

Nebraska Postsecondary Graduation Rates

August 2020

Six-Year Outcomes by Sector for Degree-Seeking, First-Time Freshmen Fall 2013 Cohort

Note. Graphs on this page show the percentage of the cohort who received diplomas or certificates from **any institution** in the United States (“completed”), or were still enrolled at any institution in the United States (“still enrolled”), by the end of the defined six-year period. FT = full time, PT = part time, Mixed = enrolled at least one term full time and at least one term part time over the course of the enrollment. Enrollments during summer terms and shorter terms lasting less than 21 days were excluded from consideration. WNCC	37.5%	37.5%	17.8%	0.0%	N/A	26.9%	25.9%	16.5%

Note. Tables on this page show data for the bachelor's degree seeking cohort for four-year institutions and the degree/certificate seeking cohort for two-year institutions. Rates represent the percentage of the cohort who received an award from **the same institution** where they started as full-time, first-time freshmen. Institutions are not required to report transfer data unless their mission includes providing substantial preparation for students to enroll in another eligible institution without having completed a program. If half or more of a Nebraska institution's peers did not report transfer data, the peer median is not reported. Source: Integrated Postsecondary Education Data System.
