Key Takeaways

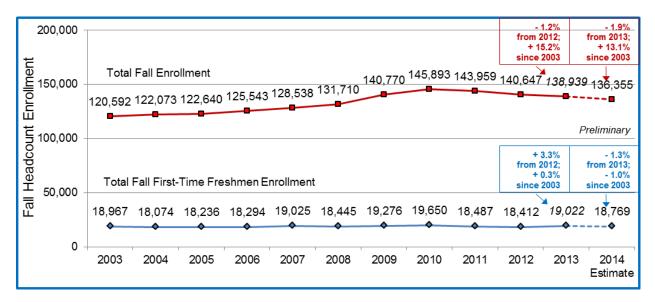

from the 2015 Nebraska Higher Education Progress Report

State Priority 1: Increase the Number of Students who Enter Postsecondary Education in Nebraska

Total Fall Enrollment and Full-Time Freshmen (FTF) Enrollment

Total fall enrollments have increased from 120,592 in 2003 to 138,939 in 2013, an increase of 15.2%. It is estimated that fall enrollment declined 1.9% between 2013 and 2014. Fall enrollments have declined each of the last four years.

Full-time freshmen enrollment – the continuing "life blood" of institutions – increased slightly from 18,967 in fall 2003 to 19,022 in fall 2013, an increase of 0.3%. Estimates indicate that FTF enrollment decreased 1.3% between fall 2013 and fall 2014.

High School Graduation Rates

Nebraska's cohort four-year graduation rate has increased from 86% in 2010–2011 to 90% in 2013–2014. While this four percentage point increase is notable, disparities between various racial/ethnic groups are still prevalent. For example, in 2013–2014 the cohort four-year graduation rate for Native Americans was 69%, compared to 93% for white non-Hispanics.

College Continuation Rates

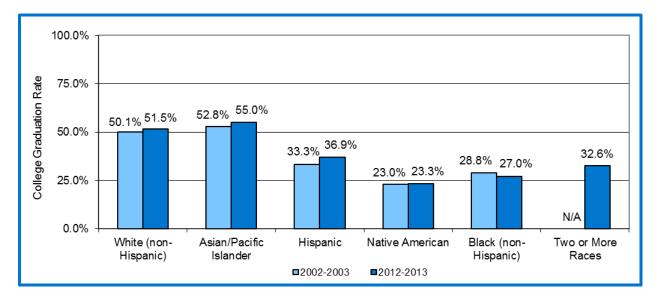

Overall, 70.8% of 2012–2013 Nebraska public high school graduates continued on to college, up from 69.0% for 2007–2008 public high school graduates.

State Priority 2: Increase the Percentage of Students who Enroll and Successfully Complete a Degree

Statewide Graduation Rate (IPEDS Data)

The overall graduation rate for full-time first-time freshmen at Nebraska's postsecondary institutions has increased slightly from 48.4% in 2002–2003 to 48.5% in 2012–2013. The state's graduation rates have varied only slightly from year to year. However, minority graduation rates continue to lag behind graduation rates for white non-Hispanics and Asian/Pacific Islanders.

State Priority 3: Reduce, Eliminate, and then Reverse the Net Out-Migration of Nebraskans with High Levels of Educational Attainment American Community Survey Migration Data

Data from the most recent American Community Survey in 2013 indicates that there was a net out-migration of working-age adults with bachelor's degrees. While it can be concluded that Nebraska exported more 22- to 64-year-olds with bachelor's degrees in 2013, the available data are inadequate to precisely determine the magnitude of this negative net migration in 2013.

Conclusion

Attainment Gap

The consequence of the disparities in high school graduation rates, college continuation rates, and college graduation rates is that Nebraska's gap in educational attainment between whites and underrepresented minorities (i.e., blacks, Hispanics, and Native Americans) is the third largest in the nation. In Nebraska, 52% of 25-to-44-year old, white non-Hispanics have completed an associate's degree or higher. In comparison, only 18% of 25-to-44-year old underrepresented minorities have completed an associate's degree or higher. Nationally, 48% of 25-to-44-year old, white non-Hispanics have completed an associate's degree or higher. In comparison, only 24% of 25-to-44-year old underrepresented minorities have completed an associate's degree or higher. In comparison, only 24% of 25-to-44-year old underrepresented minorities have completed an associate's degree or higher. In comparison, only 24% of 25-to-44-year old underrepresented minorities have completed an associate's degree or higher.

Executive Summary

This report provides the Nebraska Legislature with comparative statistics to monitor and evaluate progress toward achieving **three key priorities** for Nebraska's postsecondary education system:

- Increase the number of students who enter postsecondary education in Nebraska.
- Increase the percentage of students who persist and successfully complete a degree.
- Reduce, eliminate, and then reverse the net out-migration of Nebraskans with high levels of educational attainment.

These priorities were developed by the 2003 LR 174 Higher Education Task Force and are incorporated in Neb. Rev. Stat. § 85-1428 (3).

This summary highlights the comparative analysis used to measure and evaluate performance with respect to each priority. Throughout this analysis, the latest available statistics are compared to the quantitative baselines established in 2004 for the LR 174 Higher Education Task Force. The complete report and its appendices, which are online at www.ccpe.ne.gov, provide a detailed and fully documented analysis.

Overall Progress and Challenges Facing the State

- The research findings in the 2015 Nebraska Higher Education Progress Report reflect modest annual changes in the state's postsecondary education system.
- While the changes measured each year have been relatively small, progress through 2010 was generally in the right direction with respect to the first and second priorities recommended in 2003. However, for the past four years, enrollments have declined.
- Estimates of net-migration-priority three-do not provide sufficient evidence to conclude whether Nebraska is gaining or losing more working-age adults with college degrees.
- Even though progress toward most of the state's higher-education goals is generally in the right direction, it is not aggressive enough to meet the state's long-term needs and goals.
 - Since 2002–2003, the number of students graduating from Nebraska's high schools has increased 4.7%. The cohort four-year graduation rate has increased from 86% in 2010–2011 to 90% in 2013-2014. However, many students continue to drop out of high school before they earn diplomas, lessening their likelihood of financial and other successes and, for the purposes of this report, reducing the pool of students who could go to college.
 - The college-going rate of Nebraska public and private high school students is among the top 10 nationally (as of fall 2010), but it has not increased significantly for graduates of Nebraska's public high schools since the Commission began estimating college continuation rates in 2007–2008.
 - Overall freshmen retention rates have declined slightly since 2004 while the state's overall college graduation rates has risen only slightly since 2004. College graduation rates are significantly lower for Hispanics, blacks, Native Americans, and multiracial students than for white and Asian undergraduate students.
 - Nebraska has increased the amount of state funds allocated for need-based financial aid, but state funding has not kept pace with the number of students who are eligible for state grants. The Nebraska Opportunity Grant program has aided thousands of students, but more state-funded, need-based aid is needed to enable more of the state's low-income and moderately low-income students to go to college and earn degrees.

Priority 1

Increase the number of students who enter postsecondary education in Nebraska

Decreasing enrollments are one of the most significant trends evidenced in this report on higher education in Nebraska. Since 2010, Nebraska's total fall enrollment has decreased an estimated 6.5% to 136,355. Meanwhile, first-time freshmen (FTF) enrollment decreased to 18,769, a 4.5% decline since 2010.

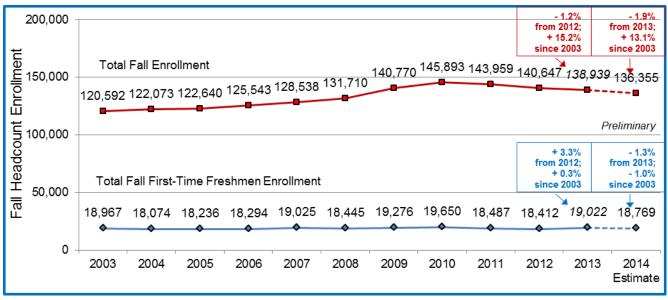

Total fall enrollments

Nebraska's total postsecondary headcount enrollment increased steadily from 120,592 in fall 2003 to a high of 145,893 in fall 2010, an increase of 21.0%. However, fall enrollment decreased to 138,939 in fall 2013, for an overall 10-year increase of 15.2%. In comparison, fall

enrollment across the United States increased 22.5% over this same period.

It is estimated that fall 2014 statewide enrollment decreased 1.9% since 2013, resulting in an 11year increase of 13.1% since baseline in fall 2003.

As shown in the charts on the next page, total fall enrollment increased across all sectors between 2003 and 2013, ranging from an increase of 6.1% at the community colleges to an increase of 39.4% at the independent institutions. However, based on preliminary estimates, 2014 fall enrollments were lower than fall 2003 enrollments at Nebraska's community colleges and for-profit/career/schools.

Fall Total Headcount Enrollment and First-Time Freshmen Enrollment: Fall 2003 – Fall 2014

Note. See Figure 1.1 (page 3) and Figure 1.14 (page 16).

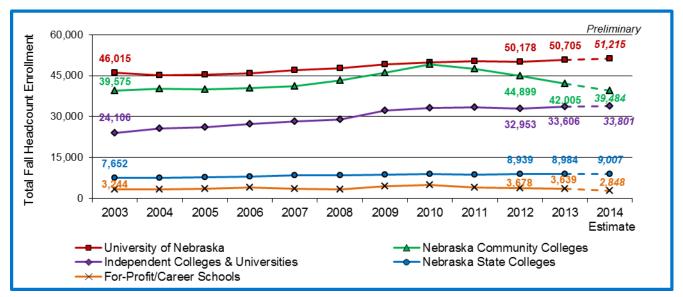

Freshmen fall enrollments

Total enrollment of first-time freshmen (FTF) at the state's postsecondary institutions increased 0.3%, from 18,967 in fall 2003 to 19,022 in fall 2013. At the same time, national FTF enrollments increased 12.8%.

It is estimated that fall 2014 statewide FTF enrollment decreased by 1.3% since 2013,

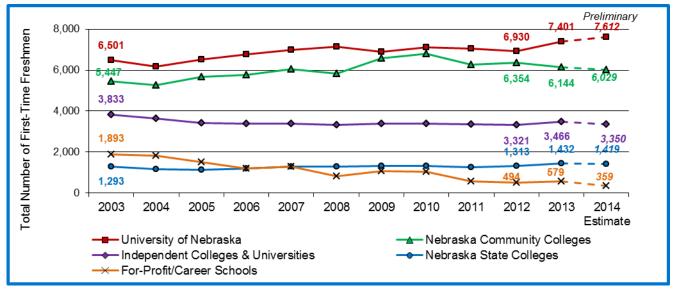

resulting in an 11-year decrease of 1.0% since baseline.

Between fall 2003 and fall 2014, FTF enrollment decreased an estimated 12.6% at the independent institutions and 81.0% at the for-profit sector. However, FTF enrollment increased 17.1% at the University of Nebraska, 9.7% at the Nebraska State College System, and 10.7% at the community colleges.

Fall Total Headcount Enrollment by Sector: Fall 2003 – Fall 2014

Note. See Figure 1.2 (page 4) and Figure 1.17 (page 19).

<u>Nebraska high schools—Nebraska's primary</u> source of college students

The number of students who graduate from Nebraska high schools is important information because more than 83% of the first-time freshmen at Nebraska's colleges and universities are graduates of Nebraska high schools.¹

Since 2002–2003, the number of students graduating annually from Nebraska high schools has increased 4.7%, from 21,972 to 23,004 in 2013–2014.

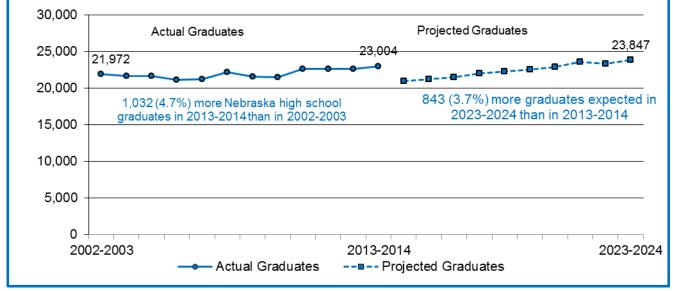

Based on the latest projections, Nebraska high schools will graduate about 843 more students in 2022–2023 than in 2013–2014, an increase of 3.7%.

Shifting high school demographics

The demographic profile of Nebraska's high school graduates is forecast to continue to change over the next decade.

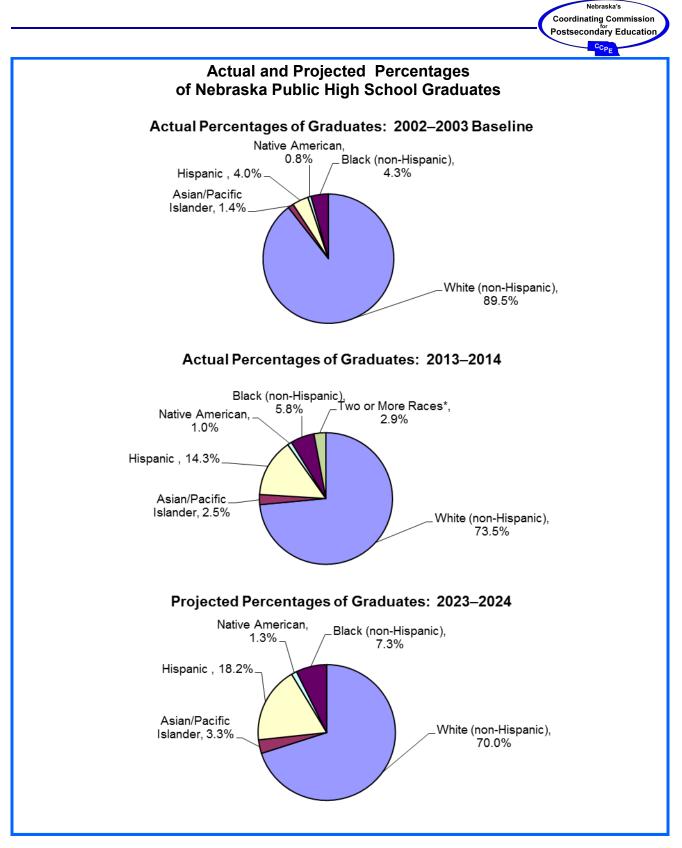

Even though Hispanic students graduate from high school at a lower *rate* than white non-Hispanics and Asians, they are projected to account for 18.2% of Nebraska's public high school graduates by 2023–2024, compared to 14.3% in 2013–2014. Additionally, other minorities are projected to account for 11.8% of Nebraska's public high school graduates by 2023 –2024, compared to 12.2% in 2013–2014.

Note. See Figure 1.1.a.1 (page 23) and Figure 1.1.a.2 (page 25).

¹This conclusion refers to the first-time freshmen who enroll in college within one year of graduating from high school. These students account for about 83% of all first-time freshmen. The remaining 17% enroll more than a year after high school graduation, and where they graduate from high school is not reported.

Note. See Figure 1.1.a.3 (page 26).

High school graduation rates

The graduation rates at Nebraska's public high schools improved for all of the major racial and ethnic groups between 2002–2003 and 2009–2010.

In 2010–2011, the cohort four-year graduation rate replaced the methodology used previously to calculate graduation rates and established a new baseline for future comparisons. Based on this new methodology, Nebraska's public high school graduation rate was 90% in 2013–2014, up from 86% three years earlier in 2010–2011. In fact, in 2012–2013 (the latest year for which national data is available), Nebraska's cohort four-year graduation rate was ranked second highest in the nation. (See Figure 1.1.a.5 on page 29.)

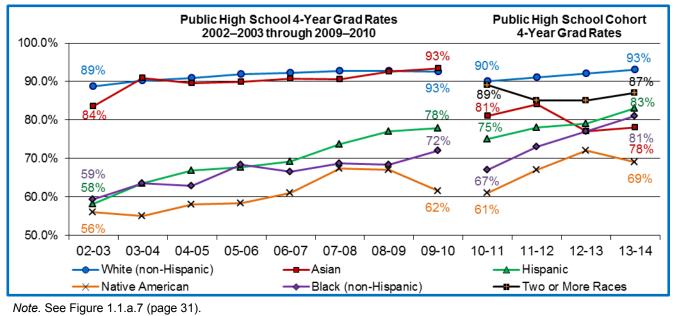

Using the new methodology, males continue to graduate at lower rates than females. In 2010–2011, the graduation rate for females was 89%, compared to 83% for males. By 2013–2014, the graduation rate for males increased to 87%, compared to 92% for their female classmates (See Figure 1.1.a.6 on page 30.)

As shown below, between 2010–2011 and 2013– 2014, cohort four-year graduation rates

decreased three percentage points for Asians and two percentage points for multi-racial individuals. During this same time, cohort fouryear graduation rates increased for all other racial/ethnic groups, ranging from a three percentage point increase for white non-Hispanics to a 14 percentage point increase for black non-Hispanics.

An important addition to the 2015 Progress Report is the reporting of cohort extended graduation rates. Extending graduation rates out to six years increases the overall public high school graduation rates by three to four percentage points. (See Figure 1.1.a.8 on page 34.)

While Nebraska's overall public high school graduation rate has been increasing, analysis of the total membership and the total number of dropouts from the 7th through 12th grades reveals that compared to their white classmates, all other racial/ethnic groups accounted for disproportionately higher percentages of the students who dropped out of school relative to the percentages of students included in fall membership counts in 2013–2014. (See Table 1.1.a.3 on page 36.) Consequently, Nebraska needs to continue to strengthen efforts to reduce and eliminate these disparities.

Nebraska Public High School Graduation Rates by Race/Ethnicity 2002–2003 through 2013–2014

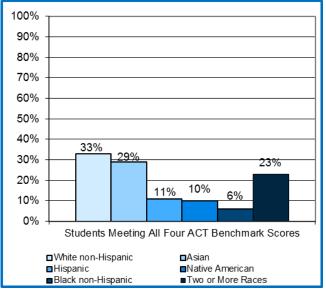

Preparation for college

The average ACT[®] composite score for Nebraska high school students was 21.7 in 2014, the same as Nebraska's average composite score in 2004 (the baseline for this report). Nebraska's 2014 ACT composite score is higher than the 2014 national average of 21.0. (See Figure 1.1.b.3 on page 41.)

Data from ACT, Inc. for the class of 2014 suggest that only 29% of Nebraska's ACT-tested high school graduates are sufficiently prepared to succeed in all four common areas of entry-level college coursework: algebra, biology, English, and social science. (See Figure 1.1.b.5 on page 44.)

Furthermore, as shown below, compared to their white non-Hispanic and Asian classmates, even lower percentages of the state's Hispanic, Native American, black non-Hispanic, and multiracial high school graduates are adequately prepared for entry-level college coursework.

Percentages of 2014 ACT-Tested Nebraska High School Students Who Met or Exceeded ACT College Readiness Scores by Race/Ethnicity

Note. See Figure 1.1.b.7 (page 46).

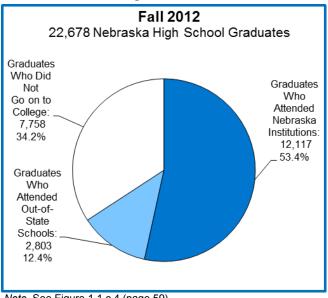

College continuation rates: using IPEDS data

The most common approach to estimating college continuation rates uses data collected every two years through the Integrated Postsecondary Education Data System (IPEDS) maintained by the National Center for Education Statistics (NCES). The advantage of this approach is that, every other year, Nebraska's college-going rate can be compared directly to the rates of other states.

The latest available national college continuation rate data shows that Nebraska ranked seventh nationally in fall 2010 with a college continuation rate of 69.5% (compared to 62.5% nationally). (See Figure 1.1.c.3 on page 57.)

For Nebraska, the latest available IPEDS data are for the high school graduation class of 2011–2012 who continued to college in fall 2012. Of the 22,678 students who graduated from high school in 2011–2012, 34.2% did not go on to college in fall 2012, while 53.4% went to college in Nebraska and 12.4% went out of state to further their education.

Percentages of 2011–2012 Nebraska High School Graduates by Whether and Where They Went to College in Fall 2012

Note. See Figure 1.1.c.4 (page 59).

Based on the latest available IPEDS data, a total of 65.8% of Nebraska's high school graduates from the class of 2011–2012 enrolled in college in fall 2012, an increase of 2.3 percentage points from the 63.5% continuation rate in 2002.

Enrollment of out-of-state and foreign students

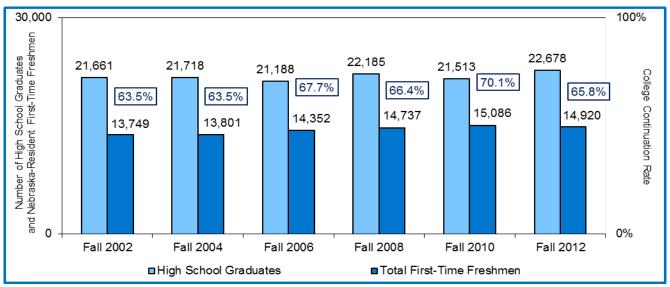

In addition to attracting a high percentage of the state's college-going high school graduates, Nebraska colleges enrolled 3,609 out-of-state and foreign first-time freshmen in fall 2012. (See Figure 1.3.1 on page 75.) Additionally, at degreegranting institutions, the state imported 184 more first-time freshmen than it exported. (See Figure 1.3.3 on pages 79-80.)

Public high school college continuation rates based on National Student Clearinghouse data

An alternative approach to calculating Nebraska's college-going rate is to annually use data obtained from the National Student Clearinghouse (NSC) in cooperation with the Nebraska Department of Education (NDE). An advantage of this approach is that college-going rates can be calculated every year and compared by student income level.

Using data files from the NDE matched with college enrollment files from the Clearinghouse, the Commission has conducted research to estimate the college-going rates of Nebraska's public high school graduates in 2007–2008, through 2012–2013.¹

As the charts on the next page illustrate, the college continuation rates for low-income graduates of Nebraska's public high schools are significantly lower than the comparable rate for graduates from non-low income households, regardless of gender. However, female public high school graduates have consistently higher college-going rates than their male classmates, and the lowest college-going rates are for male public high school graduates from low-income households.

Nebraska College Continuation Rates Based on IPEDS Data

Note. See Figure 1.1.c.2 (page 56).

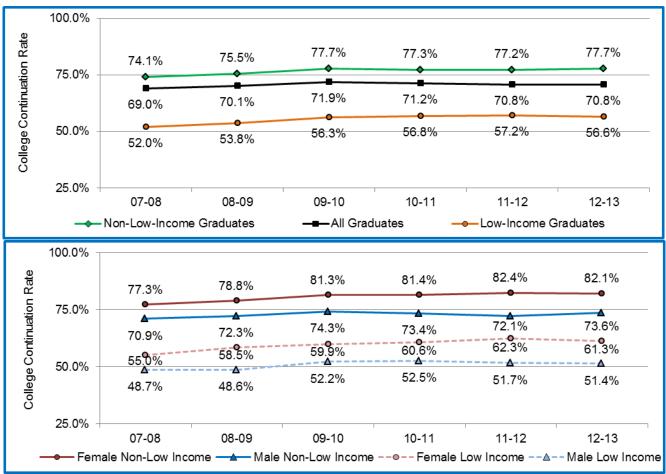

¹College continuation rates based on NSC data files are not comparable to statewide rates based on IPEDS data for two reasons. First, available NDE data files do not include graduates of Nebraska's private (non-public) high schools. Second, NSC data files include students who first enrolled in college in the winter or spring, as well as those who started college in the fall or the preceding summer. As a result, the college-going rates based on NDE and NSC data files will be higher than those calculated using IPEDS data, even though they do not include graduates of the state's private high schools. ²Low-income students are defined as students who are approved to receive free or reduced-price school lunches. Non-low-income students are students who are not approved for free or reduced-price school lunches. This group may include some low-income students who do not sign up for free or reduced-price school lunches.

National estimates of college continuation rates for high school graduates

Data from the NDE matched with the Clearinghouse shows that overall, 70.8% of 2012 –2013 Nebraska public high school graduates continued onto college. 74.9% of female graduates continued on to college, compared to 66.6% of their male classmates.

Using data from the U.S. Census Bureau's Current Population Survey, the Bureau of Labor Statistics (BLS) estimates the national college continuation rate for January-October 2013 high school graduates to be 65.9%. Mirroring a similar gender gap as is seen in Nebraska, national estimates show that females are more likely than males to continue on to college— 63.5% for males versus 68.4% for females. (See Figure 1.1.c.10 on page 66.)

College Continuation Rates for Nebraska <u>Public</u> High School Graduates Based on National Student Clearinghouse Data

Note. See Figure 1.1.c.7 (page 63) and Figure 1.1.c.9 (page 65).

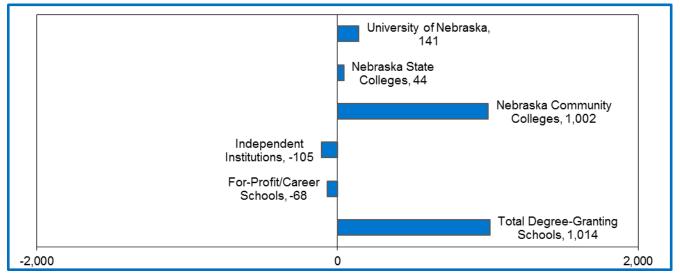

Trends in first-time freshmen enrollments

Using IPEDS data collected every other year, the Commission monitors the enrollment of first-time freshmen who are residents of Nebraska, classified by whether they start college within 12 months of high school graduation or wait to enroll in college more than 12 months after they graduate from high school. number of first-time freshmen (FTF) who enrolled at Nebraska's community colleges *within a year of high school graduation* increased by 1,002 students, or 34.3%, between fall 2002 and fall 2012.

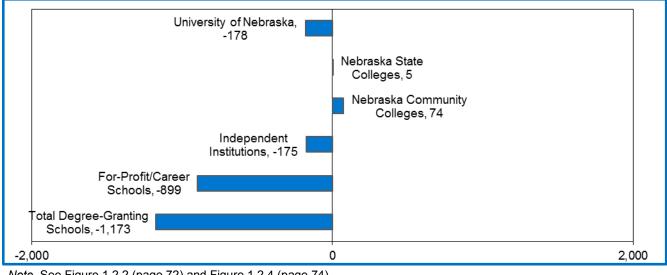

Analysis also reveals that the number of FTF who started college *more than a year after high school graduation* decreased between fall 2002 and fall 2012 within all sectors, except Nebraska state colleges and the community colleges.

The Commission's latest analysis reveals that the state colleges and the community colleges.

Changes in the Numbers of Nebraska-Resident, First-Time Freshmen Enrolled at Nebraska Degree-Granting Institutions <u>within 12 Months</u> of High School Graduation Fall 2012 Compared to Fall 2002

Changes in the Numbers of Nebraska-Resident, First-Time Freshmen Enrolled at Nebraska Degree-Granting Institutions <u>More than 12 Months After</u> High School Graduation Fall 2012 Compared to Fall 2002

Note. See Figure 1.2.2 (page 72) and Figure 1.2.4 (page 74).

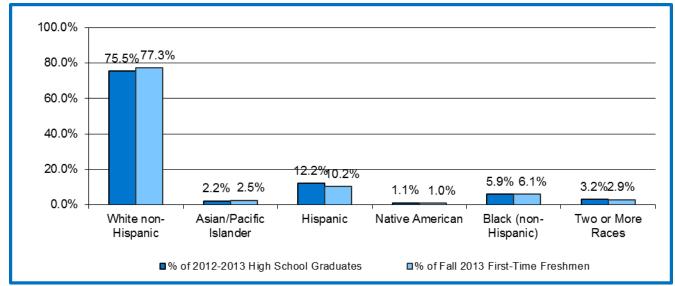

First-time freshmen enrollments by race/ethnicity

Based on IPEDS data collected annually, higher numbers of Asian/Pacific Islanders, Hispanics, Native Americans and black non-Hispanics were enrolled at Nebraska institutions in fall 2013 than in fall 2003. Over the same period, there was a predictable decrease in the number of white first-time freshmen, given the decrease in the number of white non-Hispanics graduated from Nebraska's high schools in 2012–2013 compared to 2002–2003. (See Figure 1.4.1 and Figure 1.4.2 on page 82.)

As previously discussed, disproportionately lower percentages of Asians/Pacific Islanders, Hispanics, Native Americans, and black non-Hispanics graduate from Nebraska high schools compared to white non-Hispanic students and students of two or more races.

However, as shown in the chart below, *minority* students <u>who graduate from high school</u> generally tend to be represented among first-time college freshmen in Nebraska to about the same relative degree as white-non Hispanics, except for Hispanics, Native Americans, and multiracial students who were slightly underrepresented among FTF in fall 2013.

There were 2,068 more minority students attending Nebraska colleges as first-time freshmen in fall 2013 than in fall 2003, an increase of 103.1%. In comparison, there were 1,954 fewer white non-Hispanic first-time freshmen in fall 2013 than in fall 2003, a decrease of 12.4%.

Note. See Figure 1.4.3 (page 83).

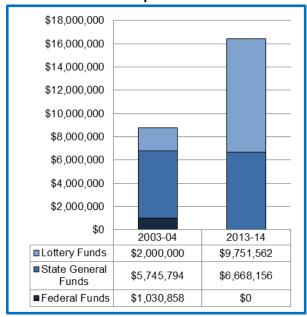

The importance of state-funded financial aid

Since 2003, Nebraska has made progress toward the goal of improving access to higher education by increasing the amount of state funds allocated for need-based financial aid. However, additional financial aid is needed to enable more of Nebraska's low-income and moderately low-income students to go to college, stay enrolled and complete degrees.

Nebraska currently provides need-based financial aid to college students through the Nebraska Opportunity Grant Program, originally authorized as the Nebraska State Grant Program by the Nebraska Scholarship Act, which was passed by the Legislature in 2003.

Including state lottery and federal funds, total dollars available for the state grant program increased from \$8,776,652 in 2003–2004 to \$16,419,718 in 2013–2014.

Available Funding for Nebraska's State Grant Program 2013–2014 Compared to 2003–2004

Note. See Figure 1.5.1 (page 90).

As a result of increased funding, the number of low-income students served by the state grant program increased 22.4%, from 13,031 in 2003–

2004 to 15,944 in 2013–2014, and the average award increased from \$670 to \$1,030. (See Figure 1.5.2 on page 91.)

The success of the ACE Scholarship Program

The state-funded Access College Early (ACE) Scholarship Program, which was initiated in 2007–2008, enables eligible low-income students to take college courses while they are still enrolled in high school.

Using state and federal funds, the amount awarded in ACE scholarships increased from \$114,856 in 2007–2008 to \$921,071 in 2013– 2014. For 2014–2015, \$953,890 is available for ACE scholarships.

In 2007–2008, 294 Nebraska high school students took 1,698 credit hours of college coursework as a result of their ACE scholarships. With increased funding, 1,866 low-income Nebraska high school students were able to take 13,592 credit hours of college coursework in 2013–2014. (See Figure 1.5.6 on page 101.)

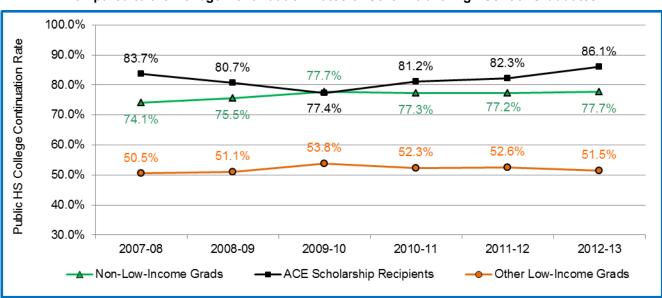

Research on the college continuation rates of ACE Scholarship recipients

The number of students who received ACE scholarships when they were seniors at Nebraska <u>public</u> high schools increased from 215 in 2007–2008 to 951 in 2012–2013.

As illustrated in the chart on the following page, the college continuation rates of ACE scholarship recipients are significantly higher than the college -going rates of other low-income public high school graduates.

Since inception, the college-going rates of ACE scholarship recipients also have been higher than, or about equal to, the college-going rates of non-low-income graduates of the state's public high schools. In effect, the ACE scholarship program has enabled low-income public high school graduates to continue on to college at the same or higher rates as their non-low-income classmates.

College Continuation Rates for ACE Scholarship Recipients Compared to the College Continuation Rates of Other Public High School Graduates

Note. See Figure 1.5.11 (page 107).

The ACE Plus Scholarship

The ACE Plus Scholarship Program was initiated in 2011–2012 to provide assistance to first- and second-year college students who were ACE scholarship recipients prior to graduating from high school. Initially funded with \$223,000 of a federal College Access Challenge Grant, ACE Plus scholarships were awarded to 317 eligible students in 2011–2012.

With \$283,000 in funding, 377 eligible students were awarded ACE Plus scholarships 2014–2015 to help them with their college expenses

during their first or second year of college. Of the 377 students who received ACE Plus scholarships for their second year of college, nearly 80% had 3.0 or higher grade-point averages (GPAs) after their first year of college, and about 51% had first-year GPAs of 3.5 or higher. (See Figure 1.5.14 and Figure 1.5.16 on pages 112 and 113.)

The ACE Plus budget for 2015–2016 is \$237,500. No federal funding is available for the ACE Plus program in 2016–2017. (See Figure 1.5.13 on page 111.)

Priority 2 Increase the percentage of students who enroll and successfully complete a degree

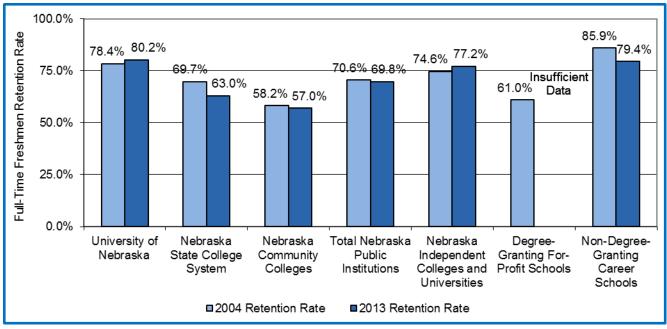

Success is measured not only by the number of freshmen who enroll in college, but by those who stay in college beyond their freshmen year and earn degrees or other awards.

Based on IPEDS data that are collected annually, freshmen retention rates and graduation rates are not improving across all sectors of higher education in Nebraska. Analyses of IPEDS data also show that there are continuing racial/ethnic disparities in graduation rates.¹

Analysis of records at the National Student Clearinghouse provides evidence that notable percentages of students who start college at Nebraska's public and independent institutions transfer to other schools where they persist in their studies and earn degrees or certificates. This study also reveals that students who attend college part time are far less likely to complete their degree or certificate program than students who attend college full time.

Freshmen retention rates

As shown in the chart below, full-time freshmen retention rates for the Nebraska State College System, Nebraska's community colleges, and the non-degree-granting career schools were lower in fall 2013 than they were in fall 2004. For the remaining sectors, full-time retention rates were higher in fall 2013 than they were in fall 2004 or

Full-Time Freshmen Retention Rates of Nebraska Postsecondary Institutions by Sector Fall 2013 Compared to Fall 2004 Baseline

Note. See Figure 2.1.1 (page 119).

¹The freshmen retention rate is the number of freshmen who are enrolled at the same college one year later. The IPEDS definition of a college graduation rate is the percentage of full-time, first-time freshmen who complete their degree programs at the same college within 150% of the time specified for the programs. For example, the specified time frame for four-year programs is six years, while the time frame for two-year programs is three years.

data are not sufficient to compute a sector retention rate for fall 2013.

Retention rates for full-time students in fall 2013 varied between the sectors, ranging from 57.0% at the community colleges to 80.2% at the University of Nebraska.

The non-degree granting career schools and the independent colleges and universities also had relatively high fall 2013 retention rates of 79.4% and 77.2%, respectively.

Full-time and part-time retention rates compared

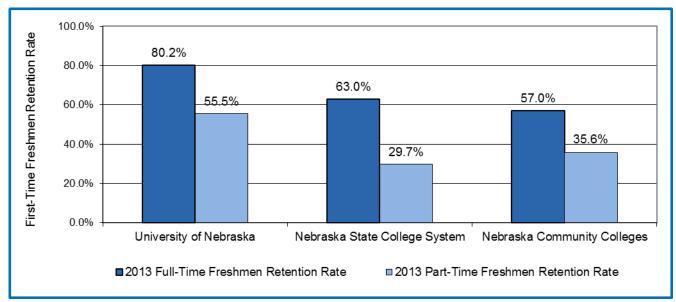

A statewide retention rate for part-time, first-time freshmen cannot be calculated due to insufficient data from some institutions. However, the freshmen retention rates for full-time and parttime students at the state's public institutions can be compared as shown in the chart below. This comparison clearly indicates that students who

start college full time are much more likely than part-time students to continue going to college beyond their freshmen year. Conversely, freshmen who attend college only part time are less likely to continue their studies and, therefore, are less likely to earn degrees.

Nebraska's Coordinating Commission Postsecondary Education

Nebraska freshmen retention rates compared to those of other states

Nebraska's retention rates for 2013 are generally lower than corresponding national rates. For fouryear public institutions, Nebraska's full-time retention rate was 77.3% and its part-time retention rate was 51.7% (compared to 79.9% and 50.2% nationally). For two-year public institutions, Nebraska's full-time retention rate was 57.3% and its part-time rate was 35.5% (compared to 59.3% and 42.9% nationally). (See Figure 2.1.5, Figure 2.1.6, Figure 2.1.9 and Figure 2.1.10 on pages 124 and 128.)

Fall 2013 Full-Time and Part-Time Freshmen Retention Rates for Students in Nebraska's Public Colleges and Universities

Note. See Figure 2.1.1 (page 119) and Figure 2.1.2 (page 120).

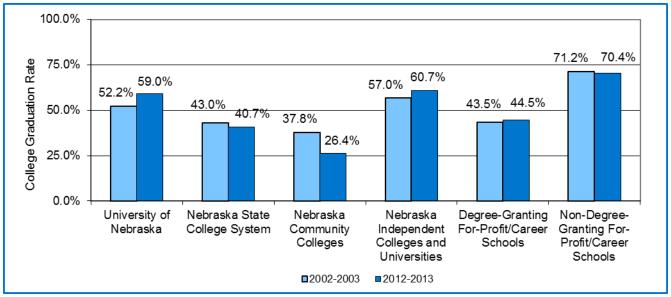

College graduation rates based on IPEDS data

Graduation rates based on IPEDS data can be calculated only for <u>full-time students</u> who graduate from the <u>same college where they</u> <u>started as first-time freshmen</u>.¹ Because transfer students are not counted among the graduates of any reporting institution, IPEDS graduation rates underestimate the percentage of full-time, firsttime freshmen who complete degree, certificate or diploma programs. In addition, IPEDS graduation rates cannot be calculated for any students who initially attend college part time.

Based on IPEDS data, the statewide graduation rate for Nebraska institutions increased from 48.4% in 2002–2003 to 48.5% in 2012–2013, the latest year for which data are available. (See Figure 2.2.1 on page 129.)

In 2012–2013, the highest graduation rate among the six sectors of higher education in Nebraska was 70.4%, which was the rate for the nondegree-granting, for-profit schools. The next highest rates were 60.7% for the independent institutions and 59.0% for the University of Nebraska.

Graduation Rates for Nebraska Postsecondary Institutions by Sector 2012–2013 Compared to 2002–2003

Note. See Figure 2.2.2 (page 130).

¹The college graduation rate is the percentage of full-time, first-time freshmen who complete their degree programs at the same college within 150% of the time specified for the programs. For example, the specified time frame for four-year programs is six years, while the time frame for two-year programs is three years.

Racial/ethnic disparities in graduation rates

Minorities—who account for most of Nebraska's projected population growth—currently graduate from the state's high schools at lower rates than do white non-Hispanics.

Minority students who graduate from high school generally tend to be represented among first-time college freshmen at Nebraska institutions to about the same degree as they are represented among Nebraska's high school graduating classes. However, black non-Hispanics, Hispanics, Native Americans, and multiracial students have significantly lower college *graduation* rates than whites and Asian/Pacific Islanders who complete degree programs at Nebraska colleges and universities.

Between 2002–2003 and 2012–2013, graduation rates for all racial/ethnic groups increased at the University of Nebraska. (See Figure 2.2.4 on page 133.)

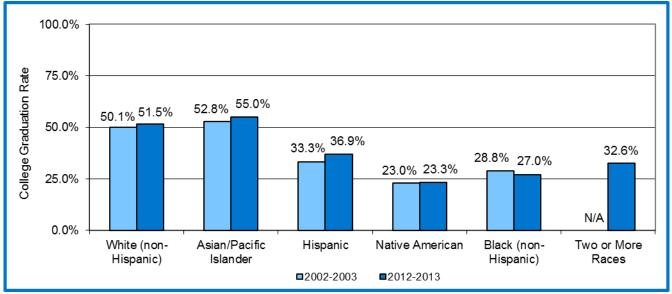

Conversely, graduation rates for the Nebraska State College System decreased or remained about the same for all racial/ethnic groups. (See Figure 2.2.5 on page 134.) Meanwhile, rates at the state's community colleges decreased for all racial/ethnic groups except for Hispanics. This is possibly due, at least in part, to the increasing number of students who have enrolled in academic transfer programs and transfer before they graduate from the community colleges. (See Figure 2.2.6 on page 134.)

Nebraska's Coordinating Commission Postsecondary Education

Graduation rates increased for white non-Hispanics and Asian/Pacific Islanders within the independent sector (see Figure 2.2.7 on page 135) and the sectors consisting of degreegranting (see Figure 2.2.8 on page 135) and nondegree-granting for-profit career schools (see Figure 2.2.9 on page 136). Within each of these three sectors, rates also decreased for black non-Hispanics, but were varied for Hispanics and Native Americans.

Nebraska graduation rates compared to those of other states

Nebraska's 2012—2013 graduation rate for fouryear institutions was 57.0%, compared to 55.2% nationally. For two-year institutions, Nebraska's graduation rate was 28.2%, slightly lower than the national rate of 29.4%. (See Figure 2.2.16 and Figure 2.2.17 on pages 141 and 142.)

Graduation Rates for Nebraska Postsecondary Institutions by Race/Ethnicity 2012–2013 Compared to 2002–2003

Note. See Figure 2.2.2 (page 132).

Graduation and persistence rates based on National Student Clearinghouse data

The National Student Clearinghouse Research Center recently conducted a study of six-year student outcomes based on a national cohort of degree-seeking, first-time freshmen who started college in fall 2007, analyzed by state as well as for the United States as a whole. This report is available at http://nscresearchcenter.org/ signaturereport6-statesupplement/.

For this research, students were classified by the state of the institution where they first started college and by type of institution. Based on Clearinghouse enrollment and completion records, comparable six-year completion and persistence rates were calculated for the students who started college at (a) two-year public colleges, (b) four-year public colleges and universities, and (c) four-year private nonprofit institutions.¹

In addition, completion and persistence rates were calculated for exclusively full-time students, exclusively part-time students, mixed enrollment students with combinations of full- and part-time enrollment, students who started college when they were 20 years of age or younger, students who started college when they were 21 to 24 years of age, and students who were 25 or older when they first enrolled in college.

The completion and persistence rates that the Clearinghouse calculated for Nebraska were sometimes higher and sometimes lower than the comparable national rates, depending on the type of institution and the student enrollment or age group that was analyzed.

More importantly, the findings of the study confirm that college completion and persistence rates vary significantly by student enrollment status and age group, as well as by the type of institution where students first enroll. The findings of the Clearinghouse study are evidence that students who enroll initially at fouryear institutions—public or private nonprofit—are more likely to earn degrees or certificates, or at least persist in their studies, than students who start college at two-year institutions, regardless of whether they enroll full or part time.

However, students who are able to attend college full time—exclusively or at least sometime during the course of their studies—are much more likely to earn degrees or certificates and less likely to drop out of college than students who go to college only part time.

The findings of the Clearinghouse study also are evidence that students who start college when they are age 20 or younger are more likely to persist in their studies and complete degree or certificate programs than students who don't start college until they are over the age of 20. This is not surprising since non-traditional students often have family and work responsibilities that may be equally or more important than finishing college.

The completion rates calculated by the Clearinghouse also confirm that a notable percentage of freshmen start college at one institution and then transfer to another where they complete a program of study. Specifically, 15% to 19% of the degree-seeking, first-time students at Nebraska's public and private nonprofit institutions in fall 2007 graduated from two-year or four-year schools to which they had transferred. (See Figure 2.3.3 on page 148.)

Another finding of interest is that 16.2% of the students who initially enrolled at Nebraska's twoyear public colleges in fall 2007 graduated from four-year institutions over the course of the next six years. (See Table A12.2.b on page 341.)

¹Completion rates and graduation rates are synonymous terms. In general, a completion or graduation rate is the percentage of students in a specified cohort who earn degrees, certificates, or diplomas within a specified period of time. A persistence rate is the percentage of the students in a cohort who have not earned degrees or other academic awards but who are still enrolled in college at the end of a specified period of time.

Priority 3

Reduce, eliminate, and then reverse the net out-migration of Nebraskans with high levels of educational attainment

Data from the 2000 U.S. Census revealed that Nebraska experienced a net out-migration of college-educated adults at all levels of education beyond high school between 1995 and 2000. During the same period, Nebraska attracted a significant net in-migration of adults with less than a high school education.

Beginning in 2005, the U.S. Census Bureau started collecting data annually through the American Community Survey (ACS) to estimate net migration by education level for each state. Since the resulting annual ACS estimates for Nebraska are based on very small samples of the people who move in or out of the state, these estimates vary dramatically from one year to the next.

Combining the latest three years of ACS data increases sample sizes and reduces the margins of error associated with the corresponding estimates of average annual net migration. Still, these estimates do not provide policy makers with a clear, complete picture of the migration patterns of adults who are moving to or from Nebraska.

Based on ACS data collected from 2005 to 2011, Nebraska seems to attract more working-age adults with less than a high school diploma than have left the state. However, ACS data are inadequate to determine the exact magnitude of this important migration trend.

Between 2007 and 2011, Nebraska also may have experienced a net in-migration of workingage adults with high school diplomas, or some college but no degrees, or associate's or bachelor's degrees, but the evidence is inconclusive, and the migration estimates are unstable from year to year. Data from the most recent ACS in 2013 indicates that there was a net out-migration of working-age adults with bachelor's degrees. While it can be concluded that Nebraska exported more 22- to 64-year-olds with bachelor's degrees in 2013, the available data are inadequate to precisely determine the magnitude of this negative net migration in 2013. (See Figure 3.2 on page 161.)

Furthermore, there is no solid evidence that Nebraska is gaining or losing more working-age adults with less than high school diplomas, high school diplomas, associate degrees, or graduate or professional degrees than it has in the past.

Although data currently available from the U.S. Census Bureau do not reveal a clear picture of Nebraska migration patterns, there is still reason to be concerned about the possible effects of migration on the size and quality of the state's labor force. Consequently, the Commission will continue to monitor the available estimates of net migration by education level in an effort to determine if a clear, overall picture of Nebraska's net migration pattern eventually emerges from the analysis of data from the U.S. Census Bureau.

Conclusion

Attainment Gap

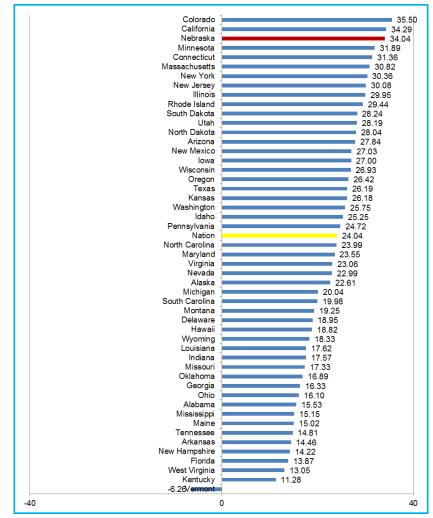

The consequence of the disparities in high school graduation rates, college continuation rates, and college graduation rates is that Nebraska's gap in educational attainment between whites and underrepresented minorities (i.e., blacks, Hispanics, and Native Americans) is the third largest in the nation.

In Nebraska, 52.26% of 25-to-44-year old, white non-Hispanics have completed an associate's

degree or higher. In comparison, only 18.22% of 25-to-44-year old underrepresented minorities have completed an associate's degree or higher.

Nationally, 48.02% of 25-to-44-year old, white non-Hispanics have completed an associate's degree or higher. In comparison, only 23.97% of 25-to-44-year old underrepresented minorities have completed an associate's degree or higher.

Estimated Difference in College Attainment Between Whites and Minorities (Blacks, Hispanics, Native Americans) of 25-to-44-Year Olds by State Based on the 2011–2013 American Community Survey (ACS)

Data source: Estimates based on the 2011, 2012, and 2013 American Community Surveys, conducted by the U.S. Census Bureau, obtained from the National Center for Higher Education Management Systems (NCHEMS).

The findings evidenced in this report indicate that more work needs to be done in order for Nebraskans to enroll in college and successfully complete degrees.

At the High School Level:

- Increase the percentage of students who stay in school and earn diplomas. Nebraska's 2012-2013 public high school graduation rate is one of the best in the nation (88.5%), and Nebraska's 2013-2014 graduation rate was even higher (90%), but disparities continue to be seen. While 92% of females graduate, only 87% of males earn diplomas. Disparities are even more pronounced between racial/ethnic groups with only 69% (Native American) to 87% (two or more races) of minorities earning diplomas.
- Increase the percentage of students who are prepared academically for college and who take dual enrollment courses. According to ACT, only 29% Nebraska's ACT-tested high school graduates are sufficiently prepared to succeed in college.
- For males, minorities, and low-income students especially, more effort needs to be exerted to increase:
 - The percent who are prepared for college academically
 - The number who take dual enrollment courses
 - High school graduation rates
 - College-going rates

At the Postsecondary Level:

 Increase the percentage of high school graduates who go on to college, encouraging as many as possible to enroll full-time and not delay enrollment. About 70.8% of Nebraska public high school graduates go on to college, but National Student Clearinghouse research shows that those who attend school full-time are much more likely to earn degrees than those who attend part-time.

- Increase awareness of the range of higher education opportunities, especially at the community colleges.
- Reach out to adults with college credit but no earned certificates or degrees.
- Increase efforts to improve retention and persistence rates. Full-time retention rates vary by sector, ranging from 57.0% at the community colleges to 80.2% at the University of Nebraska.
- Increase efforts to improve graduation rates for all students across all sectors of higher education in Nebraska, especially at the community colleges and for minority students at all institutions. Using IPEDS data, the statewide graduation rate for full-time firsttime freshmen at Nebraska's institutions was 48.5%, but only 26.4% at the community colleges. While graduation rates are generally increasing for minority students, they continue to lag behind their white non-Hispanic and Asian classmates.

At the State Government Level:

- Continue to support and increase funding for the Nebraska Opportunity Grant program and the ACE program.
- Develop and build support for clear completion targets for Nebraska's publicfunded colleges and universities.
- Initiate incentives for the state's public-funded colleges and universities to improve graduation rates and increase the number of degrees and certificates awarded.

2015 Nebraska Higher Education Progress Report

Introduction

The 2015 Nebraska Higher Education Progress Report is the tenth annual report designed to provide the Nebraska Legislature with comparative statistics to monitor and evaluate progress toward achieving three major goals for Nebraska's postsecondary education system. Developed by the LR 174 Higher Education Task Force in 2003, these key priorities are incorporated in <u>subdivision (3)</u> of LB 962, now Neb. Rev. Stat. § 85-1428 (2008), which states: The Legislature finds that:

- (1) Expansion and diversification of Nebraska's economy are necessary in order to sustain essential public services sponsored or aided by the state;
- (2) Increasing the number of Nebraskans with high levels of educational attainment is essential to support economic expansion and diversification;
- (3) In order to increase the number of Nebraskans with high levels of educational attainment, the state's postsecondary education system shall include, but not be limited to, the following key priorities that were identified by the LR 174 Task Force of 2003:
 - (a) Increasing the number of students who enter postsecondary education in Nebraska;
 - (b) Increasing the percentage of students who enroll, persist, and successfully complete a degree; and
 - (c) Reducing, eliminating, and then reversing the net out-migration of Nebraskans with high levels of educational attainment; and
- (4) Unprecedented collaboration and cooperation between and among educational institutions and sectors will be necessary to develop community, regional, and statewide strategies to achieve progress toward these priorities and to assist the state in serving Nebraska students and allowing them to reach their academic caliber.¹

The 2015 Nebraska Higher Education Progress Report provides legislators and other state policy makers with a detailed comparative analysis to monitor progress toward the three key priorities listed above. Throughout this report, the most recently available statistics are compared to the quantitative baselines established in the 2004 Baseline Report for the LR 174 Higher Education Task Force or the 2005 Nebraska Higher Education Progress Report for the LR Legislative Evaluation Task Force. These comparisons evidence the extent to which Nebraska's postsecondary education system is making progress toward achieving the key priorities and corresponding strategic objectives recommended by the LR 174 Task Force.

¹ Neb. Rev. Stat. § 85-1429 requires the Coordinating Commission for Postsecondary Education to provide, on or before March 15 of each year, a report that evaluates progress toward the achievement of the priorities listed in § 85-1428. The statute requires the Education Committee of the Legislature to review the report at a public hearing and report its findings to the Legislature.

Nebraska's postsecondary education system consists of five sectors of higher education—the University of Nebraska; the Nebraska State College System; Nebraska's community colleges; the independent (non-profit) colleges and universities; and the forprofit/career schools. This report covers all five sectors and also includes important information about Nebraska high schools, which are a primary source of students for Nebraska's postsecondary institutions.

Prior to this report, Nebraska's Coordinating Commission for Postsecondary Education produced the 2004 Baseline Report for the LR 174 Higher Education Task Force, the 2005 Nebraska Higher Education Progress Report for the LR 75 Legislative Evaluation Task Force and the Nebraska Higher Education Progress Report in 2007, 2008, 2009, 2010, 2011, 2012, 2013, and 2014.² Copies of all previous progress reports are available on the Coordinating Commission's Website: www.ccpe.ne.gov. However, due to data corrections and additions to the Commission's database that have been made since the 2014 report was published, **the 2015 Progress Report supersedes all previous editions**.

The 2015 Progress Report provides an update of every section of the 2013 report—from an analysis of the pool of Nebraska high school graduates preparing for college to the migration of educated Nebraskans to and from the state—provided that updated information is available to report.

In updating this report, the Coordinating Commission always uses the latest data available for analysis. However, for several of the analyses for this report, the Commission has to rely primarily on data collected through the Integrated Postsecondary Education Data System (IPEDS), which is maintained by the National Center for Education Statistics (NCES) in the U.S. Department of Education. Data obtained from the NCES are usually not available for six to nine months after they have been collected through IPEDS, and some data are collected only every other year. Consequently, the latest data available for analysis may not be the most current data.

 $^{^2}$ The first two reports were submitted in December 2004 and December 2005, respectively. Since the deadline for submission of the third report—the first required by LB 962—was set for March 15, rather than December of the preceding year, it is labeled as the 2007 report, and there is no report labeled for 2006.

Section 1 Increasing Postsecondary Enrollment

Priority 1. Increasing the number of students who enter postsecondary education in Nebraska.

The first priority recommended by the 2003 LR 174 Task Force is to increase the number of students who enter postsecondary education in Nebraska. To generally monitor progress toward achieving this goal, this section compares the latest available total student unduplicated headcounts and enrollments of first-time freshmen to fall 2003 baselines within the context of 11-year trends.

The National Center for Education Statistics (NCES) in the U.S. Department of Education is the official source of the enrollment data summarized for fall 2003 through fall 2013. Enrollments for fall 2014 are preliminary, based on estimates that institutions reported directly to the Coordinating Commission for Postsecondary Education.

Nebraska Total Fall Headcount Enrollment

- Total headcount—the count of all students taking courses for credit—at Nebraska's public, independent and for-profit postsecondary institutions increased steadily from 120,592 in fall 2003, which is the baseline for this report, to 145,893 in fall 2010. However, total enrollment decreased 4.8% between fall 2010 and fall 2013, and based on reported estimates, decreased another 1.9% between fall 2013 and fall 2014. As a result, total headcount enrollment increased from 120,592 in fall 2003 to an estimated136,355 in fall 2014, for an 11-year increase of 13.1%, as shown in Figure 1.1.
- Fall enrollment at all IPEDS-reporting institutions in the United States increased 22.5% between fall 2003 and fall 2013. Fall enrollment at Nebraska's postsecondary institutions increased 15.2% during this same period. (Estimated fall enrollments are no longer collected through IPEDS; therefore, fall 2013 enrollments are the latest available data.)

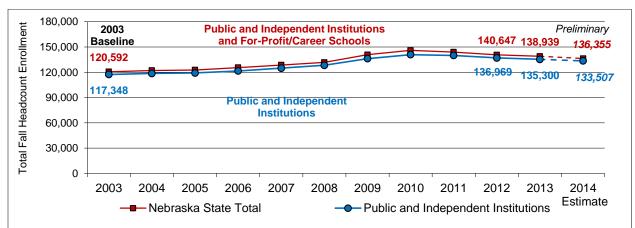

Figure 1.1

Total Fall Headcount Enrollment at Nebraska Postsecondary Institutions Fall 2003–Fall 2014

Note. See <u>Table A1.1</u> and <u>Table A1.2</u> in <u>Appendix 1</u> for supporting data. Data sources: For 2003–2013 data, National Center for Education Statistics (NCES), Integrated Postsecondary Education Data System (IPEDS), with minor data adjustments as needed for improved data accuracy. Preliminary enrollments for fall 2014 were collected from each institution by the Coordinating Commission for Postsecondary Education, January 2015.

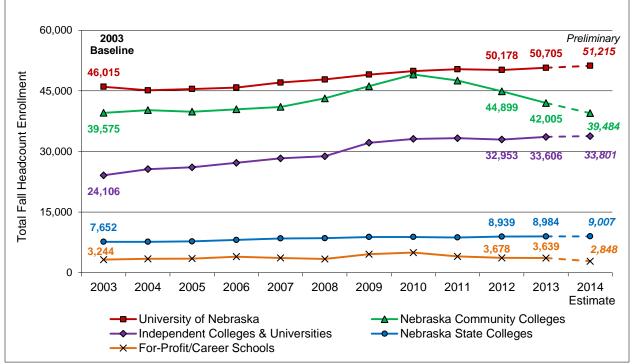

Nebraska Total Fall Headcount Enrollment by Sector

- The University of Nebraska continues to lead the state's higher education system in terms of fall headcount enrollment. As shown in <u>Figure 1.2</u>, Nebraska's state colleges, community colleges, independent (not-for-profit) institutions and for-profit/career schools have also contributed positively to the state's increased enrollment since 2003. However, based on fall 2013 enrollments and preliminary data for fall 2014, noticeable decreases in enrollment occurred within the community college and for-profit sectors between 2010 and 2014.
- By sector, Nebraska's postsecondary enrollment has changed as follows:

| Sector | 1-Year Change <u>2012 to 2013</u> | Est. 1-Year Change <u>2013 to 2014</u> | 10-Year Change <u>2003 to 2013</u> | Est. 11-Year Change <u>2003 to 2014</u> |
|-------------------------------------|---|--|--|---|
| University of Nebraska | 1.1% | 1.0% | 10.2% | 11.3% |

Figure 1.2

Fall Headcount Enrollment at Nebraska Postsecondary Institutions by Sector Fall 2003–Fall 2014

Note. See <u>Table A1.2</u> in <u>Appendix 1</u> for supporting data. Data sources: For 2003–2013 data, National Center for Education Statistics (NCES), Integrated Postsecondary Education Data System (IPEDS), with minor data adjustments as needed for improved data accuracy. Preliminary enrollments for fall 2014 were collected from each institution by the Coordinating Commission for Postsecondary Education, January 2015.

Nebraska Public Colleges and Universities: Fall Enrollment by Institution

Within all sectors, changes in enrollment vary from one institution to another. The charts in this section show the 11-year enrollment trends of the institutions in each public sector from 2003 through 2013, plus the estimated enrollment for 2014. Within this context, fall 2003 baseline enrollments are shown in comparison to the estimated total enrollments for fall 2014.

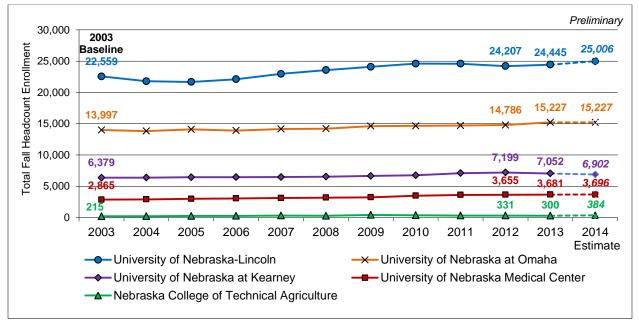

University of Nebraska

- From fall 2003 to fall 2014, fall enrollment increased an estimated 11.3% at the University of Nebraska. All institutions experienced modest increases during this 11-year period, with the largest increase seen at the Nebraska College of Technical Agriculture (78.6%).
- Following are the most recent one-year changes in enrollment, as well as the total changes in enrollment between fall 2003 and fall 2014, at the institutions constituting the University of Nebraska:

| Sector | 1-Year Change <u>2012 to 2013</u> | Est. 1-Year Change <u>2013 to 2014</u> | 10-Year Change <u>2003 to 2013</u> | Est. 11-Year Change <u>2003 to 2014</u> |
|---------------------------------------|---|--|--|---|
| Neb. College of Technical Agriculture | -9.4% | 28.0% | 39.5% | 78.6% |
| University of Nebraska at Kearney | -2.0% | -2.1% | 10.6% | 8.2% |
| University of Nebraska-Lincoln | 1.0% | 2.3% | 8.4% | 10.8% |
| University of Nebraska Medical Center | 0.7% | 0.4% | 28.5% | 29.0% |
| University of Nebraska at Omaha | 3.0% | 0.0% | 8.8% | 8.8% |

Fall Headcount Enrollment at the University of Nebraska by Institution Fall 2003–Fall 2014

Note. See <u>Table A1.2</u> in <u>Appendix 1</u> for supporting data. Data sources: For 2003–2013 data, National Center for Education Statistics (NCES), Integrated Postsecondary Education Data System (IPEDS), with minor data adjustments as needed for improved data accuracy. Preliminary enrollments for fall 2014 were collected from each institution by the Coordinating Commission for Postsecondary Education, January 2015.

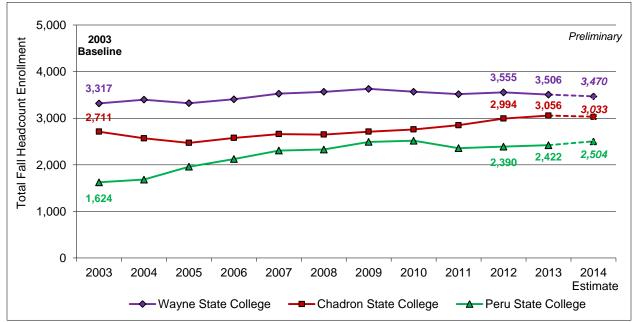

Nebraska State College System

- From fall 2003 to fall 2014, fall enrollment increased an estimated 17.7% within the Nebraska State College System. All institutions experienced increases during this 11-year period, ranging from 4.6% at Wayne State College to 54.2% at Peru State College.
- Meanwhile, total fall enrollment at Chadron State College increased a total of 11.9% from fall 2003 to fall 2014.
- Following are the most recent one-year changes in enrollment, as well as the total changes in enrollment between fall 2003 and fall 2014, at the institutions constituting the Nebraska State College System:

| | 1-Year Change | Est. 1-Year Change | 10-Year Change | Est. 11-Year Change |
|-----------------------|------------------|-----------------------|-------------------|------------------------|
| Sector | 2012 to 2013 | 2013 to 2014 | 2003 to 2013 | 2003 to 2014 |
| Chadron State College | 2.1% | -0.8% | 12.7% | 11.9% |
| Peru State College | 1.3% | 3.4% | 49.1% | 54.2% |
| Wayne State College | -1.4% | -1.0% | 5.7% | 4.6% |

Fall Headcount Enrollment at Nebraska State College System by Institution Fall 2003–Fall 2014

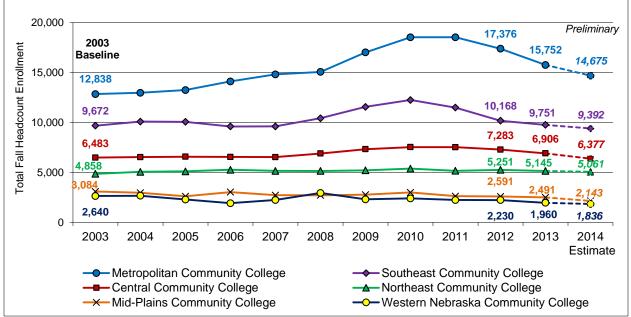

Nebraska Community Colleges

- From fall 2003 to fall 2014, total fall enrollment decreased an estimated 0.2% at the community colleges. Both Western Nebraska Community College and Mid-Plains Community College experienced 30.5% decreases during this time. At Central Community College, fall enrollment decreased 1.6% during this 11-year period.
- Meanwhile, total fall enrollment at Northeast increased a total of 4.2% from fall 2003 to fall 2014 while fall enrollment at Metro increased 14.3%.
- Notably, all of the community colleges reported declines in fall enrollment between 2012 and 2013, and estimates for 2014 indicate that all six institutions also experienced declines between fall 2013 and fall 2014.
- Following are the most recent one-year changes in enrollment, as well as the total changes in enrollment between fall 2003 and fall 2014, at Nebraska's six community colleges:

| Sector | 1-Year Change <u>2012 to 2013</u> | Est. 1-Year Change <u>2013 to 2014</u> | 10-Year Change <u>2003 to 2013</u> | Est. 11-Year Change <u>2003 to 2014</u> |
|------------------------------------|---|--|--|---|
| Central Community College | -5.2% | -7.7% | 6.5% | -1.6% |
| Metropolitan Community College | -9.3% | -6.8% | 22.7% | 14.3% |
| Mid-Plains Community College | -3.9% | -14.0% | -19.2% | -30.5% |
| Northeast Community College | -2.0% | -1.6% | 5.9% | 4.2% |
| Southeast Community College | -4.1% | -3.7% | 0.8% | -2.9% |
| Western Nebraska Community College | -12.1% | -6.3% | -25.8% | -30.5% |

Figure 1.5

Fall Headcount Enrollment at Nebraska Community Colleges by Institution Fall 2003–Fall 2014

Nebraska Independent Colleges and Universities

- From fall 2003 to fall 2014, total fall enrollment increased an estimated 40.2% at Nebraska's independent colleges and universities.
- The following institutions accounted for nearly all of the sector's growth between fall 2003 and fall 2014: Bellevue University, Bryan College of Health Sciences, Clarkson College, Concordia University-Seward, Creighton University, Doane College³, Midland University, Nebraska Methodist College of Nursing and Allied Health, and Nebraska Wesleyan University.⁴
- The combined enrollment of these "growth" institutions increased an estimated 54.6% between 2003 and 2014. Meanwhile, the total enrollment of the remaining schools decreased an estimated 13.3% over the same period.

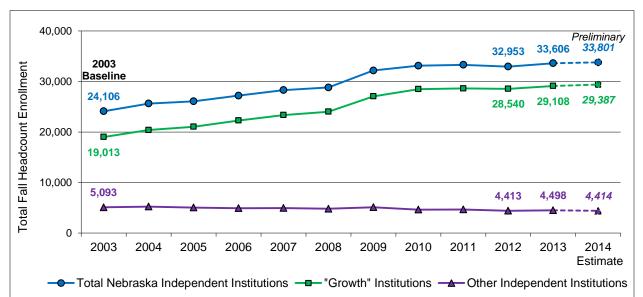

Figure 1.6

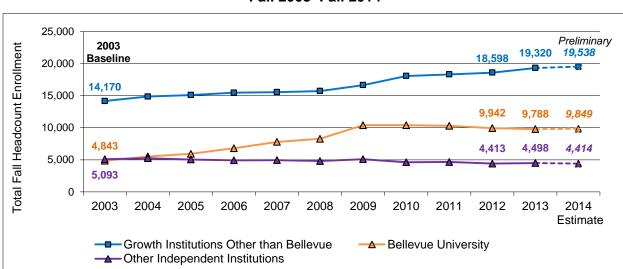

Fall Headcount Enrollment at Nebraska Independent Colleges and Universities Fall 2003–Fall 2014

- As shown in <u>Figure 1.7</u>, Bellevue University's fall 2014 estimated headcount enrollment was 9,849 full- and part-time students, or more than one-half of the combined enrollment of the other eight growth institutions.
- Between fall 2003 and fall 2014, Bellevue's enrollment has increased an estimated 103.4%. Fall enrollment for the other growth institutions in the independent sector increased 37.9% during this same time, while fall enrollment for the non-growth institutions decreased 13.3%.

³ Beginning in 2006, Doane College-Lincoln became a reporting institution, separate from Doane College. For the purposes of this report, the two campuses are considered to be a single institution.

⁴ Aforementioned institutions are categorized by the Commission as "growth" institutions because these institutions had higher 11-year increases in total fall headcount enrollment between 2003 and 2014 than other institutions in the independent sector. See <u>Table A1.2</u> in <u>Appendix 1</u> for supporting data.

Figure 1.7

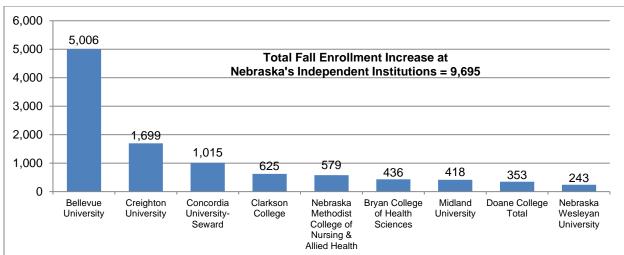

Fall Headcount Enrollment of Bellevue University Compared to Other Nebraska Independent Colleges and Universities Fall 2003–Fall 2014

Note. See <u>Table A1.2</u> in <u>Appendix 1</u> for supporting data. Data sources: For 2003–2013 data, National Center for Education Statistics (NCES), Integrated Postsecondary Education Data System (IPEDS), with minor data adjustments as needed for improved data accuracy. Preliminary enrollments for fall 2014 were collected from each institution by the Coordinating Commission for Postsecondary Education, January 2015.

• As shown in <u>Figure 1.8</u>, Bellevue University alone accounted for 5,006, or 51.6%, of the estimated net increase of 9,695 students in the independent sector between fall 2003 and fall 2014. Creighton University's fall enrollment increased by 1,699 students over the same 11-year period, accounting for 17.5% of the sector's growth.

Figure 1.8

The For-Profit/Career School Sector

All of the institutions in the "for-profit/career school sector" are operated for profit *except* for three schools of radiologic technology, which are operated by not-for-profit hospitals or medical centers. This category previously has been referred to as "private career schools." While this sector still includes a variety of career schools, some of the institutions in this category have broadened their missions to include the offering of bachelor's or more advanced degrees.

- The degree-granting schools within the for-profit sector include a variety of institutions. As illustrated in <u>Figure 1.9</u>, total headcount enrollment at the degree-granting schools has fluctuated between fall 2003 and fall 2014, decreasing an estimated 7.6% over this period.
- As also shown in <u>Figure 1.9</u>, enrollment decreased 26.6% between fall 2003 and fall 2014 at the non-degree-granting schools, which consist of six for-profit schools of hair design and one of the state's three not-for-profit schools of radiologic technology.
- Notably, fall enrollment decreased an estimated 15.0% at the degree-granting schools between fall 2013 and fall 2014. Meanwhile, at the non-degree-granting schools, fall enrollment decreased an estimated 40.2% during this same one-year period.
- See <u>Table A1.2</u> in <u>Appendix 1</u> for a list of the schools in the for-profit sector and their total headcount enrollments from fall 2003 to fall 2014.

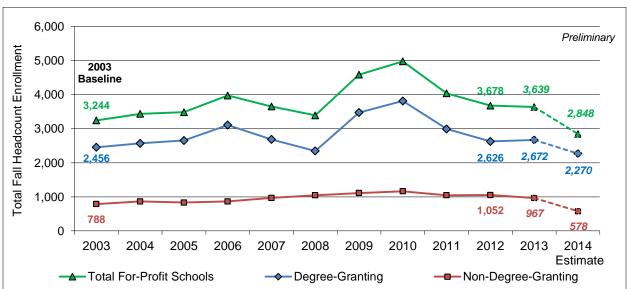

Figure 1.9

Total Fall Headcount Enrollment within the Nebraska For-Profit/Career School Sector Fall 2003–Fall 2014

Nebraska Fall Headcount Enrollment Summary by Sector

- Including the enrollments at for-profit schools, Nebraska's total postsecondary headcount enrollment increased from 120,592 in fall 2003 to 136,355 in fall 2014, based on preliminary counts.
- As shown in <u>Table 1.1</u>, the net effect of the changes in enrollment that occurred between the fall 2003 baseline and fall 2014 is that the enrollments at the independent colleges and universities accounted for a higher percentages of Nebraska's total postsecondary enrollment in 2014 than they did in 2003. At the same time, the combined enrollment of the public institutions accounted for a lower percentage of the state's total enrollment.

| Table 1.1Nebraska Total Fall Headcount Enrollment by Sector: 2003 and 2014 | | | | | | | | |
|--|---|--|--|--|--|--|--|--|
| Fall 2 | 2003 | Estimated Fall 2014 | | | | | | |

Note. The for-profit/career school sector includes three non-profit career schools of radiologic technology. See <u>Table A1.1</u> in <u>Appendix 1</u> for supporting data. Data sources: For 2003–2013 data, National Center for Education Statistics (NCES), Integrated Postsecondary Education Data System (IPEDS), with minor data adjustments as needed for improved data accuracy. Preliminary enrollments for fall 2014 were collected from each institution by the Coordinating Commission for Postsecondary Education, January 2015.

<u>12-Month Unduplicated Headcounts at Nebraska's Public Institutions</u> <u>Compared to Fall Headcount Enrollment</u>

Fall headcount enrollment is the best available indicator of enrollment trends across all of the sectors of postsecondary education in Nebraska because it can be analyzed by race/ethnicity, gender, enrollment status (part-time/full-time), or level of study (undergraduate/graduate). However, fall enrollment totals provide only a snapshot of the number of students at an institution on a specific date during the fall of the academic year. As a result, fall enrollment totals do not include students who enrolled later in the fall or who were enrolled in college only during the spring or summer of the academic year.

Although fall enrollment is currently the most reliable measure to track higher education enrollment trends across all of the sectors of higher education, Nebraska's postsecondary institutions also report 12-month unduplicated headcounts to the National Center for Education Statistics (NCES). Also referred to as 12-month enrollment, a <u>12-month unduplicated headcount</u> is the total number of students who were enrolled at an institution at any time during the academic year. For this measure, each student is counted only once per academic year. If a student was enrolled in the fall and spring semester, for example, the student is counted only once for the entire year. The advantage of this count is that it captures students who were enrolled any time during the year. In this way, 12-month enrollment captures the total number of students an institution serves during the course of an academic year.

For some institutions, fall enrollment is about the same or only slightly lower than the school's 12-month unduplicated headcount. However, for other institutions, fall enrollment is considerably lower than the total number of students the school serves over the course of an academic year. This is particularly true for Nebraska's community colleges, where the number of students enrolled in the fall is about half of the number of students served over the course of an academic year.

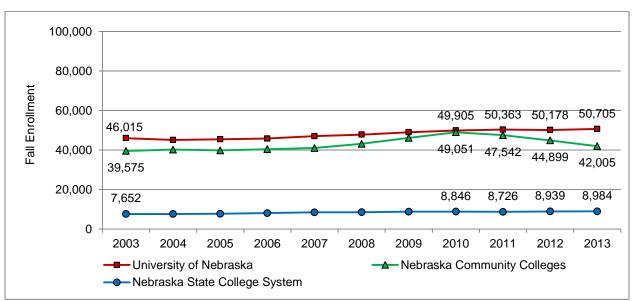

The following analysis compares fall and 12-month unduplicated headcounts for Nebraska's three public sectors of higher education: the University of Nebraska, the Nebraska State College System, and Nebraska's six community colleges. For comparisons of the fall and 12-month enrollments of each of the institutions within these sectors, see the 2013–2014 Factual Look at Higher Education in Nebraska - Enrollment, which is available on the Commission's website, www.ccpe.ne.gov.

<u>Figure 1.10</u> shows the total fall enrollments for the three public sectors from fall 2003 through fall 2013, the latest period for which official data are available from the NCES. <u>Figure 1.11</u> shows the comparable 12-month enrollments reported to the NCES for the 2003–2004 academic year through the 2012–2013 academic year. Official 12-month enrollment data for the 2013–2014 academic year, which are comparable to fall 2013 enrollments, are not yet available from the NCES. For this reason, direct comparisons of fall and 12-month enrollments in this discussion are limited to 2003–2004 through 2012–2013.

The fall and 12-month enrollments shown in <u>Figure 1.10</u> and <u>Figure 1.11</u> are both valid measures for determining whether sector enrollments are generally increasing, decreasing or staying about the same. However, the two headcounts provide different information about sector enrollments.

Based on the fall enrollments charted in <u>Figure 1.10</u>, the University of Nebraska enrolls a higher number of students than Nebraska's six community colleges. In fall 2012, for example, the University of Nebraska enrolled 50,178 students compared to enrollment of 44,899 students at the community colleges.

Figure 1.10

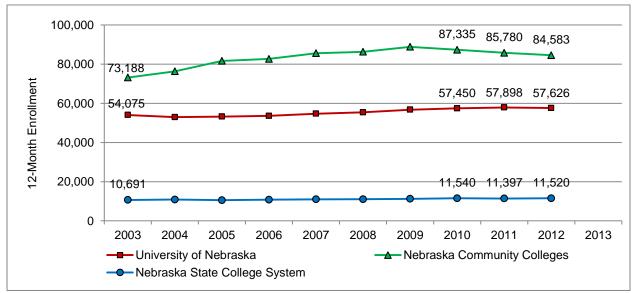

Fall Headcount Enrollment at Nebraska Public Postsecondary Institutions by Sector Fall 2003–Fall 2013

Note. See <u>Table A1.1</u> in <u>Appendix 1</u> for supporting data. Data source: National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS) (2004–2014).

12-Month Unduplicated Headcount at Nebraska Public Postsecondary Institutions by Sector 2003–2004 Academic Year through 2012–2013 Academic Year

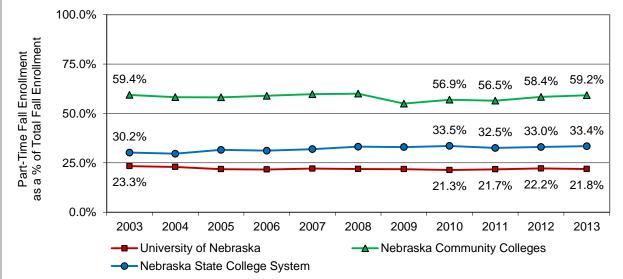

Note. See <u>Table A1.3</u> in <u>Appendix 1</u> for supporting data. Data source: National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS) (2004–2014).

The 12-month enrollments summarized in <u>Figure 1.11</u>, on the other hand, show that Nebraska's community colleges serve a greater number of students than the University of Nebraska over the course of an academic year. In 2012–2013, the community colleges served a total of 84,583 students over the course of the academic year, while the University of Nebraska served 57,626 students. This is not surprising, given the differences in the institutional missions and programs offered by these two sectors.

The higher 12-month headcount of the community colleges reflects the fact that these colleges serve many students who take courses only one semester or quarter of the academic year. Furthermore, the community colleges enroll more part-time students than the university or state colleges. As shown in <u>Figure 1.12</u>, part-time students accounted for 59.2% of total fall enrollment at the community colleges in fall 2013. In comparison, part-time students accounted for 21.8% of the university's fall 2013 enrollment and for 33.4% of the fall enrollment at the state colleges.⁵

Part-Time Fall Enrollment as a Percentage of Total Fall Headcount Enrollment at Nebraska Public Postsecondary Institutions by Sector Fall 2003–Fall 2013

Figure 1.12

Note. For supporting data, see the Excel workbook for the 2013–2014Factual Look at Higher Education in Nebraska – *Enrollment* on the Commission's website at: www.ccpe.ne.gov. Data source: National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS) (2004–2014).

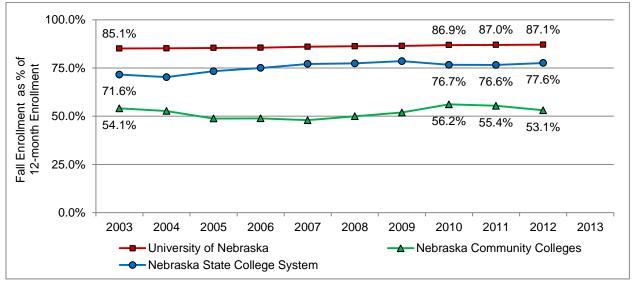

<u>Figure 1.13</u> shows fall enrollment as a percentage of 12-month enrollment as a means of directly comparing these two headcounts. As shown in this chart, fall enrollment in fall 2012 accounted for 87.1% and 77.6% of 12-month enrollment during the 2012–2013 academic year at the University of Nebraska and the Nebraska State College System, respectively. In contrast, fall enrollments account for 53.1% of the students served annually by the state's six community colleges.

⁵ The NCES does not ask institutions to report 12-month unduplicated headcounts by full-time/part-time enrollment status. Consequently, the numbers and percentages of students who attend any institution on a part-time basis are available only for fall headcount enrollments.

The Commission will continue to use fall unduplicated headcounts as the primary measure of the number of students enrolled at colleges and universities in Nebraska. However, fall headcount enrollments should be interpreted with the understanding that there are many more students who are served by Nebraska's postsecondary education system over the course of any given academic year, and this is especially true in the case of the state's community colleges.

Fall Headcount Enrollment as a Percentage of 12-Month Unduplicated Headcount at Nebraska Public Postsecondary Institutions by Sector 2003–2004 Academic Year through 2012–2013 Academic Year

Note. See <u>Table A1.1</u> and <u>Table A1.3</u> in <u>Appendix 1</u> for supporting data. Data source: National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS) (2004–2014).

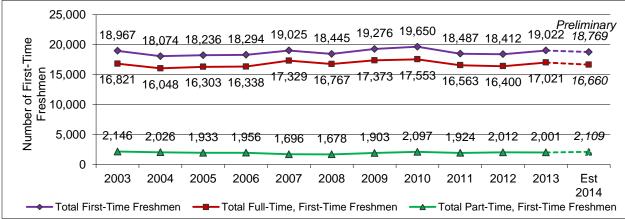

Nebraska First-Time Freshmen Enrollments

First-time freshmen enrollments are indicators of the general direction undergraduate enrollments are headed as well as general measures of the numbers of high school graduates who go on to college in Nebraska. Consequently, this section compares 2003 baseline enrollments of first-time freshmen to freshmen enrollments in fall 2013 and fall 2014. First-time freshmen enrollments for fall 2014 are preliminary. Official enrollments for fall 2014 will be available in May 2015 and reported in the *2016 Nebraska Higher Education Progress Report.*

Nebraska Total Enrollment of Full- and Part-Time, First-Time Freshmen

- As shown in <u>Figure 1.14</u>, full-time freshmen accounted for 88.8% of the first-time freshmen attending postsecondary institutions in Nebraska in fall 2014, up slightly from 88.7% in fall 2003.
- Total enrollment of first-time freshmen at all of Nebraska's colleges and universities, including for-profit/career schools, decreased an estimated 1.0% between fall 2003 and fall 2014.
- *Full-time*, first-time freshmen enrollment decreased an estimated 1.0% over the 11year period between fall 2003 and fall 2014. Meanwhile, *part-time*, first-time freshmen enrollment decreased 1.7% over the 11-year period, despite an estimated increase of 5.4% between fall 2013 and fall 2014.
- Analyzing the actual changes in fall enrollment between 2003 and 2013 reveals that Nebraska's total first-time freshmen enrollment increased 0.3% while full-time firsttime freshmen enrollment increased 1.2% and part-time first-time freshmen enrollment decreased 6.8%. In comparison, first-time freshmen fall enrollment at all IPEDS-reporting institutions in the United States increased 12.8% between fall 2003 and fall 2013. Full-time first-time freshmen enrollments increased 12.2% nationally during this ten-year period while part-time first-time freshmen enrollments increased 15.7%. (Estimated fall enrollments are no longer collected through IPEDS; therefore, fall 2013 enrollments are the latest available data.)

Figure 1.14 Nebraska Total First-Time Freshmen Enrollment by Full- and Part-Time Student Status Fall 2003–Fall 2014

Nebraska Enrollment of Full- and Part-Time, First-Time Freshmen by Sector

- As illustrated in <u>Figure 1.15</u>, estimated full-time, first-time freshmen enrollment at the University of Nebraska increased 3.0% between fall 2013 and fall 2014, resulting in a 18.3% 11-year increase since fall 2003. All other sectors saw decreases in fall enrollment between fall 2013 and fall 2014.
- Full-time, first-time freshmen enrollment at Nebraska's state colleges decreased an estimated 1.5% between fall 2013 and fall 2014, resulting in a 13.6% 11-year increase since fall 2003.
- At Nebraska's community colleges, full-time first-time freshmen enrollment decreased an estimated 7.3% between fall 2013 and fall 2014, resulting in a 5.3% 11-year increase since fall 2003.
- Full-time, first-time freshmen enrollment at Nebraska's independent colleges and universities decreased an estimated 2.6% between fall 2013 and fall 2014, resulting in a 8.8% 11-year decrease since fall 2003.
- The for-profit/career schools reported an estimated decrease of 30.7% in full-time, first-time freshmen enrollment between 2013 and 2014, resulting in an 80.7% 11-year decrease since fall 2003.

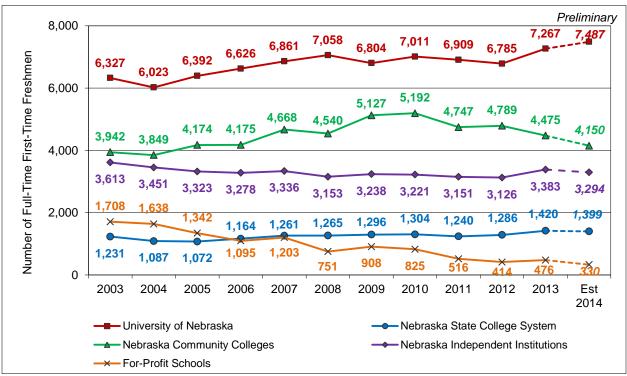

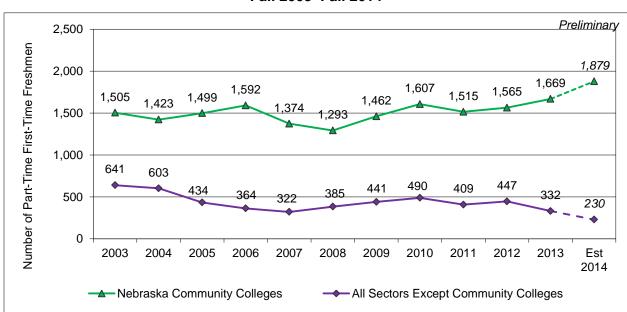

Figure 1.15

Nebraska Total Full-Time, First-Time Freshmen Enrollment by Sector Fall 2003–Fall 2014

- As shown in <u>Figure 1.16</u>, Nebraska's community colleges account for the majority of first-time freshmen who attend school part-time (70.1% of the state total in fall 2003 and 89.1% in fall 2014).
- Enrollment of part-time, first-time freshmen at Nebraska's community colleges increased an estimated 12.6% from fall 2013 to fall 2014, resulting in an 11-year increase of 24.9% from 2003 to 2014.
- The number of part-time, first-time freshmen enrolled at other types of institutions decreased an estimated 30.7% from 2013 to 2014, resulting in an 11-year decrease of 64.1%.

Nebraska Total Part-Time, First-Time Freshmen Enrollment by Sector Fall 2003–Fall 2014

Figure 1.16

Note. Totals for fall 2014 are preliminary estimates. See <u>Table A1.4</u> in <u>Appendix 1</u> for supporting data. Data sources: For 2003–2013 data, National Center for Education Statistics (NCES), Integrated Postsecondary Education Data System (IPEDS), with minor data adjustments as needed for improved data accuracy. Preliminary enrollments for fall 2014 were collected from each institution by the Coordinating Commission for Postsecondary Education, January 2015.

Nebraska Total Enrollment of First-Time Freshmen by Sector

- When full-time and part-time enrollments of first-time freshmen are combined as shown in <u>Table 1.17</u>, the University of Nebraska has enrolled more first-time freshmen than any other sector since fall 2003.
- With an estimated increase of 2.9% between fall 2013 and fall 2014, fall enrollment of first-time freshmen at the University of Nebraska has increased 17.1% between fall 2003 and fall 2014.
- The state colleges experienced an estimated decrease of 0.9% for fall enrollment of first-time freshmen between 2013 and 2014, resulting in an 11-year increase of 9.7% from 2003 to 2014.

- Similarly, Nebraska's community colleges reported an estimated 1.9% decrease in total first-time freshmen fall enrollment from 2013 to 2014. However, this sector still reported an increase of 10.7% between 2003 and 2014.
- The independent institutions reported an estimated 3.3% decrease in total first-time freshmen fall enrollment from 2013 to 2014, resulting in an 11-year decrease of 12.6% from 2003 to 2014.
- Meanwhile, the for-profit/career schools reported an estimated decrease of 38.0% in total first-time freshmen between fall 2013 and fall 2014, resulting in an 81.0% decrease between 2003 and 2014.

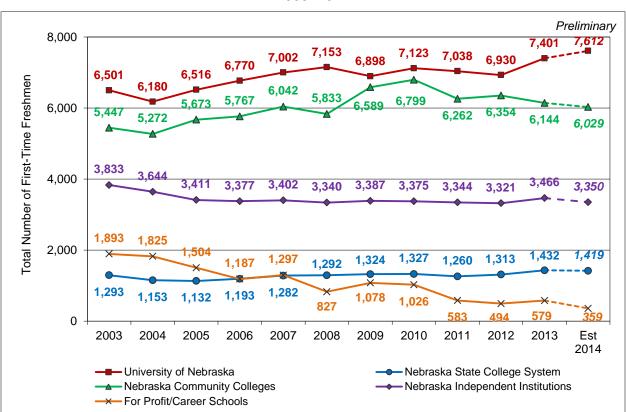

Figure 1.17 Nebraska Total First-Time Freshmen Enrollment by Sector 2003–2014

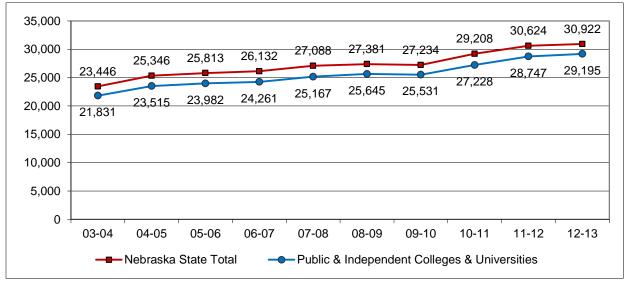

Number of Degrees Conferred at Nebraska Postsecondary Institutions

Although not specified as a state priority by the 2003 LR 174 Higher Education Task Force, increasing the number of degrees is a logical outcome of increasing enrollment and increasing the percentage of students who complete degree programs.

As shown in <u>Figure 1.18</u>, the total number of degrees and awards conferred by Nebraska institutions increased 31.9% from 23,446 in 2003–2004 to 30,922 in 2012–2013, the latest year for which data are available. Excluding the for-profit/career schools, the number of conferred degrees and awards increased 33.7%, from 21,831 in 2003–2004 to 29,195 in 2012–2013.

Total Number of Degrees and Other Awards Conferred by Nebraska Public and Independent Institutions and For-Profit/Career Schools 2003–2004 through 2012–2013

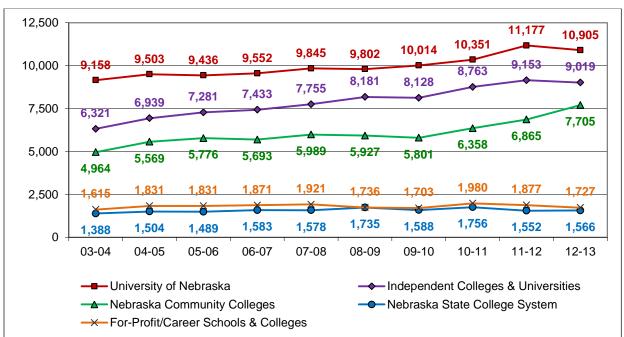

Note. For supporting data, see the Excel workbook t for the 2013–2014 Factual Look at Higher Education in *Nebraska Degrees and Other Awards Section* on the Commission's website at: www.ccpe.ne.gov. Data source: National Center for Education Statistics, IPEDS surveys (2005–2014).

• <u>Figure 1.19</u> summarizes the number of degrees and other awards conferred by sector. As shown in this chart, all five sectors awarded more degrees and other awards in 2012–2013 than in 2003–2004:

| University of Nebraska | up | 19.1% |
|-------------------------------------|----|-------|
| Independent Colleges & Universities | up | 42.7% |
| Nebraska Community College | up | 55.2% |
| For-Profit/Career Schools | up | 6.9% |
| Nebraska State College System | up | 12.8% |

 <u>Table 1.2</u> shows, by degree level, the number of degrees conferred by all Nebraska colleges and universities, including the degree-granting and non-degree-granting for-profit schools. Based on these data, from 2003–2004 to 2012–2013, the highest growth was 41.0% at the master's level. The number of research doctorates and professional practice doctorates increased 21.0%, while the number of associate or other less-than-four-year degrees increased 38.1% and the number of bachelor's degrees increased 26.3% between 2003– 2004 and 2012–2013.

Figure 1.19

Total Number of Degrees and Other Awards Conferred by Sector 2003–2004 through 2012–2013

Note. For supporting data, see the Excel workbook t for the 2013–2014 Factual Look at Higher Education in *Nebraska Degrees and Other Awards Section* on the Commission's website at: www.ccpe.ne.gov. Data source: National Center for Education Statistics, IPEDS surveys (2005–2014).

For supporting data, see the Excel workbook t for the 2013–2014 Factual Look at Higher Education in Nebraska Degrees and Other Awards Section on the Commission's website at: www.ccpe.ne.gov. Data source: National Center for Education Statistics, IPEDS surveys (2005–2014).

Strategic Objectives to Increase Postsecondary Enrollment Recommended by the 2003 LR 174 Task Force

Given the first priority to increase the number of students who enter postsecondary education in Nebraska, the 2003 LR 174 Task Force recommended a series of <u>strategic</u> <u>objectives</u> to increase college enrollments. For the purposes of establishing baseline statistical indicators and monitoring progress toward achieving these objectives, they are stated as follows:

- 1.1 Increase the proportion of PK-12 students who graduate from high school, enroll in postsecondary education and are adequately prepared to proceed through postsecondary degree completion.
- 1.2 Increase the proportion of <u>Nebraska</u> high school graduates who pursue their postsecondary education in Nebraska.
- 1.3 Increase the number of <u>non-Nebraska</u> high school graduates who pursue postsecondary education in Nebraska.
- 1.4 Increase the number and proportion of Nebraska postsecondary students who have been underrepresented in the state's higher education system.
- 1.5 Increase need-based financial aid in order to improve access to higher education for Nebraskans with limited financial means.

Following this outline, the remainder of this section focuses on the extent to which each of these measurable objectives is being achieved. Throughout this analysis, the latest available data are compared to the baseline statistics that were established and reported in the 2004 Baseline Report for the LR 174 Higher Education Task Force or the 2005 Nebraska Higher Education Progress Report for the LR 75 Legislative Evaluation Task Force.

1.1.a High School Graduation Rates

Increase the proportion of students who graduate from Nebraska high schools.

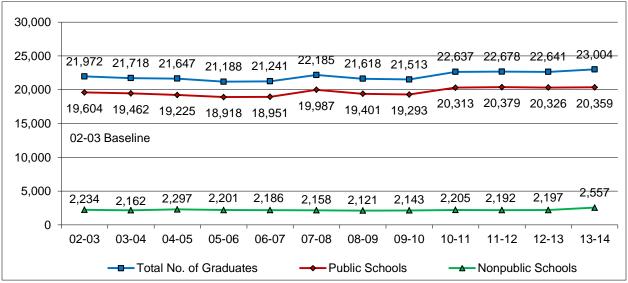

One strategic approach to increasing the number of students who enter postsecondary education in Nebraska is to increase the proportion of students who graduate from the state's high schools. In other words, increase Nebraska's high school graduation rate and, in the process, increase the pool of high school students who could potentially attend college.

Past and Present Trends in the Number of Nebraska High School Graduates

- As shown in <u>Figure 1.1.a.1</u>, 21,972 students graduated from Nebraska high schools in 2002–2003, the latest year for which official data were available from the Nebraska Department of Education for the *2004 Baseline Report* for the LR 174 Higher Education Task Force.
- The number of students who graduated from Nebraska high schools increased 4.4% from 2006–2007 to 2007–2008, and there was a one-year increase of 5.2% in 2010–2011. Otherwise, however, the number of graduates has increased or decreased only slightly between 2002–2003 and 2013–2014.
- As a result, only 1,032, or 4.7% more, students graduated from Nebraska high schools in 2013–2014 than in 2002–2003.
- Between 2002–2003 and 2013–2014, the number of *public* high school graduates increased 3.9% to 20,359, while the number graduating from *nonpublic* (private) high schools increased 14.5% to 2,557.

Figure 1.1.a.1

Numbers of Nebraska Public and Nonpublic High School Graduates 2002–2003 through 2013–2014

Note. Graduates do not include GED recipients or completers who did not receive regular diplomas. The total number of graduates includes graduates of public schools, nonpublic (private) schools, educational service units, and state-operated schools. See <u>Table A2.1</u> in <u>Appendix 2</u> for supporting data. Data source: Nebraska Department of Education, December 2007 for 2002–03 through 2005–06 data, January 2009 for 2006–07 data, February 2010 for 2007–08 data, February 2011 for 2008–09 data and 2009–10 data, February 2012 for 2010–11 data, December 2012 for 2011–12 data, January 2014 for 2012–13 data, and January 2015 for 2013–14 data.

As shown in <u>Table 1.1.a.1</u>, since 2002–2003, about 9 out of 10 of Nebraska's high school graduates have received their diplomas from public schools. Interestingly, between 2012–2013 and 2013–2014, the number of nonpublic high school graduates increased 16.4% (360 students) while the number of public high school graduates increased only 0.2% (33 students).

Projected Trends in the Number of Nebraska High School Graduates⁶

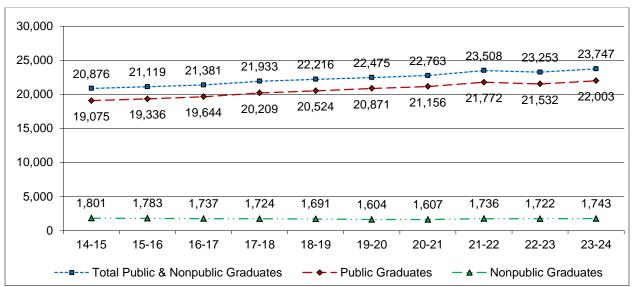

January 2015 for 2013–14 data.

- As shown in <u>Figure 1.1.a.2</u>, 831 more students are forecast to graduate from Nebraska public and nonpublic high schools in 2023–2024 than graduated during the 2013–2014 school year, a projected increase of 3.6%.
- Public schools are projected to account for 91% to 93% of Nebraska's high school graduates through the 2023–2024 school year.
- The numbers of graduates from Nebraska's public high schools are projected to increase 1.4% between 2014–2015 and 2015–2016 and then increase 13.8% from 2015–2016 to 2023–2024.
- The numbers of graduates from the state's nonpublic (private) high schools are projected to decrease 1.0% from 2014–2015 to 2015–2016 and decrease another 2.2% from 2015–2016 to 2023–2024.

⁶ Knocking at the College Door, Projections of High School Graduates by State and Race/Ethnicity, Western Interstate Commission for Higher Education (WICHE), December 2012. See <u>Table A2.2</u> in <u>Appendix 2</u> for supporting data. For 2013–2014, the actual number of public school graduates (20,359) was 8.5% higher than WICHE predicted in their 2012 report (18,761).

Figure 1.1.a.2

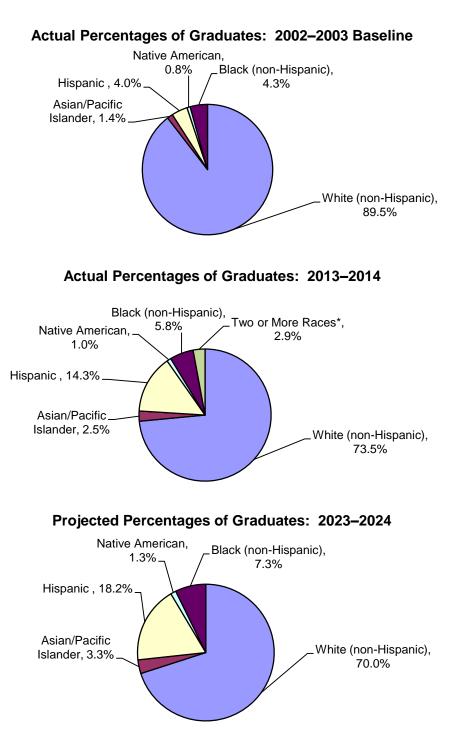

Note. Projections do not include graduates of educational service units or state-operated schools. Graduates do not include GED recipients or completers who did not receive regular diplomas. See <u>Table A2.2</u> in <u>Appendix 2</u> for supporting data. Data source: *Knocking at the College Door, Projections of High School Graduates by State and Race/Ethnicity*, Western Interstate Commission for Higher Education (WICHE), December 2012.

Projected and Recent Changes in Nebraska Public High School Graduates by Race/Ethnicity

- As illustrated in <u>Figure 1.1.a.3</u>, minority students, especially Hispanics, are projected to account for much higher percentages of the state's public high school graduates in 2023– 2024 than they did in 2002–2003.
- Actual changes in the racial/ethnic distribution of Nebraska's public high school graduates over the past 11 years have been in the direction of the projected trend.
 - The number of white non-Hispanic graduates decreased 14.7% from 2002–2003 to 2013–2014 (from 17,541 to 14,964 graduates). White non-Hispanics accounted for 73.5% of Nebraska's public high school graduates in 2013–2014, down from 89.5% in 2002–2003.
 - Between 2002–2003 and 2013–2014, the number of public high school graduates in each of the major racial/ethnic groups increased as follows:
 - Hispanics increased 274.6% (from 776 to 2,907 graduates)
 - Asian/Pacific Islanders increased 81.7% (from 279 to 507 graduates)
 - Black non-Hispanics increased 40.2% (from 841 to 1,179)
 - Native Americans increased 26.3% (from 167 to 211 graduates)
 - Since 2010–2011, graduates also have been classified in the category of "two or more races." In 2010–2011, there were 492 public high school graduates in this category. By 2013–2014, the number had increased 20.1% to 591 graduates.

Figure 1.1.a.3

Note. Graduates do not include GED recipients or completers who did not receive regular diplomas. Actual counts and projections do not include graduates of educational service units or state-operated schools. *'Two or more races' was not a racial/ethnic category until 2010–11. For projections, multiracial graduates are proportionally distributed to the four race categories (American Indian/Alaska Native (i.e., Native American), Asian/Pacific Islander, black non-Hispanic, and white non-Hispanic. See <u>Table A2.3</u> in <u>Appendix 2</u> for supporting data. Data sources: Nebraska Department of Education, December 2007 and January 2015 (actual number of graduates). Projection data obtained from *Knocking at the College Door*, Western Interstate Commission for Higher Education, December 2012.

Nebraska High School Graduation Rates

The Coordinating Commission monitors Nebraska high school graduation rates to determine if the proportion of Nebraska's high school students who graduate from high school is increasing, thereby potentially increasing the pool of students who are prepared to go on to college.

Four-Year High School Graduation Rates (2002–2003 through 2009–2010)

Prior to the 2010–2011 school year, the Nebraska Department of Education used what has been called the **four-year high school graduation rate** to measure the proportion of high school students who receive regular diplomas.

- Nebraska's <u>state</u> four-year graduation rate was based on data that included graduates of educational service units, state-operated schools and nonpublic (private) schools as well as graduates of the state's public schools.
- In comparison, the **<u>public</u> four-year graduation rate** was also a statewide rate, but it was limited to data from Nebraska's public high schools.
- See Explanatory Note A3.1 in Appendix 3 for information on how four-year graduation rates were calculated and Table A3.1 in Appendix 3 for supporting data.

Cohort Four-Year High School Graduation Rates (2010–2011 through 2013–2014)

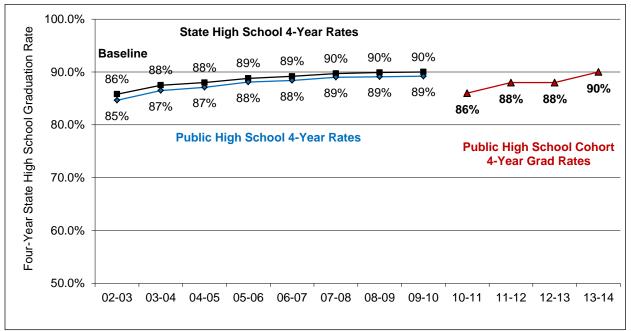

With the 2010–2011 school year, the Nebraska Department of Education began using the **cohort four-year graduation rate** to measure the proportion of Nebraska's *public* high school students who earn regular diplomas.

- Currently, data are not available to calculate a cohort four-year graduation rate for the nonpublic (private) high schools in Nebraska. Consequently, a statewide cohort four-year graduation rate for all public and nonpublic schools in Nebraska is not available.
- See <u>Explanatory Note A3.2</u> in <u>Appendix 3</u> for more information on how the cohort fouryear graduation rates are calculated and <u>Table A3.3</u> in <u>Appendix 3</u> for supporting data.
- Because the cohort four-year graduation rate is calculated using an entirely different methodology, it is <u>not comparable</u> to the four-year graduation rates for previous school years. Consequently, **the 2011 cohort four-year graduation rate established a new baseline for future comparisons**.⁷
- As shown in <u>Figure 1.1.a.4</u>, the cohort four-year graduation rate for Nebraska's <u>public</u> schools was 86% in 2011 (2010–2011) and 90% in 2014 (2013–2014), or four percentage points higher than the cohort rate for 2011.

⁷ With the adoption of the cohort four-year graduation rate, the Nebraska Department of Education is no longer using its previous methodology for calculating graduation rates.

Figure 1.1.a.4

Nebraska State and Public High School Four-Year Graduation Rates 2002–2003 through 2009–2010 and the Nebraska Public High School Cohort Four-Year Graduation Rates for 2010–2011 through 2013–2014

Note. See <u>Table A3.1</u> and <u>Table A3.3</u> in <u>Appendix 3</u> for supporting data. Data source: Nebraska Department of Education, December 2007 for 2002–03 through 2005–06 data, January 2009 for 2006–07 data, February 2010 for 2007–08 data, February 2011 for 2008–09 and 2009–10 data, and January 2015 for 2010–11 through 2013–14 data.

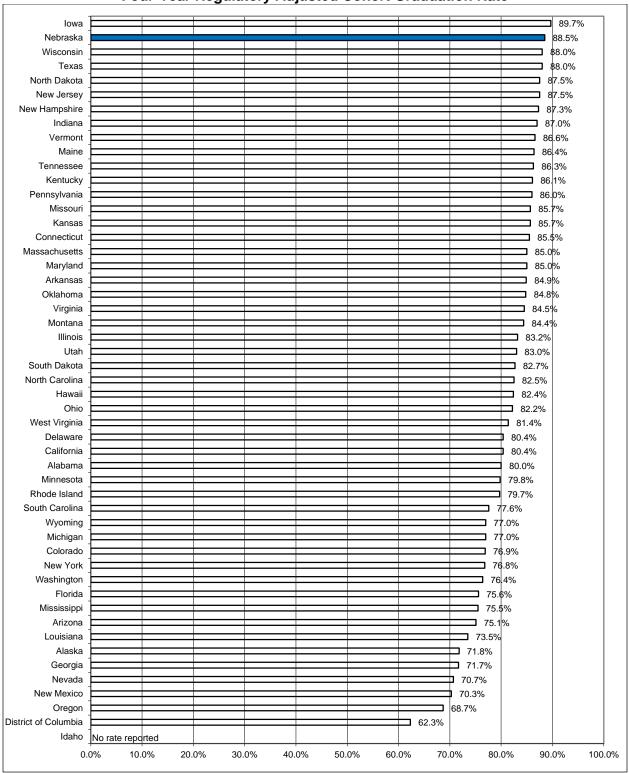

Public High School Cohort Four-Year Graduation Rates by State

<u>Figure 1.1.a.5</u> shows the state-to-state comparisons of the cohort four-year graduation rates calculated for the 2012–2013 school year.

• As shown in <u>Figure 1.1.a.5</u>, Nebraska's 2012–2013 cohort four-year graduation rate was the second highest among the rates reported by 49 states and the District of Columbia. Iowa was the only state that reported a higher public high school graduation rate than Nebraska.

Figure 1.1.a.5

By State: 2012–2013 Public High School Four-Year Regulatory Adjusted Cohort Graduation Rate

Note. California, Louisiana, Oklahoma, and Texas submitted data late; therefore, data for these states has not gone through the U.S. Department of Education's standard data quality review. Data source: U.S. Department of Education, Consolidated State Performance Report 2012–2013, December 18, 2014.

Nebraska Public High School Graduation Rates by Gender

An analysis of the high school graduation rate data obtained from the Nebraska Department of Education reveals that females continue to have higher graduation rates than males who attend Nebraska's public high schools, regardless of the methodology used to calculate them.

- As evidenced in <u>Figure 1.1.a.6</u>, the four-year graduation rates for females were higher than the rates for males from 2002–2003 to 2009–2010. Both rates gradually increased during this time, and the gap between males and females decreased from four percentage points in 2002–2003 to three percentage points in 2009–2010.
- As explained previously, cohort four-year graduation rates (first reported in 2010–2011) are not comparable to the rates reported for previous school years. Consequently, the 89% graduation rate for females and the 83% graduation rate for males in 2010–2011 established new baselines for future comparisons.
- The cohort graduation rate for females in 2013–2014 was 92%, three percentage points higher than the rate for 2010–2011. The cohort graduation rate for males in 2013–2014 was 87%, four percentage points higher than the rate for 2010–2011.
- In 2013–14, the gap between male and female cohort graduation rates was five percentage points, down from six percentage points in 2010–2011.

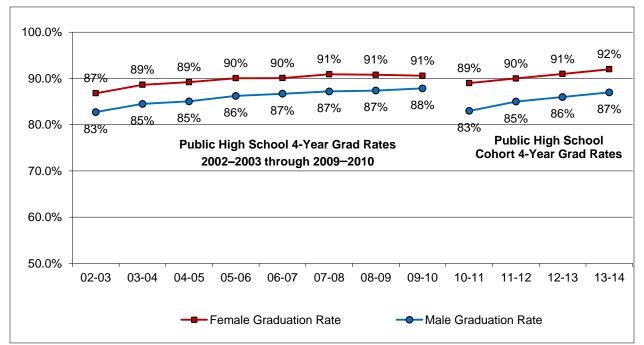

Figure 1.1.a.6

By Gender: Nebraska Public High School Four-Year Graduation Rates 2002–2003 through 2009–2010 and the Nebraska Public High School Cohort Four-Year Graduation Rates for 2010–2011 through 2013–2014

Note. See <u>Table A3.2</u> and <u>Table A3.3</u> in <u>Appendix 3</u> for supporting data. Data source: Nebraska Department of Education, December 2007 for 2002–03 through 2005–06 data, January 2009 for data for 2006–07, February 2010 for 2007–08 data, February 2011 for 2008–09 and 2009–10 data, and January 2015 for 2010–11 through 2013–14 data.

Nebraska Public High School Graduation Rates by Race/Ethnicity

As illustrated in <u>Figure 1.1.a.7</u>, high school graduation rates vary considerably by race/ethnicity, regardless of the methodology used to calculate them.

- The four-year high school graduation rates for each of the five reported racial/ethnic groups increased between 2002–2003 and 2009–2010. The largest percentage point increase in graduation rates during this time was evidenced among Hispanics, increasing from 58% to 78%.
- Four-year graduation rates for Hispanics, blacks and Native Americans were considerably lower than the four-year graduation rates for whites and Asians/Pacific Islanders from 2002– 2003 to 2009–2010.
- Since they are not comparable to the rates previously calculated by the Nebraska Department of Education, the cohort four-year graduation rate for each racial/ethnic group in 2010–2011 established new baselines for future comparisons.
- Between 2010–2011 and 2013–2014, the cohort four-year graduation rates decreased three percentage points for Asians and two percentage points for multi-racial individuals. During this same time, cohort four-year graduation rates increased for all other racial/ethnic groups, ranging from a three percentage point increase for white non-Hispanics to a 14 percentage point increase for black non-Hispanics.

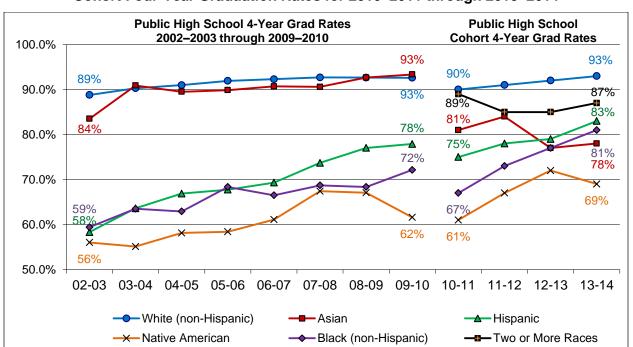

Figure 1.1.a.7

By Race/Ethnicity: Nebraska Public High School Four-Year Graduation Rates 2002–2003 through 2009–2010 and the Nebraska Public High School Cohort Four-Year Graduation Rates for 2010–2011 through 2013–2014

Note. Asian includes Pacific Islanders in the rates for 2002–2003 through 2009–2010. Cohort graduation rates are not shown for Native Hawaiians and other Pacific Islanders. Graduation rates for multiracial students are not available prior to 2010–11. See <u>Table A3.1</u> and <u>Table A3.3</u> in <u>Appendix 3</u> for supporting data. Data source: Nebraska Department of Education, December 2007 for 2002–03 through 2005–06 data, January 2009 for data for 2006–07, February 2010 for 2007–08 data, February 2011 for 2008–09 and 2009–10 data, and January 2015 for 2010–11 through 2013–14 data.

District-Level Analysis of Graduation Rates

The Nebraska Department of Education provided the Commission with the distribution of the cohort four-year graduation rates for Nebraska's 254 school districts in 2013–2014, as shown in <u>Table 1.1.a.2</u>.

- 82 (32.3%) of Nebraska's public school districts had cohort four-year graduation rates of 100%, and 208 districts (81.9%) had graduation rates higher than the statewide rate of 89.68% in 2013–2014.
- 46 (18.1%) of the districts had graduation rates that were lower than the statewide rate of 89.68% for public schools in 2013–2014, and eight districts had rates of less than 75.0%.
- The three districts with the largest number of cohort graduates were Omaha Public Schools with a graduation rate of 80.74% (2,683 graduates), Lincoln Public Schools with a graduation rate of 83.91% (2,096 graduates), and Millard Public Schools with a graduation rate of 94.91% (1,641 graduates).

Nebraska Public High School Cohort Extended Graduation Rates

<u>Figure 1.1.a.8</u> shows extended five- and six-year graduation rates for the 2010–2011 cohort (<u>Part A</u>) and 2011–2012 cohort (<u>Part B</u>). The 2012–2013 cohort extended five-year graduation rate is shown in <u>Part C</u>.

- As evidenced in <u>Part A</u> of <u>Figure 1.1.a.8</u>, the 2010–2011 cohort **six-year** graduation rate for Nebraska's public school was 90%, four percentage points higher than the cohort four-year graduation rate.
- Similarly, <u>Part B</u> of <u>Figure 1.1.a.8</u> reveals that the overall **six-year** graduation rate for the 2011–2012 cohort was three percentage points higher than the cohort's four-year graduation rate.
- As shown in <u>Part C</u> of <u>Figure 1.1.a.8</u>, the overall **five-year** graduation rate for the 2012–2013 cohort was three percentage points higher than the cohort four-year graduation rate.

Extended Graduation Rates by Gender

Extending cohort graduation rates to five and six years narrows the gap between graduation rates for males and females. In other words, males are more likely than females to take five or six years to graduate from high school.

- For the 2010–2011 cohort, the four-year graduation rate was 83% for males and 89% for females, a gap of six percentage points. However, extending the graduation rate out to sixyears reveals the gap narrowed to four percentage points (88% for males and 92% for females). A similar pattern is evidenced in the 2011–2012 cohort, with the gap decreasing from five to six percentage points.
- For the 2012–2013 cohort, the five-year graduation rate was 93% for females (up from 91% for four-years) and 89% for males (up from 86% for four-years).

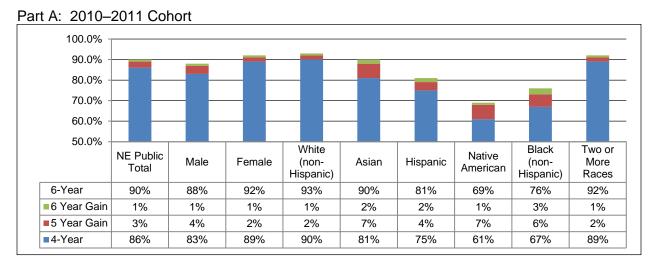

Extended Graduation Rates by Race/Ethnicity

Extending cohort graduation rates to five and six years also narrows the gaps between graduation rates for various racial/ethnic groups. In particular, Asian, Native American, and black non-Hispanic students are more likely than other racial/ethnic groups to take five or six years to graduate from high school.

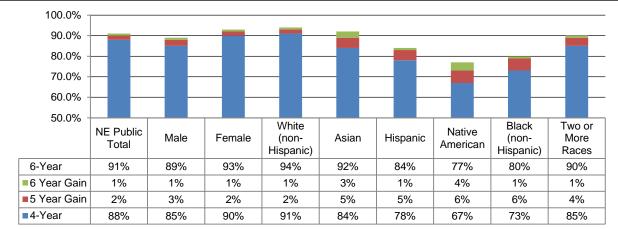

- The 2010–2011 cohort graduation rates for both Asians and black non-Hispanics increased nine percentage points when extended from four to six years. The largest graduation rate increase reported for the 2011–2012 cohort was for Native American students, increasing from a 67% four-year graduation rate to a 77% six-year graduation rate.
- For the 2012–2013 cohort, the largest increase reported was for Asians, who increased seven percentage points in just one year (77% four-year graduation rate vs. 84% five-year graduation rate).

Figure 1.1.a.8

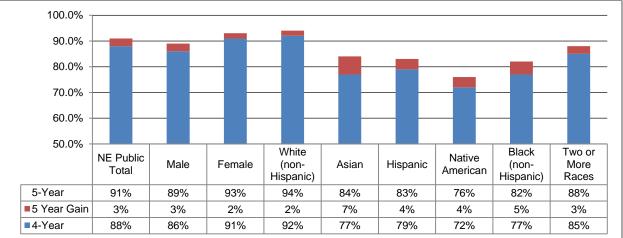

By Gender and By Race/Ethnicity: Nebraska Public High School Cohort Extended Graduation Rates for 2010–2011 through 2012–2013

Note. Graduates do not include GED recipients or completers who did not receive regular diplomas. See <u>Table A3.3</u> in <u>Appendix 3</u> for supporting data. Data source: Nebraska Department of Education, 2013–2014 State of the Schools Report, retrieved January 28, 2015.

Dropouts from Nebraska Public Schools

Previous editions of this report have shown that the net effect of the lower graduation rates for black non-Hispanics, Hispanics and Native Americans is that these minorities account for disproportionately high percentages of the students who drop out of public high schools in Nebraska, compared to their representation among the graduates of these schools. This is an important finding because minorities—Hispanics in particular—are projected to account for higher percentages of Nebraska's high school students in the future.⁸

It is essential to examine students who drop out of Nebraska's public schools because these are students who have dropped out of the "pipeline" of students who potentially can go on to college and earn degrees or other awards.

In its *State of the Schools* report, the Nebraska Department of Education publishes only the cohort four-year graduation rate and the corresponding number of students in the cohort who earned regular diplomas within four years, including the summer following their fourth year of high school. A **cohort four-year dropout rate** *cannot* be calculated simply by subtracting the cohort four-year graduation rate from 100 percent. Additionally, the number of students in a cohort who drop out of school *cannot* be calculated by subtracting the number of regular diploma recipients from the total number of students in the cohort. Such calculations are invalid because the number of students in a cohort who did not receive regular diplomas includes students who are still in school, received other certificates, awards and diplomas, such as the GED, as well as students who dropped out of school.

Although cohort four-year dropout rates by gender or race/ethnicity are not available for analysis, the Nebraska Department of Education (NDE) provides the Commission with the **total number of students in the 7th through 12th grades who dropped out of school** during the school year. In addition, the NDE provides this information by race/ethnicity and by gender. The Commission also downloads membership data from the NDE website for 7th through 12th grade students by gender and by race/ethnicity.

<u>Table 1.1.a.3</u> compares Nebraska public school fall membership for 7^{th} to 12^{th} graders to the number of students in the 7^{th} to 12^{th} grades who dropped out in 2013–2014.

- Interestingly, while fall membership increased 1.1% from 2012–2013 (131,141 vs 132,594), the number of dropouts increased 7.4% from 2012–2013 to 2013–2014 (1,371 vs 1,473).
- As evidenced in <u>Table 1.1.a.3</u>, white non-Hispanics accounted for 673, or 45.7%, of the students in the 7th to 12th grades who dropped out in 2013–2014.
- However, compared to their white classmates, all other racial/ethnic groups accounted for disproportionately higher percentages of the students who dropped out of school relative to the percentages of students included in fall membership counts for 7th to 12th graders in 2013–2014.

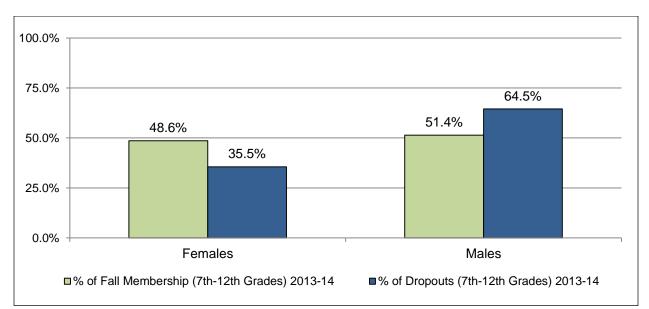

⁸For the details of this analysis, see the 2011 Nebraska Higher Education Progress Report (Section 1.1.a), which is available on the Commission's website: www.ccpe.ne.gov.

| Distributions of F from the | Public School 7 th through 1 | ble 1.1.a.3 Fall Member 2 th Grades by)13–2014 | | | its |
|--|--|---|------------------|----------|------------|

| American Indian/Alaska Native | 1,809 | 1.4% | 60 | 4.1% | 3.3% |
| Black (non-Hispanic) | 8,521 | 6.4% | 201 | 13.6% | 2.4% |
| Two or More Races | 3,917 | 3.0% | 65 | 4.4% | 1.7% |
| Public Total | 132,594 | | 1,473 | | 1.1% |
| Note. See <u>Table A3.4</u> in <u>Appendix 3</u> Reporting System – Quick Facts, Fe 2015 (dropouts). | | | | | |

Based on the same type of analysis by gender, as evidenced in <u>Figure 1.1.a.9</u>, males accounted for 51.4% of 7th to 12th grade fall membership at Nebraska's public schools in 2013–2014, but 64.5% of the students in the 7th to 12th grades who dropped out of school.

Percentages of Public School Fall Membership and Total Dropouts from the 7th through 12th Grades by Gender 2013–2014

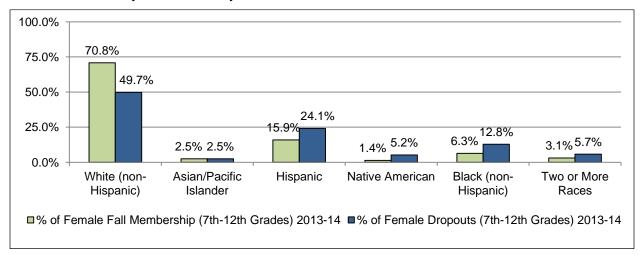

Note. See <u>Table A3.4</u> in <u>Appendix 3</u> for supporting data. Data source: Nebraska Department of Education, Data Reporting System – Quick Facts, February 2015 (fall membership); Nebraska Department of Education, January 2015 (dropouts).

 <u>Figure 1.1.a.10</u> shows that disproportionately higher percentages of male and female students who are Hispanic, Native American, black non-Hispanic, or multiracial dropped out of school in 2013–2014, relative to their representation among 7th to 12th grade fall membership at Nebraska's public schools in 2013–2014.

Figure 1.1.a.10

Percentages of Public School Fall Membership and Total Dropouts from the 7th through 12th Grades by Gender and Race/Ethnicity 2013–2014

Part A: Females by Race/Ethnicity

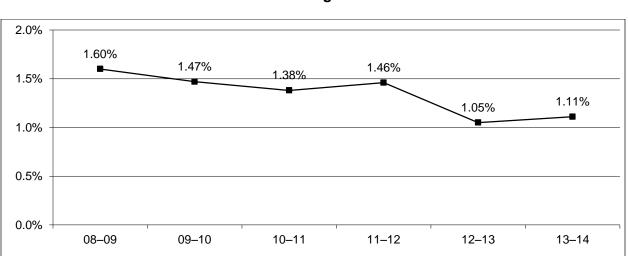

Part B: Males by Race/Ethnicity

Note. See <u>Table A3.4</u> in <u>Appendix 3</u> for supporting data. Data source: Nebraska Department of Education, Data Reporting System – Quick Facts, February 2015 (fall membership); Nebraska Department of Education, January 2015 (dropouts).

The findings reported in the preceding tables and charts clearly indicate that greater effort needs to be exerted to reduce the number of students who are dropping out of Nebraska's public schools each year, regardless of their gender or race/ethnicity. At the same time, an even greater effort should be exerted to encourage minority students to stay in school and continue on to college or some form of postsecondary training.

Nebraska Public Schools Dropout Rates

As shown in <u>Figure 1.1.a.11</u>, dropout rates for 7th- to 12th-graders from Nebraska's public schools have declined from 1.60% in 2008–2009 to 1.11% in 2013–2014. See <u>Table A3.5</u> in <u>Appendix 3</u> for district dropout rates.

Note. See <u>Table A3.5</u> in <u>Appendix 3</u> for supporting data. Data source: Nebraska Department of Education, 2013–2014 State of the Schools Report, retrieved January 28, 2015.

State Dropout Rates for 7th- to 12th-Graders from Nebraska Public Schools 2008–2009 through 2013–2014

1.1.b Preparation for College

Increase the proportion of Nebraska high school graduates who are adequately prepared to enroll in postsecondary education and proceed through degree completion.

The results of the ACT Assessment and the SAT Reasoning Test[™] are summarized in this section as indicators of the extent to which Nebraska high school graduates are prepared academically to enter and proceed through postsecondary education. Of particular interest are (1) the estimated percentages of Nebraska high school graduates who are prepared for college-level coursework and (2) the higher average ACT scores achieved by students who take the "core" high school courses recommended to prepare them for college.

Nebraska Participation Rates for the ACT Assessment and the SAT Reasoning Test

- The ACT Assessment is the predominant college entrance exam available to measure the extent to which Nebraska students are prepared for academic coursework beyond high school. As shown in <u>Figure 1.1.b.1</u>, 77.2% of the Nebraska high school students in the graduating class of 2014 took the ACT Assessment (down from 78.4% in 2013). In comparison, 3.4% of the students took the SAT Reasoning Test in 2014.
- The recent increase in participation rates for the ACT Assessment is at least partially due to the Nebraska ACT Pilot Project. Funded by the Nebraska Legislature, this project requires all 11th graders in eight selected Nebraska public school districts to take the ACT during a school day in the spring of 2012, 2013, and 2014.
- The participation rate for the ACT was 1.1 percentage points higher in 2014 than in 2004 while the rate for the SAT was 4.2 percentage points lower in 2014 than in 2004.

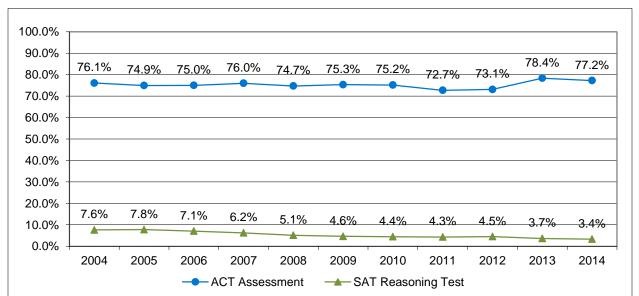

Figure 1.1.b.1

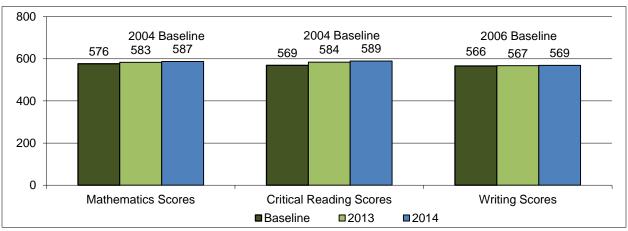

Percentages of Nebraska High School Graduates Who Took the ACT Assessment and/or the SAT Reasoning Test 2004–2014

Note. See <u>Table A4.1</u> in <u>Appendix 4</u> for supporting data. Data sources: ACT, Inc., College Examination Board and the Nebraska Department of Education.

Nebraska SAT Reasoning Test Scores

The three components of the SAT Reasoning Test measure achievement in mathematics, critical reading and writing.

• As shown in <u>Figure 1.1.b.2</u>, the average mathematics scores of Nebraska high school students were four points higher in 2014 than in 2013 and 11 points higher than in 2004. Average critical reading scores were five points higher in 2014 than in 2013, up a total of 20 points since 2004, while average writing scores increased two points from 2013 to 2014, up a total of three points since this test component was introduced in 2006.

Data Source: College Examination Board, State Reports 2004, 2013 and 2014.

 As shown in <u>Table 1.1.b.1</u>, the average math, critical reading, and writing scores of Nebraska high school students who took the SAT continued to be well above the national averages in 2014. However, it is important to note that only a relatively small number of students (772) in Nebraska took the SAT in 2014.

| Table 1.1.b.1 National and Nebraska Average SAT Reasoning Test Scores 2004–2014 | | | | | | | | | |

| 2014 | 513 | 587 | 497 | 589 | 487 | 569 | | | |

Nebraska ACT Assessment Scores

The ACT Assessment consists of four curriculum-based achievement tests in English, reading, mathematics and science. A student's scores for each of these tests are reported on a 36-point scale. A composite score is reported on a 36-point scale to reflect the student's overall performance on the series of four tests.

- As shown in <u>Figure 1.1.b.3</u>, the average ACT composite score for Nebraska high school students in the graduating class of 2014 was 21.7 (which is the same composite score as 2004, the baseline for this report), up from 21.5 in 2013. Nebraska's 2014 average ACT composite score was 0.7 points higher than the national average of 21.0.
- There are two known reasons for the recent decline in the average ACT composite score.
 - First, starting in 2013, extended time test takers are included in national and state composite scores. The average ACT composite score for extended time test takers in 2014 was 17.1. Without extended time students, Nebraska's average composite score would increase 0.1 points to 21.8.⁹
 - Second, the Nebraska ACT Pilot Project required all 11th graders in eight selected Nebraska public school districts to take the ACT during a school day in the spring of 2012, 2013, and 2014. The net effect of this project on ACT scores is unknown as the Commission does not know which students would have taken the ACT Assessment had it not been required.

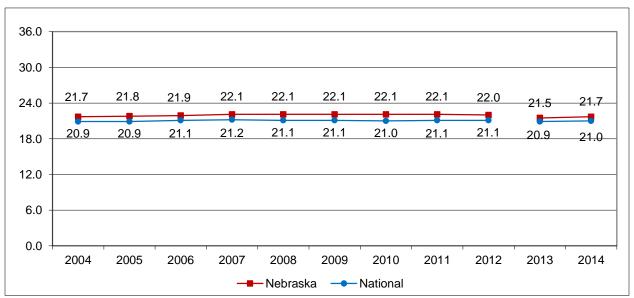

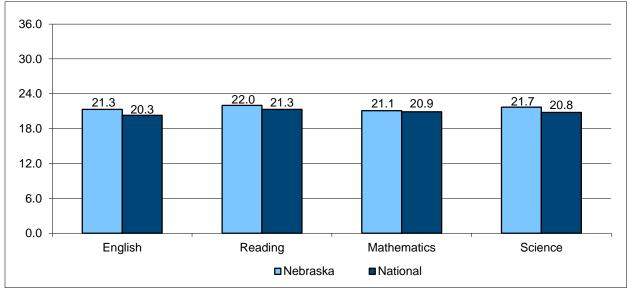

Figure 1.1.b.3

Comparison of Nebraska and National Average ACT Composite Scores for the High School Graduating Classes of 2004–2014

Note. Beginning with the graduating class of 2013, scores for extended time test takers are included in reported ACT composite scores. Data source: ACT High School Profile Reports for Nebraska, 2004–2014.

⁹ Students with disabilities are provided reasonable accommodations appropriate to the student's disability. Approved students have up to five total hours (50% more time) to complete all four multiple-choice tests.

- Based on information from ACT, Inc., Nebraska had the highest average composite score among the five states where an estimated 80% to 94% of the 2014 high school graduates took the ACT Assessment. However, direct state-to-state comparisons are generally not advisable.¹⁰
- <u>Figure 1.1.b.4</u> shows that Nebraska students in the 2014 graduating class scored above the national average on each of the subject-area tests that constitute the ACT Assessment.
- Since 2013, the national and Nebraska average ACT scores either increased or stayed the same in all four subject-areas.

Comparison of National and Nebraska Average ACT Scores in English, Reading, Mathematics and Science for the Graduating Class of 2014

Data source: ACT High School Profile Report for Nebraska, 2014.

¹⁰ The ACT Assessment is administered in all 50 states, and it is the predominant college entrance exam taken in about half of the states. Nationally, 1,845,787 (an estimated 57%) of the students in the high school graduating class of 2014 took the ACT Assessment. Each year, average ACT scores are reported for every state, but state-to-state comparisons are not advisable for several reasons. Currently, Colorado, Illinois, Kentucky, Louisiana, Michigan, Mississippi, Montana, North Carolina, North Dakota, Tennessee, Utah, and Wyoming are the only states where the ACT Assessment is administered to 95% or more of the students who will graduate from high school. In all other states, the students who take the ACT are generally self-selected and, as a result, do not necessarily represent the total student populations of their states. Furthermore, the percentages of students who take the ACT vary greatly from one state to another, as do other factors that affect student achievement, such as the quality of school systems and the demographic and socio-economic characteristics of students and their families. For these reasons, specific state-to-state comparisons are not included in this report.

ACT College Readiness Benchmark Scores

Based on research conducted by ACT, Inc., students are prepared to succeed in entrylevel college courses if their scores on the ACT Assessment meet or exceed ACT College Readiness Benchmark Scores. A *benchmark score is the minimum score needed on an ACT subject-matter test to indicate that a student has a 50% chance of earning a B or higher or about a 75% chance of earning a C or higher in related entry-level, credit-bearing college courses.* Corresponding to the subject-matter tests that constitute the ACT Assessment, these courses include English composition, social sciences, college algebra, and biology. For each college course or subject area, the 2014 ACT subject-area test and College Readiness Benchmark Scores are:

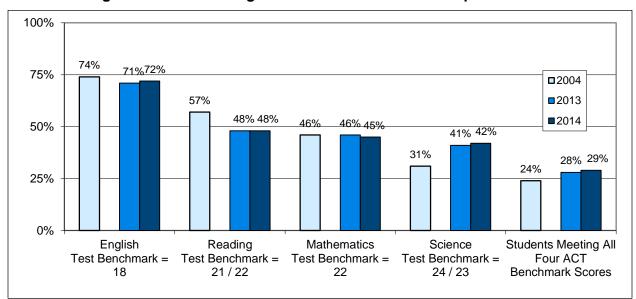

| College Course or Area | ACT Subject-Area Test | College Readiness Benchmark Score ¹¹ |
|---------------------------------------|------------------------|--|
| English Composition Social Science | English | 18 22 |
| College Algebra | Reading Mathematics | 22 |
| Biology | Science | 23 |

Percentages of Nebraska ACT-Tested Students Ready for College-Level Coursework

- Based on the data summarized in <u>Figure 1.1.b.5</u>, 72% of the ACT-tested Nebraska high school graduates in 2014 met or exceeded the College Readiness Benchmark Score of 18 on the ACT English test, indicating that there is a relatively high probability that these students will earn at least a C in college-level English composition courses.
- In comparison, 48% met or exceeded the College Readiness Benchmark Score of 22 on the reading test; 45% met or exceeded the mathematics benchmark score of 22 for college algebra; and only 42% met or exceeded the science benchmark score of 23 for biology.
- Between 2004 and 2014, the percentages of Nebraska students who met or exceeded ACT College Readiness Benchmarks on the English, reading, and mathematics tests decreased two, nine, and one percentage points, respectively. The only increase seen from 2004 to 2014 was for the science benchmark, which increased 11 percentage points.
- Between 2013 and 2014, the percentage of Nebraska students who met or exceeded ACT College Readiness Benchmark for mathematics decreased one percentage point, and the percentage who met or exceeded the benchmark for reading remained the same.
 Meanwhile, the percentage of Nebraska students who met or exceeded the benchmarks for English and science increased one percentage point each.
- Only 29% of Nebraska's high school graduates in the class of 2014 met or exceeded the ACT College Readiness Benchmarks in all four subject areas included in the ACT Assessment. This percentage is five points higher than in 2004 and one point higher than in 2013, but it is still relatively low.

¹¹ Beginning in 2013, the reading benchmark score increased from 21 to 22 and the science benchmark score decreased from 24 to 23.

Note. A benchmark score is the minimum score needed on an ACT subject-matter test to indicate that the student has a 50% chance of earning a B or higher or about a 75% chance of earning a C or higher in corresponding entry-level, credit-bearing college courses. Beginning in 2013, the reading benchmark score increased from 21 to 22, the science benchmark score decreased from 24 to 23, and scores for extended time test takers are included in reported ACT composite scores. See <u>Table A4.2</u> in <u>Appendix 4</u> for supporting data. Data source: ACT High School Profile Report for Nebraska, 2004, 2013 and 2014.

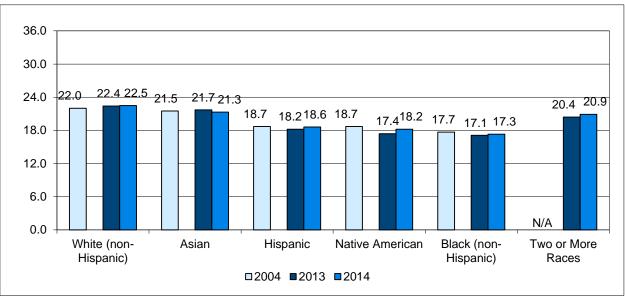

Changes in the Number of Students Who Took the ACT Assessment

- The largest change in the number of students who took the ACT Assessment in 2014 was the increase in the number of Hispanics: 2,020 in the class of 2014, up from 1,831 in the class of 2013, an increase of 189 students (10.3%) in only one year.
- Also reflecting Nebraska's changing demographics, 31 fewer white non-Hispanics took the ACT Assessment in 2014 than in 2013, a decrease of 0.2%.
- See <u>Table A4.4</u> in <u>Appendix 4</u> for the number of students in each racial/ethnic group who took the ACT Assessment in 2004 and from 2009 through 2014.

ACT Composite Scores and College Readiness Percentages by Race/Ethnicity

- <u>Figure 1.1.b.6</u> shows that average ACT composite scores and the percentages of students who meet or exceed ACT College Readiness Benchmark Scores vary by race/ethnicity.
- The average composite scores for Asians, Hispanics, Native Americans, black non-Hispanics, and multiracial persons who graduated from Nebraska high schools in 2004, 2013, and 2014 were lower than the average composite scores of their white non-Hispanic classmates.

- Between 2013 and 2014, average composite scores increased for all racial/ethnic groups, except for Asians, whose average composite score decreased 0.4 points.
- The average composite scores of white non-Hispanics increased 0.5 points between 2004 and 2014. Meanwhile, the average scores of Asians, Hispanics, Native Americans and black non-Hispanics decreased 0.2, 0.1, 0.5, and 0.4 points, respectively.
- However, it is unknown how much of the overall decline was attributable to the inclusion of extended time test takers and students who took the ACT Assessment only because they were required to do so through the Nebraska ACT Pilot Project, and how much of the decline is attributable to other variables.

Nebraska Average ACT Composite Scores by Race/Ethnicity 2013 and 2014 Compared to 2004 Baseline

Figure 1.1.b.6

Note. Beginning with the graduating class of 2013, scores for extended time test takers are included in reported ACT composite scores. Prior to 2011, the Asian category included Native Hawaiians and other Pacific Islanders. Average composite scores for Native Hawaiians and other Pacific Islanders are excluded from this figure due to the small number of individuals in this racial category who took the ACT Assessment. In 2013, 19 Native Hawaiians and other Pacific Islanders took the ACT Assessment with an average composite score of 19.5. In 2014, 12 Native Hawaiians and other Pacific Islanders took the ACT Assessment with an average composite score of 19.6. These students are not included in the calculation of the average composite score for Asians in 2013 or 2014. Prior to 2011, ACT did not have a racial/ethnic category for individuals who were more than one race. Data source: ACT High School Profile Report for Nebraska, 2004, 2013, and 2014.

- Based on the data for the graduating class of 2014 summarized in <u>Figure 1.1.b.7</u>, lower percentages of Hispanics, Native Americans, and black non-Hispanics are sufficiently prepared for college-level coursework, compared to their white non-Hispanic, Asian, or multiracial classmates.
- For example, only 22% of the ACT-tested Hispanics in the class of 2014 met or exceeded the ACT College Readiness Benchmark Score in mathematics, compared to 51% of the white non-Hispanic students, 53% of the Asian students, and 33% of the multiracial students. More dramatically, only 18% of the ACT tested Native Americans and 13% of the ACT tested black non-Hispanics met or exceeded the benchmark score in mathematics. The same pattern is evidenced for the other three ACT subject-matter tests as well as the percentage of students who met all four ACT benchmark scores.

• In fact, 33% of white non-Hispanics, 29% of Asians, and 23% of multiracial students met or exceeded the benchmarks for all four subject-matter tests in 2014, while only 11% of Hispanics, 10% of Native Americans and 6% of black non-Hispanics met or exceeded the benchmarks for all four subject-matter tests.

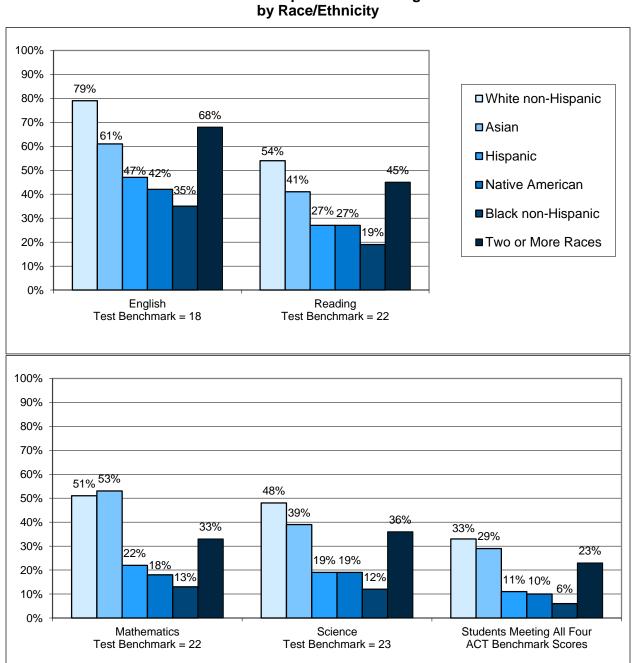

Figure 1.1.b.7

Percentages of ACT-Tested High School Students in the Graduating Class of 2014 Who Met or Exceeded ACT College Readiness Benchmark Scores That Indicate Sufficient Preparation for College-Level Courses

Note. A benchmark score is the minimum score needed on an ACT subject-matter test to indicate that the student has a 50% chance of earning a B or higher or about a 75% chance of earning a C or higher in corresponding entry-level, credit-bearing college courses. Data for Native Hawaiians and other Pacific Islanders are excluded from this figure due to the small number of individuals in this racial category (12) who took the ACT Assessment. Data source: ACT High School Profile Report for Nebraska, 2014.

The Importance of the ACT-Recommended High School Core Curriculum

ACT, Inc. defines the core, college-preparatory high school curriculum (i.e., the core) as consisting of four years of English and three or more years each of social studies, science, and mathematics (beginning with Algebra I). Specifically, the core is defined as consisting of the following courses:

- <u>4 years of English</u>: English 9, English 10, English 11, and English 12
- <u>3 years of Math</u>: Selected from Algebra I, Algebra II, Geometry, Trigonometry, and Calculus
- <u>3 years of Social Sciences</u>: Selected from American History, World History, American Government, Economics, Geography, and Psychology
- <u>3 years of Natural Sciences</u>: Selected from General/Physical/Earth Science, Biology, Chemistry, and Physics

When students register to take the ACT Assessment, they are asked to report the courses they have taken or plan to take before they graduate from high school. Based on the combinations of courses that students report they have taken or plan to take, ACT, Inc. conducts research to determine how taking the core—or more than the core—is related to scores on the ACT Assessment and academic achievement in college.

- The research conducted by ACT, Inc. has repeatedly confirmed that students who complete the high school core generally score higher on the ACT Assessment and are more likely to progress successfully through postsecondary education programs than students who do not complete the recommended core courses.
- Furthermore, research conducted by ACT, Inc. indicates that students who take rigorous courses beyond the recommended minimum number of core courses are even more likely to be ready for college than students who take the minimum core. This research indicates that students whose coursework beyond the core includes advanced courses in mathematics, such as trigonometry or calculus, as well as courses in biology, chemistry and physics, are the likeliest of all high school students to be ready for college-level coursework.¹²

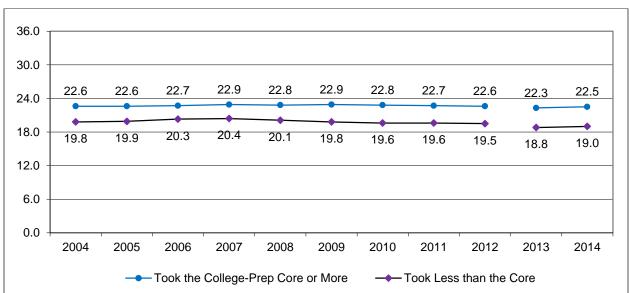

Consequently, it is important to monitor the average ACT composite scores of students who report that they completed the core—or more than the core—compared to the scores of students who report taking less than the minimum core courses.

<u>Nebraska ACT Composite Scores of Students Who Take the ACT-Recommended Core</u> and Students Who Take Less than the Core Curriculum

- As shown in <u>Figure 1.1.b.8</u>, Nebraska students who have taken or plan to take the core college preparatory courses—or more than the core—in high school have consistently scored higher on the ACT than the students who have completed or plan to complete less than the minimum core.
- Of the ACT-tested students in the class of 2014, those who took the core or more had an average composite score of 22.5 compared to an average score of 19.0 for the students who reported that they took courses that did not meet the minimum core requirements.

¹² Executive Summary, *Crisis at the Core: Preparing All Students for College and Work*, ACT, Inc., 2004, page 3, available at www.act.org/research/policymakers/pdf/crisis_exec_summary.pdf.

- The average ACT composite score for the students who took the core or more was 0.1 points lower in 2014 than it was in 2004 while the average score for students who took less than the core was 0.8 points lower in 2014 than it was in 2004.
- The average ACT composite score of Nebraska students who have taken less than the core increased from 18.8 in 2013 to 19.0 in 2014. Similarly, the average score for those who took the core or more increased from 22.3 in 2013 to 22.5 in 2014.
- Regardless of score variations, the data summarized in <u>Figure 1.1.b.8</u> provides strong evidence that taking the college-preparatory curriculum continues to have a positive effect on ACT composite scores and improves a student's chances for achieving academic success in college-level courses.

Nebraska Average ACT Composite Scores of Students Who Took the College-Preparatory Core and Students Who Took Less than the Core 2004–2014

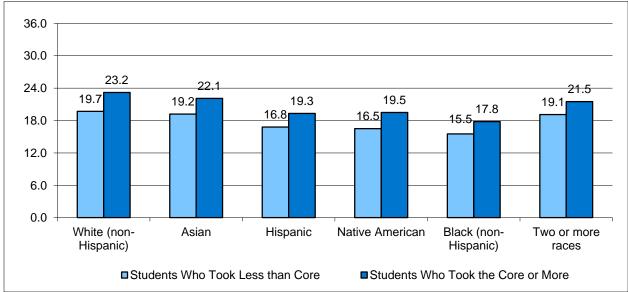

Note. ACT, Inc. defines the core college-preparatory high school curriculum (or what is simply called "the core") as consisting of four years of English and three or more years each of social studies, science, and mathematics (beginning with Algebra I). Beginning with the graduating class of 2013, scores for extended time test takers are now included in reported ACT composite scores. Data source: ACT High School Profile Reports for Nebraska, 2004–2013.

Note: Beginning with the 2014–2015 school year, Nebraska school districts are required to adopt and implement graduation requirements that include meeting standards similar to those represented by the core, college-preparatory high school curriculum advocated by ACT, Inc. Prior to adoption of the new statewide standards, Nebraska high school graduation requirements were set by each school district individually and may or may not have included "the core" as defined by ACT, Inc. Data source: Nebraska Department of Education, Rule 10, Regulations and Procedures for the Accreditation of Schools (pages 4-5), September 15, 2012.

• Taking "the core or more" helps students of every race/ethnicity. Within each of the six racial/ethnic groups, the average ACT composite score was higher for the students in the graduating class of 2014 who took the college-preparatory core than the average score for students who took less than the core, as illustrated in Figure 1.1.b.9.

Figure 1.1.b.9

2014 Nebraska ACT Composite Scores for Students Who Took the College-Preparatory Core or More and Students Who Took Less than the Core by Race/Ethnicity

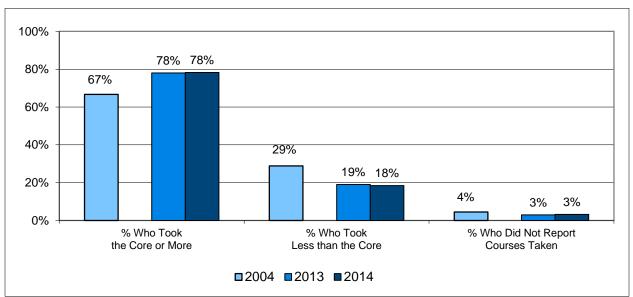

Note. Numbers of students tested: White (non-Hispanic) 13,220, Asian 458, Hispanic 2,020, Native American 116, black non-Hispanic 755, Native Hawaiian and other Pacific Islanders 12, two or more races 610, and no information on race/ethnicity 577. In this chart, Asian does not include the 12 Native Hawaiians and other Pacific Islanders who were tested. Data source: ACT High School Profile Report for Nebraska, 2014.

The Percentage of Nebraska ACT-Tested Students Who Take the Core or More

As mentioned earlier in this section, the students themselves report the courses they have taken and plan to take before they graduate from high school when they register for the ACT Assessment. Self-reporting may make the data less accurate and/or less reliable. However, the percentage of ACT-tested students who reported the courses they took or planned to take in high school was 96% in 2004, 97% in 2013, and 97% in 2014.

• A direct comparison of 2004, 2013, and 2014 percentages indicates that the percentage of high school students who take the core or more noticeably increased over the past 10 years. As shown in <u>Figure 1.1.b.10</u>, the percentage of students who reported that they took the core or more was 11 percentage points higher in 2014 than in 2004.

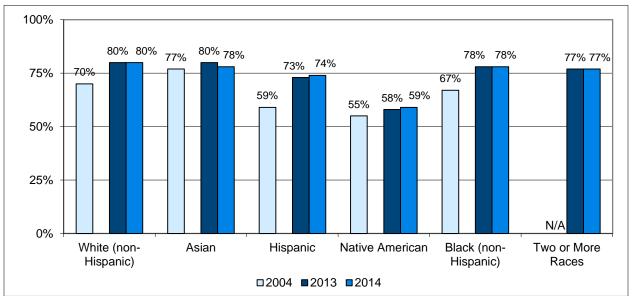

Percentages of Nebraska's ACT-Tested Students Who Took the College-Preparatory Core or More and Students Who Took Less than the Core 2013 and 2014 Compared to 2004 Baseline

Note. Beginning with the graduating class of 2013, scores for extended time test takers are included in reported ACT composite scores. See <u>Table A4.3</u> in <u>Appendix 4</u> for supporting data. Data source: ACT High School Profile Report for Nebraska, 2004, 2013, and 2014.

- <u>Figure 1.1.b.11</u> shows that, since 2004, there has been a general increase in the percentage of the ACT-tested students in each of the major racial/ethnic groups who have reported taking the core or more in high school.
- A lower percentage of Asians in the graduating class of 2014 took the core or more compared to the 2013 graduating class. For all racial/ethnic groups, either the same percentage or a higher percentage reported taking the core or more in the graduating class of 2014 than in the graduating class of 2013.
- As shown in <u>Figure 1.1.b.12</u>, lower percentages of Hispanic, Native American, and black non-Hispanic high school graduates in Nebraska have been taking the ACT Assessment than their white non-Hispanic, Asian/Pacific Islander, and multiracial classmates.¹³
- Between 2013 and 2014, ACT participation rates increased for Hispanics, Native Americans, and multiracial students but declined for all other racial/ethnic groups.

¹³ Beginning in 2011, the Asian category includes Native Hawaiians and other Pacific Islanders.

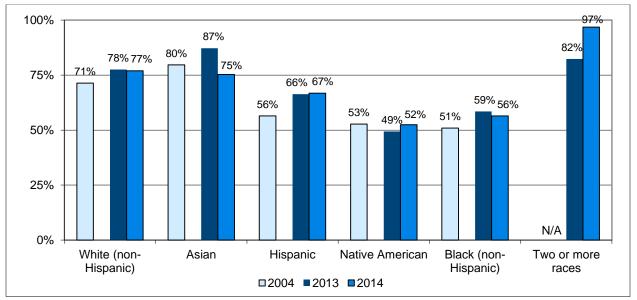

Percentage of Nebraska ACT-Tested Students Who Reported That They Took the College-Preparatory Core or More by Race/Ethnicity 2013 and 2014 Compared to 2004 Baseline

Note. Beginning with the graduating class of 2013, scores for extended time test takers are included in reported ACT composite scores. Prior to 2011, ACT did not have a racial/ethnic category for individuals who were more than one race. Data for Native Hawaiians and other Pacific Islanders are excluded from this figure due to the small number of individuals in this racial category who took the ACT Assessment. Data source: ACT High School Profile Report for Nebraska, 2004, 2013, and 2014.

Figure 1.1.b.12

Note. Beginning with the graduating class of 2013, scores for extended time test takers are included in reported ACT composite scores. Asian graduates include Asians as well as Native Hawaiians and other Pacific Islanders. Prior to 2011, ACT did not have a racial/ethnic category for individuals who were more than one race. See <u>Table A4.4</u> in <u>Appendix 4</u> for supporting data. Data sources: Nebraska Department of Education and ACT High School Profile Report for Nebraska for 2004, 2013, and 2014.

1.1.c College Continuation Rates

Increase the proportion of Nebraska high school graduates who enroll in postsecondary education.

One strategic approach to increasing the total number of students who enroll at Nebraska's postsecondary institutions is to increase the state's college continuation rate, or the percentage of Nebraska high school graduates who go to college. Increasing the state's college continuation rate is also one of the primary goals of Nebraska's P-16 Initiative. (Since a college-going rate is the same as a college continuation rate, the two terms are used interchangeably in this report.)

Introduction: Two Measures of Nebraska's College Continuation Rates

This section of the *Nebraska Higher Education Progress Report* provides estimates of the state's college continuation rate based on two different approaches to data collection and analysis. The first approach relies on data collected every two years through the Integrated Postsecondary Data System (IPEDS) maintained by the National Center for Education Statistics (NCES) in the U.S. Department of Education. The second approach is an annual study that is based on data obtained from the National Student Clearinghouse (NSC) in cooperation with the Nebraska Department of Education.

College Continuation Rates Based on IPEDS Data

The Coordinating Commission estimates Nebraska's college continuation rates using IPEDS data that are collected every other year in the fall. The Nebraska Department of Education provides the total number of students who graduated from Nebraska public and private high schools during the school year preceding IPEDS data collection. Given the number of high school graduates, the Commission uses IPEDs data to estimate how many of these Nebraskans continued on to college at degree-granting and non-degree-granting institutions throughout the United States.

Using available data from IPEDS, college continuation rates are estimated only for firsttime freshmen who start college in the fall term or preceding summer of the academic year following their graduation from high school. First-time freshmen who wait to start college until after the fall term are not included. College continuation rates do not account for these students because the NCES does not require institutions to report when each of the students in this category graduated from high school.

Another limitation of the college continuation rates based on IPEDS data is that they cannot be calculated for any subgroups based on gender, race/ethnicity, household income, or any other demographic or socioeconomic variable. Using IPEDS data, a college continuation rate can be estimated only for the total number of students who graduated from Nebraska high schools during a given school year.

An important advantage of using IPEDS data is that the National Center for Education Statistics has consistently collected these data for a number of years, allowing the Commission to calculate and publish statewide college continuation rates for degree- and non-degreegranting institutions for an extended period of time. In addition, IPEDS data are currently the only source that research organizations can use to calculate a national college continuation rate and make state-to-state comparisons of college-going rates. The latest available IPEDS data were reported by institutions for first-time freshmen who started college in fall 2012, providing a basis for estimating the college continuation rate for students who graduated from Nebraska high schools during the 2011–2012 school year. In this report, the estimated college continuation rate for fall 2012 is compared to estimates for previous years, including fall 2002, which is the baseline for this report.

College Continuation Rates Based on National Clearinghouse Data

An approach to estimating college continuation rates that overcomes major limitations of using IPEDS data is to use data available from the National Student Clearinghouse (NSC). The NSC is a not-for-profit organization that serves as a central repository of postsecondary student enrollment, degree, and diploma data voluntarily submitted by more than 3,600 colleges and universities. These institutions enroll about 96% of the college students in the United States.¹⁴

Since the beginning of 2009, the Coordinating Commission has worked in cooperation with the Nebraska Department of Education to obtain and analyze data from the NSC to estimate the college continuation rates for male and female low-income and non-low-income students who have graduated from Nebraska's public high schools. Currently, students who have graduated from Nebraska's nonpublic (or private) high schools are not included in the analysis. However, this research has the important advantage of providing estimates and comparisons of college continuation rates by gender and student income status. Another advantage is that this research is conducted in the spring of the year following high school graduation. As a result, students who do not start college in the summer or fall immediately following high school graduation but who instead wait to begin college until the winter or spring are included in the count of the state's public high school graduates who continued on to college.

The Coordinating Commission has estimated college continuation rates for the students who graduated from Nebraska's public high schools during the 2007–2008 through 2012–2013 school years, using data obtained from the National Student Clearinghouse. The findings of this research are summarized at the end of this section.

¹⁴ Data source: National Student Clearinghouse Research Center, Enrollment Coverage Workbook, updated November 20, 2014.

Nebraska Statewide College Continuation Rates Based on IPEDS Data

- Using IPEDS data, the college continuation rate is the number of Nebraska-resident, firsttime freshmen who enrolled in college in the summer or fall term within 12 months of high school graduation, divided by the number of students who graduated from Nebraska high schools during the previous school year.
- As evidenced in <u>Figure 1.1.c.1</u>, the estimated college continuation rate for Nebraska high school graduates who attended <u>degree-granting institutions</u> anywhere in the United States rose from 62.2% in fall 2002, which is the baseline for this report, to 65.1% in fall 2012. While this estimate corresponds to an increase of 2.9 percentage points since baseline, it is also a decrease of 4.0 percentage points since fall 2010.

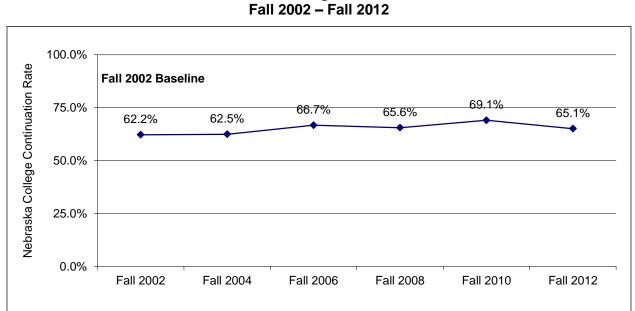

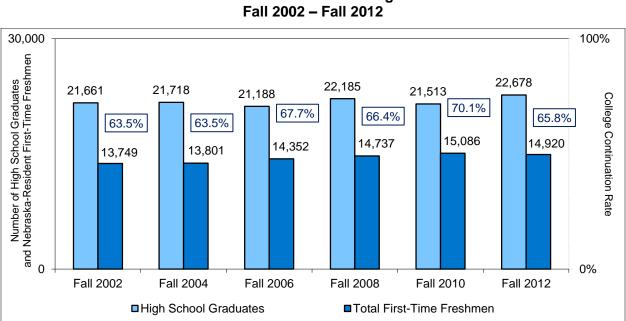

Figure 1.1.c.1 College Continuation Rate for Nebraska High School Graduates

Who Attended <u>Degree-Granting Institutions</u> in the United States within 12 Months of High School Graduation

Note. Includes full-time and part-time students. See <u>Table A5.1</u> in <u>Appendix 5</u> for supporting data and a technical note. Data sources: Nebraska Department of Education, January 2007, January 2009, January 2011, and December 2013, and the National Center for Education Statistics, IPEDS fall 2002– 2012 surveys.

- Adding the number of high school graduates who attended <u>non-degree-granting</u> institutions slightly increases the estimated college continuation rate for Nebraska.
- As illustrated in <u>Figure 1.1.c.2</u>, the college continuation rate for Nebraska students who graduated in the high school class of 2012 and attended <u>degree-granting and non-degree granting colleges</u> in fall 2012 was 65.8%, an increase of 2.3 percentage points from the 63.5% continuation rate in 2002.

College Continuation Rate for Nebraska High School Graduates Who Attended <u>Degree-Granting and Non-Degree-Granting Institutions</u> in the United States within 12 Months of High School Graduation Fall 2002 – Fall 2012

Note. Includes full-time and part-time students. See <u>Table A5.1</u> in <u>Appendix 5</u> for supporting data and a technical note. Data sources: Nebraska Department of Education, January 2007, January 2009, January 2011, and December 2013, and the National Center for Education Statistics, IPEDS fall 2002–2012 surveys.

State-by-State College Continuation Rates

- The most recent national study of college continuation rates is limited to students who attended <u>degree-granting institutions</u> as first-time freshmen in fall 2010 after graduating from high school during the 2009–2010 school year. ¹⁵
- As shown in <u>Figure 1.1.c.3</u>, Nebraska's fall 2010 estimated college continuation rate of 69.5% was the 7th highest in the 50-state comparison and 7.0 percentage points above the 50-state average.¹⁶
- Nebraska having the 7th-highest college-going rate in fall 2010 was a noticeable improvement from fall 2008, when Nebraska's college continuation rate was 65.5% and 18th highest among the 50 states.

¹⁵ The national report of college continuation rates for fall 2012 was expected to be released in late 2014. However, as of press time, the U.S. Department of Education has not yet released the number of public high school graduates by state for 2012.

¹⁶ Data source: Postsecondary Education OPPORTUNITY, www.postsecondary.org, College Continuation Rate Comparisons by State included in the 2010 Chance for College spreadsheet, updated January 22, 2013. The 69.5% estimated college continuation rate for Nebraska in the 50-state study is 0.4 percentage points higher than the rate of 69.1% that the Coordinating Commission estimated for fall 2010, as shown in <u>Figure 1.1.c.1</u>. This difference is due to the fact the number of Nebraska nonpublic (private) high school graduates was estimated to be 2,004 for the 50-state study, whereas the Commission used the actual number of nonpublic high school graduates the Nebraska Department of Education reported to the Commission, which was 2,143. In both cases, the number of public high school graduates was 19,370.

Data source: 2010 Chance for College by Age 19 Spreadsheet, updated January 22, 2013, Postsecondary Education OPPORTUNITY: www.postsecondary.org.

In-State and Out-of-State College Continuation Rates

- The statewide college continuation rate for Nebraska high school graduates can be partitioned into two rates:
 - <u>In-state college continuation rate</u>: the percentage of Nebraska high school graduates who attend postsecondary institutions in Nebraska within 12 months of high school graduation.
 - <u>Out-of-state college continuation rate</u>: the percentage of Nebraska high school graduates who continue on to college at out-of-state institutions within 12 months of graduating from high school.
- As illustrated in <u>Figure 1.1.c.4</u>, the Commission estimates Nebraska's <u>in-state college</u> <u>continuation rate</u> was 53.4% for the state's 2011–2012 high school graduates who attended degree-granting or non-degree-granting colleges. While this is an increase of 1.6 percentage points from 51.8% in fall 2002, it is a decrease of 5.3 percentage points since fall 2010. (See <u>Table A5.2</u> in <u>Appendix 5</u>.)
- Meanwhile, the <u>out-of-state college continuation rate</u> for both degree-granting and nondegree-granting schools increased slightly, from 11.6% of the high school graduating class of 2001–2002 to 12.4% of Nebraska high graduates in 2011–2012.
- The net effect of these increases is that the estimated percentage of Nebraska <u>high school</u> <u>graduates who did not go on to college within 12 months</u> decreased from 36.5% of the high school graduating class of 2001–2002 to 34.2% of the graduates in 2011–2012.
- As evidenced in <u>Table A5.2</u> in <u>Appendix 5</u>, the Commission estimates that the <u>in-state</u> <u>college continuation rate</u> for <u>degree-granting institutions</u> was 52.8% for Nebraska high school graduates in 2011–2012, (up from 50.6% for fall 2002). In comparison, the <u>out-of-state college continuation rate</u> for <u>degree-granting institutions</u> increased from 11.6% in fall 2002 to 12.3% in fall 2012.

In-State and Out-of-State College Continuation Rates for Nebraska High School Graduates Who Attended Degree-Granting and Non-Degree-Granting Institutions and the Percentage Who Did Not Go on to College within 12 Months of High School Graduation Fall 2012 Compared to Fall 2002

Fall 2002 Baseline 21,661 Nebraska High School Graduates

Note. Includes full-time and part-time students. Percentages do not always add to 100.0% due to rounding. See <u>Table A5.2</u> in <u>Appendix 5</u> for supporting data. Date sources: Nebraska Department of Education, January 2007 for 2001–02 high school graduates and December 2013 for 2011–12 graduates, and the National Center for Education Statistics, fall 2002 and fall 2012 IPEDS surveys.

Percentages of Students Who Continue Their Education at Public and Private Institutions

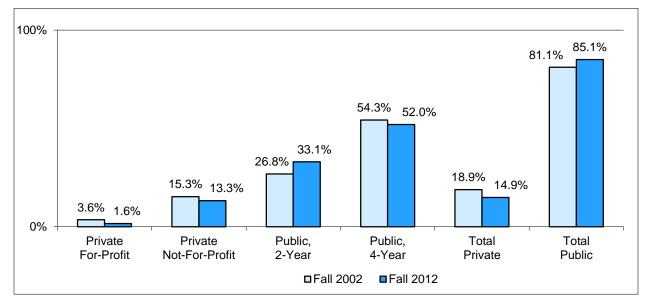

- Of related interest are the types of postsecondary institutions attended by recent graduates
 of Nebraska's high schools. As shown in <u>Part A</u> and <u>Part B</u> of <u>Figure 1.1.c.5</u>, the pattern of
 attendance of Nebraska-resident, first-time freshmen who go to college in Nebraska within a
 year of graduating from high school is different from the pattern of Nebraskans who go out
 of state to school their freshmen year.
- <u>Part A</u> of <u>Figure 1.1.c.5</u> shows that 85.1% of the fall 2012 first-time freshmen who stayed in state attended Nebraska's public colleges or universities, compared to 14.9% who went to Nebraska's private, for-profit or non-profit institutions.
- In contrast, <u>Part B</u> of <u>Figure 1.1.c.5</u> reveals that 58.9% of the fall 2012 first-time freshmen who went out of state attended public institutions, while 41.1% went to private institutions.

• <u>Figure 1.1.c.5</u> also shows that a higher percentage of Nebraska-resident first-time freshmen attended Nebraska's public, two-year community colleges in fall 2012 (33.1%) than in fall 2002 (26.8%). This trend also is evident among the first-time freshmen from Nebraska who attended out-of-state institutions within 12 months of high school graduation.

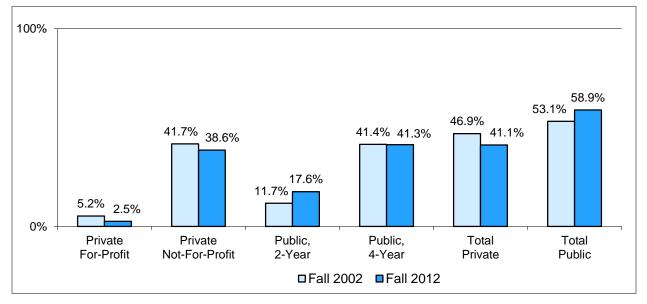

Figure 1.1.c.5

Percentages of First-Time Freshmen with Nebraska Residency Who Attended <u>Nebraska</u> and <u>Out-of-State</u>, Degree-Granting and Non-Degree-Granting Institutions Within 12 Months of High School Graduation Fall 2012 Compared to Fall 2002

Part A: Nebraska-Resident Freshmen Who Attended Nebraska Institutions

Part B: Nebraska-Resident Freshmen Who Attended Out-of-State Institutions

Note. Includes full-time and part-time students. FTF = first-time freshmen. See <u>Table A5.3</u> in <u>Appendix 5</u> for supporting data. Date source: National Center for Education Statistics, fall 2002 and fall 2012 IPEDS surveys.

College Continuation Rates for Male and Female Low-Income and Non-Low-Income Nebraska Public High School Graduates Based on National Student Clearinghouse Data

As mentioned in the introduction to this section, the Coordinating Commission worked with the Nebraska Department of Education (NDE) to estimate the college continuation rates for students who graduated from Nebraska <u>public</u> high schools during the 2007–2008 through 2012–2013 school years.

- These estimates included only "on time" graduates—students who graduated from high school in four years or less.
- In addition, students who graduated from Nebraska's nonpublic (private) high schools were not included in this research.

Using student records from the NDE and enrollment data from the Clearinghouse, the Coordinating Commission estimated the college continuation rate for all public high school students who earned regular diplomas between 2007–2008 and 2012–2013.¹⁷ In addition, the Commission asked the NDE to determine the number of male and female low-income students in these graduating classes and to determine how many of these students continued on to college by the following April, based on enrollment records obtained from the Clearinghouse. Using the counts provided by NDE, the Commission estimated the college continuation rates for male and female low-income and non-low-income students who graduated from Nebraska's public schools.

- <u>Low-income students</u> are defined as students who are approved to receive free or reduced-price school lunches.
- <u>Non-low-income students</u> are students who are not approved for free or reduced-price school lunches. The numbers of non-low-income graduates in each class were determined by subtracting the numbers of male and female low-income graduates from the total numbers of graduates provided by the NDE. The non-low-income students in this study included at least some students who lived in low-income households but who did not apply for free or reduced-price school lunches. Since participation in the free or reduced-price school lunch program is the only indicant of household income in the student records maintained by the Nebraska Department of Education, low-income students in the non-low-income category cannot be identified and excluded for the purposes of analysis.

The Commission's analysis of the college enrollment records received from the Clearinghouse indicated that these records did not include a few hundred students who continued on to college from Nebraska high schools each year. These students were not included because they attended private, not-for-profit colleges or for-profit colleges and career schools that do not submit enrollment records to the Clearinghouse. As a result, the college continuation rates reported in this section are underestimated to some degree.

¹⁷ The Commission has also estimated the college continuation rates for each of the public high schools in Nebraska that award regular high school diplomas. A report or downloadable Excel workbook for each of these analyses is available in the "Data Collection, Reports and Presentations" section of the Commission's website, www.ccpe.ne.gov, in the subsection titled "Nebraska College-Going Rates."

Statewide Public High School College Continuation Rate

- As shown in <u>Figure 1.1.c.6</u>, the estimated statewide public high school college continuation rate was 70.8% for the graduating class of 2012–2013, up from 69.0% for the students who graduated in 2007–2008.
- The statewide rates reported in <u>Figure 1.1.c.6</u> are based on Clearinghouse data and are higher than the Nebraska statewide college continuation rates based on IPEDS data. This is primarily because students who enrolled in the spring, but not in the fall or preceding summer, are included in National Student Clearinghouse enrollment records.

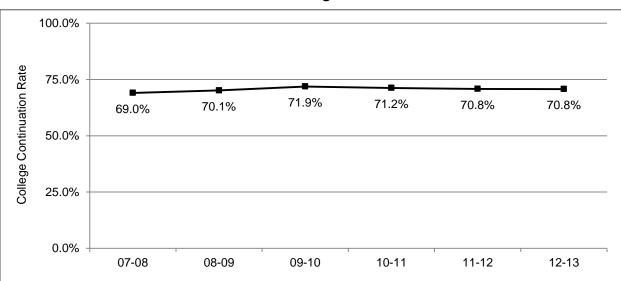

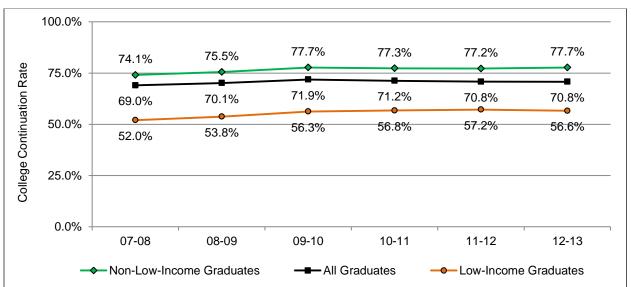

Figure 1.1.c.6

College Continuation Rates for Nebraska <u>Public</u> High School Graduates 2007–2008 through 2012–2013

Note. See <u>Table A5.4</u> in <u>Appendix 5</u> for supporting data. Data sources: For high school graduates, Nebraska Department of Education, April 2009, April 2010, April 2011, April 2012, April 2013, and April 2014; for number of graduates who enrolled in college, National Student Clearinghouse, April 2009, April 2010, April 2011, April 2012, August 2013, and April 2014.

College Continuation Rates for Public High School Graduates by Income Status

- Students from low-income households accounted for 33.0% of the Nebraska public high school graduates in 2012–2013, up from 22.9% in 2007–2008.
- As shown in <u>Figure 1.1.c.7</u>, the college-going rate for low-income graduates was considerably lower than the continuation rate for non-low-income graduates for the classes of 2007–2008 through 2012–2013.
- The college-going rate for the low-income students increased 4.6 percentage points, from 52.0% in 2007–2008 to 56.6% in 2012–2013. In comparison, the college continuation rate for the students from non-low-income households increased 3.6 percentage points, from 74.1% in 2007–2008 to 77.7% in 2012–2013.

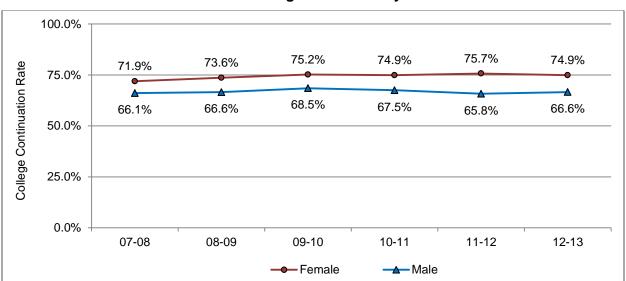

College Continuation Rates for Nebraska <u>Public</u> High School Graduates 2007–2008 through 2012–2013 by Student Income Status

Note. See <u>Table A5.4</u> in <u>Appendix 5</u> for supporting data. Data sources: For high school graduates, Nebraska Department of Education, April 2009, April 2010, April 2011, April 2012, April 2013, and April 2014; for number of graduates who enrolled in college, National Student Clearinghouse, April 2009, April 2010, April 2011, April 2012, August 2013, and April 2014.

Gender Differences Between Statewide Public High School College Continuation Rates

- Female and male students each accounted for about half of the graduates of Nebraska's public high schools from 2007–2008 through 2012–2013.
- However, as shown in <u>Figure 1.1.c.8</u>, the college continuation rate for female students in each of these graduating classes was considerably higher than the college continuation rate for their male classmates.
- While the college-going rate for females increased from 71.9% in 2007–2008 to 74.9% in 2012–2013, the college-going rate for males increased from 66.1% in 2007–2008 to 66.6% in 2012–2013.
- Between 2007–2008 and 2012–2013, the difference between the college-going rates of male and female graduates increased from 5.8 percentage points in 2007–2008 to 8.3 percentage points in 2012–2013.
- Interestingly, between 2011–2012 and 2012–2013, the college-going rate decreased 0.8 percentage points for females but increased 0.8 percentage points for males.

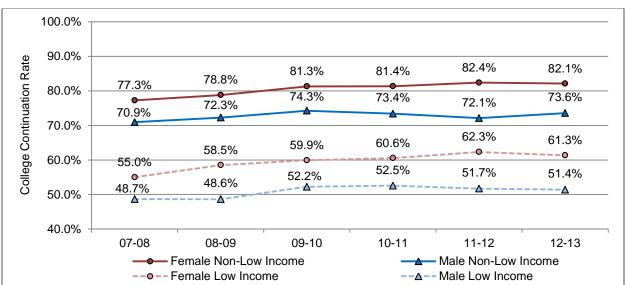

College Continuation Rates for Nebraska <u>Public</u> High School Graduates 2007–2008 through 2012–2013 by Gender

Note. See <u>Table A5.4</u> in <u>Appendix 5</u> for supporting data. Data sources: For high school graduates, Nebraska Department of Education, April 2009, April 2010, April 2011, April 2012, April 2013, and April 2014; for number of graduates who enrolled in college, National Student Clearinghouse, April 2009, April 2010, April 2011, April 2012, August 2013, and April 2014.

College Continuation Rates for Public High School Graduates by Gender and Income Status

- As shown in <u>Figure 1.1.c.9</u>, the college continuation rate for female graduates was higher than the rate for male graduates among both the low-income and non-low-income students who graduated between 2007–2008 and 2012–2013.
 - Among <u>low-income graduates</u> in 2007–2008, 55.0% of females continued on to college, compared to 48.7% of males. Among low-income graduates in 2012–2013, 61.3% of females continued on to college, compared to 51.4% of males.
 - Among <u>non-low-income graduates</u> in 2007–2008, 77.3% of females went to college, compared to 70.9% of males. Among non-low-income graduates in 2012–2013, 82.1% of females continued on to college, compared to 73.6% of males.
- Interestingly, between 2011–2012 and 2012–2013, college-going rates increased for male non-low-income high school graduates but decreased for the other three comparison groups.
- Directly comparing the students in the two income categories in <u>Figure 1.1.c.9</u> clearly shows the college continuation rates for low-income students has been considerably lower than the comparable rates for graduates from non-low-income households, regardless of gender.
- However, the lowest college continuation rates revealed by this research were for male high school graduates from low-income households.
- See <u>Table A5.4</u> in <u>Appendix 5</u> for supporting data.

College Continuation Rates for Nebraska <u>Public</u> High School Graduates 2007–2008 through 2011–2012 by Student Income Status and Gender

Note. See <u>Table A5.4</u> in <u>Appendix 5</u> for supporting data. Data sources: For high school graduates, Nebraska Department of Education, April 2009, April 2010, April 2011, April 2012, April 2013, and April 2014; for number of graduates who enrolled in college, National Student Clearinghouse, April 2009, April 2010, April 2011, April 2012, August 2013, and April 2014.

<u>Nebraska Statewide Public High School College Continuation Rates Compared to U.S.</u> <u>Rates by Gender</u>

<u>Figure 1.1.c.10</u> shows Nebraska's college continuation rates for male and female graduates of the state's public high schools in 2012–2013 compared to estimates of the college continuation rates for male and female students who graduated from all high schools in the United States in 2013.

The national estimates shown in <u>Figure 1.1.c.10</u> are based on data obtained from a supplement to the October 2013 Current Population Survey (CPS). The CPS is a monthly survey of about 60,000 households that provides information about the labor force, employment, and unemployment in the United States. Each October, a supplement to the CPS gathers more detailed information about school or college enrollment.

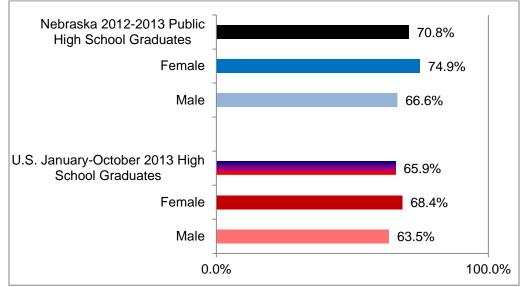

The U.S. Census Bureau conducts the October CPS supplement for the Bureau of Labor Statistics (BLS) in the U.S. Department of Labor. The annual BLS report on college enrollment and work activity of high school graduates is the <u>only available source</u> for estimated national college continuation rates by gender and race/ethnicity. The latest BLS report, released in April 2014, provides estimates of the college continuation rates of students who graduated from high school during the period from January through October 2013.

- <u>Figure 1.1.c.10</u> shows the estimated overall college-going rate of 70.8% for Nebraska public high school students compared to the estimated rate of 65.9% for the United States.
- The estimated college continuation rate for females was 74.9% for Nebraska high school graduates, compared to an estimated national rate of 68.4% for female graduates.

- For males, the estimated college-going rate for males was 66.6% for Nebraska high school graduates, compared to 63.5% nationally.
- The national estimates shown in <u>Figure 1.1.c.10</u> did not include 2013 high school graduates who started college after the Current Population Survey (CPS) was conducted in October 2013. Also, since these estimates are based on data collected through the CPS, these statistics are subject to both sampling and non-sampling errors. As a result, the nation's college-going rates for male and female high school graduates in the class of 2013 may actually be higher or lower than those reported in <u>Figure 1.1.c.10</u>.

College Continuation Rates for 2012–2013 Nebraska Public High School Graduates by Gender Compared to National Estimated Rates for 2013 High School Graduates

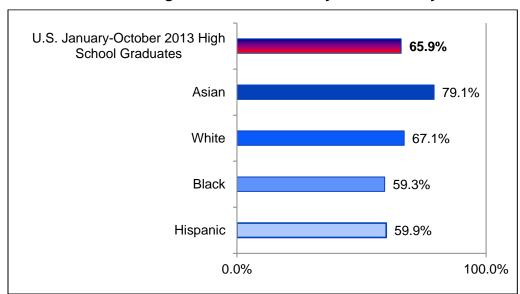

Data sources: For Nebraska data, Nebraska Department of Education, April 2014, and the National Student Clearinghouse, April 2014. For national data, October 2013 Current Population Survey conducted by the U.S. Census Bureau and reported by the U.S. Bureau of Labor Statistics, U.S. Department of Labor, in "College Enrollment and Work Activity of 2013 High School Graduates," April 22, 2014.

As explained earlier in this section, the Nebraska rates shown in <u>Figure 1.1.c.10</u> are based on data obtained from the Nebraska Department of Education and the National Student Clearinghouse. Since graduates of the state's nonpublic (private) high schools were excluded from the study and Clearinghouse files did not include enrollment records for some of Nebraska's public high school graduates, the Nebraska rates presented in <u>Figure 1.1.c.10</u> are at least slightly underestimated. Given that the Nebraska statistics are underestimated to some degree and the reported national rates are only good estimates, a reasonable conclusion is that Nebraska's college-going rates for male and female high school graduates are probably at least slightly higher than comparable national rates.

U.S. College Continuation Rates by Race/Ethnicity

No study has been conducted to estimate Nebraska's college-going rates by race/ethnicity, and there is no available set of national data for making state-to-state comparisons by race/ethnicity or gender. However, the annual report on college enrollment and work activity published by the Bureau of Labor Statistics (BLS) provides estimates of the national college-going rates for four racial/ethnic groups: white, Asian, black, and Hispanic. As mentioned previously, the BLS bases these estimates on data collected through the October supplement of the Current Population Survey (CPS), which is conducted by the U.S. Census Bureau.

<u>Figure 1.1.c.11</u> shows the estimated national college continuation rates of students who graduated from high school during the period from January through October 2013 by their race/ethnicity. The highest estimated rate was 79.1% for Asian high school graduates, down from 82.2% in 2012. Notably, the college-going rate of 59.9% for Hispanics was a decrease of 10.4 percentage points from the BLS 2012 estimate. Meanwhile, the college-going rates for both blacks and whites increased slightly between 2012 and 2013 (+ 0.9 percentage points for blacks and + 0.5 percentage points for whites).

Estimated National College Continuation Rates for 2013 High School Graduates by Race/Ethnicity

Figure 1.1.c.11

Data sources: October 2013 Current Population Survey conducted by the U.S. Census Bureau and reported by the U.S. Bureau of Labor Statistics, U.S. Department of Labor, in "College Enrollment and Work Activity of 2013 High School Graduates," April 22, 2014.

This page left blank intentionally.

1.2 Nebraska High School Graduates Who Go to College in Nebraska

Increase the proportion of <u>Nebraska</u> high school graduates who pursue their postsecondary education in Nebraska.

The analysis of college continuation rates, summarized in the previous section of this report, revealed that the estimated proportion of Nebraska high school graduates who attended degree-granting institutions in Nebraska within a year of high school graduation increased from 50.6% in fall 2002 to 52.8% in fall 2012. Over the same period, the percentage who attended out-of-state degree-granting institutions increased from 11.6% to 12.3% for a total college continuation rate of 65.1% in fall 2012. (See <u>Table A5.2</u> in <u>Appendix 5</u> for supporting data.)

While monitoring and increasing Nebraska's college continuation rates is important, another approach to increasing college enrollment in Nebraska that was recommended by the 2003 LR 174 Higher Education Task Force is to increase the proportion of Nebraska high school graduates who pursue their postsecondary education in their home state, rather than going out of state to college.

The data required to monitor the proportion of Nebraska high school graduates who go to colleges and universities in Nebraska or other states are collected every two years through the Integrated Postsecondary Education Data System (IPEDS) maintained by the National Center of Education Statistics in the U.S. Department of Education. **The latest available data were collected in fall 2012 and compared to 2002 baseline data in the 2014 Nebraska Higher Education Progress Report. Since data collected in fall 2014 will not be available until mid-2015, the following analysis of data collected in fall 2012 is repeated in this section of the 2015 report.** Findings based on the 2014 data will be published in the 2016 Nebraska Higher Education Progress Report.

The best available estimate of the proportion of Nebraska high school graduates who pursue their postsecondary education in Nebraska is the number of students with Nebraska residency who enroll at Nebraska degree-granting institutions as first-time freshmen within a year of graduating from high school, compared directly to the number who go out of state to college. Consequently, this section provides a detailed analysis of the numbers and percentages of Nebraska high school graduates who attended Nebraska and out-of-state, degree-granting institutions as first-time freshmen within 12 months of graduating from high school between fall 2002 and fall 2012.¹⁸

Nebraska-resident, first-time freshmen who start college at Nebraska or out-of-state degree-granting institutions *more* than 12 months after they graduated from high school are also of interest. However, since there is no way of knowing exactly when they received their diplomas from Nebraska or out-of-state high schools, these students are considered separately in the analysis reported in this section.

Data reported by <u>non-degree-granting</u> schools are <u>excluded</u> from the following analysis because the residency data reported by the non-degree-granting institutions in Nebraska were not as complete or consistent as the data reported by the degree-granting institutions in 2002, which is the baseline for this analysis. However, the data is available in <u>Table A6.8.a</u> through <u>Table A6.8.f</u> in <u>Appendix 6</u>. See <u>Explanatory Note A6.1</u> in <u>Appendix 6</u> for more information on the collection and limitations of the data analyzed in this section.

Nebraska's Coordinating Commission for Postsecondary Education – 2015 Progress Report

¹⁸ For the purposes of IPEDS reporting, first-time freshmen are defined to be degree-seeking students. Students taking courses for credit but not seeking degrees are not included in first-time freshmen cohorts.

<u>Changes in the Number of Nebraska-Resident, First-Time Freshmen Enrolled</u> <u>at Degree-Granting Institutions by Length of Time Since High School Graduation</u>

 Between fall 2002 and fall 2012, 1,285 more Nebraska-resident, first-time freshmen attended degree-granting institutions within one year of high school graduation. During the same period, 1,257 fewer Nebraska-resident first-time freshmen enrolled in college more than a year after they graduated from high school, as shown in <u>Table 1.2.1</u>. As a result, the net total enrollment of Nebraska-resident, first-time freshmen at degree-granting institutions increased 0.2% (28 students) since fall 2002.

| Table 1.2.1 Nebraska-Resident, First-Time Freshmen Enrolled at Nebraska and Out-of-State <u>Degree-Granting</u> Postsecondary Institutions Classified by Length of Time Since High School Graduation Fall 2004 through Fall 2012 Compared to Fall 2002 | | | | | | | | |

| <i>Note.</i> Includes full-time and part-time students. Δ = change. See <u>Table A6.1</u> and <u>Table A6.3</u> in <u>Appendix 6</u> for supporting data. Data sources: National Center for Education Statistics, fall 2002, 2004, 2006, 2008, 2010, and 2012 IPEDS surveys; and records maintained by Nebraska's Coordinating | | | | | | | | |

Commission for Postsecondary Education, 2011 and 2012.

In-State and Out-of-State Enrollments of Nebraska-Resident, First-Time Freshmen Who Graduated from High School Within 12 Months of College Enrollment

- The net increase between 2002 and 2012 of 1,285 students who continued on to college within 12 months of high school graduation, shown in <u>Table 1.2.1</u>, is attributable to an increase of 271 Nebraska-resident, first-time freshmen who enrolled at *out-of-state* degree-granting schools within 12 months of high school graduation and an increase of 1,014 students who pursued their postsecondary education at degree-granting institutions in *Nebraska*.
- As illustrated in <u>Figure 1.2.1</u>, in fall 2002, 81.3% of Nebraska-resident, first-time freshmen started college in Nebraska. While this is similar to fall 2012 when 81.1% who attended schools in Nebraska, it is a decrease from fall of 2010 when 83.7% pursued their postsecondary education in Nebraska.
- Overall, the percent of Nebraska-resident, first-time freshmen who choose to begin college in Nebraska has remained relatively stable since fall 2002, ranging from 80.3% in fall 2004 to 83.7% in fall 2010. (See <u>Table A6.1</u> in <u>Appendix 6</u> for supporting data.)

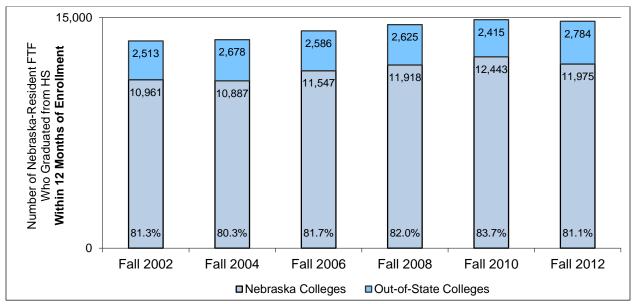

Figure 1.2.1

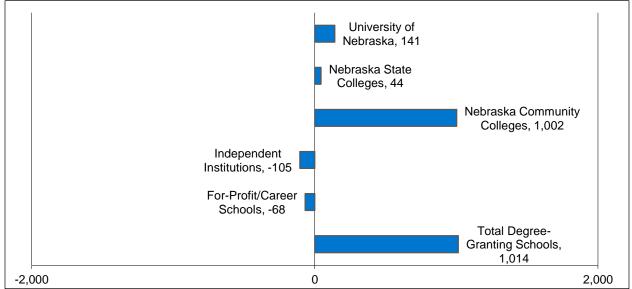

Number of Nebraska-Resident, First-Time Freshmen Enrolled at <u>Nebraska and Out-of-State Degree-Granting Institutions</u> <u>Within 12 Months of Graduation from High School</u> Fall 2002 through Fall 2012

Note. Includes full-time and part-time students. Institutions are classified as degree-granting, based on their classification at the time of each fall survey. FTF = first-time freshmen. See <u>Table A6.1</u> in <u>Appendix 6</u> for supporting data. Data sources: National Center for Education Statistics, fall 2002, 2004, 2006, 2008, 2010, and 2012 IPEDS surveys; and records maintained by Nebraska's Coordinating Commission for Postsecondary Education, 2011 and 2012.

- As illustrated in <u>Figure 1.2.2</u>, from fall 2002 to fall 2012, three of the five higher education sectors reported increases in the number of Nebraska-resident, first-time freshmen who enrolled in college less than a year after high school graduation.
 - The University of Nebraska and the Nebraska State College System reported modest total gains of 2.7% and 5.0%.
 - During this same ten-year period, Nebraska community colleges reported a total increase of 34.3%.
 - Meanwhile, Nebraska's independent institutions and for-profit degree-granting schools reported decreases of 6.1% and 55.7%.
- Overall, the number of Nebraska-resident, first-time freshmen who enrolled at Nebraska degree-granting institutions within 12 months of high school graduation increased 9.3%, from 10,961 in fall 2002 to 11,975 in fall 2012. This increase of 1,014 students is almost entirely attributable to increased enrollments at Nebraska's community colleges.
- See <u>Table A6.2</u> in <u>Appendix 2</u> for supporting data.

Figure 1.2.2

Changes in the Number of Nebraska-Resident, First-Time Freshmen Enrolled at <u>Nebraska Degree-Granting Institutions</u> <u>Within 12 Months of Graduation from High School</u> Fall 2012 Compared to Fall 2002

Note. Includes full-time and part-time students. See <u>Table A6.2</u> in <u>Appendix 6</u> for supporting data. Data sources: National Center for Education Statistics, fall 2002 and fall 2012 IPEDS surveys; and records maintained by Nebraska's Coordinating Commission for Postsecondary Education, 2011 and 2012.

In-State and Out-of-State Enrollments of Nebraska-Resident, First-Time Freshmen Who Graduated from High School More than 12 Months Prior to College Enrollment

- Between fall 2002 and fall 2012, there was a decrease in the number of first-time freshmen with Nebraska residency who started their postsecondary studies at degree-granting institutions in Nebraska more than a year after they graduated from high school.
- As illustrated in <u>Figure 1.2.3</u>, 1,173 fewer of these freshmen attended <u>Nebraska colleges</u> in fall 2012 than in fall 2002, a total decrease of 32.6%.
- Likewise, between 2002 and 2012, 84 fewer first-time freshmen from Nebraska went to <u>out-of-state colleges</u> more than a year after graduating from high school, a 14.2% decrease.
- As shown in <u>Figure 1.2.3</u>, the net effect of these changes in enrollment was that a lower percentage of the students who graduated from high school more than a year before college enrollment attended Nebraska postsecondary institutions in fall 2012 than in fall 2002, while a higher percentage chose to go out of state. Specifically, 82.7% attended Nebraska colleges in 2012, compared to 85.9% in 2002.
- Total enrollment of first-time freshmen at out-of-state and in-state schools decreased 30.0% (1,257 students) from 4,191 in fall 2002 to 2,934 in fall 2012. Much of this decline was seen between fall 2010 and fall 2012 when enrollment decreased 23.6% (904 students). (See <u>Table A6.3</u> in <u>Appendix 6</u> for supporting data.)

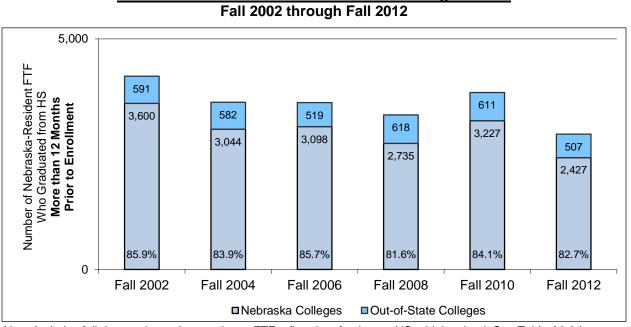

Figure 1.2.3

Number of Nebraska-Resident, First-Time Freshmen Enrolled at <u>Nebraska and Out-of-State Degree-Granting Institutions</u> <u>More than 12 Months After Graduation from High School</u> Fall 2002 through Fall 2012

Note. Includes full-time and part-time students. FTF = first-time freshmen. HS = high school. See <u>Table A6.3</u> in <u>Appendix 6</u> for supporting data. Data sources: National Center for Education Statistics, fall 2002, 2004, 2006, 2008, 2010, and 2012 IPEDS surveys; and records maintained by Nebraska's Coordinating Commission for Postsecondary Education, 2011 and 2012.

- As illustrated in <u>Figure 1.2.4</u>, from fall 2002 to fall 2012, three of the sectors of higher education in Nebraska reported decreases in the number of Nebraska-resident, first-time freshmen who enrolled in college more than a year after high school graduation.
 - The University of Nebraska and Nebraska's independent institutions and for-profit degree-granting schools reported decreases of 56.7%, 55.4% and 83.1%.
 - Meanwhile, Nebraska's state colleges reported an increase of five students since fall 2002, equating to 9.3% total growth, and Nebraska's community colleges reported an increase of 74 students since fall 2002, corresponding to a 4.0% overall increase.
- Overall, the number of Nebraska-resident, first-time freshmen who enrolled at Nebraska degree-granting institutions more than a year after high school graduation decreased 32.6%, from 3,600 in fall 2002 to 2,427 in fall 2012. This decrease of 1,173 students is mostly attributable to reduced enrollments at Nebraska's for-profit degree-granting institutions.
- See <u>Table A6.4</u> in <u>Appendix 6</u> for supporting data and a summary of enrollment changes by sector.

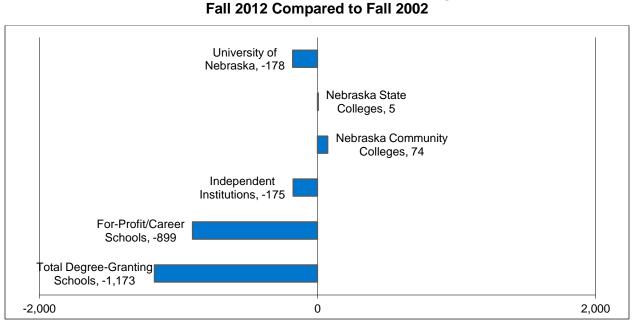

Figure 1.2.4 Changes in the Numbers of Nebraska-Resident. First-Time Freshmen

Enrolled at <u>Nebraska Degree-Granting Institutions</u> More than 12 Months After Graduation from High School

Note. Includes full-time and part-time students. See <u>Table A6.4</u> in <u>Appendix 6</u> for supporting data. Data sources: National Center for Education Statistics, fall 2002 and fall 2012 IPEDS surveys; and records maintained by Nebraska's Coordinating Commission for Postsecondary Education, 2011, 2012, and February 2015 (corrected).

1.3 Non-Nebraska, First-Time Freshmen Who Enroll at Nebraska Colleges and Net Migration

Increase the number of <u>non-Nebraska</u> high school graduates who pursue postsecondary education in Nebraska.

The 2003 LR 174 Higher Education Task Force recommended that Nebraska's colleges and universities should more actively recruit high school graduates from outside the state to increase college enrollments in Nebraska. The data required to monitor the total number of outof-state and nonresident alien students who enroll as first-time freshmen at Nebraska's postsecondary institutions are collected every two years through the Integrated Postsecondary Education Data System (IPEDS) maintained by the National Center for Education Statistics.

In this section, the latest available data, which are for fall 2012, are compared to the data for fall 2002, fall 2004, fall 2006, fall 2008, and fall 2010. Emphasis is primarily on the comparison of the findings for fall 2012 to those for fall 2002, which is the baseline for this analysis.

Non-Nebraska, First-Time Freshmen Who Attend Nebraska Colleges and Universities

 As shown in <u>Figure 1.3.1</u>, Nebraska's degree-granting and non-degree-granting colleges attracted 620, or 20.7%, more non-Nebraska, first-time freshmen in fall 2012 than in fall 2002.

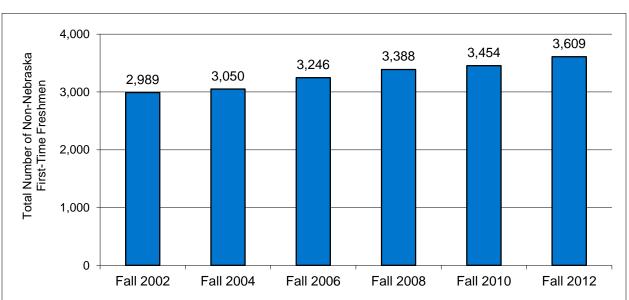

Figure 1.3.1

Total Number of Non-Nebraska, First-Time Freshmen Enrolled at Nebraska Degree-Granting and Non-Degree-Granting Institutions Fall 2002 through Fall 2012

Note. Includes full-time and part-time students. Includes out-of-state and nonresident alien students. See <u>Table A6.5</u> in <u>Appendix 6</u> for supporting data. Data sources: National Center for Education Statistics, fall 2002, 2004, 2006, 2008, 2010, and 2012 IPEDS surveys; and records maintained by Nebraska's Coordinating Commission for Postsecondary Education, 2011 and 2012.

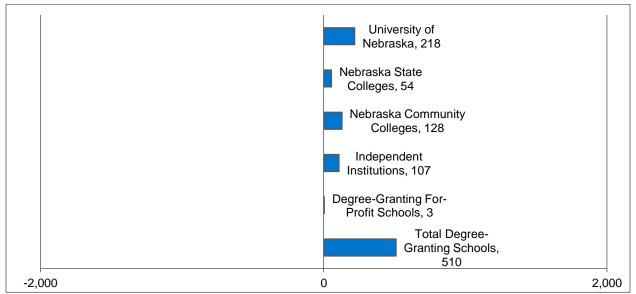

- The <u>University of Nebraska-Lincoln</u> enrolled 863 (23.9%) of the non-Nebraska, first-time freshmen in fall 2012, up from 624 (20.9%) in fall 2002. <u>Creighton University</u> enrolled 729 (20.2%) of the non-Nebraska, first-time freshmen in fall 2012, up from 475 (15.9%) in fall 2002. In comparison, less than seven other schools enrolled more than 100 non-Nebraska, first-time freshmen, and two-thirds of Nebraska's colleges and universities enrolled fewer than 50 non-Nebraskan, first-time freshmen in fall 2002 or fall 2012.
- Creighton University attracted 254 more non-Nebraska, first-time freshmen in fall 2012 than it enrolled in fall 2002, while the University of Nebraska-Lincoln attracted an additional 239 non-Nebraska, first-time freshmen during this same time period. Consequently, these two institutions accounted for 493, or 79.5%, of the additional 620 non-Nebraska, first-time freshmen enrolled at Nebraska's degree-granting and non-degree-granting schools. (See <u>Table A6.9</u> in <u>Appendix 6</u> for supporting data on total non-Nebraska, first-time freshmen by institution.)
- In fall 2002, 1.7% of all non-Nebraska, first-time freshmen attended non-degree-granting colleges. In comparison, in 2012, only 0.4% of all non-Nebraska, first-time freshmen attended non-degree granting schools within the state. (See <u>Table A6.5</u> in <u>Appendix 6</u> for supporting data.)
- Non-Nebraska first-time freshmen who attended <u>non-degree granting schools</u> are <u>excluded</u> from the remainder of this analysis because the residency data reported by the non-degree granting institutions in Nebraska were not as complete or consistent as the data reported by the degree-granting institutions in 2002, which is the baseline for comparisons.
- Between 2002 and 2012, degree-granting institutions in Nebraska attracted a noticeably higher number of non-Nebraskans who went to college within a year of high school graduation. The state also attracted a slightly higher number of out-of-state and nonresident alien students who started college more than a year after they graduated from high school. Both of these trends are evidenced in <u>Table 1.3.1</u>.
- As shown in <u>Table 1.3.1</u>, the net enrollment of out-of-state and nonresident alien students at Nebraska degree-granting institutions increased by 655 students, or 22.3%, between 2002 and 2012. Of these students, 510 (77.9%) graduated from high school during the 12 months prior to their college enrollment. The remaining 145 students started college more than a year after high school graduation.
- In fall 2002, Nebraska degree-granting institutions attracted 2,458 non-Nebraskan, first-time freshmen who graduated from high school within 12 months of college enrollment, compared to 2,968 non-Nebraskans in 2012, a 20.7% increase.
- In 2012, Nebraska degree-granting colleges and universities attracted 625 non-Nebraskans who started college more than 12 months after high school graduation, a 30.2% increase since 2002. Notably, this includes a one-year increase of 125 students (a 25.0% increase) between fall 2010 and fall 2012.

| Table 1.3.1 Non-Nebraska, First-Time Freshmen Enrolled at Nebraska <u>Degree-Granting</u> Postsecondary Institutions Classified by Length of Time Since High School Graduation Fall 2004 through Fall 2012 Compared to Fall 2002 | | | | | | | | |
|--|-----------|---------------------|-----------|--------|-----------|--------|--------------------------|-------|
| Length of Time | Fall 2002 | | Fall 2004 | | Fall 2006 | | Δ Since Fall 2002 | |
| Since High School - Graduation | Ν | % | Ν | % | Ν | % | | |
| Graduated During the 12 Months Prior to College Enrollment | 2,458 | 83.7% | 2,424 | 80.8% | 2,783 | 86.5% | | |
| Graduated More than 12 Months Prior to College Enrollment | 480 | 16.3% | 576 | 19.2% | 435 | 13.5% | | |
| Total | 2,938 | 100.0% | 3,000 | 100.0% | 3,218 | 100.0% | | |
| Length of Time | Fall | Fall 2008 Fall 2010 | | 2010 | Fall 2012 | | | |
| Since High School - Graduation | Ν | % | Ν | % | Ν | % | Ν | % |
| Graduated During the 12 Months Prior to College Enrollment | 2,961 | 87.9% | 2,942 | 85.5% | 2,968 | 82.6% | 510 | 20.7% |
| Graduated More than 12 Months Prior to College Enrollment | 407 | 12.1% | 500 | 14.5% | 625 | 17.4% | 145 | 30.2% |
| Total | 3,368 | 100.0% | 3,442 | 100.0% | 3,593 | 100.0% | 655 | 22.3% |
| <i>Note.</i> Includes full-time and part-time students. Counts of non-Nebraska students include nonresident alien students, but they do not include students with unknown states of residence or students for whom | | | | | | | | |

alien students, but they do not include students with unknown states of residence or students for whom no residence information was reported to the NCES but who are counted by the NCES as a balance/ correction factor so that the residence totals equal enrollment totals. Students with unknown states of residence are excluded because there is no way of knowing how many of these students are from Nebraska or from other states or countries, and there also is no way of determining when any of these students graduated from high school. Δ = change. See <u>Table A6.6</u> and <u>Table A6.7</u> in <u>Appendix 6</u> for supporting data. Data sources: National Center for Education Statistics, fall 2002, 2004, 2006, 2008, 2010, and 2012 IPEDS surveys; and records maintained by Nebraska's Coordinating Commission for Postsecondary Education, 2011 and 2012.

- As shown in <u>Figure 1.3.2</u>, 42.7% of the net increase of 510 students who started college within 12 months of high school graduation is attributable to the increased number of non-Nebraskans who attended the University of Nebraska.
- The Nebraska State College System, Nebraska's community colleges, and Nebraska's independent institutions also experienced gains in the number of non-Nebraskans that they attracted, but the for-profit colleges attracted only a few more out-of-state students in 2012 than in 2002. (See <u>Table A6.6</u> in <u>Appendix 6</u> for the supporting data.)
- See <u>Table A6.7</u> in <u>Appendix 6</u> for information on the enrollment of non-Nebraskans first-time freshmen who enrolled at Nebraska colleges more than a year after high school graduation.
- <u>Table A6.8a</u> through <u>Table A6.8f</u> in <u>Appendix 6</u> provide detailed listings *by institution* of the numbers of first-time freshmen with Nebraska, out-of-state, and foreign (i.e., nonresident alien) residencies who were enrolled at degree-granting colleges and universities *within 12 months of high school graduation* from fall 2002 through fall 2012.

Changes in the Numbers of Non-Nebraska, First-Time Freshmen Enrolled at <u>Nebraska Degree-Granting Institutions</u> <u>Within 12 Months of Graduation from High School</u> Fall 2012 Compared to Fall 2002

Note. Includes full-time and part-time students. See <u>Table A6.6</u> in <u>Appendix 6</u> for supporting data. Data sources: National Center for Education Statistics, fall 2002 and fall 2012 IPEDS surveys; and records maintained by Nebraska's Coordinating Commission for Postsecondary Education, 2011 and 2012.

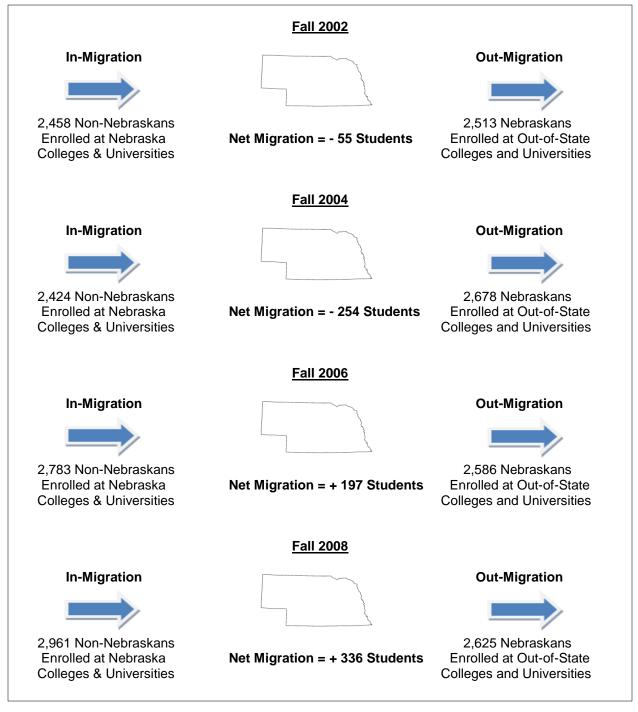

Net Migration of Nebraska and Non-Nebraska, First-Time Freshmen

Data summarized in the preceding sections can be used to calculate the net migration of first-time freshmen who attended degree-granting colleges and universities within one year of high school graduation, as illustrated in Figure 1.3.3.¹⁹

- In fall 2002 and fall 2004, more first-time freshmen who attended degree-granting schools within a year of graduating from high school *left Nebraska* to go to college than *came to Nebraska* to begin their postsecondary education. While the change in net migration between fall 2002 and fall 2004 was only 199 students, this change was in the opposite direction of what is desirable for the state.
- However, in fall 2006, fall 2008, fall 2010, and fall 2012, more first-time freshmen *came to Nebraska* to attend degree-granting colleges within 12 months of high school graduation than *left Nebraska* to go to school out of state.

¹⁹ The net migration numbers reported in this section are the best possible estimates, given the data available from the National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS). However, the estimated net migration of Nebraska-resident students and non-Nebraskans for fall 2002, fall 2004, and fall 2006 may be slightly underestimated or overestimated due to the fact that some of the degree-granting institutions in Nebraska did not report their numbers of first-time freshmen who graduated from high school within 12 months of college enrollment by state or country of residency for these survey years. There are probably similar reporting errors in other states where Nebraska first-time freshmen attended colleges in fall 2002, 2004, or 2006, but there is no way of knowing how Nebraska's net migration numbers should be adjusted to compensate for such errors.

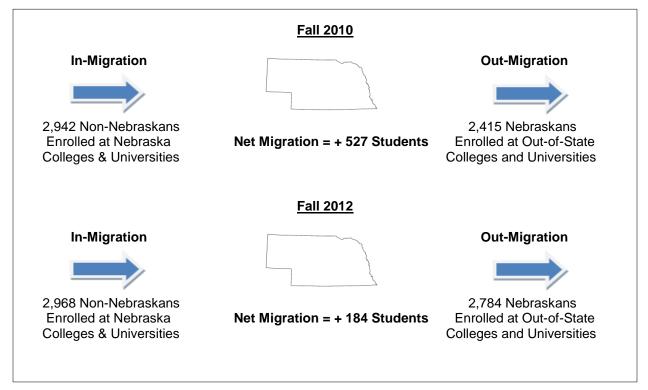

Net Migration of First-Time Freshmen Who Attended <u>Degree-Granting</u> Postsecondary Institutions in Nebraska <u>Within 12 Months of High School Graduation</u> Fall 2002 through Fall 2012

Continued on the next page.

Figure 1.3.3 (Continued)

Net Migration of First-Time Freshmen Who Attended <u>Degree-Granting</u> Postsecondary Institutions in Nebraska <u>Within 12 Months of High School Graduation</u> Fall 2002–Fall 2012

Note. Counts include full-time and part-time students. Counts of non-Nebraskans include nonresident alien students. Counts do not include students with reported unknown states of residence and students for whom no residence information was reported. See <u>Table A6.10</u> in <u>Appendix 6</u> for supporting data. Data sources: National Center for Education Statistics, fall 2002, 2004, 2006, 2008, 2010, and 2012 IPEDS surveys; and records maintained by Nebraska's Coordinating Commission for Postsecondary Education, 2011 and 2012.

1.4 Enrollment of First-Time Freshmen by Race/Ethnicity

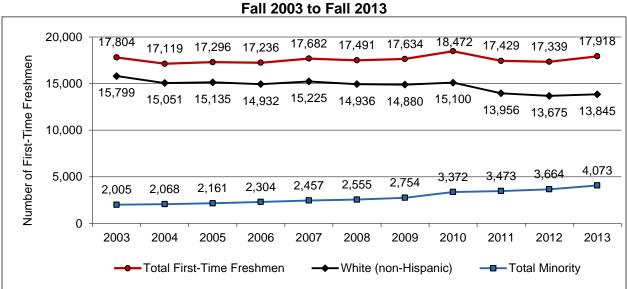

Increase the number and proportion of Nebraska postsecondary students who have been underrepresented in the state's higher education system.

Increasing the number and percentage of students who have been underrepresented in Nebraska's higher education system is another recommended approach to increasing the state's postsecondary enrollment. To determine the extent to which this strategic objective is being achieved, the following analysis focuses on (1) the changes that have occurred since 2003 in the numbers of white non-Hispanics and minority students who have been enrolled as *first-time freshmen* at Nebraska colleges and (2) the extent to which each racial/ethnic group was represented in the state's postsecondary education system in fall 2013, the latest period for which data are available. (Estimated enrollments for fall 2014 are not available by race/ethnicity; therefore, estimates for fall 2014 will be reported in the *2016 Progress Report*.)

Changes in the Numbers of First-Time Freshmen Enrolled at Nebraska Institutions²⁰

- As shown in <u>Figure 1.4.1</u>, 17,918 first-time freshmen of known race/ethnicity were enrolled at Nebraska's degree-granting and non-degree-granting institutions in fall 2013, a 0.6% increase from the 17,804 first-time freshmen of known race/ethnicity in fall 2003.
- Between fall 2012 and fall 2013, total first-time freshmen enrollment increased 3.3%.
- In fall 2003, white non-Hispanics accounted for 88.7% of the first-time freshmen, while minorities accounted for 11.3%. Of the first-time freshmen enrolled in fall 2013, 77.3% were white non-Hispanics, while 22.7% were minorities.
- As shown in <u>Figure 1.4.2</u>, higher numbers of Hispanics, black non-Hispanics, and Asians/Pacific Islanders were enrolled in college in fall 2013 than in fall 2003. However, the number of Native-American first-time freshmen decreased from 193 in fall 2003 to 174 in fall 2013.
- The net effect of these changes is there were **2,068 more minority students** attending Nebraska colleges as first-time freshmen in fall 2013 than in fall 2003, an increase of 103.1%. In comparison, there were **1,954 fewer white non-Hispanic** first-time freshmen in fall 2013 than in fall 2003, a decrease of 12.4%.

²⁰ Beginning with the *2015 Progress Report*, students of two or more races are included in the total number of first-time freshmen with known race/ethnicity. The race/ethnic category 'two or more races' was first available in IPEDS for fall 2008 enrollment. However, institutions were not required to use the new race/ethnic category until fall 2011 enrollments were reported. Therefore, totals and percentages may have changed from those reported in previous editions of this report. Counts reported in this section do not include non-resident aliens (foreign students) and students of unknown race/ethnicity. <u>Total minority students</u> are defined as students from the following race/ethnic categories: Asian/Pacific Islander, Hispanic, Native American, black (non-Hispanic), and two or more races.

Numbers of White Non-Hispanic and Minority First-Time Freshmen at Nebraska Postsecondary Institutions Fall 2003 to Fall 2013

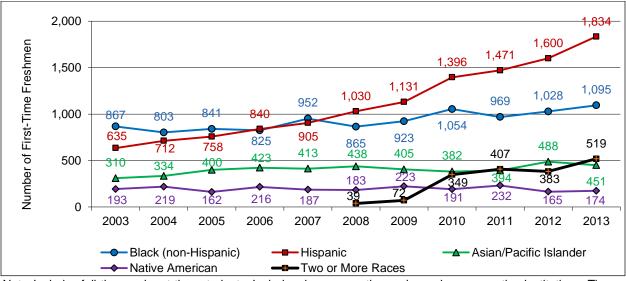

Figure 1.4.2

Numbers of Minority Students Enrolled as First-Time Freshmen at Nebraska Postsecondary Institutions Fall 2003 to Fall 2013

Note. Includes full-time and part-time students. Includes degree-granting and non-degree-granting institutions. The race/ethnic category 'two or more races' was first available in IPEDS for fall 2008 enrollment. See <u>Table A7.1</u> in <u>Appendix 7</u> for supporting data. Data source: National Center for Education Statistics, 2003 through 2013 IPEDS enrollment surveys.

Racial/Ethnic Representation in Nebraska's Postsecondary Education System Fall 2013

The following analysis examines the extent to which students in each racial/ethnic group have been represented in Nebraska's postsecondary education system. In this analysis students in a race/ethnic category are considered to be underrepresented if they accounted for a smaller percentage of the first-time college freshmen at Nebraska institutions than they did of the students who graduated from Nebraska high schools the preceding year. Conversely, students are considered to be overrepresented if they accounted for a larger percentage of firsttime college freshmen than they did of the students who graduated from high school the year before.

- As evidenced in <u>Section 1.1.a</u> of this report, disproportionately lower percentages of Asians/Pacific Islanders, Hispanics, Native Americans, and black non-Hispanics graduate from Nebraska high schools as a result of the fact that their graduation rates are significantly lower than the high school graduation rates for white non-Hispanics and students of two or more races.
- As illustrated in <u>Figure 1.4.3</u>, minority students who graduate from high school generally tend to be represented among first-time college freshmen in Nebraska to about the same degree as white non-Hispanics, except for Hispanics, Native Americans, and multiracial students who were slightly underrepresented among first-time freshmen in fall 2013.

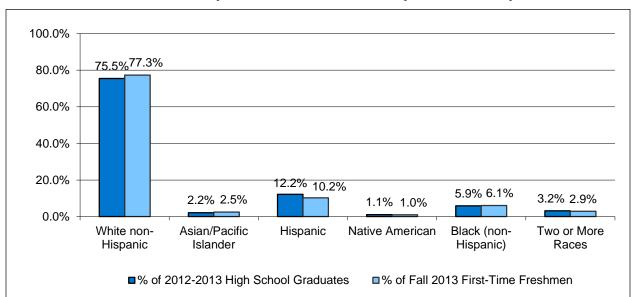

Figure 1.4.3

Percentages of 2012–2013 Nebraska High School Graduates and First-Time Freshmen Enrolled at Nebraska Degree-Granting and Non-Degree-Granting Postsecondary Institutions in Fall 2013 by Race/Ethnicity

Note. Percentages of high school graduates include graduates of public and nonpublic schools, educational service units, and state-operated schools. Percentages of first-time freshmen include full-time and part-time students, but not foreign students or students of unknown race/ethnicity. See <u>Table A7.2</u> in <u>Appendix 7</u> for supporting data. Data sources: Nebraska Department of Education, January 2014, and the National Center for Education Statistics, fall 2013 IPEDS survey.

A Comparison of the Representation of Racial/Ethnic Groups in Fall 2003 and Fall 2013

Determining if there was any change between fall 2003 and fall 2012 in the pattern of racial/ethnic representation in Nebraska's postsecondary education system is complicated by the fact that fewer white non-Hispanics and more minority students graduated from Nebraska high schools in 2012–2013 than in 2002–2003. However, as shown in <u>Table A7.2</u> in <u>Appendix 7</u>, comparing the percentage distributions of high school graduates in 2002–2003 and 2012–2013 to the percentage distributions of first-time freshmen in fall 2003 and fall 2013 reveals that compared to the first-time freshmen who started college in 2003:

- 1. White non-Hispanics were underrepresented in fall 2003 but overrepresented in fall 2013.
- 2. Asians/Pacific Islanders were overrepresented among first-time freshmen in fall 2003 and fall 2013.
- 3. Hispanics were more underrepresented in the fall 2013 freshmen class than in 2003.
- 4. Native Americans were overrepresented in fall 2003 but underrepresented in fall 2013.
- 5. Black non-Hispanics were less overrepresented in fall 2013 than in fall 2003.
- 6. Students of two or more races were slightly overrepresented in fall 2011 but were underrepresented in fall 2013.²¹

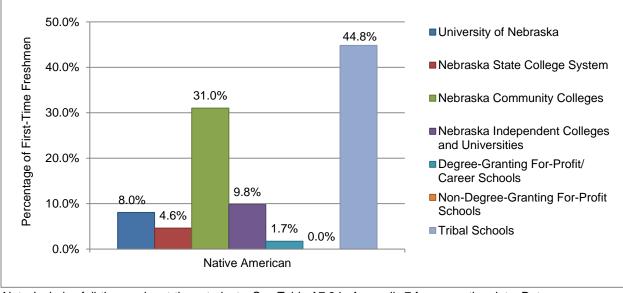

The Types of Institutions Most Frequently Attended by Each Racial/Ethnic Group

Another approach to analyzing the representation of white non-Hispanics and minorities is to examine the percentage of students in each racial/ethnic group who attend each of the major types of institutions within Nebraska's postsecondary education system. For the purposes of statewide analysis, two Native American tribal colleges—Little Priest Tribal College and Nebraska Indian Community College—are included among the independent colleges and universities since they are not state or locally supported. However, in the following analysis, the tribal colleges are considered separately from other independent institutions so that student enrollment patterns of Native Americans can be interpreted more clearly.

- As shown in <u>Figure 1.4.4</u> and <u>Table A7.3</u> in <u>Appendix 7</u>, 78 (44.8%) of the 174 <u>Native</u> <u>Americans</u> who were first-time freshmen in fall 2013 attended Little Priest Tribal College or Nebraska Indian Community College, while 17 (9.8%) chose to enroll at other independent colleges and universities.
- 31.0% (54) of the Native American, first-time freshmen attended the state's community colleges, 4.6% (8) went to Nebraska's state colleges, and 8.0% (14) enrolled at the University of Nebraska in fall 2013. Additionally, 1.7% (3) attended schools in the degree-granting or non-degree-granting, for-profit sectors.

²¹ The race/ethnic category 'two or more races' was first available in IPEDS for fall 2008 enrollment. However, institutions were not required to use the new race/ethnic category until fall 2011 enrollments were reported. In addition, the 'two or more races' category was first utilized by the Nebraska Department of Education with the 2010–2011 high school graduating class. Therefore, comparisons of the representation of multiracial students are limited to the fall 2011 through fall 2013 cohorts.

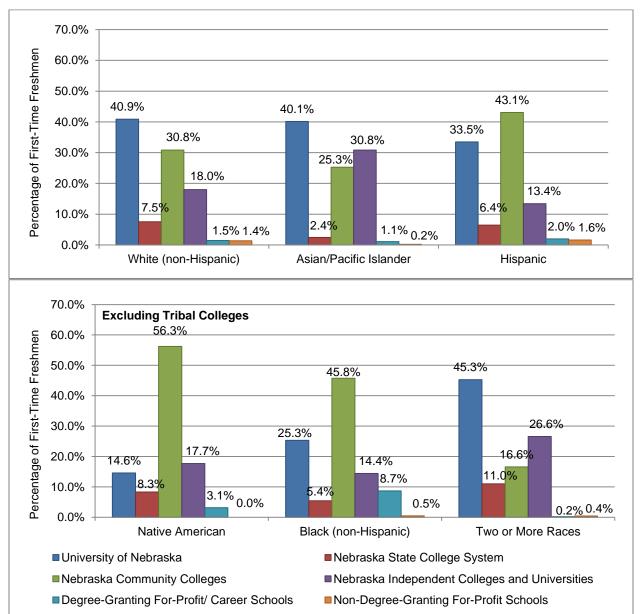

Nebraska Enrollment of Native American, First-Time Freshmen at Nebraska Degree-Granting and Non-Degree-Granting Postsecondary Institutions Fall 2013

Note. Includes full-time and part-time students. See <u>Table A7.3</u> in <u>Appendix 7</u> for supporting data. Data source: National Center for Education Statistics, fall 2013 IPEDS survey.

- <u>Figure 1.4.5</u> shows the percentages of the first-time freshmen in each of the six major racial/ethnic groups who attended the major types of institutions within Nebraska's postsecondary education system in fall 2013, <u>excluding</u> the two native tribal colleges in the analysis of Native American enrollments.
- As evidenced in <u>Figure 1.4.5</u>, <u>white non-Hispanics</u> most frequently enrolled as first-time freshmen at the schools constituting the University of Nebraska and the state's community colleges in fall 2013. In comparison, about half as many white non-Hispanics chose to enroll at independent institutions, and noticeably fewer attended state colleges or for-profit/career schools.
- Compared to the other minority racial/ethnic groups, higher percentages of <u>Asians/Pacific</u> <u>Islanders</u> enrolled at the independent institutions, while a lower percentage attended the state's community colleges and only small percentages chose to enroll at the state colleges or for-profit/career schools. Asians/Pacific Islanders most frequently enrolled as first-time freshmen at the University of Nebraska.
- Hispanics most frequently enrolled as first-time freshmen at Nebraska's community colleges. About one-third of first-time freshmen Hispanics enrolled at the University of Nebraska, while only small percentages chose to enroll in one of the other four sectors.
- If the tribal colleges are excluded from the independent sector, as shown in <u>Figure 1.4.5</u>, the first-time freshmen enrollment pattern for <u>Native Americans</u> in fall 2013 is dominated by the high percentage of these students who enroll at the state's community colleges. In comparison, far lower percentages go to the schools constituting the University of Nebraska, the state college, independent institutions, or for-profit/career schools.

- Like Hispanics and Native Americans, black non-Hispanic first-time freshmen were most likely to enroll at the state's community colleges in fall 2013. The enrollments for the remaining black non-Hispanic first-time freshmen were split between the University of Nebraska (25.3%) and the other four sectors (28.9%)
- In fall 2013, multiracial first-time freshmen were most likely to enroll at the University of Nebraska or the independent institutions, while only very small percentages chose to enroll at for-profit/career schools.

Nebraska First-Time Freshmen Sector Enrollments by Race Ethnicity Fall 2013

Note. Includes full-time and part-time students, but not foreign students or students of unknown race/ethnicity. The two native tribal colleges, Little Priest Tribal College and Nebraska Indian Community College, are excluded from the analysis of Native American enrollments in this table. See <u>Table A7.3</u> in <u>Appendix 7</u> for fall 2003 through 2013 data. Data source: National Center for Education Statistics, fall 2013 IPEDS survey.

Representation of Racial/Ethnic Groups by Sector

Since different percentages of white non-Hispanics and minority students enrolled as first-time freshmen at each of the major types of postsecondary institutions in fall 2013, their representation varied across the six sectors of higher education, as shown in <u>Figure 1.4.6</u>. Native Americans accounted for 94% to 100% of the combined first-time freshmen enrollment in fall 2008 through fall 2013 of Little Priest Tribal College and Nebraska Indian Community College. Consequently, these two schools are excluded from the sector of independent colleges in the following analysis so sectors can be more clearly compared. See <u>Table A7.4</u> in <u>Appendix 7</u> for supporting data.

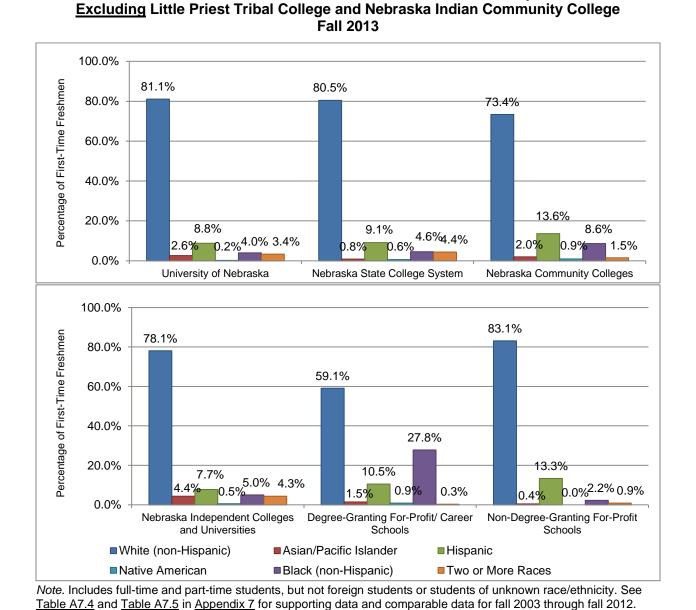

Figure 1.4.6 Nebraska First-Time Freshmen Racial/Ethnic Enrollments by Sector

Nebraska's Coordinating Commission for Postsecondary Education – 2015 Progress Report

Data source: National Center for Education Statistics, fall 2013 IPEDS survey

- In the fall of 2013, white non-Hispanics accounted for the highest percentages of first-time freshmen enrolled within every sector. White non-Hispanics accounted for 83.1% of first-time freshmen at the non-degree-granting for-profit schools but only 59.1% at degree-granting for-profit schools.
- Asians/Pacific Islanders accounted for 4.4% of first-time freshmen at the independent colleges/universities (excluding tribal colleges) but only 0.4% at non-degree-granting for-profit schools.
- Hispanics accounted for 13.6% of first-time freshmen at the community colleges and 7.7% at the independent colleges/universities.
- Native Americans accounted for 0.9% of first-time freshmen at the community colleges and at the degree-granting for-profit schools. None of the first-time freshmen at the non-degree-granting for-profit schools were Native American in fall 2013.
- Black non-Hispanics accounted for 27.8% of first-time freshmen at the degree-granting forprofit schools but only 2.2% at the non-degree-granting for-profit schools.
- Multiracial students accounted for 4.4% of first-time freshmen at the state colleges but only 0.3% at the degree-granting for-profit schools.

1.5 Financial Aid

Increase need-based financial aid in order to improve access to higher education for Nebraskans with limited financial means.

The 2003 LR 174 Higher Education Task Force recommended increasing need-based financial aid as a means of improving access to higher education for Nebraskans with limited financial resources. Since 2003, Nebraska has increased the amount of state funds allocated for need-based financial aid, thereby making progress toward the goal of improving access to higher education within the state.²²

Financial aid is even more important today than it was in 2003 as increasing college costs make it more difficult for many Nebraskans to be educated beyond high school. While there are several sources of need-based financial aid available to students, the amount available has not kept up with increasing costs and the corresponding need for more financial aid. This can be illustrated in several ways.

Number of Students Not Served by Nebraska's State Grant Program

First, Nebraska allocates state general and lottery funds to a financial aid program called the Nebraska Opportunity Grant program (NOG). This program was previously called the Nebraska State Grant program (NSG), with the name change becoming effective for the 2010–2011 academic year. In the following discussion, for the sake of simplicity, the grants awarded through the NSG and NOG programs are referred to as Nebraska state grants.

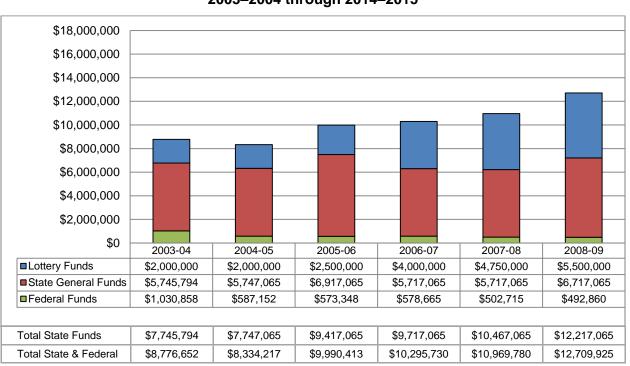

Nebraska state grants are awarded to students who are residents of Nebraska, have not earned a bachelor's, graduate or professional degree, have high financial need, and who are attending eligible Nebraska colleges and universities. As the following discussion illustrates, Nebraska has significantly increased the amount of funding available for state grants to college students. However, the amount of available funding for financial aid continues to be insufficient to meet the needs of an increasing number of students who are eligible to receive state assistance. As a result, only about a third of the students who are eligible for state-funded financial aid receive state grants.

<u>Figure 1.5.1</u> illustrates how the amount of available funding for state grants has significantly increased since 2003–2004. For the 2003–2004 academic year, the state allocated \$7,745,794 for grant aid to students attending public and private institutions in Nebraska. For 2013–2014, the state allocated \$16,419,718 to assist needy students in attending higher education institutions in Nebraska, an increase of 112.0%. For the 2014–2015 academic year, the amount of available state funding for grant aid was increased to \$16,468,156, or 0.3% above the amount allocated for 2013–2014. As a result, available state funding for state grants awarded in 2014–2015 is 112.6% higher than the state appropriated for student financial aid in 2003–2004.

Increasing the allocation of lottery funds from \$2,000,000 in 2003–2004 to \$9,800,000 in 2014–2015 accounted for 89.4% of the total increase in state appropriations for the state grant program. Increasing appropriations from the state's general fund from \$5,745,794 in 2003–2004 to \$6,668,156 in 2014–2015 accounted for only 10.6% of the increased appropriations.

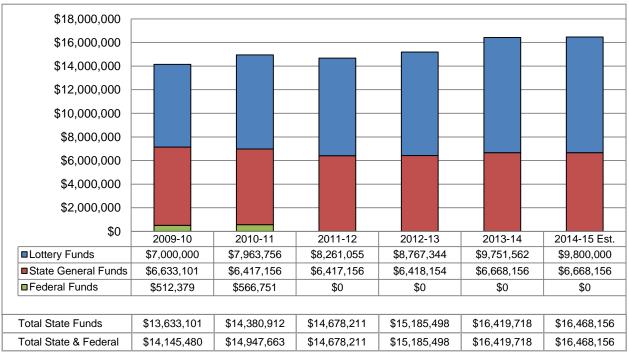

²² For more information on tuition, fees and financial aid, see the 2014 Tuition, Fees and Financial Aid *Report*, available on the Commission's website at www.ccpe.ne.gov/PublicDoc/Ccpe/Reports/tuition-and-fees/default.asp

Over the same period, federal funding decreased from \$1,030,858 in 2003–2004 to \$566,751 in 2010–2011 and was eliminated in 2011–2012. Consequently, total funding for 2014–2015 is \$1,520,493, or 10.2%, higher than for 2010–2011.

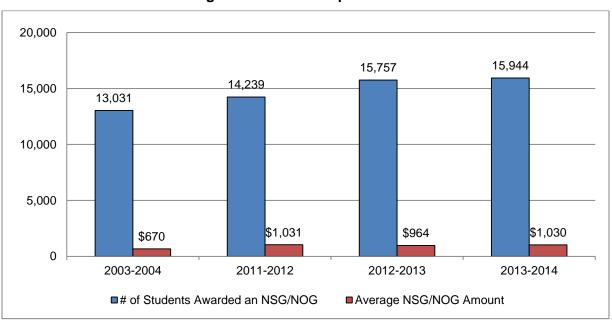

Sources and Amounts of Available Funding for the Nebraska Opportunity Grant Program 2003–2004 through 2014–2015

Data source: 2014 Tuition, Fees and Financial Aid Report, Nebraska's Coordinating Commission for Postsecondary Education, September 16, 2014, supplemented with CCPE records, January 2015.

Between 2003–2004 and 2013–2014, as shown in <u>Figure 1.5.2</u>, the number of students who received state grants increased 22.4%, from 13,031 to 15,944, and the average awarded grant increased 53.7%, from \$670 to \$1,030.²³

Number of Students Who Received Nebraska Opportunity Grants (NOGs) and the Average Grant Awarded 2011–2012 through 2013–2014 Compared to 2003–2004 Baseline

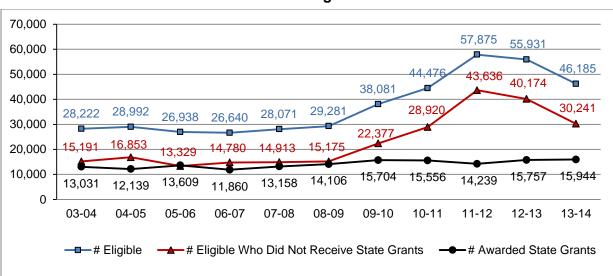

Unfortunately, as shown in <u>Figure 1.5.3</u>, many students who are eligible for state grants do not receive them. In 2013–2014, for example, 15,944 students received state grants. However, based upon expenditure reports submitted to the Commission by each institution, it is estimated that an additional 30,241 students qualified for state grants but did not receive them due to insufficient available funding.

Furthermore, the percentage of eligible students who receive state grants has decreased. In 2003–2004, 46.2% of the students who were eligible for state grants received them. In 2013–2014, only 34.5% of the eligible students received state grants. This decrease is due to state funding not keeping pace with the increases in the numbers of eligible students.²⁴

See <u>Table A8.1</u> and <u>Table A8.2</u> in <u>Appendix 8</u> for supporting data and for additional information about the numbers and amounts of Nebraska state grants awarded by sector.

Data source: Nebraska Opportunity Grant Expenditure Reports, September 2004 and October 2014.

²³ The maximum award a student could receive has been 25% or 50% of the tuition and mandatory fees charged by UNL to a full-time, Nebraska-resident undergraduate student, depending on the year. In 2003–2004, the maximum award was at the 25% level, or \$1,032. For 2014–2015, the maximum award was at the 50% level, or \$3,987.
²⁴ Part of the increase beginning in 2010–11 in the number of students eligible to receive Nebraska Opportunity Grants is likely due to the expansion of Pell Grant eligibility.

Number of Students Eligible to Receive Nebraska Opportunity Grants Compared to the Number of Students Awarded a Nebraska Opportunity Grant 2003–2004 through 2013–2014

Other Evidence of Unmet Need for Financial Aid

Although state funding of financial aid has increased significantly since 2003–2004, there is a substantial amount of unmet financial need in Nebraska, including the need not met by state grants. The Commission estimates the annual unmet financial need of all Nebraskans who are eligible for Pell Grants by subtracting the total amount of financial aid, excluding work-study or PLUS, from the total cost of attending Nebraska colleges and universities for all Pell-Grant-eligible students.²⁵ Using this formula, which includes subsidized and unsubsidized loans as financial aid, the Commission estimates the unmet need of Nebraskans was probably more than \$150 million in 2009–2010 and \$220 million in 2012–2013, as a result of the significant increase in the number of Nebraskans eligible for financial aid.²⁶

An indicator of the increased difficulty in meeting the financial needs of students is that students and their families are covering an increasing percentage of the costs of education for all sectors of Nebraska's public postsecondary institutions. For details, see pages 17–21 of the Commission's 2014 Tuition, Fees and Financial Aid Report.

Finally, students are borrowing at higher levels. As illustrated in <u>Figure 1.5.4</u>, the amount students borrowed to attend Nebraska's public postsecondary institutions rose 54.9%, from \$208,953,401 in 2003–2004 to \$323,604,358 in 2013–2014.²⁷ The number of loan recipients increased 16.0%, from 56,182 in 2003–2004 to 65,148 in 2013–2014, while the number of originated loans increased 25.7%, from 59,698 to 75,045, in 2013–2014.

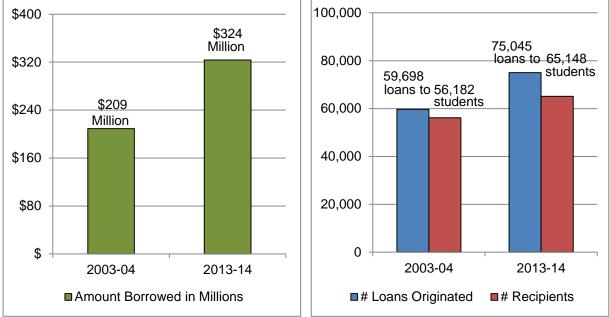

Nebraska's Coordinating Commission for Postsecondary Education - 2015 Progress Report

Data source: Nebraska Opportunity Grant Expenditure Report and Unmet Need Report, October 2014.

 ²⁵ Cost of attendance includes tuition and mandatory fees, room and board, and books and supplies.
 ²⁶ For details regarding 2009–2010 estimates, see the Commission's *2012 Tuition, Fees and Financial*

Aid Report. For details regarding 2012–2013 estimates, see the 2014 Tuition, Fees and Financial Aid *Report*, Both reports are available at: www.ccpe.ne.gov.

²⁷ Originated loans, including fees.

Level of Student Borrowing to Attend Nebraska's Public Colleges and Universities 2013–2014 Compared to 2003–2004

Need-Based Financial Aid

In addition to the Nebraska Opportunity Grant, the state provides financial aid through a system of tuition waivers at the Nebraska state colleges and the institutions constituting the University of Nebraska. However, tuition waivers may or may not be need-based, depending on how each institution decides to allocate tuition waivers.

The State of Nebraska also funds the Access College Early (ACE) Scholarship Program. Initiated in fall 2007, ACE scholarships are awarded to eligible low-income Nebraska high school students who take college courses for credit from qualified postsecondary institutions while the students are still in high school.

In fall 2011, the ACE Plus program was initiated. This program is fully funded by a federal College Access Challenge Grant (CACG) and is designed to provide financial aid to Nebraska college students who received ACE scholarships while they were in high school.

Since Nebraska's state grant program has been the primary source of state-funded, need-based financial aid for Nebraska residents who are attending postsecondary institutions within the state, the analysis in this section focuses primarily on the changes in the funding of Nebraska's state grant program that occurred between 2003–2004, which is this report's baseline year, and 2013–2014. In the analysis of the Nebraska's state grant program, other sources of need-based aid also are discussed to present a complete picture of the amount of financial aid available to Nebraskans. The last part of this section focuses on the growth of the Access College Early (ACE) Scholarship Program, the college continuation rates of ACE scholarship recipients, and the funding and profiles of ACE Plus scholarship recipients.

Data sources: U.S. Department of Education Office of Postsecondary Education, January 2015; Nebraska CCPE Supplements, October 2014.

The Nebraska State Grant Program and Other Sources of Title IV Financial Aid

The Nebraska state grant program was one of several programs based on or administered under the guidelines of Title IV of the U.S. Higher Education Act between 2003 and 2013. These programs provide financial aid to students attending postsecondary institutions in Nebraska and include the following federal programs (see <u>Explanatory Note A8.1</u> in <u>Appendix 8</u> for definitions of all of the financial aid programs listed below)²⁸:

- Academic Competitiveness Grant (ACG)
- Federal Pell Grant
- Federal Supplemental Educational Opportunity Grant (FSEOG)
- Federal Work-Study (FWS)
- National Science and Mathematics Access to Retain Talent (SMART) Grant
- Perkins Loans
- PLUS Loans
- PLUS Loans for Graduate and Professional Degree Students (Grad PLUS)
- Subsidized (Sub) and Unsubsidized (Unsub) Stafford Loans
- Teacher Education Assistance for College and Higher Education Grant (TEACH)

Federal Pell Grants are awarded to undergraduates who have not yet earned bachelor's degrees and who demonstrate high financial need. Nebraska state grants are awarded to Nebraska-resident students who demonstrate high financial need and attend eligible Nebraska postsecondary institutions.

Funding of Awarded State Grants

- The majority of the funding for Nebraska's state grants has come from the state through the Nebraska Lottery and the state's general fund. From 2003–2004 through 2010–2011, the remaining funding came from the federal government through its regular and special Leveraging Educational Assistance Partnership (S/LEAP) authorizations. In 2011–2012, the Nebraska state grant program became entirely dependent on state funding.
- As shown in <u>Table 1.5.1</u>, \$7,704,305 in general state funds accounted for 88.2% of the \$8,735,163 awarded through Nebraska state grants in 2003–2004.
- Between 2003–2004 and 2013–2014, state funding increased \$8,715,413, or 113.1%. (See <u>Figure 1.5.1</u> for the breakdown of lottery funds, the state general fund, and federal funds.)
- In total, the amount of state and federal funding awarded through the state grant program increased 88.0%, from \$8,735,163 in 2003–2004 to \$16,419,718 in 2013–2014.

²⁸ The Academic Competitiveness Grant and National Science and Mathematics Access to Retain Talent (SMART) Grant were eliminated after the 2010–2011 academic year.

Data sources: U.S. Department of Education Office of Postsecondary Education and Nebraska's Coordinating Commission for Postsecondary Education, October 2005–2014.

^a Many states were unable to participate in the federal funding program in the 2003–2004 academic year. Therefore, those that were able to participate, like Nebraska, received extra funding. In the 2004–2005 academic year, many of the states that could not participate in the previous year were able to return to the program, which reduced the amount of funding to the other participating states.

Nebraska State Grants as a Percentage of All Title IV Financial Aid

Between 2003–2004 and 2012–2013, Nebraska's state grants represented only a small percentage of the total Title IV financial aid awarded through all of the eligible postsecondary institutions in Nebraska. <u>Table 1.5.2</u> compares the total amount of financial aid awarded to students attending Nebraska colleges and universities in 2012–2013, the latest year for which federal data for all Nebraska institutions are available, to financial aid awarded in 2003–2004 (the baseline for this report).

- A total of \$848,280,115 Title IV financial aid was awarded to students at Nebraska's postsecondary institutions in 2012–2013, an increase of 64.6% from the 2003–2004 baseline amount of \$515,291,402.
- Nebraska's state grants were equivalent to 1.8% of the total Title IV financial aid awarded to students attending Nebraska postsecondary institutions in 2012–2014, up from 1.7% in 2003–2004.²⁹

²⁹ The interest on a Perkins Loan or a subsidized loan is paid by the federal government while the student borrower is in college. Therefore, this interest is comparable to a grant in the sense that it does not have to be repaid. For the sake of clarification, the amounts reported in this section are for the actual amounts borrowed, *not including interest*.

Nebraska State Grants as a Percentage of Title IV Financial Aid Awarded at Nebraska Public Institutions

- The amounts of federal funding for all types of Title IV financial aid that were awarded to students at all of Nebraska's eligible postsecondary institutions in 2013–2014 are not yet available. However, the amount of aid awarded through each Title IV program to students attending the state's *public* institutions in 2013–2014 is available to compare to the amount awarded in 2003–2004.
- A total of \$454,783,195 Title IV financial aid was awarded to students at Nebraska's *public* postsecondary institutions in 2013–2014, an increase of \$217,902,229 (92.0%) from the 2003–2004 baseline amount of \$236,880,966.
- As shown in <u>Table 1.5.3</u>, Nebraska state grants accounted for 2.5% of the \$454,783,195 in financial aid awarded by Nebraska's public institutions in 2013–2014, up from 2.1% in 2003– 2004.

Need-Based Financial Aid (Excluding Loans) Awarded at Nebraska's Public Institutions

Title IV Aid (Excluding Loans):

- As shown in <u>Table 1.5.4</u>, of the \$125,099,338 awarded through grants or the work-study program in 2013–2014, 9.1% was awarded through the Nebraska state grants program, compared to 8.7% in 2003–2004.
- State funds accounted for 100% of the \$11,322,929 awarded in state grants to students enrolled at public institutions in 2013–2014. Since 2011–2012, no federal funds have been available for funding the state grants program.
- Total federal funding of grants and work study increased by 114.7%, or by \$60,783,819 from \$52,992,590 in 2003–2004 to \$113,776,409 in 2013–2014.
- Between 2003–2004 and 2013–2014, state funding of state grants increased \$6,936,819, or by 158.1%, from \$4,386,690 to \$11,322,929. The state funded portion of the Nebraska state grants program increased from being equivalent to 7.6% of the total Title IV financial aid, excluding loans, awarded through Nebraska public institutions in 2003–2004 to equaling 9.1% in 2013–2014.

Other Need-Based Aid (Excluding Loans):

Although Title IV-related programs are the primary source of need-based financial aid, other institution-based programs are available to assist students. Programs available through the state's public institutions are funded by the institutions and private sources. In addition, state funding is provided through need-based tuition waivers offered by the Nebraska state colleges and the institutions constituting the University of Nebraska.

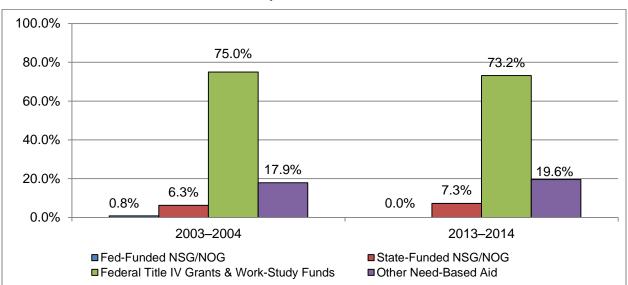

- The total amount of need-based financial aid, not including Title IV aid, provided to students by Nebraska's public institutions increased 143.1% from \$12,513,302 in 2003–2004 to \$30,420,772 in 2013–2014.
- Between 2003–2004 and 2013–2014, the amount of other need-based aid provided by Nebraska's six community colleges increased 193.9%, while the amount of other needbased aid provided by the University of Nebraska increased 133.3% and the amount of other need-based aid awarded by the Nebraska State College System increased 124.1%.

Total Need-Based Aid (Excluding Loans):

- The total amount of need-based financial aid provided to students attending Nebraska's public institutions, including Title IV programs and other need-based aid, but excluding loans, increased 122.5% from \$69,892,582 in 2003–2004 to \$155,520,110 in 2013–2014.
- As illustrated in <u>Figure 1.5.5</u>, the state-funded portion of the Nebraska's state grants program accounted for 6.3% of all of the need-based aid awarded by Nebraska public institutions in 2003–2004, excluding loans, compared to 7.3% in 2013–2014.

October 2014.

Total Need-Based Financial Aid (Excluding Loans) Awarded by <u>Public</u> Nebraska Postsecondary Institutions 2013–2014 Compared to 2003–2004 Baseline

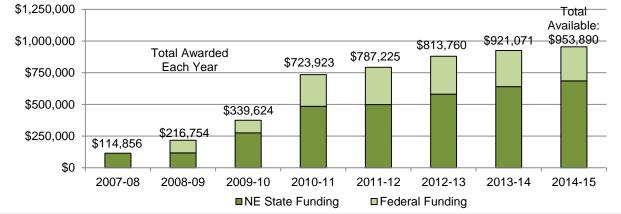

Note. NOG = Nebraska Opportunity Grant; NSG = Nebraska State Grant. The Nebraska State Grant program was in effect from 2003–04 through 2009–10. In 2010–11, the program was renamed the Nebraska Opportunity Grant. Data sources: U.S. Department of Education Office of Postsecondary Education, January 2015; Nebraska DAS Supplements and Nebraska CCPE Supplements, October 2005 and October 2014.

Access College Early (ACE) Scholarship Program

The State of Nebraska funds the Access College Early (ACE) Scholarship Program, which was started in fall 2007. ACE scholarships are awarded to eligible low-income Nebraska high school students who take courses for credit from postsecondary institutions while the students are in high school. These courses are typically dual enrollment courses, which are offered for both high school and college credit, but some are college courses offered only for college credit. Figure 1.5.6 illustrates the growth of the ACE Scholarship Program. Using state and federal funds, the program has grown steadily since its inception.

- In 2007–2008, 363 ACE scholarships totaling \$114,856 were awarded to 294 Nebraska high school students from 110 high schools. These students registered for 1,698 credit hours at 11 Nebraska colleges and universities.
- In 2013–2014, 3.969 ACE scholarships totaling \$921.071 were awarded to 1.866 Nebraska high school students from 217 high schools. These students registered for 13.592 credit hours at 20 Nebraska colleges and universities.

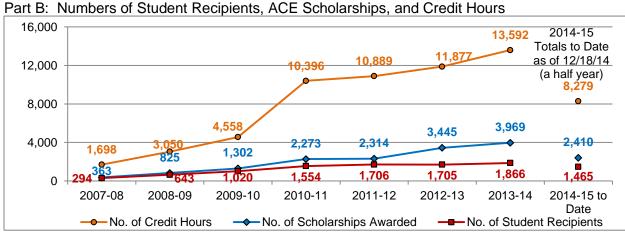

Figure 1.5.6

Growth of the Nebraska Access College Early (ACE) Scholarship Program 2007–2008 through 2014–2015 to Date

Part A: Sources and Amount of Scholarships Awarded

Note. \$573,880 has been awarded for the 2014–15 academic year as of December 18, 2014. See Table A8.3 in Appendix 8 for supporting data. Data source: Records maintained by Nebraska's Coordinating Commission for Postsecondary Education, August 2011, January 2013, January 2014, and December 2014.

Research on the College Continuation Rates of ACE Scholarship Recipients

Since 2009, the Coordinating Commission has conducted research to determine how many of the high school seniors who receive ACE scholarships continue on to college compared to other low-income and non-low-income graduates of Nebraska's public high schools.

For this research, a <u>college continuation rate</u> is defined as the percentage of high school graduates who were enrolled in college within one year of their high school graduation. For example, for the high school seniors who received ACE scholarships during 2012–2013, the college continuation rate is the percentage of these students who were enrolled in college any time between June 1, 2013 and May 31, 2014. Throughout this summary, the terms college continuation rate and college-going rate are used interchangeably.

Using student records and summary reports from the Nebraska Department of Education (NDE) and enrollment records from the National Student Clearinghouse, the Commission calculates the college continuation rates by gender for the high school seniors who were ACE scholarship recipients.

The Commission then compares the college continuation rates for the seniors who received ACE scholarships while attending *public* high schools to the college continuation rates for other low-income and non-low-income graduates of Nebraska's public high schools.

<u>Low-income students</u> are defined as students who are approved to receive free or reduced-price school lunches.

<u>Non-low-income students</u> are students who are not approved for free or reduced-price school lunches.³⁰ (See Section 1.1.c of this report for further information.)

Students who were homeschooled or attended nonpublic (private) high schools were not included in this phase of the research because the NDE does not have sufficient records for the Commission to compute college continuation rates for nonpublic high school students by income status.

Profile of Nebraska High School Seniors Who Received ACE Scholarships

Since 2007–2008, the number of ACE scholarships awarded to high school seniors has steadily increased. However, as total funding for the ACE scholarship program has increased, more scholarships have been awarded to students during their freshmen, sophomore, or junior year of high school. As a result, the percentage of ACE recipients who received scholarships during their senior year decreased from 74.8% in 2007–2008 to 57.9% in 2012–2013.

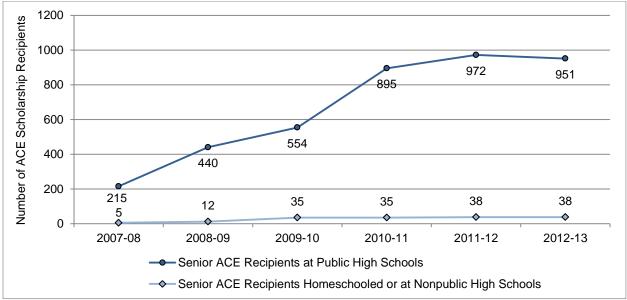

• As shown in <u>Figure 1.5.7</u>, the number of seniors who received ACE scholarships while attending *public* high schools increased from 215 in 2007–2008 to 951 in 2012–2013. The number of senior ACE recipients who were homeschooled or attended nonpublic high schools increased from only five students in 2007–2008 to 38 students in 2012–2013.

³⁰ Non-low-income students for this study include at least some students who live in low-income households but who did not apply for free or reduced-price school lunches. Since participation in the free or reduced-price school lunch program is the only indicant of household income in the student records maintained by the Nebraska Department of Education, low-income students in the non-low-income category cannot be identified and excluded for the purposes of analysis.

- Seniors who received ACE scholarships while attending *nonpublic* high schools accounted for 3.8% of the seniors who received ACE scholarships in 2012–2013, up from 2.3% in 2007–2008.
- As evidenced in <u>Appendix 8</u> (Part 1 of <u>Tables A8.4.a</u>, <u>A8.4.b</u>, <u>A8.4.c</u>, <u>A8.4.d</u>, <u>A8.4.e</u>, and <u>A8.4.f</u>), among high school seniors who received ACE scholarships between 2007–2008 and 2012–2013, significantly more females received scholarships than their male classmates. Females accounted for 65.9% of the senior scholarship recipients in 2007–2008 and 64.1% in 2012–2013.

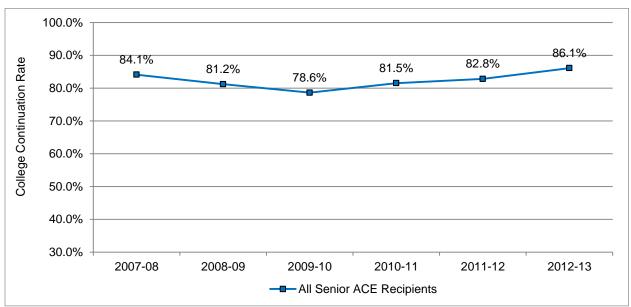

Number of High School Seniors Who Received Access College Early (ACE) Scholarships by Type of School Attended: 2007–2008 through 2012–2013

Note. See <u>Tables A8.4.a</u>, <u>A8.4.b</u>, <u>A8.4.c</u>, <u>A8.4.c</u>, <u>A8.4.e</u>, and <u>A8.4.f</u> in <u>Appendix 8</u> for supporting data. Data source: Nebraska ACE Scholarship Program records, Nebraska's Coordinating Commission for Postsecondary Education, February 2015.

College Continuation Rates for Nebraska ACE Scholarship Recipients

- From the first year of the program in 2007–2008 to the third year in 2009–2010, the college continuation rates of ACE scholarship recipients decreased as the number of awarded ACE scholarships increased. As shown in Figure 1.5.8, the college continuation rates for *all seniors* who received ACE scholarships decreased from 84.1% for students who graduated in 2007–2008 to 78.6% for those who finished high school in 2009–2010.
- However, the college-going rate for ACE scholarship recipients has since increased to 86.1% among the 2012–2013 graduates. This compares to 70.8% for Nebraska's overall college-going rate for 2012–2013.

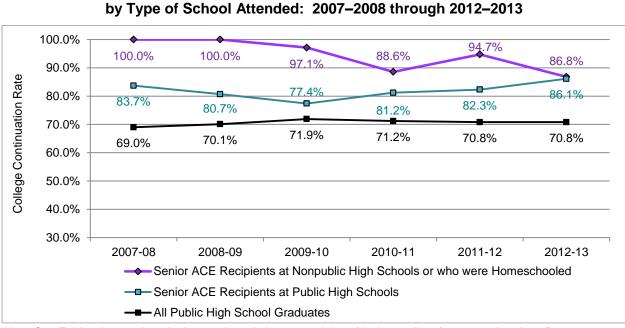

College Continuation Rates for All High School Seniors Who Received Access College Early (ACE) Scholarships 2007–2008 through 2012–2013

Note. See <u>Tables A8.4.a</u>, <u>A8.4.b</u>, <u>A8.4.c</u>, <u>A8.4.d</u>, <u>A8.4.e</u>, and <u>A8.4.f</u> in <u>Appendix 8</u> for supporting data. Data source: Nebraska ACE Scholarship Program records maintained by Nebraska's Coordinating Commission for Postsecondary Education and enrollment records from the National Student Clearinghouse, July, 2009, April, 2010, March, 2011, March, 2012, August, 2013, and April 2014.

College Continuation Rates by School Type

- As shown in <u>Figure 1.5.9</u>, the college-going rate for ACE scholarship recipients who were homeschooled or attended *nonpublic* (private) high schools decreased from 100.0% of the graduates in 2007–2008 to 86.8% of those in the class of 2012–2013. While the collegegoing rate for these ACE scholarship recipients appears to have dramatically decreased in 2010–2011 and 2012–2013, it is important to remember this cohort has historically consisted of only five to 38 students per year.
- The college-going rate for ACE scholarship recipients at Nebraska's *public* high schools decreased from 83.7% among the seniors who received scholarships in 2007–2008 to 77.4% for the class of 2009–2010. However, the college-going rate has since increased to 86.1% for 2012–2013 recipients.
- <u>Figure 1.5.9</u> also shows that college continuation rates of the *public* high school recipients of ACE scholarships have consistently been significantly higher than the statewide college continuation rates for all graduates of Nebraska's public high schools.

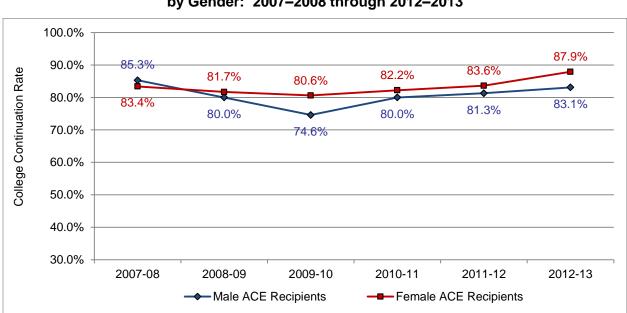

College Continuation Rates for High School Seniors Who Received Access College Early (ACE) Scholarships by Type of School Attended: 2007–2008 through 2012–2013

Note. See <u>Tables A8.4.a</u>, <u>A8.4.b</u>, <u>A8.4.c</u>, <u>A8.4.d</u>, <u>A8.4.e</u>, and <u>A8.4.f</u> in <u>Appendix 8</u> for supporting data. Data source: Nebraska ACE Scholarship Program records maintained by Nebraska's Coordinating Commission for Postsecondary Education and enrollment records from the National Student Clearinghouse, July, 2009, April, 2010, March, 2011, March, 2012, August, 2013, and April 2014.

College Continuation Rates by Gender

- For a number of years, the college-going rates of male high school graduates have been lower than the rates of their female classmates. However, as shown in <u>Figure 1.5.10</u>, the college continuation rate for male ACE scholarship recipients in 2007–2008 was 85.3%, compared to a slightly lower rate of 83.4% for the female recipients that year.
- The college continuation rate for male ACE scholarship recipients in 2012–2013 was 83.1%, compared to a rate of 87.9% for the female recipients in 2012–2013.

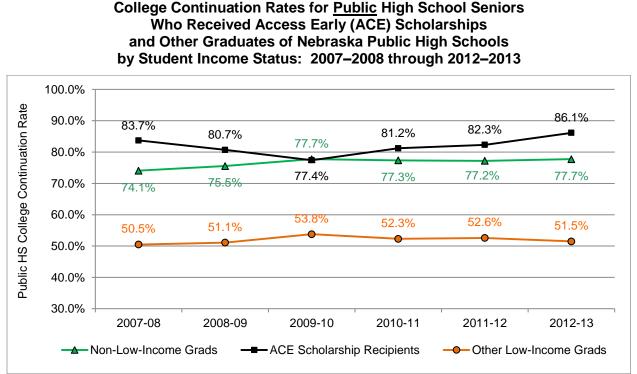

College Continuation Rates for High School Seniors Who Received Access College Early (ACE) Scholarships by Gender: 2007–2008 through 2012–2013

Note. See <u>Tables A8.4.a</u>, <u>A8.4.b</u>, <u>A8.4.c</u>, <u>A8.4.c</u>, <u>A8.4.e</u>, and <u>A8.4.f</u> in <u>Appendix 8</u> for supporting data. Data source: Nebraska ACE Scholarship Program records maintained by Nebraska's Coordinating Commission for Postsecondary Education and enrollment records from the National Student Clearinghouse, July, 2009, April, 2010, March, 2011, March, 2012, August, 2013, and April 2014.

College Continuation Rates by Household Income

- As shown in <u>Figure 1.5.11</u>, college continuation rates of ACE scholarship recipients have been higher than, or about equal to, the rates for non-low-income graduates of the state's public high schools. In effect, these scholarships have enabled low-income students to continue on to college at rates that are higher than, or at least equal to, the rates for their non-low-income classmates.³¹
- College continuation rates for ACE scholarship recipients were significantly higher than the college-going rates for other low-income students who graduated from Nebraska's public high schools between 2007–2008 and 2012–2013.
- Specifically, 86.1% of the 2012–2013 public high school seniors who received ACE scholarships continued on to college, compared to 77.7% of their classmates from non-low-income households and 51.5% of the other low-income public high school students who graduated the same year.

³¹ To calculate the college continuation rates for other low-income graduates, the recipients of ACE scholarships were assumed to be included among the male and female low-income graduates reported by the Nebraska Department of Education to the Coordinating Commission. The numbers of other low income graduates were determined by subtracting the numbers of male and female ACE scholarship recipients from the total numbers of male and female low income graduates reported by the Nebraska

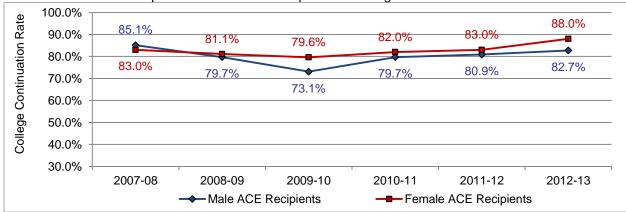

Note. See <u>Tables A8.4.a</u>, <u>A8.4.b</u>, <u>A8.4.c</u>, <u>A8.4.d</u>, <u>A8.4.e</u>, and <u>A8.4.f</u> in <u>Appendix 8</u> for supporting data. Data source: Nebraska ACE Scholarship Program records maintained by Nebraska's Coordinating Commission for Postsecondary Education and enrollment records from the National Student Clearinghouse, July, 2009, April, 2010, March, 2011, March, 2012, August, 2013, and April 2014.

College Continuation Rates by Gender and Household Income

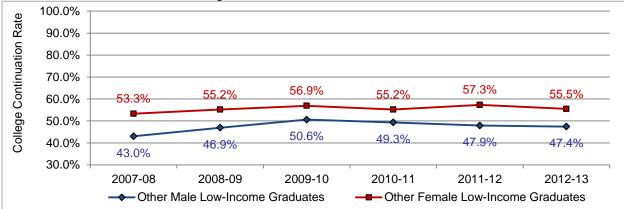

- Females accounted for about seven out of ten public high school seniors who received ACE scholarships between 2007–2008 and 2012–2013.
- In comparison, females accounted for about half of the low-income and non-low-income students who graduated from Nebraska's public high schools between 2007–2008 and 2012–2013.
- Even though males accounted for about half of all the students who graduated from Nebraska's high schools between 2007–2008 and 2012–2013, fewer males than females continued on to college after high school graduation.
- The three charts constituting <u>Figure 1.5.12</u> directly compare the college continuation rates of the male and female students within each of the three sub-groups of seniors who graduated from Nebraska's public high schools between 2007–2008 and 2012–2013.
- As shown in <u>Part A</u> of <u>Figure 1.5.12</u>, in 2007–2008, the college continuation rate for the male recipients of ACE scholarships was 2.1 percentage points *higher* than the college continuation rate for female ACE recipients (85.1% vs. 83.0%). For the class of 2012–2013, the college continuation rate for male ACE recipients was 5.3 percentage points *lower* than the rate for female ACE recipients (82.7% vs. 88.0%).

College Continuation Rates for <u>Public</u> High School Seniors Who Received Access College Early (ACE) Scholarships and Other Graduates of Nebraska Public High Schools by Student Income Status and Gender: 2007–2008 through 2012–2013

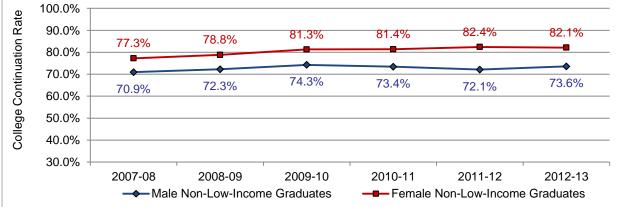

Note. See <u>Tables A8.4.a</u>, <u>A8.4.b</u>, <u>A8.4.c</u>, <u>A8.4.d</u>, <u>A8.4.e</u>, and <u>A8.4.f</u> in <u>Appendix 8</u> for supporting data. Data source: Nebraska ACE Scholarship Program records maintained by Nebraska's Coordinating Commission for Postsecondary Education and enrollment records from the National Student Clearinghouse, July, 2009, April, 2010, March, 2011, March, 2012, August, 2013, and April 2014.

- As evidenced in <u>Part B</u> of <u>Figure 1.5.12</u>, the college-going rate for other low-income females in the class of 2007–2008 was 53.3%, or 10.3 percentage points higher than the 43.0% college-going rate for other low-income males. For the class of 2012–2013, the gap between males and females from other low-income households had dropped to 8.1 percentage points, with 55.5% of the females going on to college, compared to 47.4% of the males.
- As shown in <u>Part C</u> of <u>Figure 1.5.12</u>, the college-going rates for female graduates from non-low-income households were 6.4 percentage points higher than the college continuation rates for non-low-income males for the class of 2007–2008 (77.3% vs. 70.9%). For the non-low-income graduates from the class of 2012–2013, the college going rates for females was 8.5 percentage points higher than the college going rates for males (82.1% vs. 73.6%).
- College-going rates for both male and female ACE scholarship recipients from 2007–2008 to 2012–2013 were significantly higher than the comparable college-going rates for male and female graduates from other low-income households.
- Male and female ACE scholarship recipients have had higher college-going rates than their male and female classmates from non-low-income households, with the exception of the ACE scholarship recipients in 2009–2010.
- There is strong evidence that the ACE scholarship program has enabled male and female low-income students to continue on to college at rates that are higher than, or close to, the college-going rates of their non-low-income classmates. However, the consistent gap between the college-going rates of male and female graduates, regardless of scholarship availability or household income, suggests other factors need to be identified and addressed to increase the college-going rates of the young men who graduate from Nebraska's public high schools.

2014 ACE Scholarship Recipient Survey

While the college continuation rates for ACE scholarship recipients are over 50% higher than the rates for other low-income Nebraska high school graduates, not all ACE recipients continue onto college. Between 2007–2008 and 2012–2013, 4,190 high school seniors received ACE scholarships and 3,461 continued onto college within a year of high school graduation according to the National Student Clearinghouse (NSC). In other words, 729 of the students who received an ACE scholarship during their senior year of high school did not continue onto college.

To gain insight into why recipients sometimes do not continue onto college, the 2014 ACE Scholarship Recipient Survey was conducted by CCPE. Students who received one or more ACE scholarships while seniors during the academic years of 2011–2012 or 2012–2013, and did not continue onto college within one year of high school graduation, were surveyed.

A total of 89 students completed the survey (response rate = 29.0%). Surprisingly, 49 respondents reported they had continued on to college within a year of their high school graduation. Specifically, 67.2% of the 2011–2012 respondents and 33.3% of the 2012–2013 respondents reported continuing onto college within one year of their high school graduation, despite the fact that NSC data indicated that none of these students continued onto college within one year of high school graduation. The impact of this is that rather than having a college-going rate of 84.4% for the combined cohorts, the survey results show that the actual college-going rate was at least 86.9%.

While National Student Clearinghouse data is not perfect (not all postsecondary institutions are required to submit data to NSC, both students and schools can put directory

blocks on their information at the NSC, and data matching issues sometimes arise because of name misspellings/birth date errors), their coverage is estimated to be 95%. It is suspected that many of the ACE recipients failed to match because of name misspellings and/or birth date errors. Beginning with the 2012–2013 academic year, the Commission converted its ACE Scholarship application from a paper form to an online form, and it appears as though this change has helped to reduce matching errors attributable to data entry errors.

The college continuation rates presented in the preceding portion of this report were not corrected to account for ACE recipients who stated they had continued onto college for two reasons. First, these were self-reports of continuing onto college and were not verified with the postsecondary institutions. Second, the survey was conducted with only two out of six senior classes. Altering college continuation rates for these two classes would make trend analyses invalid.

Some other important findings of the study include:

- For the 2011–2012 cohort, an additional eight respondents reported continuing onto college within one to two years after high school graduation. (Since the survey was conducted in the summer of 2014, it is unknown how many of the 2012–13 cohort continued onto college within one to two years of high school graduation.)
- 93.1% agreed (33.3%) or strongly agreed (59.8%) that dual-enrollment was beneficial.
- 87.5% fell prepared (53.4%) or very prepared (34.1%) to take college-level courses when they graduated from high school.
- For respondents who had not yet continued on to college, 93.5% stated that completing a college degree is a goal of theirs.

The ACE Plus Scholarship Program

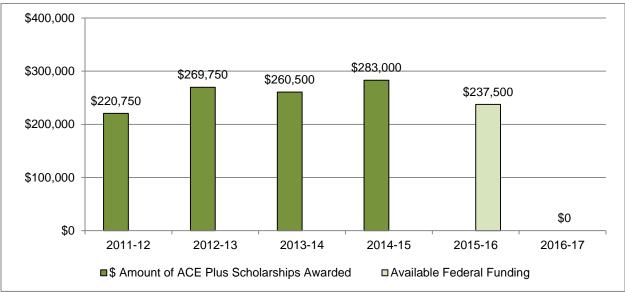

The ACE Plus scholarship program was initiated by the Commission in 2011–2012 to provide assistance to first- and second-year college students who were Access College Early (ACE) scholarship recipients prior to graduating from high school. A student does not have to receive an ACE Plus scholarship for their first year of college in order to qualify for a scholarship for their second year in college. However, to qualify for an ACE Plus scholarship, a student must have taken at least one college course while in high school that was funded by the ACE scholarship program and be enrolled full time in college for a full academic year. In addition, they must have earned at least a 2.0 GPA in ACE courses while in high school and maintain at least a 2.0 GPA during their first year of college in order to qualify for a second-year scholarship.

ACE Plus Funding

- The ACE Plus scholarship was initially funded with \$223,000 of a federal College Access Challenge Grant (CACG). Of the \$223,000, a total of \$220,750 was awarded in scholarships for the 2011–2012 academic year.
- For 2014–2015, \$283,000 in federal CACG funding was awarded for ACE Plus scholarships. As shown in <u>Figure 1.5.13</u>, the ACE Plus budget for 2015–2016 is \$237,500, again funded through CACG. No funding is available for the ACE Plus program in 2016– 2017.
- The first awards of ACE Plus scholarships were made in July and August 2011 for the 2011–2012 academic year. Awards for first-year college students were for \$500, while second-year students received awards of \$1,250. Since 2012–2013, awards for first-year college students were still \$500, but the scholarships for second-year students were reduced to \$1,000 so that ACE Plus scholarships could be awarded to more students.

Amount Awarded for ACE Plus Scholarships for 2011–2012 through 2014–2015 and Amount of Funding Available for 2016–2017

Data source: Nebraska's Coordinating Commission for Postsecondary Education, November 2014.

ACE Plus by Year in College

- As shown in <u>Figure 1.5.14</u>, a total of 317 ACE Plus scholarships were awarded for the 2011–2012 academic year. Of the 317 scholarships awarded, 234 (73.8%) went to first-year students and 83 (26.2%) were awarded to second-year students.
- Of the 377 scholarships awarded for 2014–2015, 188 (49.9%) were awarded to first-year students, while second-year students received 189 (51.1%) of ACE Plus scholarships.

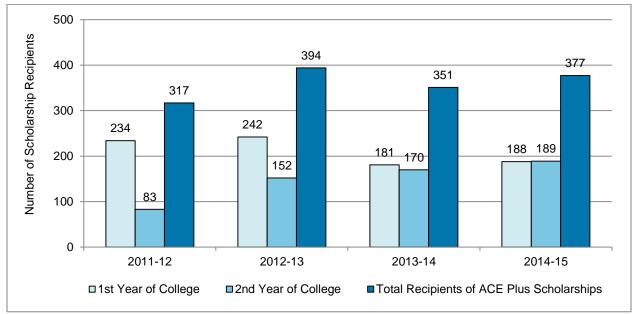

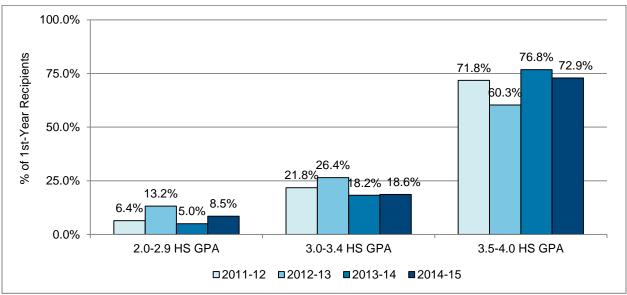

Figure 1.5.14

Recipients of ACE Plus Scholarships by Year in College 2011–2012 through 2014–2015

ACE Plus by Student GPA

- The academic success of the students who received ACE Plus scholarships is illustrated in Figure 1.5.15 and Figure 1.5.16.
- Since inception of the ACE Plus program in 2011–2012, more than 85% of the students who
 received ACE Plus scholarships for their first year of college reported a high school reported
 a high school grade-point average (GPA) of 3.0 or higher, and at least 60% reported a GPA
 between 3.5 and 4.0. (See Figure 1.5.15.)
- In additional, since the program began in 2011–2012, over 80% of students who received ACE Plus scholarships for their second year of college finished their first year in college with a GPA of 3.0 or higher. Roughly 50% or more earned first year GPAs in the range of 3.5 to 4.0. (See <u>Figure 1.5.16</u>.)

Note. See <u>Table A8.5</u> in <u>Appendix 8</u> for supporting data. Data source: Nebraska's Coordinating Commission for Postsecondary Education, November 2014.

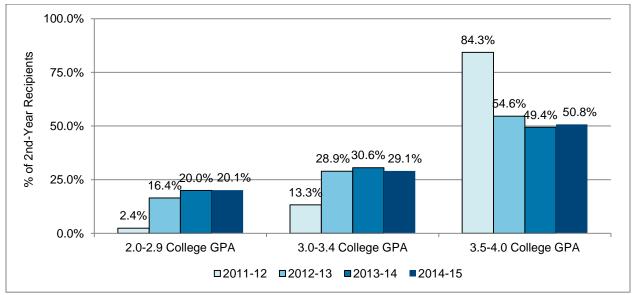

High School Grade-Point Average (GPA) of Students Who Received ACE Plus Scholarships for Their First Year of College 2011–2012 through 2014–2015

Note. High school GPA is equal to the student's unweighted high school GPA, unless the student's transcript only contained a weighted GPA. GPAs greater than 4.0 were rounded to 4.0. For 2011–12, 2012–13, and 2013–14: high school GPA was self-reported by the student at the time of his/her ACE Plus application. For 2014–15: high school GPA was obtained by Commission staff from the student's unofficial high school transcript. See <u>Table A8.5</u> in <u>Appendix 8</u> for supporting data. Data source: Nebraska's Coordinating Commission for Postsecondary Education, November 2014.

Freshmen Year (College) Grade-Point Average (GPA) of Students Who Received ACE Plus Scholarships for Their Second Year of College 2011–2012 through 2014–2015

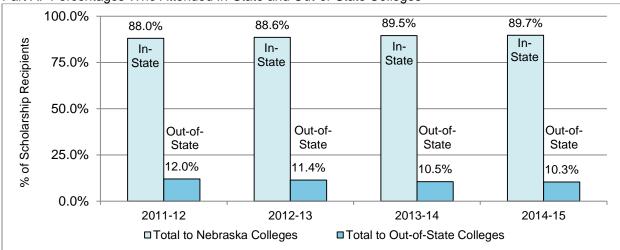

Note. College GPA was obtained by Commission staff from the student's unofficial college transcript. See <u>Table A8.5</u> in <u>Appendix 8</u> for supporting data. Data source: Nebraska's Coordinating Commission for Postsecondary Education, November 2014.

ACE Plus by In-State and Out-of-State and by Sector within Nebraska

- As shown in <u>Figure 1.5.17</u>, 89.7% of the ACE Plus scholarship recipients went to college in Nebraska in 2014–2015, while 10.3% attended out-of-state schools. (The federal funds that support this program cannot be restricted to students attending in-state institutions.)
- In 2014–2015, of the 338 ACE Plus recipients who attended Nebraska colleges, 57% attended institutions constituting the University of Nebraska, 13% enrolled at Nebraska's state colleges, 14% attended Nebraska's community colleges, 15% went to independent (not-for-profit) schools and less than 1% attended for-profit/career schools.

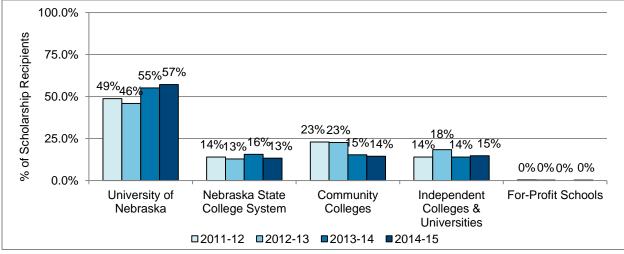

Figure 1.5.17

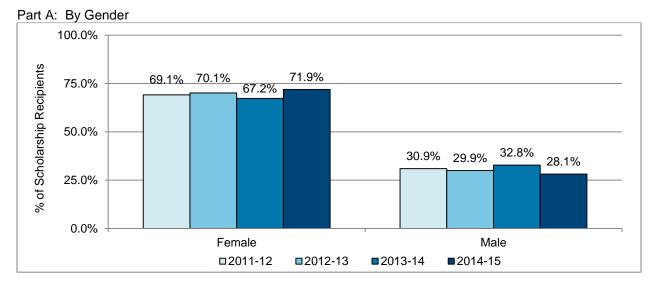

Note. See <u>Table A8.5</u> in <u>Appendix 8</u> for supporting data. Data source: Nebraska's Coordinating Commission for Postsecondary Education, November 2014.

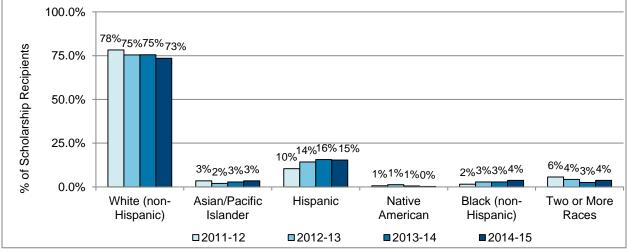

ACE Plus by Gender and Race/Ethnicity

- As shown in Figure 1.5.18, 71.9% of the 2014–2015 ACE Plus scholarships were awarded to females.
- 73% of the ACE Plus scholarships were awarded to white non-Hispanics in 2014–2015, while the remaining 27% of the ACE Plus scholarships were awarded to minorities or students of two or more races.

ACE Plus Scholarship Recipients by Gender and Race/Ethnicity 2011–2012 through 2014–2015

Part B: By Race/Ethnicity

Note. See <u>Table A8.5</u> in <u>Appendix 8</u> for supporting data. Data source: Nebraska's Coordinating Commission for Postsecondary Education, November 2014.

Section 2

Increasing College Retention and Graduation Rates

Priority 2. Increasing the percentage of students who enroll and successfully complete a degree.

The second priority recommended by the 2003 LR 174 Task Force is to <u>increase the</u> <u>percentage of students who enroll and successfully persist through degree completion</u>. To achieve this goal, the LR 174 Task Force concluded that Nebraska's postsecondary education system must (1) decrease the percentage of students who fail to persist beyond their first year(s) of enrollment, (2) increase the percentage of students who complete associate degrees within three years and baccalaureate degrees within six years, and (3) expand upon and strengthen existing associate degree to baccalaureate degree transfer programs.

To monitor the extent to which the first and second strategic objectives are being achieved, this section focuses primarily on <u>freshmen retention rates</u> and <u>college graduation</u> <u>rates</u> that are based on data collected through the Integrated Postsecondary Education Data System (IPEDS), maintained by the National Center for Education Statistics (NCES) in the U.S. Department of Education. In addition, the Coordinating Commission analyzes the <u>transfer rates</u> based on IPEDS data for Nebraska's six community colleges.

The NCES is the best available source of data for monitoring the retention and graduation rates of institutions on an annual basis and over time, either by institution or by sector. However, the <u>retention and graduation rates</u> that are reported to the NCES or calculated using data collected through IPEDS are for <u>first-time freshmen</u> who continue their studies at the <u>same institution</u> where they started college. This type of student represents a decreasing percentage of postsecondary students. Consequently, a statewide analysis of retention and graduation rates based on NCES-IPEDS data does not provide any information about the persistence or graduation rates of a significant number of Nebraska college students who transfer to other institutions to continue their studies, including students who start college in the academic transfer programs offered by Nebraska's community colleges and then transfer to four-year schools to earn bachelor's degrees.

<u>Freshmen retention rates</u> based on IPEDS data are reported for <u>full-time and part-time</u> <u>students</u>. <u>Graduation</u> and <u>transfer rates</u> that are available through IPEDS are based on the same cohort of <u>full-time</u>, <u>first-time freshmen</u>. No information about the graduation rates or transfers of part-time students can be obtained using IPEDS data.

A <u>transfer rate</u> is the percentage of students in a school's full-time, first-time freshmen cohort who transfer to other institutions. However, IPEDS data are not available to determine if transfer students persist in their studies and graduate from the institutions to which they transfer.

Another limitation of the currently available transfer data is that not all institutions are required to report the number of full-time, first-time freshmen who transfer to other schools. As a result, it is impossible to compute a statewide transfer rate that is comparable to Nebraska's statewide graduation rate.

Beginning with the 2010–2011 academic year, all six of Nebraska's community colleges have reported the number of students in their full-time, first-time freshmen cohorts who transferred to other schools. Resulting transfer rates for these schools are reported at the end of Section 2.2 on college graduation and transfer rates based on IPEDS data.

To overcome the limitations of the data available from the NCES and directly address the third strategic objective recommended by the 2003 LR 174 Task Force, the University of Nebraska, the Nebraska State College System, Nebraska's community colleges, and Commission staff conducted an extensive research project in 2006 using data obtained through the National Student Clearinghouse (NSC). Based on the 2006 NSC Research Project, about 11% of full-time freshmen and 14% of part-time freshmen at Nebraska's public institutions transferred to other schools. At least 10% of full-time freshmen who enrolled in bachelor's degree programs at the University of Nebraska or state colleges earned bachelor's degrees after transferring to other institutions. The study also found that about 19% of students initially enrolled in academic transfer programs completed a bachelor's degree within six years, while about 16% completed the academic transfer program but did not transfer to a four-year institution. About 4.4% of students in academic transfer programs earned degrees/certificates at other institutions.

A full report of the 2006 NSC Research Project is in Section 2 of the 2007 Nebraska Higher Education Progress Report, which is available on the Coordinating Commission's website: www.ccpe.ne.gov. Until this type of research is replicated in Nebraska, this progress report will continue to provide policy-makers with an annual analysis of retention, graduation and transfer rates based on NCES-IPEDS data.

In addition to reporting the latest available retention, graduation, and transfer rates based on NCES-IPEDS data, this section of the *Progress Report* includes information about graduation and persistence rates obtained from research conducted by the National Student Clearinghouse Research Center. Using Clearinghouse data, six-year student outcomes based on national cohorts of degree-seeking, first-time freshmen were <u>analyzed by state</u> as well as for the United States as a whole. As a result, it provides additional information about the graduation and persistence rates of students who have started college at two-year colleges, four-year public institutions, and four-year private nonprofit institutions in Nebraska.

The research conducted by the National Student Clearinghouse Research Center is not without limitations. However, the research encompasses part-time students as well as full-time students, and includes students who transferred to other institutions before completing their programs of study. Including these students overcomes important limitations of the analyses that are based only on NCES-IPEDS data. In overcoming these limitations, the research conducted by the Clearinghouse provides previously unavailable information about graduation and persistence rates. Consequently, this information, presented in Section 2.3, should be of interest to public policy makers and administrators of postsecondary institutions in Nebraska.

2.1 Freshmen Retention Rates (Based on IPEDS Data)

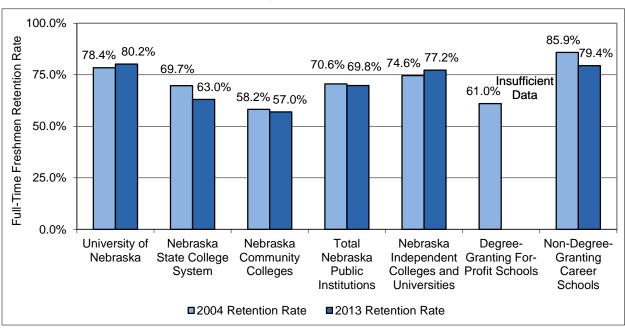

Decrease the percentage of students who fail to persist beyond their first year(s) of enrollment.

The following analysis of freshmen retention rates is based on data reported by Nebraska institutions to the National Center for Education Statistics (NCES) through the Integrated Postsecondary Education Data System (IPEDS), beginning in fall 2004. The NCES generally defines a <u>retention rate</u> as the percentage of the first-time freshmen who enrolled at an institution during the fall semester (or quarter) or the preceding summer of a given academic year and were enrolled at the same institution during the fall semester (or quarter) one year later. Separate retention rates are reported by institutions for their full-time and part-time students.

The latest available data to compare to fall 2004 freshmen retention rates are for fall 2013. Retention rates for fall 2014 will not be available until mid-2015 and will be reported in the 2016 Progress Report.

Full-Time Freshmen Retention Rates by Sector and Institution

<u>Figure 2.1.1</u> shows that full-time freshmen retention rates for the Nebraska State College System, Nebraska's community colleges, and the non-degree-granting career schools were lower in fall 2013 than they were in fall 2004. For the remaining sectors, full-time retention rates were higher in fall 2013 than they were in fall 2004 or data are not sufficient to compute a sector retention rate for fall 2013.

Full-Time Freshmen Retention Rates of Nebraska Postsecondary Institutions by Sector Fall 2013 Compared to Fall 2004 Baseline

Figure 2.1.1

Note. See <u>Table A9.1</u> in <u>Appendix 9</u> for supporting data. Data source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), fall 2004 and 2013 surveys.

- The overall full-time retention rate for the degree-granting, for-profit schools was 61.0% in fall 2004. However, data are insufficient to calculate an equivalent rate for fall 2013 because only three of the schools in this sector reported full-time retention rates for fall 2013 that are comparable to the rates reported for fall 2004. See the footnotes for <u>Table A9.1</u> in <u>Appendix</u> <u>9</u> for more details.
- The net effect of these changes in sector rates was that the estimated overall full-time retention rate for the three public sectors decreased 0.8 percentage points, from 70.6% in fall 2004 to 69.8% in fall 2013, while the rate for all institutions in Nebraska, excluding the degree-granting, for-profit schools, decreased 0.7 percentage points, from 72.1% in fall 2004 to 71.4% in fall 2013.
- See <u>Table A9.1</u> in <u>Appendix 9</u> for data related to the calculated sector and state retention rates for full-time freshmen. See <u>Table A9.4</u> in <u>Appendix 9</u> for the full-time retention rates by institution and sector for fall 2004 and fall 2013.

Part-Time Freshmen Retention Rates by Sector and Institution

<u>Figure 2.1.2</u> shows that the part-time freshmen retention rate for the Nebraska State College System was much lower in fall 2013 than in fall 2004. For the University of Nebraska and Nebraska's community colleges, part-time retention rates were slightly higher in fall 2013 than they were in fall 2004.

Due to insufficient data from institutions in the independent and for-profit sectors, an overall
part-time retention rate for the state cannot be computed for these sectors. However, it can
be estimated that the overall part-time retention rate for the three public sectors—the
University of Nebraska, the Nebraska State College System and Nebraska's community
colleges—increased 0.9 percentage points, from 36.3% in fall 2004 to 37.2% in fall 2013.

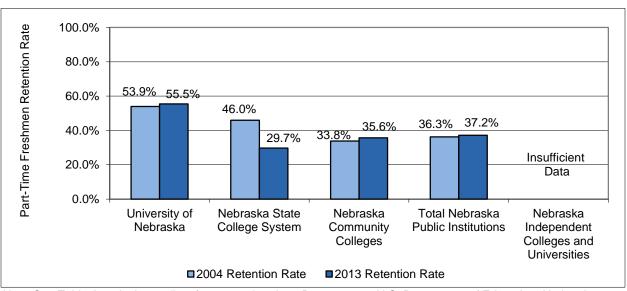

Figure 2.1.2

Part-Time Freshmen Retention Rates of Nebraska Postsecondary Institutions by Sector Fall 2013 Compared to Fall 2004 Baseline

Note. See <u>Table A9.2</u> in <u>Appendix 9</u> for supporting data. Data source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), fall 2004 and 2013 surveys.

- Retention rates for part-time students in all sectors are much lower than those for full-time students.
- See <u>Table A9.2</u> in <u>Appendix 9</u> for data related to the calculated sector rates for part-time freshmen and <u>Table A9.5</u> in <u>Appendix 9</u> for part-time retention rates by institution.

Nebraska Freshmen Retention Rates Compared to Those of Other States

The charts in this section show the fall 2013 overall freshmen retention rates for full-time and part-time freshmen enrolled at Nebraska's <u>public four-year colleges and universities</u> and Nebraska's <u>six community colleges</u>, compared to the retention rates for other states and the nation.

Retention rates reported in <u>Appendix 9</u> may differ slightly from those reported in <u>Figure 2.1.3</u> through <u>Figure 2.1.10</u>. <u>Appendix 9</u> retention rates are estimates, computed by multiplying the retention rate reported by each institution times the number of first-time freshmen who were enrolled the previous fall. Retention rates shown in <u>Figure 2.1.3</u> through <u>Figure 2.1.10</u> are computed by dividing the reported number of retained students by the adjusted fall cohort for first-time freshmen who were enrolled the previous fall. Please see the <u>Technical Note</u> in <u>Table A9.3</u> for further information.

Retention Rates for Public Four-Year Institutions

<u>Figure 2.1.3</u> reveals that the 2013 retention rate for full-time freshmen enrolled at Nebraska's public four-year institutions was below the corresponding national average. However, the 2013 retention rate for part-time freshmen enrolled at Nebraska's public four-year institutions was higher than the corresponding national average (see <u>Figure 2.1.4</u>).

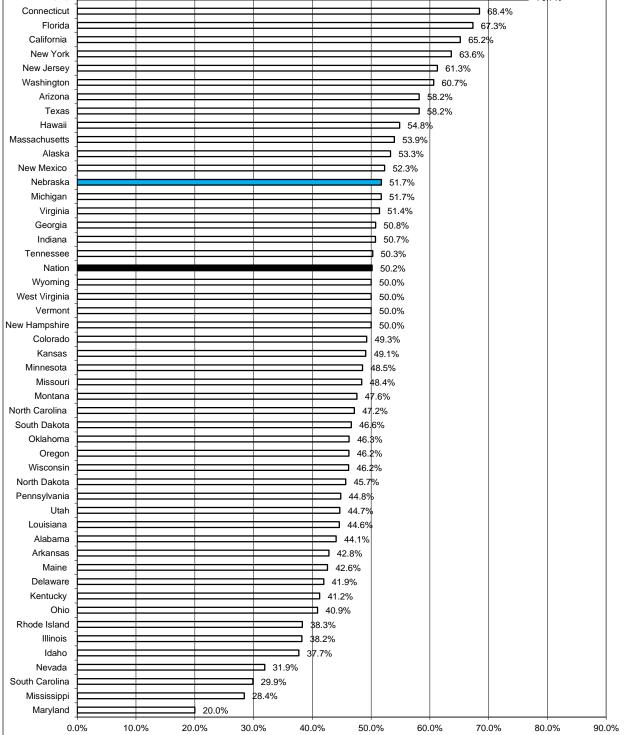

- As shown in <u>Figure 2.1.3</u>, the overall full-time retention rate for Nebraska's public four-year institutions—the University of Nebraska at Kearney, the University of Nebraska-Lincoln, the University of Nebraska at Omaha, and the three institutions in the Nebraska State College System—was 77.3% in fall 2013, compared to a 79.9% retention rate for the nation.
- Since 2005, when national comparisons became available, Nebraska's full-time retention rate for public four-year institutions has decreased 2.1 percentage points while the corresponding national rate increased 2.2 percentage points (see Figure 2.1.5).
- Nebraska's 2013 full-time retention rate for public four-year institutions was the 28th highest in the nation.
- As shown in Figure 2.1.4, the overall part-time retention rate for Nebraska's public four-year institutions was 51.7% in fall 2013, compared to the national average of 50.2%.
- Since 2005, Nebraska's part-time retention rate for public four-year institutions has decreased 0.2 percentage points while the corresponding national rate increased 1.6 percentage points (see Figure 2.1.6).
- Nebraska's 2013 part-time retention rate for public four-year institutions was the 14th highest in the nation.

2013 Part-Time Freshmen Retention Rates for Four-Year Public Institutions by State

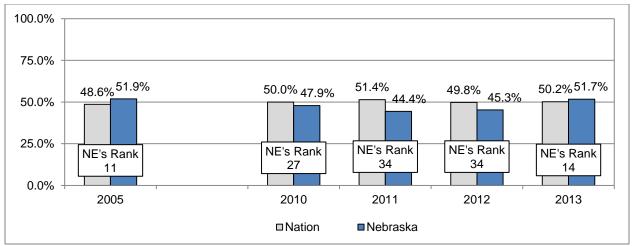

<u>Full-Time</u> Freshmen Retention Rates for <u>Four-Year Public Institutions</u> for Nebraska and the United States 2010 Through 2013 Compared to 2005

Data source: National Center for Education Statistics, IPEDS fall 2013 survey. Commission analysis of data downloaded using the IPEDS cutting tool, February 18, 2015 (before imputation).

Figure 2.1.6

Retention Rates for Public Two-Year Institutions

<u>Figure 2.1.7</u>, through <u>Figure 2.10</u> compare the overall full-time and part-time freshmen retention rates for <u>Nebraska's six community colleges</u> to the state and national rates for <u>all two-year public colleges</u>. These colleges include publicly supported tribal colleges and technical colleges, as well as community colleges. Consequently, retention data for the Nebraska College of Technical Agriculture at Curtis (NCTA-Curtis) and the Nebraska Indian Community College (NICC), which is federally supported, are included in the computation of the <u>national</u> full-time and part-time retention rates for all two-year public colleges. Data for the NCTA-Curtis and the NICC are <u>not included</u> in the calculation of the full-time retention rate for Nebraska's six community colleges shown in <u>Figure 2.1.7</u> through <u>Figure 2.1.10</u>.

- As shown in <u>Figure 2.1.7</u>, the overall full-time retention rate for Nebraska's community colleges was 57.3% in fall 2013, compared to a 59.3% retention rate for the nation.
- Since 2005, Nebraska's full-time retention rate for Nebraska's community colleges has decreased 4.2 percentage points while the corresponding national rate increased 1.0 percentage point (see Figure 2.1.9).
- Nebraska's 2013 full-time retention rate for the community colleges was the 27th highest in the nation.
- As shown in <u>Figure 2.1.8</u>, the overall part-time retention rate for Nebraska's community colleges was 35.5% in fall 2013, compared to the national average of 42.9%.
- Since 2005, Nebraska's part-time retention rate for public two-year institutions has decreased 3.5 percentage points while the corresponding national rate increased 2.3 percentage points (see Figure 2.1.10).
- Nebraska's 2013 part-time retention rate for the community colleges was the 42nd highest in the nation.

2013 <u>Part-Time</u> Freshmen Retention Rates for <u>Two-Year Public Institutions</u> by State (Nebraska Rate for Nebraska Community Colleges Only)

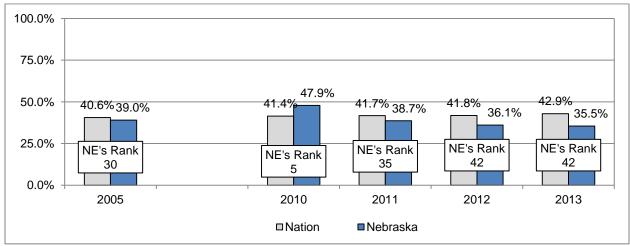

<u>Full-Time</u> Freshmen Retention Rates for <u>Two-Year Public Institutions</u> for Nebraska and the United States (Nebraska Rate for Nebraska Community Colleges Only) 2010 Through 2013 Compared to 2005

Data source: National Center for Education Statistics, IPEDS fall 2013 survey. Commission analysis of data downloaded using the IPEDS cutting tool, February 18, 2015 (before imputation).

Figure 2.1.10

2.2 College Graduation and Transfer Rates (Based on IPEDS Data)

Increase the percentage of students who complete associate degrees within three years and baccalaureate degrees within six years

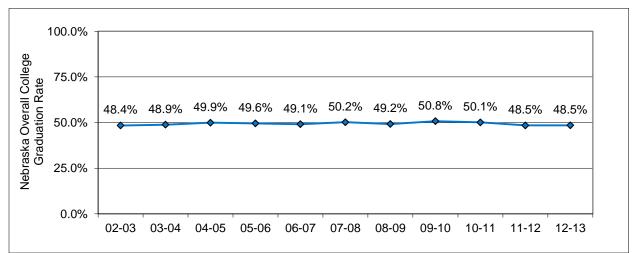

The college graduation rates reported in this section are based on data collected by the National Center for Education Statistics (NCES) through the Integrated Postsecondary Education Data System (IPEDS). The latest available data are for undergraduates who completed degree programs during the 2012–2013 academic year. Completion data for students who finished their degree programs in 2013–2014 will not be available for analysis until mid-2015. Consequently, the following analysis focuses on how 2012–2013 graduation rates for Nebraska institutions compare to 2002–2003 baseline rates. Throughout this analysis, the terms "completion rate" and "graduation rate" are used interchangeably.

Based on the same cohorts as graduation rates, the 2012–2013 transfer rates for Nebraska's six community colleges are presented at the end of this section. Presenting these rates provides an important supplement to the graduation rates reported for these institutions.

Generally, baccalaureate graduation and transfer rates are based on a six-year time frame, while rates for associate degrees are based on three years. In all cases, rates are calculated only for students who enrolled in degree programs as <u>full-time</u>, first-time freshmen. See <u>Explanatory Note A10.1</u> in <u>Appendix 10</u> and <u>Explanatory Note A11.1</u> in <u>Appendix 11</u> for further information on IPEDS-defined time frames and how completion and transfer rates are calculated using IPEDS data.

The Overall College Graduation Rate for Nebraska

As shown in <u>Figure 2.2.1</u> the statewide graduation rate for Nebraska's postsecondary institutions increased from 48.4% in 2002–2003 to 48.5% in 2012–2013, down from a high of 50.8% in 2009–2010 and up only 0.1 percentage point over the ten-year period.³²

Overall College Graduation Rate for Nebraska 2002–2003 through 2012–2013

Figure 2.2.1

Note. See <u>Table A10.1</u> in <u>Appendix 10</u> for supporting data. Data source: National Center for Education Statistics, fall 2003 through fall 2013 IPEDS surveys.

³² Data for Nebraska institutions in the degree-granting and non-degree-granting for-profit sectors are included in the calculation of the state graduation rates presented in this report.

The recent decline in Nebraska's overall graduation rate, from 50.8% in 2009–2010 to 48.5% in 2011–2012 and 2012–2013, can be attributed primarily the decline in graduation rates at the state's community colleges. Between 2009–2010 and 2012–2013, the community colleges' graduation rate dropped from 30.4% to 26.4%. Thus, this sector's recent decline in graduation rates has been a major factor in reducing the state's overall completion rate from 50.8% in 2009–2010 to 48.5% in 2012–2013. *Excluding community colleges*, the state's graduation rate for 2012–2013 would be 57.0% compared to 57.4% for 2009–2010, a three-year decrease of only 0.4 percentage point.

College Graduation Rates by Sector and by Institution

- The state's <u>overall college graduation rate</u> increased only 0.1 percentage point between 2002–2003 and 2012–2013, but completion rates by sector varied noticeably, as shown in <u>Figure 2.2.2</u>. (See <u>Table A10.2</u> in <u>Appendix 10</u> for supporting data.)
- The non-degree-granting, for-profit schools have had the highest overall completion rate among the state's six sectors of postsecondary education since 2002–2003, followed by Nebraska's independent (not-for-profit) colleges and universities and the University of Nebraska.
- The overall graduation rate for the <u>non-degree-granting</u>, <u>for-profit schools</u> decreased from 71.2% in 2002–2003 to 70.4% in 2012–2013, primarily as a result of La'James International College and Xenon International Academy-Omaha reporting lower percentages of completers in 2012–2013.

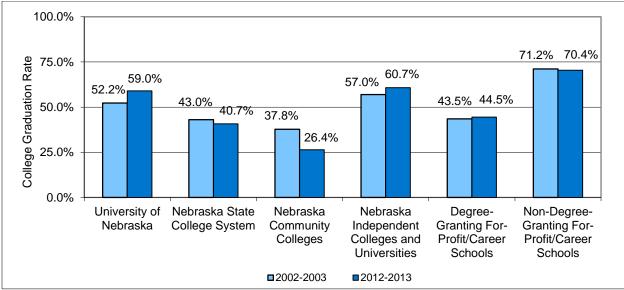

Figure 2.2.2 ates for Nebraska Postsecondary Institution

Graduation Rates for Nebraska Postsecondary Institutions by Sector 2012–2013 Compared to 2002–2003 Baseline

Note. See <u>Table A10.3</u>, <u>Table A10.4.a</u>, and <u>Table A10k</u> in <u>Appendix 10</u> for supporting data. Data source: National Center for Education Statistics, fall 2003 and fall 2013 IPEDS surveys.

- The sector graduation rate for the <u>degree-granting</u>, <u>for-profit/career schools</u> increased 1.0 percentage point, from 43.5% in 2002–2003 to 44.5% in 2012–2013.
 - The highest graduation rate within this sector was 95.7% at the Universal College of Healing Arts (22 graduates).

- The overall graduation rate for the <u>University of Nebraska</u> system increased from 52.2% in 2002–2003 to 59.0% in 2012–2013.
 - The highest graduation rate within this sector in 2012–2013 was at the University of Nebraska-Lincoln (66.8%) while the lowest rate was at the University of Nebraska Omaha (42.1%).
- The overall graduation rate for the <u>Nebraska State College System</u> decreased from 43.0% in 2002–2003 to 40.7% in 2012–2013. The highest graduation rate within this sector in 2012–2013 was at Wayne State College (45.6%) while the lowest rate was at Chadron State College (33.3%).
- The overall graduation rate for <u>Nebraska's Community Colleges</u> decreased from 37.8% in 2002–2003 to 26.4% in 2012–2013.
 - Between 2002–2003 and 2012–2013, the graduation rates at Mid-Plains Community College and Western Nebraska Community College both increased 1.2 percentage points to 34.2% and 23.1%, respectively.
 - As has been the case in the past, however, graduation rates at Nebraska's four other community colleges continue to lag behind their respective 2002–2003 numbers, impeding the sector's overall graduation rate. Metropolitan Community College's 2012–2013 graduation rate of 12.5% was the lowest within this sector, while Northeast's rate of 43.2% was the highest graduation rate among the community colleges.
- Within the <u>independent sector</u>, the graduation rate has increased from 57.0% in 2002–2003 to 60.7% in 2012–2013.
 - The highest graduation rates in the independent sector in 2012–2013 were reported by Creighton University (75.9%), Nebraska Wesleyan University (68.5%), and Nebraska Methodist College of Nursing and Allied Health (68.0%).
- Within all of the sectors, some schools showed significant decreases in their completion rates, while others reported noticeable improvements in their completion rates. Statewide, 19 of the postsecondary institutions with undergraduate programs reported lower completion rates in 2012–2013 than in 2002–2003, while 23 schools reported completion rates that were the same or higher. Calculations and comparisons of completion rates based on first-time freshmen cohorts are not applicable to the remaining 11 institutions because the schools have closed or they did not have first-time freshmen cohorts on which to base completion rates in 2002–2003 and/or 2012–2013. Consequently, the sector completion rates shown in Figure 2.2.2 should not be interpreted as an indicant of the performance of any particular school.
- See <u>Table A10.3</u> for the 2002–2003 and 2012–2013 completion rates by institution and by sector. See <u>Table A10.4.a</u> through <u>Table A10.4.k</u> in <u>Appendix 10</u> for the data used to calculate the completion rates for the six sectors and each of the state's postsecondary institutions from 2002–2003 through 2012–2013.

College Graduation Rates by Race/Ethnicity

- An analysis of IPEDS data reveals that completion rates at Nebraska's postsecondary institutions varied and changed by race/ethnicity between 2002–2003 and 2012–2013.
- As shown in <u>Figure 2.2.3</u>, the completion rates for white non-Hispanics and Asians/Pacific Islanders in 2002–2003 and 2012–2013 were significantly higher than the completion rates for Hispanics, Native Americans, black non-Hispanics, and multiracial students.³³
- Down 1.8 percentage points to 27.0%, the only ethnicity with a drop in its graduation rate was black non-Hispanics.
- Comparing the graduation rates in 2002–2003 to those in 2012–2013, the greatest increases were for Hispanics (3.6 percentage points) and Asian/Pacific Islanders (2.2 percentage points).
- Completion rates for each racial/ethnic group fluctuate, at least slightly, from year to year.
- See <u>Table A10.5.a</u> and <u>Table A10.5.b</u> in <u>Appendix 10</u> for supporting data.

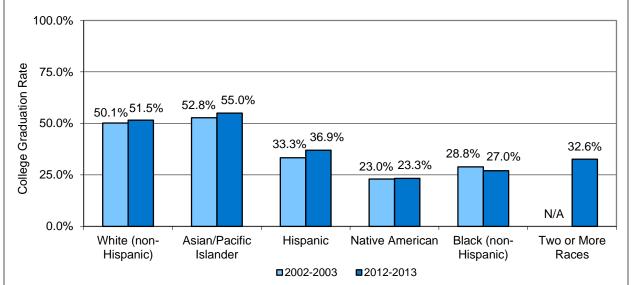

Figure 2.2.3 Nebraska Posts

Graduation Rates for Nebraska Postsecondary Institutions by Race/Ethnicity 2012–2013 Compared to 2002–2003 Baseline

³³ The race/ethnic category 'two or more races' was first available in IPEDS for fall 2008 enrollment. However, institutions were not required to use the new race/ethnic category until fall 2011 enrollments were reported.

College Graduation Rates by Sector and by Race/Ethnicity

- The following charts show how the graduation rates for each racial/ethnic group varied and changed between 2002–2003 and 2012–2013 within each of the six sectors of higher education in Nebraska.
- As shown in Figure 2.2.4, graduation rates increased for all racial/ethnic groups at the University of Nebraska between 2002–2003 and 2012–2013.
- Within the Nebraska State College System, graduation rates increased slightly for white non-Hispanics but decreased for all other racial ethnic groups between 2002–2003 and 2012–2013 (see Figure 2.2.5). That all graduation rates did not increase or remain about the same is due, at least in part, to the fact that only a small number of minority students graduated from the state colleges in 2002–2003 and 2012–2013.
- As shown in <u>Figure 2.2.6</u>, graduation rates at Nebraska's community colleges decreased for all racial/ethnic groups, except Hispanics, between 2002–2003 and 2012–2013.
- Graduation rates increased between 2002–2003 and 2012–2013 for white non-Hispanics and Asian/Pacific Islanders within the independent sector (see <u>Figure 2.2.7</u>) and the sectors consisting of degree-granting (see <u>Figure 2.2.8</u>) and non-degree-granting for-profit career schools (see <u>Figure 2.2.9</u>). Within each of these three sectors, rates also decreased for black non-Hispanics, but were varied for Hispanics and Native Americans.
- See <u>Table 10.6</u> in <u>Appendix 10</u> for supporting data.

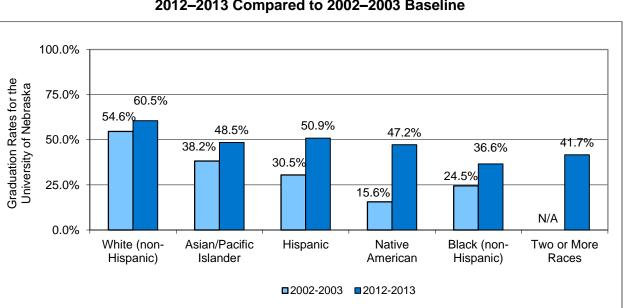

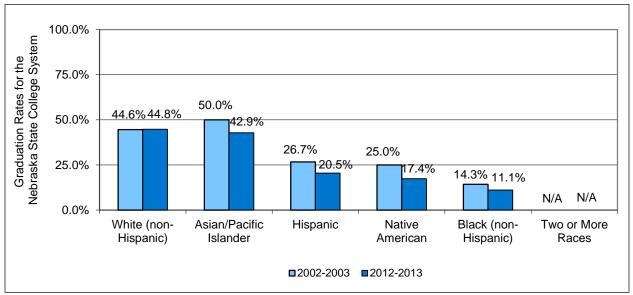

Figure 2.2.4

Graduation Rates for the University of Nebraska by Race/Ethnicity 2012–2013 Compared to 2002–2003 Baseline

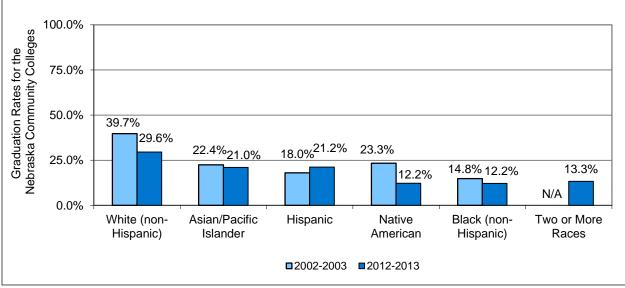

Graduation Rates for the Nebraska State College System by Race/Ethnicity 2012–2013 Compared to 2002–2003 Baseline

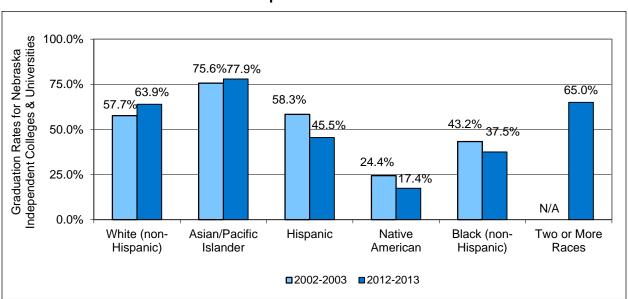

Note. See <u>Table A10.6</u> in <u>Appendix 10</u> for supporting data. Data source: National Center for Education Statistics, fall 2003 and fall 2013 IPEDS surveys.

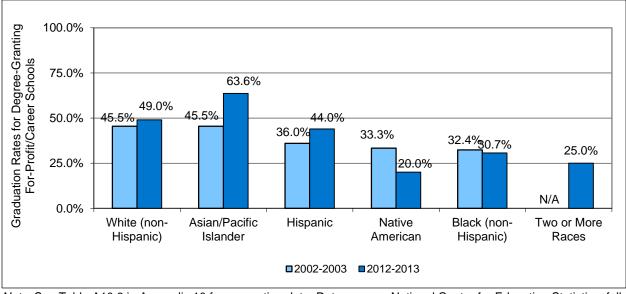

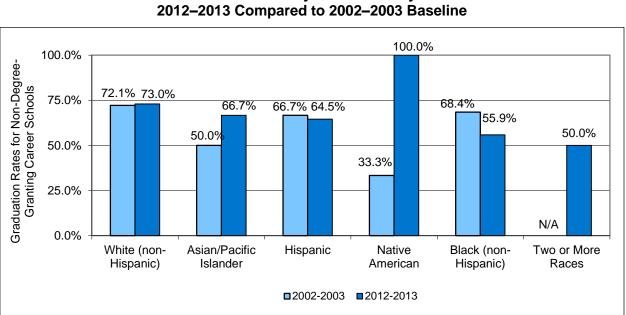

Graduation Rates for Independent Colleges and Universities in Nebraska by Race/Ethnicity 2012–2013 Compared to 2002–2003 Baseline

Note. See <u>Table A10.6</u> in <u>Appendix 10</u> for supporting data. Data source: National Center for Education Statistics, fall 2003 and fall 2013 IPEDS surveys.

Figure 2.2.8

Graduation Rates for the Degree-Granting, For-Profit/Career Schools in Nebraska by Race/Ethnicity 2012–2013 Compared to 2002–2003 Baseline

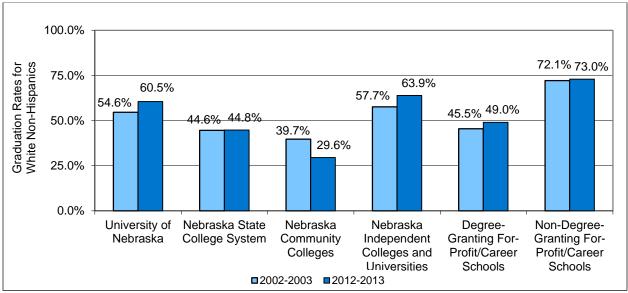

Graduation Rates for the Non-Degree-Granting, For-Profit/Career Schools in Nebraska by Race/Ethnicity 2012–2013 Compared to 2002–2003 Baseline

Note. See <u>Table A10.6</u> in <u>Appendix 10</u> for supporting data. Data source: National Center for Education Statistics, fall 2003 and fall 2013 IPEDS surveys.

College Graduation Rates by Race/Ethnicity and by Sector

- The following charts show how sector graduation rates varied and changed between 2002–2003 and 2012–2013 for each racial/ethnic group. Some of the variation for minority groups may be due, at least in part, to the fact that within some sectors, there are very few minority students who graduated in 2002–2003 and 2012–2013. Please see <u>Table A10.6</u> in <u>Appendix 10</u> for supporting data.
- As shown in <u>Figure 2.2.10</u>, graduation rates for white non-Hispanics increased within five of the six sectors of postsecondary education between 2002–2003 and 2012–2013 but rates decreased at Nebraska's community colleges.
- For Asian/Pacific Islanders, graduation rates increased within four of the sectors and decreased at the state colleges and community colleges, as shown in Figure 2.2.11.
- For Hispanics, graduation rates also increased within four of the sectors and decreased at the state colleges and the independent institutions, as shown in Figure 2.2.12.
- Between 2002–2003 and 2012–2013, graduation rates for Native Americans increased at the University of Nebraska and at the non-degree-granting schools but decreased within the other four sectors (see <u>Figure 2.2.13</u>).
- For black non-Hispanics, graduation rates increased at the University of Nebraska but decreased within the remaining five sectors, as shown in Figure 2.2.14.
- As shown in <u>Figure 2.2.15</u>, graduation rates for multiracial individuals in 2012–2013 ranged from 13.3% at the community colleges to 65.0% at the independent institutions.

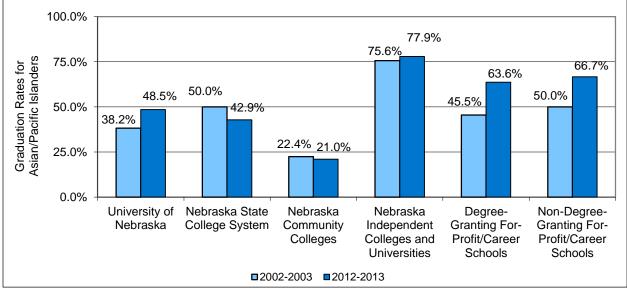

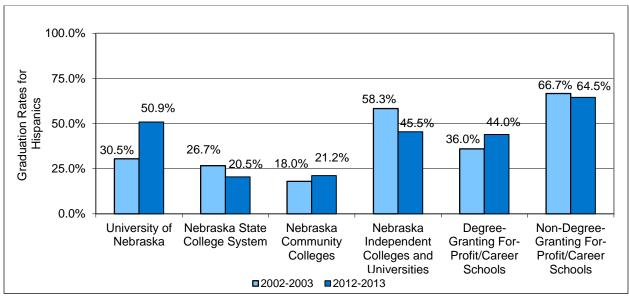

Graduation Rates for White Non-Hispanics by Sector 2012–2013 Compared to 2002–2003 Baseline

Note. See <u>Table A10.6</u> in <u>Appendix 10</u> for supporting data. Data source: National Center for Education Statistics, fall 2003 and fall 2013 IPEDS surveys.

Graduation Rates for Asians/Pacific Islanders by Sector 2012–2013 Compared to 2002–2003 Baseline

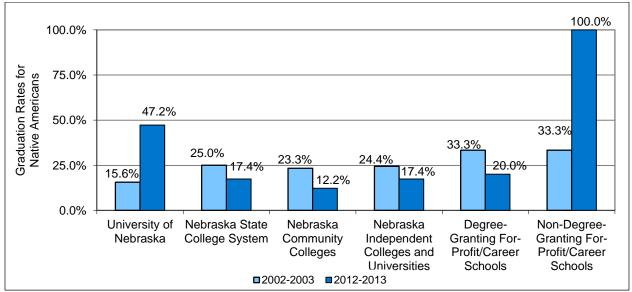

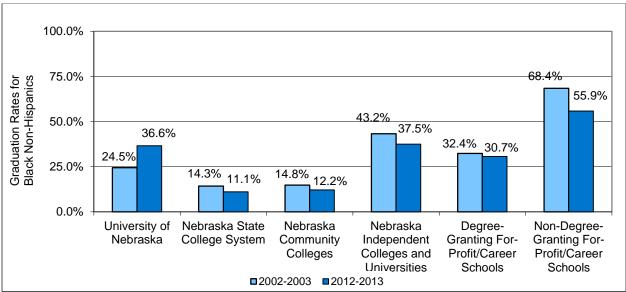

Graduation Rates for Hispanics by Sector 2012–2013 Compared to 2002–2003 Baseline

Note. See <u>Table A10.6</u> in <u>Appendix 10</u> for supporting data. Data source: National Center for Education Statistics, fall 2003 and fall 2013 IPEDS surveys.

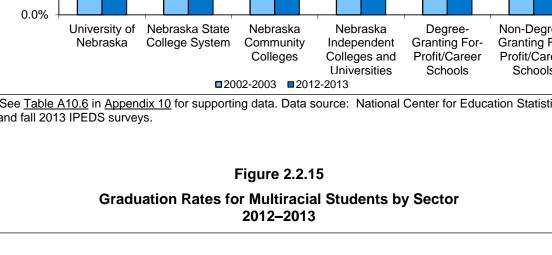

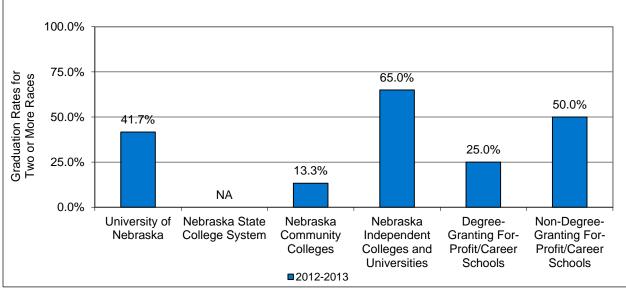

Graduation Rates for Black Non-Hispanics by Sector 2012-2013 Compared to 2002-2003 Baseline

Note. See Table A10.6 in Appendix 10 for supporting data. Data source: National Center for Education Statistics, fall 2003 and fall 2013 IPEDS surveys.

Nebraska Graduation Rates Compared to the Graduation Rates of Other States

The latest available state-to-state comparisons of college graduation rates are for students who completed their academic degree programs during the 2012–2013 academic year. A <u>graduation rate</u> based on IPEDS data is the percentage of full-time, first-time, degree-seeking undergraduates who completed their academic programs within 150 percent of normal time to completion. For example, the graduation rate for students seeking a four-year bachelor's degree is based on a six-year time frame. The graduation rate for students seeking a two-year associate degree is based on a three-year time frame.

<u>Figure 2.2.16</u> and <u>Figure 2.2.17</u> show how the graduation rates of Nebraska's four-year and two-year institutions compare to the rates calculated for other states and the United States as a whole. These rates are calculated for all of the degree-granting institutions within each state, including public, private (not-for-profit), and for-profit schools. These rates also are for all awards conferred. For example, the graduation rate for Nebraska's two-year schools encompasses awards of diplomas and certificates as well as two-year associate degrees.

- As shown in <u>Figure 2.2.16</u>, the graduation rate for Nebraska's four-year institutions was 57.0% for 2012–2013, or 20th highest among the 50 states and 1.8 percentage points above the graduation rate for all four-year institutions in the United States, which was 55.2%. In comparison, Nebraska's 2011–2012 graduation rate was 56.8%, 1.1 percentage points higher than the national rate of 55.7%, resulting in the state ranking 21st in the nation.
- As illustrated in <u>Figure 2.2.17</u>, the graduation rate for Nebraska's two-year institutions was 28.2%, or 18th highest among the 50 states, and 1.2 percentage points lower than the graduation rate of 29.4% for all two-year institutions in the United States. In comparison, Nebraska's 2011–2012 graduation rate was 30.2%, 0.8 percentage points lower than the national rate of 31.0%, resulting in the state ranking 21st highest in the nation.

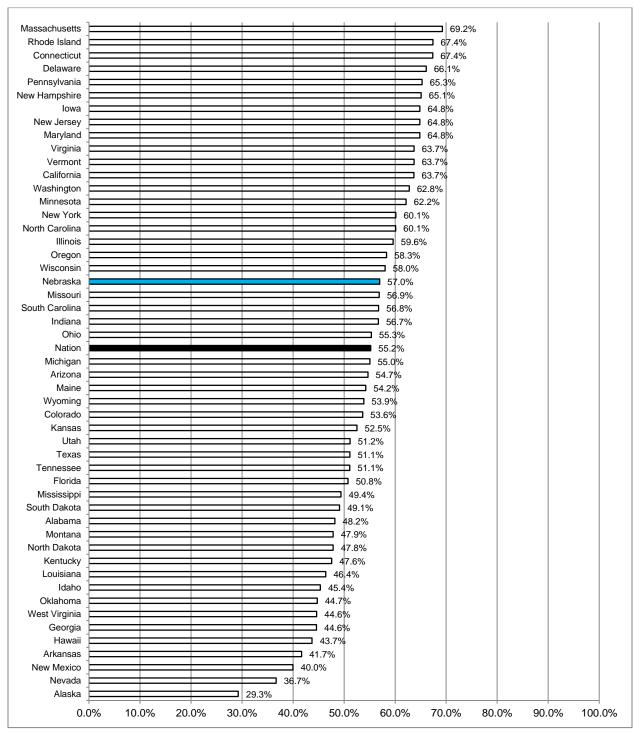

Figure 2.2.16 2012–2013 Graduation Rates for Four-Year Institutions by State

Note. Nebraska's four-year institutions are the University of Nebraska at Kearney, the University of Nebraska-Lincoln, and the University of Nebraska at Omaha; Chadron State College, Peru State College, and Wayne State College; Bellevue University, Clarkson College, College of Saint Mary, Concordia University-Seward, Creighton University, Doane College-Crete, Grace University, Hastings College, Nebraska Methodist College of Nursing & Allied Health, Midland University, Nebraska Christian College, Nebraska Wesleyan University, Union College, and York College; Kaplan University-Lincoln, Kaplan University-Omaha, ITT Technical Institute-Omaha, The Creative Center, and University of Phoenix-Omaha Campus. Data source: National Center for Education Statistics, IPEDS survey for 2012–2013. Graduation rates obtained from the National Center for Higher Education Management Systems (NCHEMS), February 2015.

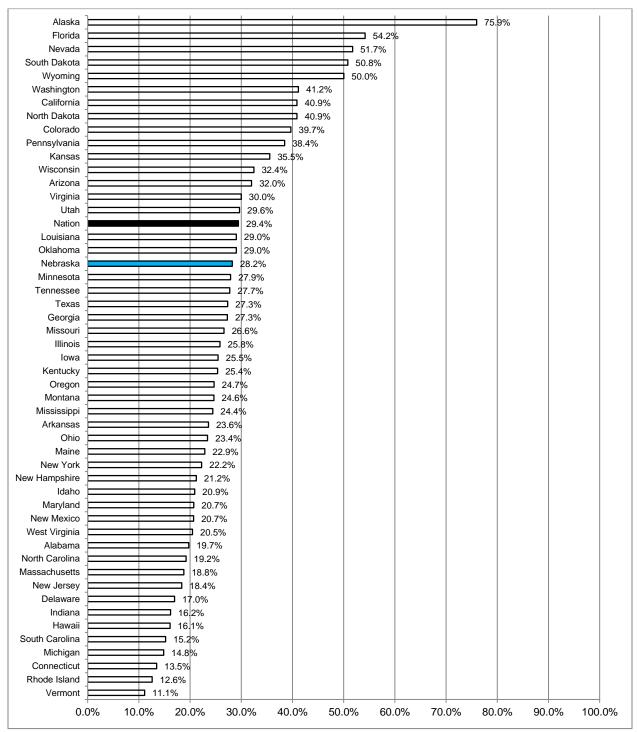

Figure 2.2.17 2012–2013 Graduation Rates for Two-Year Institutions by State

Note. For the purposes of calculating the state rate, Nebraska's two-year institutions consist of the state's six community colleges, Nebraska College of Technical Agriculture, Little Priest Tribal College, Nebraska Indian Community College, Vatterott College-Spring Valley, Omaha School of Massage and Healthcare of Herzing University, Myotherapy Institute, and Universal College of Healing Arts. Data source: National Center for Education Statistics, IPEDS survey for 2012–2013. Graduation rates obtained from the National Center for Higher Education Management Systems (NCHEMS), February 2015.

Transfer Rates for Nebraska Community Colleges

All six of Nebraska's community colleges reported transfer rates for the 2012–2013 academic year. A college's graduation and transfer rates are based on the same full-time, first-time freshmen cohort. Consequently, a college's graduation and transfer rates can be added together to determine the total percentage of the full-time, first-time freshmen who either completed their programs or transferred to other schools within 150% of the time specified for normal program completion. For two-year associate degrees, this specific period is usually three years. For one-year certificate programs, 150% of normal completion time is 18 months. (For more information about computed college transfer rates based on IPEDS data, see <u>Explanatory Note A11.1</u> in <u>Appendix 11</u>.)

<u>Figure 2.2.18</u> compares the 2012–2013 graduation, transfer, and graduation plus transfer rates for the six community colleges: Central Community College, Metropolitan Community College, Mid-Plains Community College, Northeast Community College, Southeast Community College, and Western Nebraska Community College.

- As shown in <u>Figure 2.2.18</u>, the 2012–2013 graduation rates for the colleges ranged from 12.5% at Metropolitan Community College to 43.2% at Northeast Community College.
- The schools' transfer rates ranged from 13.2% at Northeast Community College to 23.2% at Metropolitan Community College.
- The rates produced by combining each institution's graduation rates and transfer rates ranged from 35.6% at Metropolitan Community College to 56.4% at Northeast Community College.

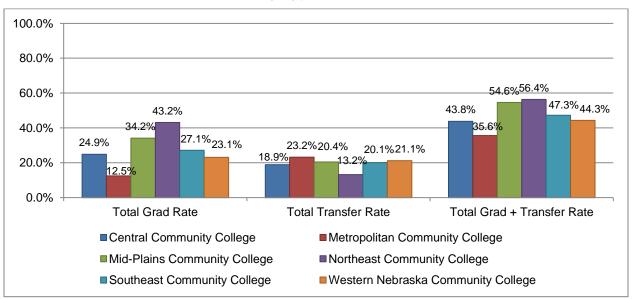

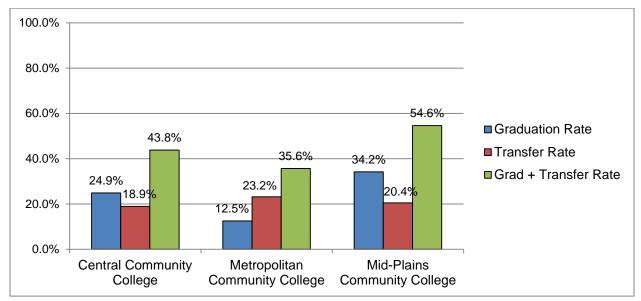

Figure 2.2.18

2012–2013 Graduation Rates and Transfers Rates for Nebraska Community Colleges by Type of Rate

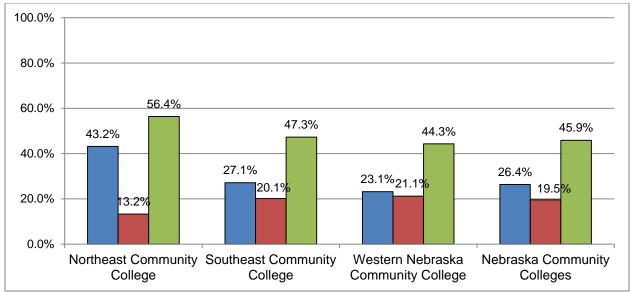

Note. See <u>Table A10.4.k</u> in <u>Appendix 10</u> and <u>Table A11.1</u> and <u>Table A11.2</u> in <u>Appendix 11</u> for supporting data. Data source: National Center for Education Statistics, fall 2013 IPEDS graduation rate survey.

- <u>Figure 2.2.19</u> shows the 2012–2013 graduation, transfer, and combined graduation and transfer rates for each of the six colleges and for the community college sector as a whole.
- The overall transfer rate for the six community colleges decreased 1.7 percentage points from 2010–2011 (21.2%) to 2012–2013 (19.5%). Similarly, the overall graduation rate for these institutions fell 2.6 percentage points from 2010–2011 (29.0%) to 2012–2013 (26.4%). As a result, the combined graduation and transfer rate decreased 4.3 percentage points, from 50.2% in 2010–2011 to 45.9% in 2012–2013.

2012–2013 Graduation and Transfers Rates for Nebraska Community Colleges by College and for the Sector

Note. See <u>Table A10.4.k</u> in <u>Appendix 10</u>, and <u>Table A11.1</u> and <u>Table A11.2</u> in <u>Appendix 11</u> for supporting data. Data source: National Center for Education Statistics, fall 2013 IPEDS graduation rate survey.

2.3 Graduation and Persistence Rates (Based on Clearinghouse Data)

A recent study by the National Student Clearinghouse Research Center provides important information about the completion and persistence rates of students who start college at Nebraska's public and independent institutions.

This section of the *Nebraska Higher Education Progress Report* summarizes the findings of a recent study of the six-year completion and persistence rates of degree-seeking, first-time freshmen who started college in Nebraska in fall 2007. This annual study was conducted by the National Student Clearinghouse (NSC) Research Center and is published in the report *Completing College: A State-Level View of Student Attainment Rates.* First available in March 2014, this report presents the findings of the NSC's second annual study of six-year student outcomes based on a national cohort analyzed by state as well as for the United States as a whole. This report also is important because it presents comparable six-year completion and persistence rates for students who started college at (a) two-year public colleges, (b) four-year public colleges and universities, and (c) four-year private nonprofit institutions.³⁴

Introduction to the National Student Clearinghouse Study

The completion and persistence rates reported in this section are based on the enrollment and completion records maintained by the NSC since 2003. An analysis of these records resulted in a national cohort of almost 2.4 million college students who could be classified as <u>degree-seeking</u>, first-time freshmen in fall 2007.³⁵ The enrollment and completion records of these students were then analyzed through the six-year period ending May 31, 2013.

Each student was classified by the state of the institution where the student first entered college, not by the student's residential home state. <u>First-time enrollment status</u> was established by confirming that a student (1) did not show any postsecondary enrollment record in the four years prior to summer 2007, and (2) did not receive a degree or certificate from any postsecondary institution prior to fall 2007. Consequently, data for 2003 through 2007 had to be available in the Clearinghouse database for an institution's students to be included in this study. In addition, records for the six-year period from fall 2007 through May 31, 2013 were required.

Unlike the previous study that focused on the fall 2006 cohort, this study included students who entered college with prior college-level experience through taking dual enrollment courses in high school. Therefore, **results for the fall 2006 cohort** (see <u>Table A12.1.b</u> in <u>Appendix 12</u>) **should not be directly compared to results discussed in this section**.

The percentage of Nebraska's two-year and four-year institutions with Clearinghouse records dating back to 2003 varied by type of institution. The historical data coverage rate, based on student enrollments, for Nebraska's four-year public institutions was 100.0%, and Nebraska's four-year private nonprofit institutions coverage rate was 94.5%. Nebraska's two-year public colleges included five of the state's six community colleges and no other two-year public institutions, resulting in a historical data coverage rate of 99.8%. (The Nebraska institutions included in the study are listed in <u>Table A12.2.a</u> in <u>Appendix 12</u> of this report.) The Nebraska cohort included 19,705 degree-seeking first-time freshmen—6,173 started college at two-year institutions, 8,747 started college at four-year public institutions, and 4,785 started at four-year private nonpublic institutions.

³⁴ Students who began at multistate four-year nonprofit institutions were excluded from the results summarized in this section.

³⁵ Fall 2007 enrollment is defined as enrollment during any term beginning August 15, or the Monday before August 15, through October 31, inclusive. If no term started between these dates, the term that started between July 14 and August 14 was used.

Degree-seeking status was defined differently for students at two-year and four-year schools. For students who started at four-year institutions, Clearinghouse records had to show that they were enrolled at least half time for at least one term. For students who started at two-year institutions, they had to either be enrolled for at least one term full time before August 15, 2008, or be enrolled at least half time for at least two terms before December 31, 2008. Because of low coverage, high rates of stop-out, and other limitations, this study excluded students whose last enrollment record was at a two-year private for-profit institution in Nebraska and New York.

The degree-seeking students in this study were classified as <u>exclusively full-time</u> <u>students</u>, <u>exclusively part-time students</u>, or <u>mixed enrollment students</u>. Mixed enrollment students were those who enrolled at least one term full-time and at least one term part-time over the course of their enrollment, rather than being enrolled exclusively full-time or part-time. (Enrollments during summer terms and shorter terms lasting less than 21 days were excluded from consideration.) For students enrolled concurrently at more than one institution, the two highest-intensity enrollment records were considered. So, if a student was concurrently enrolled half time at two institutions, that student was categorized as full time for that term.

Students were also divided into three groups based on the age of the students when they first entered college (less than 20, 21–24, and 25 or older). Finally, student outcomes were analyzed by gender.

Reported Student Outcomes

The six-year student outcomes calculated and compared in the National Student Clearinghouse study are as follows:

<u>Total completion rate:</u> The percentage of the cohort who received diplomas or certificates from any institutions in the United States by the end of the defined six-year period.

<u>Starting institution completion rate:</u> The percentage of the cohort who received degrees or certificates from the same institutions where they enrolled as first-time freshmen.

<u>Other institutions completion rates:</u> The percentage of the cohort who received degrees or certificates from institutions anywhere in the United States to which they had transferred. This rate is reported separately for the two-year and four-year schools where the students did not initially enroll as first-time freshmen.

Note: For two-year public institutions, the percentage of students who completed degrees at four-year institutions after they completed programs at two-year colleges was also calculated (i.e., subsequent completion). This percentage added to the rate of first-time completions at four-year institutions equals the reported total four-year graduation rate for students who initially enrolled as first-time freshmen at two-year public institutions.

<u>Persistence rate:</u> The percentage of students in a cohort who did not earn a degree or other academic award but were still enrolled in college during the last year of the study period.

<u>Percentage of students not enrolled:</u> The percentage of the cohort who had not completed degrees or certificate programs and were not enrolled at any institution during the last year of the study period.

Nebraska Completion and Persistence Rates Compared to National Rates

<u>Figure 2.3.1</u> shows how the total completion rates for Nebraska institutions compared to the national rates for two-year public institutions, four-year public institutions, and four-year private nonprofit institutions.

- Degree-seeking, first-time freshmen at Nebraska's two-year institutions had a 43.6% total completion rate, which was 3.7 percentage points higher than the 39.9% national rate for two-year public institutions.
- For Nebraska's four-year public institutions, the total completion rate was 64.1%, which was slightly higher than the national rate of 63.4%.
- While Nebraska's four-year private nonprofit institutions had a higher total completion rate of 69.8% compared to other Nebraska institutions, this rate was lower than the national rate of 72.9% for similar institutions.

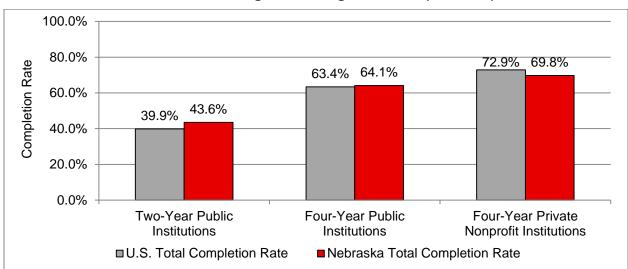

Figure 2.3.1

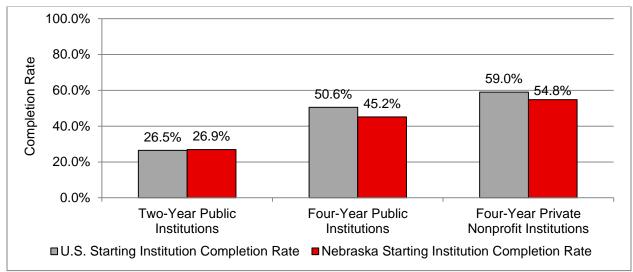

Six-Year Total Completion Rates for Nebraska and the United States for First-Time Degree-Seeking Freshmen (Fall 2007)

Note. See <u>Table A12.2.b</u> in <u>Appendix 12</u> for supporting data. Data source: National Student Clearinghouse Research Center, *Completing College: A State-Level View of Student Attainment Rates*, March 2014.

<u>Figure 2.3.2</u> compares the U.S. and Nebraska completion rates for students who received degrees or certificates from the same institutions where they initially enrolled as first-time freshmen.

- Completion rates for Nebraska's four-year public and private nonprofit institutions were both lower than the comparable national rates.
- The first completion at starting institution rate for Nebraska's two-year institutions was significantly lower than the rates for the four-year institutions, but the 26.9% completion rate for the two-year institutions is essentially the same as the 26.5% national rate for public two-year institutions.

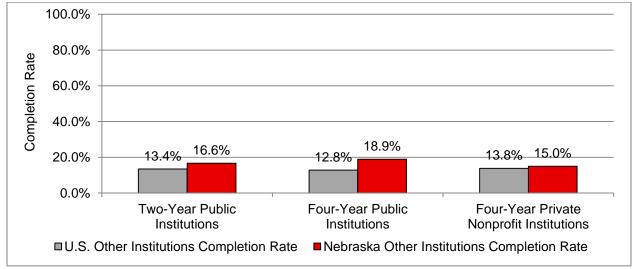

Note. See <u>Table A12.2.b</u> in <u>Appendix 12</u> for supporting data. Data source: National Student Clearinghouse Research Center, *Completing College: A State-Level View of Student Attainment Rates*, March 2014.

As shown in <u>Figure 2.3.3</u> the Clearinghouse study confirms that a notable percentage of freshmen start college at one institution and then transfer to another school where they complete a program of study.

- 15% to 19% of the first-time students at Nebraska's public and private nonprofit institutions in fall 2007 graduated from two-year or four-year schools to which they had transferred.
- In all sectors, Nebraska's percentages were higher than the comparable national rates.

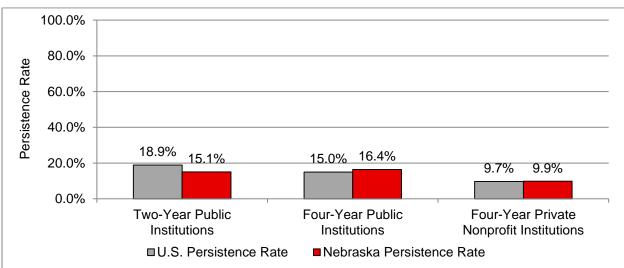

Figure 2.3.3

Six-Year "Other Institutions" Completion Rates for Nebraska and the United States for First-Time Degree-Seeking Freshmen (Fall 2007)

Note. See <u>Table A12.2.b</u> in <u>Appendix 12</u> for supporting data. Data source: National Student Clearinghouse Research Center, *Completing College: A State-Level View of Student Attainment Rates*, March 2014.

- As shown in <u>Figure 2.3.4</u>, 10% to 16% of the students who started college at Nebraska's two-year and four-year public institutions were still enrolled at these or other institutions during 2012.
- The lower persistence rate of 9.9% for Nebraska's four-year private nonprofit schools is a reflection of the fact that these institutions had a total completion rate that was higher than the total completion rates for the state's two-year and four-year public institutions.
- Nebraska's persistence rate for two-year public institutions was 3.8 percentage points lower than the national persistence rate for similar institutions. However, Nebraska's persistence rates for the other two sectors were generally in line with the reported national rates.

Six-Year Persistence Rates for Nebraska and the United States for First-Time Degree-Seeking Freshmen (Fall 2007)

Note. See <u>Table A12.2.b</u> in <u>Appendix 12</u> for supporting data. Data source: National Student Clearinghouse Research Center, *Completing College: A State-Level View of Student Attainment Rates*, March 2014.

Nebraska Student Outcomes Compared by Enrollment Status

The findings of the National Student Clearinghouse study confirm that the completion rates of full-time students are significantly higher than for students who attend college only part-time. This study also reveals that the completion rates for students with combinations of full-time and part-time enrollment are higher than those for exclusively part-time students but lower than the rates for students who consistently go to college full time. In addition, this study confirms that part-time students are less likely to persist in their studies and more likely to drop out of college than exclusively full-time students.

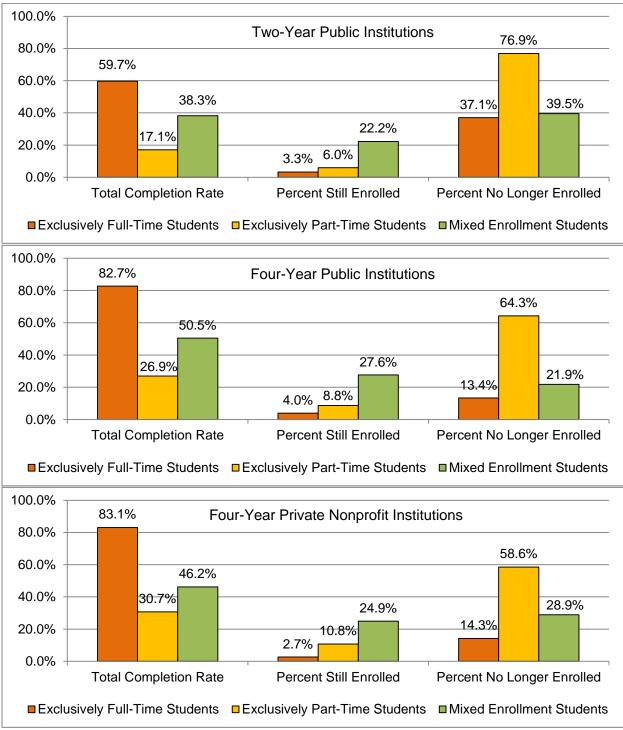

Student Outcomes Compared Within Each Sector

- <u>Figure 2.3.5</u> shows that exclusively part-time students had total completion rates that were significantly lower than the completion rates for exclusively full-time students or mixed enrollment students, regardless of whether they started college at two-year public, four-year public, or four-year private nonprofit institutions in Nebraska.
- The six-year persistence rates (i.e., the percentage of students still enrolled) were highest for the mixed enrollment students and lowest for the exclusively full-time students, regardless of the type of institution where they enrolled as first-time freshmen. However, the percentage of students who were no longer enrolled six years after they started college was significantly higher for exclusively part-time students than for exclusively full-time students or mixed enrollment students.
- 76.9% of the exclusively part-time students who started college at Nebraska's two-year public institutions (community colleges) had not earned degrees or certificates and were no longer in college at the end of six years. Of the exclusively part-time students at Nebraska's four-year public institutions, 64.3% were no longer in college, and for the four-year private nonprofit institutions, 58.6% of the exclusively part-time students had dropped out of college before earning degrees or certificates.
- The percentages of exclusively full-time students and mixed enrollment students who left college before degree completion were much lower than the percentages of exclusively parttime students. However, 37.1% of the exclusively full-time students who started at Nebraska's two-year public colleges had not earned academic awards and were no longer in college. This percentage dropped to 13.4% for the four-year public institutions and to 14.3% for the four-year private nonprofit schools.

Student Outcomes Compared Across Sectors

- <u>Figure 2.3.6</u> shows the same percentages that are presented in the series of charts in <u>Figure 2.3.5</u>. However, the charts in <u>Figure 2.3.6</u> directly compare the student outcomes for the three types of institutions included in this study within each of the three student enrollment groups. Using this type of comparison, <u>Figure 2.3.6</u> shows that the completion, persistence, and dropout rates of the students who initially enrolled at Nebraska's four-year public and private nonprofit institutions were generally similar. However, these outcomes were noticeably different than the outcomes of students who started college at Nebraska's two-year public institutions.
- In general, the comparisons in <u>Figure 2.3.6</u> are evidence that students who enroll initially at four-year institutions—public or private nonprofit—are more likely to earn degrees or certificates, or at least persist in their studies, than students who start college at two-year institutions, regardless of whether they enroll full-time or part-time.

Figure 2.3.5

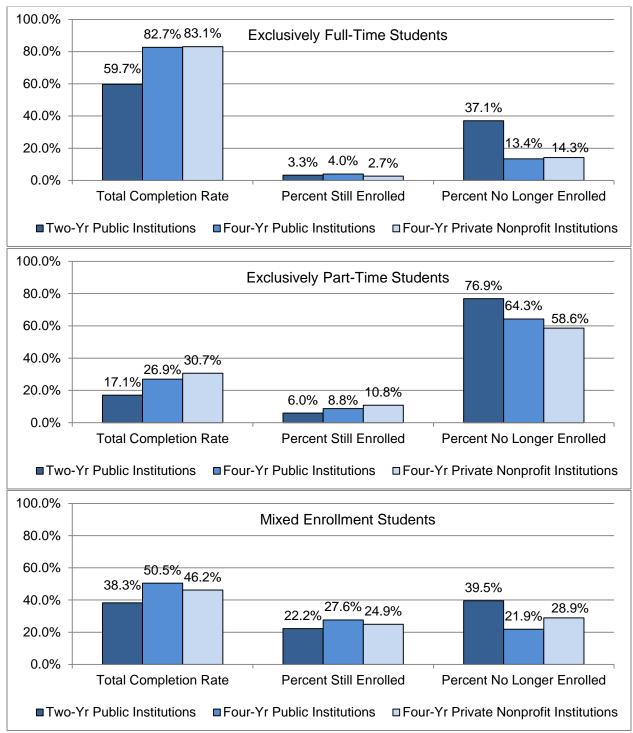

Nebraska Six-Year Student Outcomes by Sector and Student Enrollment Status for First-Time Degree-Seeking Freshmen (Fall 2007)

Note. See <u>Table A12.2.b</u> in <u>Appendix 12</u> for supporting data. Data source: National Student Clearinghouse Research Center, *Completing College: A State-Level View of Student Attainment Rates*, March 2014.

Figure 2.3.6

Note. See <u>Table A12.2.b</u> in <u>Appendix 12</u> for supporting data. Data source: National Student Clearinghouse Research Center, *Completing College: A State-Level View of Student Attainment Rates*, March 2014.

Four-Year Completion Rates for Two-Year Public Institutions

- Another finding of the National Student Clearinghouse study that is of interest is the
 percentage of students who started college at two-year institutions but earned degrees at
 four-year institutions. As evidenced in Figure 2.3.7, 16.2% of the students who initially
 enrolled at Nebraska's two-year public colleges in fall 2007 had earned degrees from fouryear institutions over the course of the next six years. For 11.5% of the cohort, these
 degrees were their first completions. For 4.8% of the cohort, their four-year degrees were
 subsequently completed after they had already completed a degree or certificate program at
 the two-year college where they initially enrolled or at another two-year school.
- Exclusively full-time students and mixed enrollment students had higher total four-year graduation rates than students who attended college only part-time. Interestingly, exclusively full-time students were more likely than mixed enrollment students to have earned four-year degrees after they had already earned degrees or certificates at two-year schools, even though the total four-year completion rates for these two groups of students were very similar.

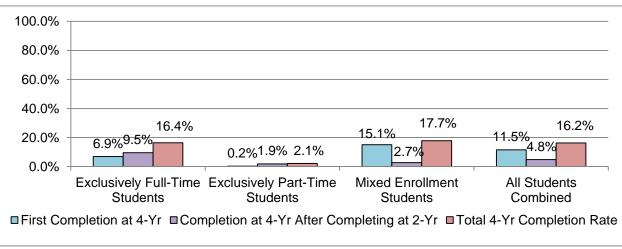

Figure 2.3.7

Nebraska Completion Rates for Four-Year Degrees Earned by Students Who Initially Enrolled at Two-Year Public Institutions for First-Time Degree-Seeking Freshmen (Fall 2007)

Note. See <u>Table A12.2.b</u> in <u>Appendix 12</u> for supporting data. Data source: National Student Clearinghouse Research Center, *Completing College: A State-Level View of Student Attainment Rates*, March 2014.

Nebraska Student Outcomes Compared by Age Group

- As shown in <u>Figure 2.3.8</u>, students who started college when they are age 20 or younger were more likely to complete degrees or certificate programs than students who didn't start college until they were over the age of 20, regardless of whether they initially enrolled at two-year public, four-year public, or four-year private nonprofit institutions.
- Interestingly, students who started college when they were age 21 through age 24 were less likely to complete degrees at two-year public institutions or at four-year private nonprofit institutions than students who started college when they were 25 years or older.

• The highest total completion rate for the students 20 years of age or younger was 76.0% at the four-year private nonprofit schools, while the highest total completion rate for students 21 through 24 was 49.6% at the four-year public institutions, and the highest total completion rate for students 25 or older was 50.4% at four-year private nonprofit schools.

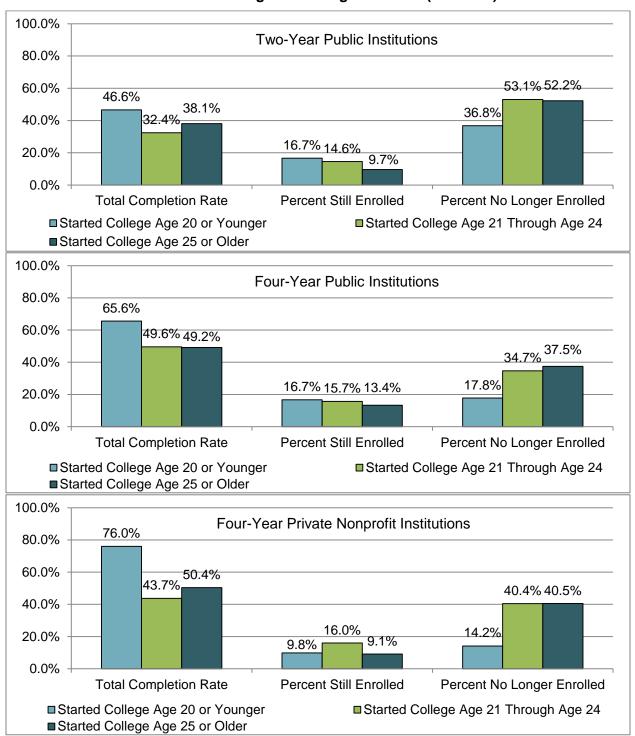

Figure 2.3.8

Nebraska Six-Year Student Outcomes by Sector and Age Group for First-Time Degree-Seeking Freshmen (Fall 2007)

Note. See <u>Table A12.2.b</u> in <u>Appendix 12</u> for supporting data. Data source: National Student Clearinghouse Research Center, *Completing College: A State-Level View of Student Attainment Rates*, March 2014.

Nebraska Student Outcomes Compared by Gender

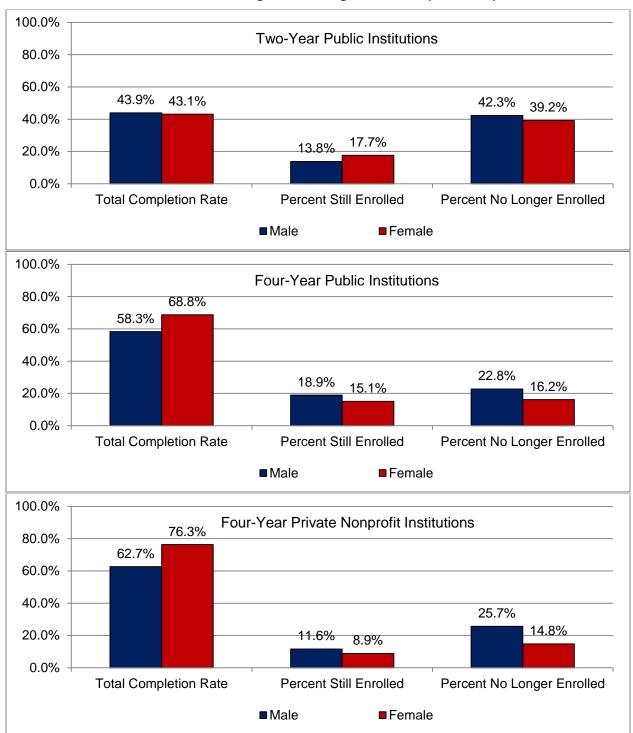

- As shown in <u>Figure 2.3.9</u>, the completion rates for male and female students at Nebraska's two-year public institutions were essentially the same (43.9% for men versus 43.1% for women). However, at four-year public and four-year private nonprofit institutions, females were much more likely than men to have completed degrees or certificate programs within six years.
- Across all sectors, the percentages of female students who left college before degree completion were much lower than the percentages of male students who dropped out of college. However, at the four-year public and four-year private nonprofit institutions, the persistence rates were higher for males than for females.

Conclusion

All of the six-year student outcomes for the United States as a whole and for Nebraska's public and private nonprofit institutions are presented in <u>Table A12.2.b</u> in <u>Appendix 12</u> of this report. When the national percentages are comparted to Nebraska's percentages, Nebraska's rates were not consistently higher or lower than the national percentages. Instead, Nebraska's outcomes were higher, lower, or about the same as the comparable national rates, depending on the type of institution and the specific student enrollment or age group that was analyzed.

This study clearly shows that students who start college earlier and attend-full time are much more likely to earn degrees and certificates. This study is not without limitations. However, it provides reasonable estimates of the six-year completion and persistence rates for Nebraska's two-year public institutions, four-year public institutions, and four-year private nonprofit institutions, compared to national rates.

Section 3

Reversing the Net Out-Migration of College-Educated Nebraskans

Priority 3. Reducing, eliminating, and then reversing the net out-migration of Nebraskans with high levels of educational attainment.

The third priority recommended by the 2003 LR 174 Task Force is to <u>reduce, eliminate</u> and then reverse the net out-migration of Nebraskans with high levels of educational attainment. This priority was advised because data from the 2000 U.S. Census showed that Nebraska lost more college-educated adults than the state attracted between 1995 and 2000. Furthermore, during the same period, Nebraska attracted a significant net in-migration of adults with less than a high school education.

Based on the most recent data collected by the U.S. Census Bureau, it is impossible to draw firm conclusions about the overall migration patterns of the adults who moved to or from Nebraska since 2000 and particularly about those with higher levels of education. Consequently, this section reviews currently available migration estimates and explains why these estimates do not clearly indicate whether Nebraska is gaining or losing more college-educated adults than it has in the past.

Previous and New Estimates of Adult Migration

An analysis of data collected through the 2000 U.S. Census revealed that, between 1995 and 2000, Nebraska experienced a net out-migration of college graduates that was more than offset by a net in-migration of adults with less than a high school education. The results of this analysis were reported in the 2004 Baseline Report for the LR 174 Higher Education Task Force and repeated in the 2005 Nebraska Higher Education Progress Report for the LR 75 Legislative Evaluation Task Force to underscore the importance of developing more employment opportunities for individuals who are educated at Nebraska's colleges and universities. (Table A13.1 in Appendix 13 provides a summary of the 2000 migration data.)

The migration analysis presented in the 2004 Baseline Report was based on the U.S. Census Bureau's estimates of the numbers of *adults aged 22 to 64* who left and entered the state during the five-year period preceding the 2000 census. These estimates and the resulting estimates of net migration were based on responses to questions asked on the 2000 Census long-form, completed by a one-in-six sample of U.S. households.

Migration estimates based on 2000 census data were included in the 2004 Baseline Report with the intention that they would later be compared to data collected through the 2010 decennial census. However, the U.S. Census Bureau no longer collects migration data comparable to the data collected in 2000. Instead, the Census Bureau replaced the long-form of the decennial census with the annual American Community Survey (ACS).

The decennial long-form asked each respondent whether household members had lived in their current home five years ago, and, if not, to report the location of their previous residence. In comparison, the ACS form asks if members of a household lived in a different residence one year ago.

Unlike the decennial census, which counts the U.S. population as of April 1st of the census year, the ACS is conducted monthly over the course of the survey year. As a result, the

migrations reported by survey respondents actually can occur within a time frame that ranges from almost a year before the first wave of the survey is conducted in January to shortly before the last wave of the survey is conducted in December. Consequently, the ACS migration data for any given survey year represents a possible migration period that is almost two years long. Furthermore, the second year of this two-year period is almost the same as the first migration year represented in the next survey. Since the ACS migration data are based on overlapping time frames that are each almost two years long, rather than a clearly defined five-year period, ACS migration data are not directly comparable to the decennial census data collected in 2000.

Compared to the decennial census, the major advantage of the ACS is that it provides new estimates of interstate migration every year, rather than only once every ten years. For the purposes of this report, the major disadvantage of the annual ACS is that it provides estimates of the numbers of 22- to 64-year-olds who migrated to and from Nebraska based on small samples of individuals who entered or left the state. As a result, the migration estimates for 22to 64-year- olds developed from ACS data can vary dramatically from one year to another, not because any significant changes in migration patterns have occurred, but because estimates based on small samples commonly fluctuate as a result of sampling error. In contrast, the migration data collected through the long-form of the decennial census in 2000 were from large samples of respondents, thus resulting in estimates with small margins of error.

First conducted in 2005, the annual nationwide ACS obtains detailed data from a sample of more than three million households, representing up to 2.5% of all households. Using the total ACS sample, the U.S. Census Bureau develops and publishes estimates of the number of adults 25 years of age or older that move into or out of each state. However, the only way to obtain migration estimates for 22- to 64-year-olds is to develop them based on a smaller sample of ACS data that is available for public use.

The ACS data files that are available for public use include the survey responses obtained from an annual sample of about 1% of Nebraska's households. However, only a small fraction of the individuals surveyed report that they lived in Nebraska for less than a year, and even smaller samples of respondents from other states say that they moved out of Nebraska within one year of the survey. When these groups of respondents are classified by level of education, sample sizes are further reduced, thereby decreasing the reliability of the migration estimates by education level.

Even though migration estimates based on ACS data can be expected to vary quite dramatically from one year to another, they are the *only* available statistics for monitoring Nebraska migration patterns since the 2000 U.S. Census. Consequently, the Coordinating Commission has reported the estimates for 22- to 64-year-olds by education level since ACS data first became available for public use.

This section of the 2015 report summarizes the migration estimates based on 2013 ACS data collected from samples of 22- to 64-year olds who migrated to and from the state in 2012 or 2013, and compares these estimates to those based on data from previous surveys. In addition, average annual net migration estimates for 22- to 64-year-olds are presented, based on three years of ACS data collected in 2011, 2012, and 2013.

Migration Estimates for 22- to 64-Year Olds Based on the American Community Survey

<u>Figure 3.1</u> summarizes the net-migration estimates for Nebraska by education level, based on the results of the ACS conducted annually from 2005 to 2013.³⁶ As shown in this chart, the estimates of net migration based on one year of ACS data vary significantly from one year to another.

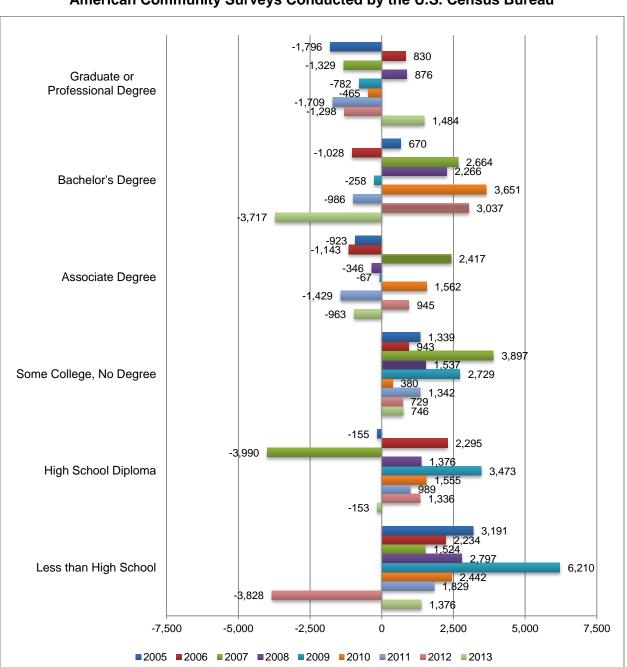

When the estimates based on the nine years of ACS data are compared, as shown in <u>Figure 3.1</u>, an overall migration pattern is not clearly revealed. Based on these estimates, it is impossible to draw conclusions about the migration trends of Nebraska.

The primary reason for the inconsistent net-migration estimates shown in <u>Figure 3.1</u> is that they are based on very small samples. For example, based on the 2013 ACS data available for public use, 1,484 more individuals with graduate or professional degrees moved into Nebraska than moved out of the state. This estimate is based on survey responses from 39 individuals who moved to Nebraska and 31 respondents who moved from Nebraska to other states, or a total of 70 individuals who were surveyed in 2013.

When the margin of error exceeds the absolute value of the point estimate, no conclusions should be drawn about the estimate. Since the estimated net migration of 1,484 individuals with graduate or professional degrees has a 90% margin of error of +/- 2,265, no conclusions can be drawn. In fact, for the 2013 ACS, every level of education, *except for bachelor's*, has a margin of error larger than the estimate itself. The estimated net migration of - 3,717 for those with a bachelor's degree has a 90% margin of error of +/- 3,368. In other words, if one were to draw indefinite samples of the population, the point estimate for those with a bachelor's degree would fall between -7,085 and -349 90% of the time. Obviously, such a conclusion provides no help in determining whether the goal of Priority 3 is being achieved. See <u>Table A13.3</u> and <u>Table A13.5</u> in <u>Appendix 13</u> for more information on confidence intervals for ACS data.

³⁶ Net migration is the difference between the estimated numbers of individuals who moved to or from Nebraska. If net migration is positive, the number of people who moved to the state is higher than the number who left Nebraska. If net-migration is negative, the number of people who left the state exceeded the number who moved to Nebraska.

Figure 3.1

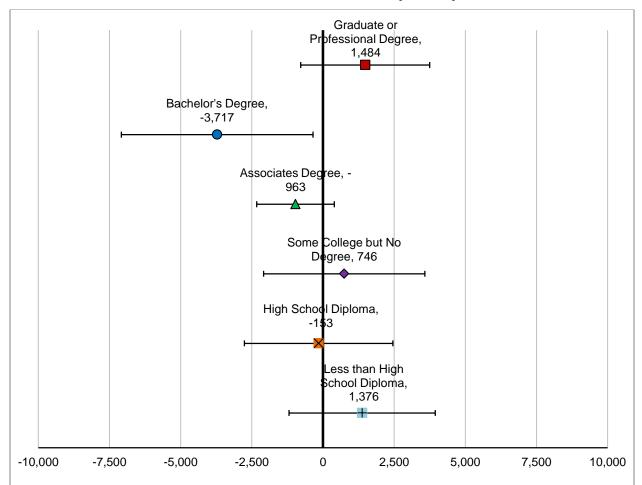

Estimated Nebraska <u>Net-Migration</u> of 22- to 64-Year-Olds by Education, Based on the 2005 Through 2013 American Community Surveys Conducted by the U.S. Census Bureau

Note. See <u>Table A13.2</u> in <u>Appendix 13</u> for supporting data. Data source: Estimates based on the 2005 through 2013 American Community Surveys, conducted by the U.S. Census Bureau, obtained from the National Center for Higher Education Management Systems (NCHEMS).

<u>Figure 3.2</u> visually illustrates the margins of error for the net-migration estimates that are based on 2013 ACS data. Similar ranges of variability have been calculated for all of the other estimates for 2005 through 2012, as summarized in <u>Figure 3.1</u>. Given that these ranges are relatively wide and the corresponding net-migration estimates at each education level vary from one year to the next, it is difficult to draw even tentative conclusions about the general migration pattern of working-age adults who moved to or from Nebraska between 2005 and 2013.

Figure 3.2

Note. See <u>Table A13.2</u> and <u>Table A13.4</u> in <u>Appendix 13</u> for the margins of error and the number of cases on which each estimate is based. This chart shows each net-migration estimate as the mid-point of the range of values based on the margin of error at the 90% confidence level. Data source: Estimates based on the 2013 American Community Survey, conducted by the U.S. Census Bureau, obtained from the National Center for Higher Education Management Systems (NCHEMS).

As previously stated, no conclusion can be drawn about a net migration estimate when the margin of error exceeds the estimate at the stated confidence level, and especially when the margin of error is large, relative to the estimate. Conversely, a conclusion can be drawn about the direction of net migration at a given education level if the margin of error is less than the absolute value of the estimated migration.

In the case of individuals with a bachelor's degree, it can be concluded that Nebraska exported more 22- to 64-year-olds with bachelor's degrees than it imported in 2013. However, the available data are inadequate to precisely determine the magnitude of this negative net migration in 2013.

The annual estimates of net migration shown in <u>Figure 3.1</u> vary quite dramatically from one year to the next. Most importantly, they do not provide evidence that Nebraska has consistently gained or lost high school or college graduates as a result of migration.

Only limited conclusions can be drawn from one-year net migration estimates, due to the small samples on which the estimates are based each year and the relatively high margin of error associated with each estimate. Theoretically, by calculating annual net migration estimates based on the combined data collected through three or more consecutive surveys, as shown in <u>Figure 3.3</u>, these limitations may be reduced.

The annual net migration estimates by education level shown in <u>Figure 3.3</u> are based on ACS data collected in 2011, 2012, and 2013. The margins of error associated with these annual estimates are still relatively high, ranging from +/- 928 for the estimate for individuals with associate's degrees to +/- 1,872 for the estimate for individuals with bachelor's degrees.

Unfortunately, even with larger samples collected over three years, the margins of error are higher than the estimated net migration for all levels of education. Based on the estimates shown in <u>Figure 3.3</u>, it is not possible to draw any conclusion about the annual net migration of individuals to or from Nebraska.

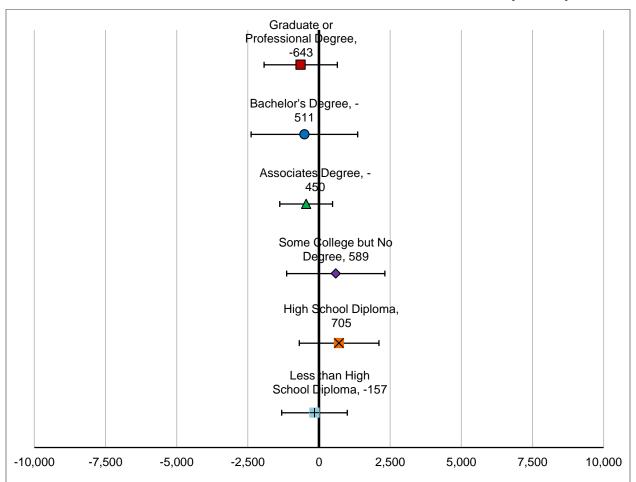

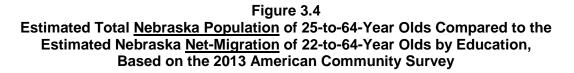

Figure 3.3

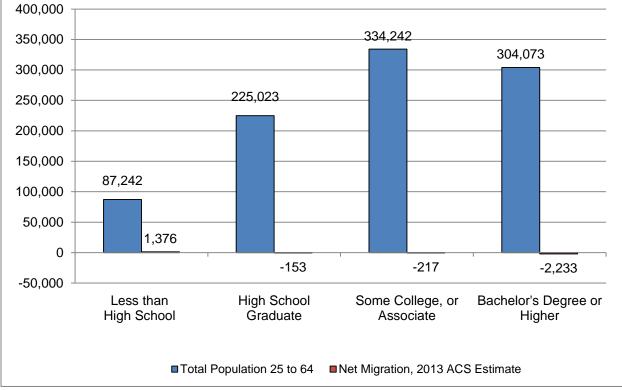

<u>Estimated</u> Nebraska Annual <u>Net-Migration</u> of 22- to 64-Year-Olds by Education, 3-Year Estimates Based on 2011, 2012, and 2013 American Community Survey Data

Note. This chart shows each net-migration estimate as the mid-point of the range of values based on the margin of error at the 90% confidence level. See <u>Table A13.3</u> and <u>Table A13.5</u> in <u>Appendix 13</u> for the margins of error and the number of cases on which each estimate is based. Data source: Estimates based on the 2011, 2012, and 2013 American Community Surveys, conducted by the U.S. Census Bureau, obtained from the National Center for Higher Education Management Systems (NCHEMS).

Additional Information Related to Migration

Although currently available estimates from the U.S. Census Bureau do not reveal a clear picture of overall Nebraska migration patterns, there is still reason to be concerned about the net-migration of working-age adults. As illustrated in Figure 3.4 below, the latest available net-migration estimate at each education level is small, relative to the corresponding total estimated working-age population of the state. Nevertheless, repeated positive or negative net migration will have a corresponding positive or negative effect on the size and quality of the state's labor force over the long run. Consequently, the Coordinating Commission will continue to monitor annual and three-year estimates of the numbers of working-age adults who migrate to and from Nebraska to determine if a clearer, more solidly evidenced picture of Nebraska's net migration pattern emerges from the analysis of ACS data.

Data source: 2013 American Community Survey (ACS), conducted by the U.S. Census Bureau.

Technical Note A0.1

Adjustments are occasionally made to improve data accuracy. Therefore, it is generally advisable to reference the most recent edition of this report.

Due to rounding, percentages may not sum to 100.0% for data summarized in this report. Additionally, due to rounding, totals may not equal the sum of their parts.

Appendix 1

Nebraska College Enrollments

| | Table A1.1 Nebraska Total Fall Headcount Enrollment by Sector Fall 2003 through Fall 2014 | | | | | | | | | |
|-------------------|---|-------------------------------------|-----------------------------------|---|----------------------------------|-------------------------|--|--|--|--|
| Year | University of Nebraska | Nebraska State College System | Nebraska Community Colleges | Independent Colleges & Universities | For- Profit/Career Schools | Nebraska State Total | | | | |
| 2003 | 46,015 | 7,652 | 39,575 | 24,106 | 3,244 | 120,592 | | | | |
| 2004 | 45,122 | 7,650 | 40,233 | 25,632 | 3,436 | 122,073 | | | | |
| 2005 | 45,470 | 7,753 | 39,851 | 26,079 | 3,487 | 122,640 | | | | |
| 2006 | 45,819 | 8,108 | 40,444 | 27,197 | 3,975 | 125,543 | | | | |
| 2007 | 47,062 | 8,494 | 41,035 | 28,294 | 3,653 | 128,538 | | | | |
| 2008 | 47,812 | 8,543 | 43,146 | 28,817 | 3,392 | 131,710 | | | | |
| 2009 | 49,032 | 8,835 | 46,153 | 32,163 | 4,587 | 140,770 | | | | |
| 2010 | 49,905 | 8,846 | 49,051 | 33,113 | 4,978 | 145,893 | | | | |
| 2011 | 50,363 | 8,726 | 47,542 | 33,291 | 4,037 | 143,959 | | | | |
| 2012 | 50,178 | 8,939 | 44,899 | 32,953 | 3,678 | 140,647 | | | | |
| 2013 | 50,705 | 8,984 | 42,005 | 33,606 | 3,639 | 138,939 | | | | |
| 2014 Estimated | 51,215 | 9,007 | 39,484 | 33,801 | 2,848 | 136,355 | | | | |

Note. Statewide official enrollments for 2014 will not be available from IPEDS until May 2015. All institutions in the for-profit category are operated for profit *except* for the three schools of radiologic technology, which are operated by not-for-profit hospitals or medical centers. Data sources: For 2003–2013 data, National Center for Education Statistics (NCES), Integrated Postsecondary Education Data System (IPEDS), with minor data adjustments as needed for improved data accuracy. Preliminary enrollments for fall 2014 were collected from each institution by the Coordinating Commission for Postsecondary Education, January 2015.

| Note. All institutions in the for-profit category a | | | | | | |

Note. All institutions in the for-profit category are operated for profit *except* for the three schools of radiologic technology, which are operated by not-for-profit hospitals or medical centers. Sector totals and yearly percentage increases/decreases for degree-granting and non-degree-granting for-profit/career schools may be different from those published in prior editions of the *Progress Report* due to schools changing from the non-degree- to the degree-granting category. Data sources: For 2003–2013 data, National Center for Education Statistics (NCES), Integrated Postsecondary Education Data System (IPEDS), with minor data adjustments as needed for improved data accuracy. Preliminary enrollments for fall 2014 were collected from each institution by the Coordinating Commission for Postsecondary Education, January 2015.

^a Beginning in 2011, Mary Lanning Memorial Hospital School of Radiologic Technology reports enrollment through the University of Nebraska at Kearney.

^bThe previously reported enrollment of 579 in fall 2010 at Joseph's College of Beauty was incorrect due to problems with the college's data system. Data was corrected to enrollment of 303 with the 2015 Progress Report.

Note. Graduates do not include GED recipients or completers who did not receive regular diplomas. The actual and projected public totals do not include graduates from education service units or state-operated schools. Beginning in 2010–2011, the actual race/ethnicity total does not equal the public total because students in the "two or more races" category are not included in the race/ethnicity total. They are, however, included in the public total. (Number of multiracial public high school graduates in 2010-11 = 492, 2011-12 = 525, 2012-13 = 536, 2013-14 = 591.) The projected race/ethnicity total does not equal the projected total number of public school graduates, due to differences in the way historical data may have been reported by the state and because graduates for each

Continued on the next page.

Table A2.2 (Continued)

race/ethnicity were projected independently from the total public projections. The sum of the projected public and nonpublic graduates may not equal the total graduates, and the sum of the projected races may not equal the race/ethnicity total. Data sources: For actual numbers of graduates: Nebraska Department of Education, December 2007 for 2002–03 through 2005–06 data, January 2009 for 2006–07 data, February 2010 for 2007–08 data, February 2011 for 2008–09 and 2009–10 data, February 2012 for 2010–11 data, December 2012 for 2011–12 data, January 2014 for 2012–13 data, and January 2015 for 2013–14 data. For projected numbers of graduates: *Knocking at the College Door*, Western Interstate Commission for Higher Education (WICHE), December 2012. Data downloaded from: www.wiche.edu/pub/16556.

| Total for Public High Schools | 19,604 | | 20,359 | | 3.9% | 21,450 ^c | | 5.4% ^c | |

Note. The number of actual graduates and the projected number of graduates do not include graduates of educational service units or state-operated schools. Data source: For actual numbers of graduates: Nebraska Department of Education, December 2007 and January 2015. For projected numbers of graduates: *Knocking at the College Door*, Western Interstate Commission for Higher Education (WICHE), December 2012. Data downloaded from: www.wiche.edu/pub/16556.

^aTwo or more races was not a racial/ethnic category in 2002–03. ^bWICHE proportionately allocated, "Two or more races enrollments and graduates to four race groups – American Indian/Alaska Native, Asian/Pacific Islander, black non-Hispanic, and white non-Hispanic – based on each group's average share of the total of the four over the three previous years. (Data in the Hispanic category were not part of the apportionment, because Hispanic is considered an ethnicity not a race.)" (WICHE, page 128). For Nebraska, the three years averaged were 2007–08, 2008–09, and 2009–10. ^cBecause projections were made independently for the publics and non-publics, and for the various race/ethnic groups, the total shown here for 2023–24 does not include 552 projected public high school graduates. WICHE projects a total of 22,003 individuals will graduate from Nebraska's public schools in 2023–24. This is a projected increase of 8.1% between 2013–14 and 2023–24.

Appendix 3

Nebraska High School Graduation Rates

Explanatory Note A3.1 The Four-Year High School Graduation Rate and Dropout Rate

Prior to the 2010–2011 school year, the Nebraska Department of Education calculated and reported four-year high school graduation rates, using a method of calculating the percentage of students who graduate from high school developed by the National Center for Education Statistics (NCES). The 2009–2010 school year was the last year for which four-year graduation rates were reported for Nebraska high schools.

The **four-year high school graduation rate** was based on the number of students in 9th grade compared to the number of students in the same class who completed high school four years later and received regular diplomas. For the purposes of computing four-year graduation rates, graduates did not include GED recipients or completers who did not receive regular diplomas. Specifically, four-year high school graduation rates were calculated using the following formula:

Number of high school diploma recipients at the end of Grade 12 Grade 9 dropouts (Year 1) + Grade 10 dropouts (Year 2) + Grade 11 dropouts (Year 3) + Grade 12 dropouts (Year 4) + Number of high school diplomas recipients at the end of Grade 12

The Nebraska Department of Education computed a statewide, four-year high school graduation rate for the state's public schools and also computed a four-year high school graduation rate for each public school district in the state. A statewide, four-year high school graduation rate was also calculated for nonpublic schools, but four-year graduation rates were not available for nonpublic schools on an individual basis.

A **four-year high school dropout rate** could be calculated simply by subtracting the four-year graduation rate from 100.0%. This dropout rate also could be calculated by dividing the total number of dropouts from Grade 9 through Grade 12 by the number of high school diploma recipients at the end of Grade 12 plus the total number of dropouts.

In calculating the four-year high school graduation rate, a "dropout" was defined as an individual who was enrolled sometime during the current school year but who was not enrolled at the beginning of the next school year and had not graduated from high school or completed a state- or district-approved education program. A dropout was <u>not</u> an individual who had passed away or who had transferred to another public school, a private school, a home school or another district-approved education program. Dropouts also did not include students who were temporarily absent due to suspension, expulsion or illness.

Explanatory Note A3.2 The Cohort Four-Year High School Graduation Rate

Beginning in the 2010–2011 school year, the Nebraska Department of Education (NDE) started using the **cohort four-year graduation rate** or, more simply, the **cohort graduation rate**, to measure the proportion of Nebraska's public high school students who receive regular diplomas. The cohort graduation rate is not currently calculated for nonpublic schools in Nebraska.

The cohort four-year graduation rate is calculated by dividing the number of students in a graduation cohort who graduate with a regular high school diploma in four years or less, including the summer following the fourth school year, by the number of students in the graduation cohort.

A student belongs to a graduation cohort based on school enrollment status. The demographic subgroups for a graduation cohort are determined by data submitted by the school district and reported at the student's final status.

A cohort represents the group of students sharing an expected graduation year. The expected graduation year is determined by adding four years to the school year when the student reaches 9th grade for the first time and remains unchanged.

For example, the 2014 graduation cohort is the group of students who entered 9th grade for the first time at the beginning of or during the 2010–2011 school year. The expected graduation year for this cohort was the 2013–2014 school year.

A graduation cohort is adjusted by adding any students transferring into the cohort and by subtracting any students who transfer out, emigrate to another country, or die during the fouryear cohort period.

Only students who earn and receive regular diplomas are counted as completers in calculating the cohort graduation rate. Students who receive certificates of achievement or attendance, alternative awards, or General Education Diplomas (GED) remain in the cohort, but they are not counted as completers for the purposes of calculating the cohort graduate rate. Instead, they remain only in the denominator. The cohort graduation rate is computed using the following formula:

High school diploma recipients (Year X)

1st time 9th graders (Year X - 4) + Students who transfer in – (Students who transfer out, emigrate to another country, or die)

A **cohort four-year dropout rate** <u>cannot</u> be calculated simply by subtracting the cohort four-year graduation rate from 100.0%, or by subtracting the number of regular diploma recipients from the total number of students in the cohort. Such calculations are invalid because the number of students who did not receive regular diplomas includes students who are still in school or received other certificates, awards and diplomas, such as the GED, as well as students who dropped out of school or their status is unknown.

Note. High school graduates include graduates of educational service units and state-operated systems as well as public and nonpublic high school graduates. Graduates do not include GED recipients or completers who did not receive regular diplomas. Nebraskans who have delayed going to college for more than a year after they graduated from high school are not included in the calculation of Nebraska's college continuation rate because there is no way of determining from IPEDS data when they received their high school diplomas. FTF = first-time freshmen. HS = high school. Continuation rate = the number of first-time freshmen who graduated from high school within the past 12 months and enrolled at degree-granting or non-degree granting institutions divided by the total number of high school graduates. Includes both full-time and part-time students. Data sources: For high school data, Nebraska Department of Education, January 2007 for 2001–02 through 2005–06, January 2009 for 2007–08, February 2011 for 2009–10, and December 2013 for 2011–12 data; for first-time freshmen data, National Center for Education Statistics, IPEDS fall survey data for 2002, 2004, 2006, 2008, 2010, and 2012. Data for students attending college out of state were obtained directly from the IPEDS survey download.

well as public and nonpublic high school graduates of educational service drins and state-operated systems as well as public and nonpublic high school graduates. Graduates do not include GED recipients or completers who did not receive regular diplomas. Nebraskans who have delayed going to college for more than a year after they graduated from high school are not included in the calculation of Nebraska's college continuation rate because there is no way of determining from IPEDS data when they received their high school diplomas. FTF = first-time freshmen. HS = high school. Continuation rate = the number of first-time freshmen who graduated from high school within the past 12 months and enrolled at degree-granting or non-degree-granting institutions divided by the total number of high school graduates. Includes both full-time and part-time students. Data sources: For high school data, Nebraska Department of Education, January 2007 for 2001–02 through 2005–06, January 2009 for 2007–08, February 2011 for 2009–10, and December 2013 for 2011–12 data; for first-time freshmen data, National Center for Education Statistics, IPEDS fall survey data for 2002, 2004, 2006, 2008, 2010, and 2012. Data for students attending college out of state were obtained directly from the IPEDS database cutting tool. Data for students attending college in Nebraska were obtained from the CCPE IPEDS survey download.

Appendix 6

Nebraska and Non-Nebraska, First-Time Freshmen Migration Data

Explanatory Note A6.1 Nebraska-Resident, First-Time Freshmen Migration Data Collection and Limitations

The data used to estimate the number and percentage of Nebraska high school graduates who go to college in Nebraska or out of state are collected every two years by the National Center for Education Statistics (NCES) through the Integrated Postsecondary Education Data System (IPEDS). Referred to as "migration" or "residency" data, these data are collected through the fall IPEDS surveys that are conducted in even-numbered years. Consequently, the latest available data are for fall 2012 representing the 2011–2012 academic year. Data for fall includes students who start college during the summer, but does not include students who start college in the winter or spring.

Based on the IPEDS data summarized below, almost 99% of all Nebraska-resident first-time freshmen (FTF) attended degree-granting institutions in fall 2012.

their classification at the time of each fall survey. Data sources: National Center for Education Statistics, fall 2002, 2004, 2006, 2008, 2010, and 2012 IPEDS surveys; and records maintained by Nebraska's Coordinating Commission for Postsecondary Education, 2011 and 2012.

The residency data reported by the non-degree-granting institutions in Nebraska for 2002 and 2004 were not as complete or consistent as the data reported by the degree-granting institutions. In order to maintain comparability with the 2002 baseline data, Nebraska-resident FTF who attended <u>non-degree-granting</u> schools are <u>excluded</u> from further analysis of the enrollment trends of Nebraska-resident freshmen presented in this section of the *Progress Report*.

The data collected from <u>degree-granting</u>, independent institutions and for-profit schools in fall 2002, 2004 and 2006 are limited by the fact that a few schools did not report the numbers and residence status of their first-time freshmen who graduated from high school within 12 months of college enrollment. See <u>Table A6.8.a</u>, <u>Table A6.8.b</u> and <u>Table A6.8.c</u> for the institutions that did not provide this information.

Note. Numbers of high school graduates include graduates of nonpublic schools, public schools, educational service units, and state-operated schools. Graduates do not include GED recipients or completers who did not receive regular diplomas. Numbers of first-time freshmen include full-time and part-time students. Counts do not include non-resident aliens (foreign students) and students of unknown race/ethnicity. Data sources: Official numbers of high school graduates obtained from the Nebraska Department of Education, January 2015. Numbers of first-time freshmen are based on data obtained through the National Center for Education Statistics, 2003 through 2013 IPEDS enrollment surveys, February 2015 (corrected).

Note. Counts include full-time and part-time students but do not include non-resident aliens (foreign students) and students of unknown race/ethnicity. Degree-granting and non-degree-granting for-profit/career schools include the schools classified in each of these categories as of fall 2013. Prior to 2009, some for-profit/career schools changed from non-degree-granting to degree-granting. Data source: National Center for Education Statistics, 2003 through 2013 IPEDS enrollment surveys, February 2015 (corrected).

Note. Counts include full-time and part-time students. Counts do not include non-resident aliens (foreign students) and students of unknown race/ethnicity. The Independent Colleges and Universities sector includes Little Priest Tribal College and Nebraska Indian Community College. The degree-granting and non-degree-granting for-profit/career schools include the schools classified in each of these categories as of fall 2013. Prior to 2009, some for-profit/career schools changed from non-degree-granting to degree-granting. Data source: National Center for Education Statistics, 2003 through 2013 IPEDS enrollment surveys, February 2015 (corrected).

Financial Aid Programs

Explanatory Note A8.1 Definitions of Federal and State Title IV Financial Aid Programs

The following are definitions of the types of federal and Title IV financial aid programs available to Nebraska postsecondary students between 2003 and 2013:

- Academic Competitiveness Grant (ACG): Created under the Higher Education Reconciliation Act of 2005, ACGs were need-based but limited to students who had demonstrated academic achievement. To receive an ACG, a student must have been a college freshman or sophomore, a U.S. citizen, Pell Grant-eligible and have completed a program of rigorous high school course work as defined by their state and recognized by the U.S. Secretary of Education. ACGs provided additional funds of up to \$750 for first-year college students and up to an additional \$1,300 for second-year students who were enrolled full time and maintained a 3.0 GPA in college. Institutions began awarding these grants in the 2006–2007 academic year. This program was eliminated after the 2010–2011 academic year.
- Federal Pell Grant: Federal Pell Grants are awarded to undergraduates who have not earned a bachelor's degree and who demonstrate high financial need. Pell Grants do not have to be repaid. The award range for Pell Grants for the award year 2013–2014 was \$582 to \$5,645.
- Federal Supplemental Educational Opportunity Grant (FSEOG): Undergraduate students with exceptional need and who have not received a bachelor's degree are eligible to receive the FSEOG. FSEOG awards can range from \$100 to \$4,000 and do not have to be repaid, but awards are subject to the availability of funds at a student's institution.
- Federal Work-Study (FWS): The FWS provides on- and off-campus jobs for graduate and undergraduate students who demonstrate financial need. Work-study amounts awarded vary from institution to institution.
- Nebraska Opportunity Grant (NOG): State grants are awarded to Nebraska-resident students who demonstrate high financial need and who attend eligible Nebraska postsecondary institutions to assist with the students' educational expenses. Funding for the grant comes from the state through the Nebraska Lottery and the state's general fund. The Nebraska State Grant (NSG) program was in effect from 2003–2004 through 2009–2010. In 2010–2011, the program was renamed the Nebraska Opportunity Grant (NOG).
- National Science and Mathematics Access to Retain Talent (SMART) Grant: Created under the Higher Education Reconciliation Act of 2005, SMART grants were need-based but limited to students majoring in specified fields who maintained B averages in college. To receive a SMART grant, a student must have been a third- or fourth-year college student; a U.S. citizen; Pell Grant-eligible; enrolled full time; majored in a designated science, technology, mathematics, or critical language; and maintained a 3.0 GPA. Students who met these criteria would receive up to \$4,000 in additional financial aid. Institutions began awarding SMART grants in the 2006–2007 academic year. This program was eliminated after the 2010–2011 academic year.

Continued on the next page.

Explanatory Note A8.1 Continued

- **Perkins Loans:** Perkins Loans are fixed, low-interest (5%) loans available to graduate and undergraduate students with financial need. Undergraduate students may borrow up to \$4,000 per year, and graduate students may borrow up to \$6,000 per year, depending on the availability of funds at their institution.
- **PLUS Loans:** PLUS loans are available to the parents of dependent undergraduate students. These loans are not need-based. Parents may borrow up to the student's cost of attendance, less any other financial aid received.
- PLUS Loans for Graduate and Professional Degree Students (Grad PLUS): Graduate and professional degree students are eligible to borrow under the PLUS loan program up to their cost of attendance minus other estimated financial assistance. The terms and conditions applicable to PLUS also apply to GRAD PLUS. Applicants must apply for their annual loan maximum eligibility under the Federal Subsidized and Unsubsidized Loan Program before applying for a Graduate/Professional PLUS loan.
- Subsidized (Sub) and Unsubsidized (Unsub) Stafford Loans: Sub and Unsub Loans are available to undergraduate and graduate students. Students must demonstrate financial need in order to qualify for a Subsidized Loan, where the federal government pays the interest while the student is in school. Unsubsidized Loans are available to all students, but borrowers are responsible for the interest while in school. Limits for Sub and Unsub Loans range from a maximum of \$5,500 to \$20,500 depending on grade level and dependency status.
- Teacher Education Assistance for College and Higher Education (TEACH) Grant: The TEACH grant program was established under the College Cost Reduction and Access Act (CCRAA) to benefit current and prospective teachers. Beginning in 2008-2009, students may be awarded up to \$4,000 per academic year. Undergraduate and post-baccalaureate students may receive up to a total of \$16,000, while graduate students may receive up to \$8,000. Eligible students must be currently completing or planning to complete coursework necessary to begin a career in teaching. There are, however, graduate degree alternatives for teachers or retirees with experience in a teacher shortage area. To be considered for a grant, a student must have a score above the 75th percentile on an admissions test, such as SAT, ACT or GRE and at least a 3.25 GPA. Students must sign an understanding of terms document to certify they understand the terms of the grant and the teaching service requirements. The student must teach full time for at least four years within eight years of completing the program at a Title I school as a highly qualified teacher and/or in a specified subject area (mathematics, science, foreign language, bilingual education, special education, reading or another "high need" field). If service is not met, the grant must be repaid as an unsubsidized direct Stafford Loan with interest from the date(s) of original disbursement.

Students must demonstrate financial need to be considered for all aid programs listed except for the TEACH, the Unsubsidized Loan, the PLUS, and the GRAD PLUS. Financial need is the difference between the student's costs to attend his or her respective institution and the ability of the family to contribute toward college costs. That ability is determined through completing the Free Application for Federal Student Aid (FAFSA). For example, if the cost of attendance is \$8,000 and the student's contribution is \$1,000, the student demonstrates a need of \$7,000.

Explanatory Note A8.2 Definitions of Income Groups and Changes in the College Continuation Rates by Type of High School Attended for Access College Early (ACE) Scholarship Recipients

The following definitions are used for Table A8.4a through Table A8.4f:

- Low-income students: Students approved to receive free or reduced-price school lunches.
- Non-low-income students: Students not approved for free or reduced-price school lunches. The non-low-income students include students in low-income households that have not applied for free or reduced-price school lunches. Participation in the free or reduced-price school lunch program is the only indicant of household income in the student records maintained by the Nebraska Department of Education; therefore, low-income students in the non-low-income category cannot be identified and excluded for the purposes of analysis.
- **Other low-income graduates:** The numbers for these students are determined by subtracting the numbers of male and female ACE scholarship recipients from the total numbers of male and female low-income graduates reported by the Nebraska Department of Education.

<u>Changes in the College Continuation Rates by Type of High School Attended for Access</u> <u>College Early (ACE) Scholarship Recipients</u>

In preparing for the 2015 Progress Report, it was discovered that one public high school was incorrectly coded as nonpublic (private). The data has been corrected in this year's report, and the college continuation rates in Table A8.4b (2008–09), Table A8.4c (2009–10), Table A8.4d (2010–11), and Table A8.4e (2011–2012) have been updated.

Note. For the first year of the program in 2007–08, eligible students were allowed to apply for scholarships for as many courses as they wanted to take. In 2008–09 and 2009–10, scholarships were limited to funding only one course per term per eligible student, so that a student could receive scholarships for a maximum of two or three courses during the school year, depending on whether courses were taken on a semester or quarter basis. Beginning in 2010–11 and continuing through 2014–15, eligible students again have been allowed to apply for scholarships for as many courses as they want to take. Data source: Nebraska's Coordinating Commission for Postsecondary Education, August 2011, January 2013, January 2014, and December 2014.

Note. The <u>college continuation rate</u> is the number 2010–11 public high school graduates who enrolled in college on or before March 26, 2012, divided by the total number of students who graduated from Nebraska public high schools in 2010–11. National Student Clearinghouse records do not include students who enrolled in small private not-for-profit colleges or for-profit colleges and career schools that do not submit enrollment records to the Clearinghouse. Data sources: Nebraska's Coordinating Commission for Postsecondary Education (numbers of ACE recipients), April 2012 and February 2015 (corrected); National Student Clearinghouse (college continuation data), March and April 2012; and Nebraska Department of Education (numbers of low-income and non-low-income graduates), April 2012.

Data source: Nebraska's Coordinating Commission for Postsecondary Education, September 2011, November 2012, November 2013, and November 2014. ^a High school GPA is equal to the student's unweighted high school GPA, unless the student's transcript only

contained a weighted GPA. GPAs greater than 4.0 were rounded to 4.0. For 2011–12, 2012–13, and 2013–14: high school GPA was self-reported by the student at the time of his/her ACE Plus application. For 2014–15: high school GPA was obtained by Commission staff from the student's unofficial high school transcript. ^b College GPA was obtained by Commission staff from the student's unofficial college transcript.

Continued on the next page.

Table A9.1 Continued

^a Prior to 2007, the NCES required schools to report only their retention rates, not the numbers of students retained. To maintain consistency for the latest year of data, the estimated number of students retained was calculated by multiplying the reported retention rate by the number of full-time, first-time freshmen reported one year earlier.

^b In fall 2003, the degree-granting for-profit sector enrolled a total of 1,119 full-time, first-time freshmen, but 158 of these students were enrolled at Kaplan University-Lincoln, which did not report a retention rate for fall 2004. Consequently, Kaplan University-Lincoln is excluded from the degree-granting, for-profit schools, reducing the number of full-time, first-time freshmen in this sector to 961 in fall 2003 (1,119 less 158).

In fall 2012, the degree-granting for-profit sector reported 191 full-time, first-time freshmen. However, only three of the schools in this sector reported retention rates for fall 2013 that are comparable to the rates reported in fall 2004 (Myotherapy Institute, Omaha School of Massage and Healthcare of Herzing University, and Vatterott College-Spring Valley).

The available data for the remaining schools in the degree-granting for-profit category are not comparable between fall 2004 and 2013 for the following reasons. (1) Alegent Health School of Radiologic Technology no longer enrolls freshmen. (2) ITT Technical Institute-Omaha, Kaplan University-Lincoln Campus, Kaplan University-Omaha Campus, and The Creative Center can no longer report traditional freshmen retention rates. Since they are now four-year schools, they can report retention rates only for bachelor-seeking students, even though all or most of their first-time freshmen register for associate-degree programs or programs of less than two years in length. (3) Mary Lanning Memorial Hospital School of Radiologic Technology does not enroll first-time freshmen. (4) National American University-Bellevue did not begin reporting full-time, first-time freshmen retention rates until fall 2012. (5) The Universal College of Healing Arts was not established until 2005. (6) The University of Phoenix-Omaha Campus was not established until 2007, Vatterott College has reported no students.

Table A9.2 Nebraska Part-Time Freshmen Retention Rates of Nebraska Postsecondary Institutions by Sector Fall 2013 Compared to Fall 2004 Baseline

| | Fall | 2004 | Fall | 2013 |
|---|--|---|--|---|
| Sector of Nebraska Postsecondary Education | No. of Part-Time, FTF Fall 2003 | Part-Time Retention Rate Fall 2004 | No. of Part-Time, FTF Fall 2012 | Part-Time Retention Rate Fall 2013 |
| University of Nebraska | 174 | 53.9% | 145 | 55.5% |
| Nebraska State College System | 62 | 46.0% | 27 | 29.7% |
| Nebraska Community Colleges | 1,505 | 33.8% | 1,565 | 35.6% |
| Total All Public Institutions | 1,741 | 36.3% | 1,737 | 37.2% |
| Nebraska Independent Institutions | 220 | Insufficient Data | 195 | Insufficient Data |
| Degree-Granting For-Profit Schools | 177 | Insufficient Data | 77 | Insufficient Data |
| Non-Degree-Granting For-Profit Schools | 8 | Insufficient Data | 3 | Insufficient Data |
| Nebraska State Retention Rate | 2,146 | Insufficient Data | 2,012 | Insufficient Data |

Note. Minor adjustments have been made to the numbers of first-time freshmen to improve data accuracy. The <u>retention rate</u> for fall of a given year is the percentage of first-time freshmen enrolled in the fall of the previous year that were enrolled at the same institution one year later. FTF = first-time-freshmen. Degree-granting and non-degree-granting for-profit/career schools include the schools classified in each of these categories as of fall 2013. The schools in the independent and for-profit sectors did not provide sufficient data to calculate part-time retention rates for these sectors or for the state. Data source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), fall 2003–2004 and 2012–2013 surveys.

The total <u>estimated number of students retained</u> equals the number of first-time freshmen multiplied by the retention rate, rounded to the nearest whole number for this table. NR = No Report: indicates the school did not report a retention rate or reported 0%, even though the school enrolled first-time freshmen the prior year. See the <u>Technical Note</u> at the end of <u>Table A9.3</u>. Data source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), the fall 2003 through fall 2012 survey for the first-time freshmen cohorts and the fall 2004 through the fall 2013 survey for the retention rates (CCPE survey downloads).

Table A9.3 Continued

Technical Note – Data for State-to-State Comparisons

The <u>estimated retention rates</u> for the six four-year institutions and the six community colleges that are reported in <u>Table A9.3</u> are based on the retention rate reported by each school multiplied by the number of first-time freshmen who were enrolled the previous fall. The Commission staff continues to use this methodology so that the retention rates reported each year are directly comparable to the rates calculated for fall 2004, which is the baseline for this report.

Beginning with fall 2005 retention rates, the Coordinating Commission has obtained national IPEDS data for comparing the estimated retention rates for Nebraska's public four-year institutions and the state's six community colleges (as reported in <u>Table A9.3</u>) to the rates for other states. For fall 2005 through fall 2009 retention rates, the national data required for these state-to-state comparisons were obtained each year from the National Center for Higher Education Management Systems (NCHEMS). Beginning with the fall 2010 rates, the Commission's database manager has obtained the required national data directly from IPEDS.

For the fall 2005 and fall 2006 rate calculations, NCHEMS used the same methodology that the Commission used to calculate the rates reported in <u>Table A9.3</u>. As stated previously, this methodology was based on multiplying the retention rate reported by each school by the number of first-time freshmen who were enrolled the previous fall.

Beginning with the fall 2007 national IPEDS data, the retention rate for an institution is determined by dividing the reported number of retained students by the <u>adjusted</u> fall cohort of first time freshmen. The same methodology is used to calculate the retention rates for the major institutional sectors, such as the four-year public colleges and universities, each state, and for the nation as a whole. Using this methodology, the sector rates based on the national data may be slightly different from those reported in <u>Table A9.3</u>.

Note. NR = No Report: indicates the school did not report a retention rate or reported 0%, even though the school enrolled first-time freshmen the prior year. NA = Not Applicable: indicates the school did not enroll freshmen the prior year. NO = Not Open: indicates the school was not open during the reporting period. Data source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), fall 2004 and 2013 surveys.

^a Due to a change in IPEDS reporting rules, ITT, Kaplan-Lincoln, Kaplan-Omaha, and The Creative Center can no longer report traditional freshmen retention rates. Since they are now four-year schools, they can report retention rates only for bachelor-seeking students, but all or most of their first-time freshmen register for associate-degree programs or programs of less than two years in length.

Data source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), fall 2004 and 2013 surveys.

^a Commission staff suspects the 1% retention rate reported for fall 2003 part-time freshmen enrolled in fall 2004 is incorrect. However, this was the rate Union College reported to IPEDS.

^b Due to a change in IPEDS reporting rules, ITT, Kaplan-Lincoln, Kaplan-Omaha, and The Creative Center can no longer report traditional freshmen retention rates. Since they are now four-year schools, they can report retention rates only for bachelor-seeking students, but all or most of their first-time freshmen register for associate-degree programs or programs of less than two years in length.

Appendix 10

IPEDS College Graduation Rates

Explanatory Note A10.1 Information on Computed College Graduation Rates Based on Data Obtained through the Integrated Postsecondary Education Data System (IPEDS)

Data collected through the Integrated Postsecondary Education Data System (IPEDS) are available from the National Center for Education Statistics to calculate the percentage of undergraduates who complete their degree programs within 150% of specified time periods. Students in four-year programs are considered to be "completers" if they graduate within six years from the time of their first enrollment. For two-year programs, the time frame for completion is three years.

The graduation rate that is calculated for an institution using IPEDS data is typically based on a cohort of <u>full-time</u>, <u>first-time degree/certificate-seeking undergraduates</u> who enrolled at the institution during the fall semester (or quarter) or the preceding summer.¹ The rate is calculated by dividing the number of completers by the number of students in the cohort and multiplying the fraction by 100 to express it as a percentage. The resulting percentage may be referred to as a "completion rate" or "graduation rate."

A cohort may be adjusted (reduced) only by removing (deleting) students who leave the institution for any of the following reasons: death or total and permanent disability; service in the armed forces; service with a foreign aid service of the federal government, such as the Peace Corps; or service on official church missions. Otherwise, students remain in a cohort group even if they become part-time students, transfer to other institutions, or drop out of the institution permanently or temporarily.

With or without cohort adjustments, graduation rates based on IPEDS data are estimates of the percentage of full-time, first-time degree/certificate-seeking students who complete their academic programs at the <u>same institution</u> where they were enrolled as freshmen. These rates do not estimate the percentage of all students who complete their degree programs after transferring to other institutions, who started their degree programs in the winter or spring, or who initially enrolled at the institution as part-time students.

¹ A full-year cohort, rather than a fall cohort, is used by schools offering primarily occupational or vocational programs and operating on a continuous basis. In Nebraska, several for-profit career schools operate on a continuous basis, qualifying them to use a full-year cohort. For all other institutions in Nebraska, a fall cohort is used in calculating graduation rates.

| Table A10.1 Overall Graduation Rate for Nebraska Postsecondary Institutions 2002–2003 through 2012–2013 | | | | | |
|---|------------------------------|---|--------------------|--|--|
| Year | No. of Students in Cohort | No. Who Completed Degree Programs | Graduation Rate | | |
| 2002–2003 | 16,298 | 7,892 | 48.4% | | |
| 2003–2004 | 16,282 | 7,954 | 48.9% | | |
| 2004–2005 | 17,624 | 8,802 | 49.9% | | |
| 2005–2006 | 18,093 | 8,967 | 49.6% | | |
| 2006–2007 | 16,949 | 8,328 | 49.1% | | |
| 2007–2008 | 17,026 | 8,548 | 50.2% | | |
| 2008–2009 | 17,999 | 8,861 | 49.2% | | |
| 2009–2010 | 16,334 | 8,298 | 50.8% | | |
| 2010–2011 | 16,606 | 8,324 | 50.1% | | |
| 2011–2012 | 17,628 | 8,546 | 48.5% | | |
| 2012–2013 | 17,427 | 8,455 | 48.5% | | |

Explanatory Note A10.2 Computation and Comparison of College Graduation Rates by Sector

<u>Table A10.2</u> and <u>Table A10.3</u> compare the latest available graduation rates for the six sectors of postsecondary education to the sector rates in 2002–2003, which is the baseline for this report. The schools that comprise the public and independent (not-for-profit) sectors are the same each year. However, since 2007, the following three for-profit/career schools have changed from non-degree granting to degree-granting status: Alegent Health School of Radiologic Technology, Mary Lanning Memorial Hospital School of Radiologic Technology, and Omaha School of Massage and Healthcare of Herzing University (formerly known as Omaha School of Massage Therapy).

For the comparisons shown in <u>Table A10.2</u> and <u>Table A10.3</u>, the sector rates for the *degree-granting*, for-profit/career schools for 2002–2003 and 2012–2013 are computed *including* Alegent, Mary Lanning, and Herzing, so that these sector rates reflect the graduation rates of the same series of schools. For this comparison, the sector rates for the *non-degree-granting*, for-profit/career schools for 2002–2003 and 2012–2013 are computed *excluding* Alegent, Mary Lanning, and Herzing, even though these schools were non-degree granting as of fall 2003.

<u>Table A10.4.a</u> through <u>Table A10.4.k</u> summarize the graduation rate data by sector and by institution for each year since 2002–2003. In each of these tables, the for-profit/career schools are listed as degree granting or non-degree granting based on how they were classified at the time the graduation rate data for the year were collected.

| Total Reporting Institutions | 17,427 | 8,455 | 48.5% | 0.1 | | |

Data source: National Center for Education Statistics, fall 2003 and fall 2013 IPEDS surveys.

^a All of the career schools are operated for profit except for three schools of radiologic technology, which are operated by not-for-profit hospitals or medical centers. All three schools of radiologic technology were non-degree-granting schools until 2007. Alegent Health School of Radiologic Technology and Mary Lanning Memorial Hospital School of Radiologic Technology became classified as degree-granting schools beginning fall 2007 and fall 2010, respectively. The for-profit Omaha School of Message Therapy was renamed Omaha School of Massage and Healthcare of Herzing University and became classified as a degree-granting school beginning fall 2009.

Technical Note A10.3

A graduation rate or a comparison of graduation rates is not applicable (NA) when a school had no first-time freshmen in a graduation cohort for one or both years compared.

All of the schools in the for-profit/career school categories are operated for profit except for the three schools of radiologic technology, which are operated by not-for-profit hospitals or medical centers.

Institutional changes and additions:

- Alegent Health School of Radiologic Technology became classified as a degree-granting school beginning fall 2007.
- Dana College was closed in August 2010 and did not report to IPEDS thereafter.
- Doane College-Lincoln first conferred degrees in 2005–2006.
- Fullen School of Hair Design conferred degrees and awards for the first time in 2003–2004.
- Hamilton College became Kaplan University as of October 30, 2007.
- Mary Lanning Memorial Hospital School of Radiologic Technology became classified as a degree-granting school beginning fall 2010.
- Myotherapy Institute conferred degrees and awards for the first time in 2003–2004.
- Omaha School of Massage Therapy was renamed Omaha School of Massage and Healthcare of Herzing University and became classified as a degree-granting school beginning fall 2009.
- Universal College of Healing Arts first conferred degrees in 2005–2006.
- University of Phoenix-Omaha Campus first conferred degrees in 2006–2007.

^aJosephs College of Beauty-Lincoln originally reported 104 students in the cohort, 103 of whom completed degrees (99.0% graduation rate). These numbers were reported in versions of this report prior to 2014 and are incorrect. Due to problems with the college's data system, which has been replaced, the correct rate is not known, but it probably is in the range of 55% to 60%. Since the correct numbers are unknown, Josephs' students are not included in these figures. These changes also affected the sector and state totals as shown in this version of the table.

Total Known Race/Ethnicity162567,96249.0%0.2Note. Institutions include the degree-granting and non-degree-granting for-profit/career schools. The
race/ethnic category 'two or more races' was first available in IPEDS for fall 2008 enrollment. However,
institutions were not required to use the new race/ethnic category until fall 2011 enrollments were
reported. Counts do not include foreign students and students of unknown race/ethnicity. As a result, the
graduation rate of 48.8% for 2002–2003 is higher than the statewide rate of 48.4%, which is based on the
total number of cohorts and completers, including foreign students and students of unknown
race/ethnicity. For 2012–2013, the graduation rate of 49.0% is higher than the statewide rates of 48.5%,
which is based on the total number of cohorts and completers, including foreign students and students of
unknown race/ethnicity. Data source: National Center for Education Statistics, fall 2003 and fall 2013
IPEDS surveys.

the for-profit/career school sectors for 2002–2003 and 2012–2013 are calculated based on how the schools were classified as degree granting or non-degree granting as of fall 2013. The race/ethnic category 'two or more races' was first available in IPEDS for fall 2008 enrollment. However, institutions were not required to use the new race/ethnic category until fall 2011 enrollments were reported. Data source: National Center for Education Statistics, fall 2003 and fall 2013 IPEDS surveys.

Appendix 11

IPEDS College Transfer Rates

Explanatory Note A11.1 Information on Computed College Transfer Rates Based on Data Obtained through the Integrated Postsecondary Education Data System (IPEDS)

Data collected through the Integrated Postsecondary Education Data System (IPEDS) are available from the National Center for Education Statistics to calculate transfer-out rates for reporting institutions. In this report, the terms transfer-out rate and transfer rate are used interchangeably.

A <u>transfer-out student</u> is a student who leaves the reporting institutions (before completing a degree) and enrolls at another institution. A transfer-out rate is the total number of students who are known to have transferred out of the reporting institution within 150% of the normal time to degree or other award completion divided by the number of students in the adjusted cohort.

The cohort for a transfer rate is the same cohort that is used to calculate the graduation or completion rate, namely the <u>full-time, first-time degree/certificate-seeking undergraduates</u> who enrolled at the institution during the fall semester (or quarter) or the preceding summer.¹

This cohort may be adjusted (reduced) only by removing (deleting) students who leave the institution for any of the following reasons: death or total and permanent disability; service in the armed forces; service with a foreign aid service of the federal government, such as the Peace Corps; or service on official church missions. Otherwise, students remain in a cohort group even if they become part-time students, transfer to other institutions, or drop out of the institution permanently or temporarily.

Data are collected on the number of students that transfer to other institutions if the mission of the institution, "...includes providing substantial preparation for students to enroll in another eligible institution..." (IPEDS Graduation Rates Full Instructions, 2014-15). As a result of the qualification that transfer be part of an institution's mission, some schools are not required to report the number of students in their freshmen cohorts who transfer to other institutions. Therefore, it is permissible for some schools to not report transfers, even though it would be desirable for them to report this information.

¹A full-year cohort, rather than a fall cohort, is used by schools offering primarily occupational or vocational programs and operating on a continuous basis. In Nebraska, several for-profit career schools operate on a continuous basis, qualifying them to use a full-year cohort. For all other institutions in Nebraska, a fall cohort is used in calculating graduation and transfer rates.

institution. The historical data coverage rate for Nebraska's four-year public institutions was 100.0%, Nebraska's four-year private nonprofit institutions was 94.5%, and Nebraska's four-year public colleges was 99.8%. First-time enrollment status was established by confirming that a student (1) did not show any postsecondary enrollment record in the four years prior to summer 2007, and (2) did not receive a degree or certificate from any postsecondary institution prior to fall 2007, according to Clearinghouse data. An exception was made for former dual enrollment student who had taken college courses while still in high school. Unlike the previous study for the fall 2006 cohort, former dual enrollment students were included in the study. Therefore, results shown in Table A12.1.b should not be directly compared to results shown in this table. Fall 2007 enrollment during any term beginning August 15, or the Monday before August 15, through October 31, inclusive. If no term started between these dates, the Clearinghouse used the term that started between July 14th - August 14th. Data Source: National Student Clearinghouse Research Center, Completing College: A State-Level View of Student Attainment Rates (Signature Report No. 6a), published March 19, 2014 as a supplement to Completing College: A National View of Student Attainment Rates, available at http://nscresearchcenter.org/signaturereport6-statesupplement/.

Note. No conclusion can be drawn about a given estimate when the margin of error exceeds the estimate itself at the stated confidence level. Data users should exercise caution when the margin of error is large relative to the estimate itself. Data source: U.S. Census Bureau, American Community Survey one-year Public Use Microdata Sample (PUMS) files (2005–2013), obtained from the National Center for Higher Education Management Systems (NCHEMS).

^a The 2009 PUMS data understated the number of minorities, especially Hispanics, due to the ACS's previous weighting methodology. Therefore, data users are advised against using estimates from the 2009 American Community Survey.

Table A13.3 Estimated Nebraska In-Migration and Out-Migration of 22- to 64-Year-Olds Confidence Intervals (Margin of Error at 90% Confidence Level) for One Year Estimates Based on the 2005–2013 American Community Survey Level of Education 2005 2006 2007 2008 2009 [1902, 4480] * * Less than HS Diploma [221, 5373] [3449, 8971] * * High School Graduate * * [635, 6311] Some College * * * [715, 7079] but No Degree Associate's Degree * * [74, 4760] * * * * * * Bachelor's Degree * Graduate or * * * * [-3207, -385] **Professional Degree** * * * Total [2077, 14935] [4719, 17891] Level of Education 2010 2011 2012 2013 Less than HS Diploma [514, 4370] [131, 3527] [-5747, -1909] * * **High School Graduate** *

| Some College | * | * | * | * |
|------------------------------------|---------------|---|---|---------------|
| but No Degree | | | | |
| Associate's Degree | * | * | * | * |
| Bachelor's Degree | [1042, 6260] | * | * | [-7085, -349] |
| Graduate or Professional Degree | * | * | * | * |
| Total | [2018, 16232] | * | * | * |

Note. Confidence intervals are shown based on 90% margin of error. * = Margin of error exceeds estimate at the 90% confidence level. When the margin of error exceeds the absolute value of the point estimate, no conclusions should be drawn about the estimate. In fact, for the 2013 ACS, every level of education, except for bachelor's, has a margin of error larger than the estimate itself. The estimated net migration of -3,717 for those with a bachelor's degree has a 90% margin of error of +/- 3,368. In other words, if one were to draw indefinite samples of the population, the point estimate for those with a bachelor's degree would fall between -7,085 and -349 90% of the time. Data source: U.S. Census Bureau, 2005 through 2013 American Community Survey One-Year Public Use Microdata Sample (PUMS) Files.
