Introduction - Enrollment

Fall Enrollment Data for 2005 through 2015 and 12-Month Enrollment Data for 2005-06 through 2015-16¹

Total Fall Enrollment

See page 1.2

- Total fall enrollment at Nebraska's public and independent institutions and for-profit/career schools increased from 122,640 in fall 2005 to 136,925 in fall 2015, an increase of 11.6% over the 10-year period.

Fall Enrollment by Sector

See pages 1.3-1.8

- Between fall 2005 and fall 2015, fall enrollments increased within the University of Nebraska, the Nebraska State College System, and the independent sector.

Percentage Change by Sector		
Sector	14-15 1-Yr	05-15 10-Yr
Univ. of Neb. (■)	1.2%	14.0%
NSCS (●)	-0.8%	15.2%
Neb. CCs (▲)	-1.0%	-1.9%
Independents (◆)	1.7%	31.9%
For-Profit/Career (x)	-16.3%	-24.0%
Total	0.2%	11.6%

¹ As of press time, national IPEDS data for fall 2015 enrollments and 2015-16 12-month enrollments were not available. Therefore, national comparison statistics are not included in the executive summary of the 2016 *Factual Look – Enrollment*.

- Overall, fall enrollments within the public sectors of higher education in Nebraska increased 7.3% between 2005 and 2015 while fall enrollments within the independent and for-profit/career school sectors increased a combined 25.3%.
- As a result of the increase in fall enrollments within the independent sector and the decrease within the community college sector, the other three sectors of higher education in Nebraska comprised about the same percentages of total fall enrollment in 2015 as in 2005.

% of Total Fall Enrollment by Sector		
Sector	2005	2015
University of Nebraska	37.1%	37.9%
Nebraska State College System	6.3%	6.5%
Nebraska Community Colleges	32.5%	28.6%
Independent Colleges and Universities	21.3%	25.1%
For-Profit/Career Schools	2.8%	1.9%

Fall Enrollment by Student Level and by Full-Time/Part-Time Classification

See pages 2.4-2.11

- Between fall 2005 and fall 2015, statewide undergraduate enrollments increased 5.9% to 111,147 while graduate enrollments increased 46.0% to 25,778.
- As a result of the recent increases in graduate enrollments in Nebraska, graduate students accounted for 18.8% of total fall enrollment in 2015, compared to 14.4% in fall 2005.
- During this 10-year period, part-time undergraduate enrollments increased 7.4% (from 33,235 to 35,678) and full-time undergraduate enrollments increased 5.2% (from 71,750 to 75,469). Meanwhile, part-time graduate enrollments increased 42.2% (from 8,227 to 11,696) and full-time graduate enrollments increased 49.4% (from 9,428 to 14,082).²

² The changes in the number of part-time and full-time enrollments can be attributed partially to changes made to Bellevue University's definition of a full-time student. Under the guidance of IPEDS, some students who were formerly classified as part-time are classified as full-time beginning with fall 2013 enrollment data. (See pages 2.11 and 2.17-2.18 of the *2013-2014 Factual Look at Higher Education in Nebraska – Enrollment* for more information.)

Fall Enrollment by Gender

See pages 3.2-3.11

- Enrollment of women at Nebraska's postsecondary institutions increased 11.9%, from 68,155 in fall 2005 to 76,286 in fall 2015. During this same time, enrollment of men increased 11.3%, from 54,485 to 60,639. Because of these similar 10-year growth rates, men accounted for about the same percentage of fall enrollment in 2015 as in 2005.
- Within each sector of higher education in Nebraska, 10-year growth rates for males and females were similar, with the exception of the for-profit/career school sector. Within that sector, male enrollments decreased 37.6% while female enrollments decreased 18.6%.
- At both the undergraduate and the graduate levels, women outnumbered men throughout the 10-year period between fall 2005 and fall 2015. Among undergraduate students, 54.7% were women in fall 2015, compared to 55.0% in fall 2005. Among graduate students, 60.0% were women in fall 2015, compared to 58.9% in fall 2005.
- The smallest gender gap among undergraduates in fall 2015 was at the University of Nebraska, where 51.1% of the students were women. The largest gender gap among undergraduates in fall 2015 was at Nebraska's for-profit/career schools, where 76.7% of the students were women.
- Similarly, the smallest gender gap among graduate students in fall 2015 was at the University of Nebraska, where 56.8% of the students were women. The largest gender gap among graduate students in fall 2015 was at Nebraska's for-profit/career schools, where 73.3% of the students were women.
- Throughout the 10-year period, men were more likely than women to be enrolled full time. In fall 2015, 69.7% of the undergraduate male students at Nebraska's postsecondary institutions were enrolled full time, compared to 69.8% in fall 2005. In comparison, 66.4% of the undergraduate female students at Nebraska's postsecondary institutions were enrolled full time in fall 2015, compared to 67.1% in fall 2005. At the graduate level, 58.4% of the male students were enrolled full time in fall 2015 (compared to 60.1% in fall 2005) while 52.1% of female students were enrolled full time in fall 2015 (compared to 48.7% in fall 2005).

Fall Enrollment by Race/Ethnicity

See pages 4.2-4.26

- Between fall 2005 and fall 2015, total enrollment of white non-Hispanics at Nebraska's postsecondary institutions decreased 4.3%, from 102,086 to 97,676. In comparison, enrollments of minority students – consisting of Asians/Pacific Islanders, black non-Hispanics, Hispanics, Native Americans, and students of two or more races – increased 111.4%, from 12,898 to 27,262. Meanwhile, enrollments of nonresident aliens increased 65.9% (from 3,331 to 5,526).
- Minorities accounted for 20.9% of total postsecondary enrollment in fall 2015, up from 10.9% in fall 2005. Nonresident aliens made up 4.2% of fall enrollment in 2015, up from 2.8% in fall 2005. White non-Hispanics accounted for 74.9% of 2015 fall enrollment, down from 86.3% in fall 2005.³
- As shown in the following table, growth rates varied by race/ethnicity and by student level over the 10-year period.

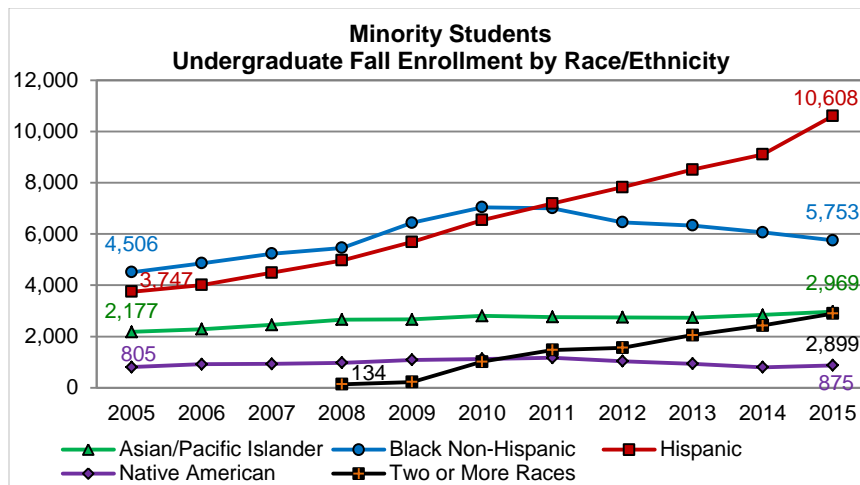

Nebraska - Change in Fall Enrollment by Level and Race/Ethnicity: Fall 2005 – Fall 2015

Race/Ethnicity	Undergraduate		Graduate	
	Percentage Change	Change in Number of Students	Percentage Change	Change in Number of Students
Asian/Pacific Islander	36.4%	792	45.9%	276
Black non-Hispanic	27.7%	1,247	104.3%	626
Hispanic	183.1%	6,861	298.7%	1,117
Native American	8.7%	70	13.6%	12
Nonresident Alien	78.6%	1,454	50.1%	741
Two or More Races	N/A	2,899	N/A	464
White non-Hispanic	-9.8%	-8,628	30.9%	4,218

Note. 'Two or more races' was an optional reporting category for enrollments reported for fall 2008 and fall 2009. Adoption of the category was mandatory beginning with data reported for fall 2010. See page 4.3 for race/ethnicity definitions.

- The following charts summarize minority enrollments at the undergraduate and graduate levels.

³ Excludes students of unknown race/ethnicity. See page 4.4 for details.

- Between fall 2014 and fall 2015, Hispanic enrollments increased 16.5% at the undergraduate level and 54.5% at the graduate level. However, the majority of this change was due to a change in the way Bellevue University identified Hispanic students.⁴

⁴ Bellevue University identified a gap historically with students who should have been coded as Hispanic. The coding of Hispanic students by Bellevue now reflects more accurate counts of these students. With the change in coding, undergraduate fall enrollment of Hispanic students at Bellevue University increased 165.4% over the last year (from 471 to 1,250) while graduate fall enrollment of Hispanic students at Bellevue University increased 225.9% (from 205 to 668). Excluding Bellevue University, undergraduate fall enrollment of Hispanic students increased 8.4% over the last year while graduate fall enrollment of Hispanic students increased 8.3%.

Fall Enrollment by Race/Ethnicity and Gender

See pages 5.2-5.8

- The following table summarizes fall 2015 enrollment by race/ethnicity and gender.

Race/Ethnicity	Male	Female
Asian/Pacific Islander	44.7%	55.3%
Black non-Hispanic	47.0%	53.0%
Hispanic	43.0%	57.0%
Native American	37.8%	62.2%
Nonresident Alien	59.6%	40.4%
Two or More Races	43.6%	56.4%
White non-Hispanic	43.3%	56.7%

- Unlike the other student categories, male nonresident alien students outnumber female nonresident alien students in Nebraska. In fall 2015, men accounted for 59.6% of total fall enrollment of nonresident aliens at Nebraska postsecondary institutions, while women accounted for 40.4%.

Fall Enrollment by Age (Age data are collected only in odd-numbered years.)

See pages 6.2-6.14

- In fall 2015, students age 24 or younger made up 64.6% of all students enrolled at Nebraska's postsecondary institutions. Students age 25 to 29 made up 13.4% and students 30 or older accounted for 22.0% of the student body. In comparison, in fall 2005, 65.9% of students were age 24 or younger, 12.6% were 25 to 29 years, and 21.5% were 30 years or older.
- At the undergraduate level, the University of Nebraska enrolled the highest percentage of undergraduates age 24 or younger (87.9%) in fall 2015, while the for-profit/career schools enrolled the lowest percentage of undergraduates age 24 or younger (40.2%).
- At the graduate level, the for-profit/career school sector enrolled the highest percentage of graduates age 30 or older (75.2%) in fall 2015. Meanwhile, the University of Nebraska enrolled the lowest percentage of graduates age 30 or older (40.0%).

Fall Enrollment by Distance Education Status

See pages 7.2-7.14

- Section 7 of this report examines the number of students who are enrolled in distance education courses. Institutions report the number of students enrolled exclusively in distance education courses as well as the number of students enrolled in some but not all distance education courses. From this data, IPEDS calculates the number of students not enrolled in any distance education courses. For students enrolled exclusively in distance education courses, institutions report additional data on the location of these students. Note that since distance education data has only been collected since fall 2012, 10-year trends are not available.
- As shown in the following chart, more students enrolled in distance education in fall 2015 than in fall 2012.

Nebraska - % of Fall Enrollment by Distance Education Status						
Distance Education Status	Undergraduate		Graduate		Total	
	2012	2015	2012	2015	2012	2015
No Distance Education	69.3%	62.7%	57.9%	47.0%	67.3%	59.8%
Some Distance Education	17.1%	23.1%	8.8%	10.9%	15.7%	20.8%
Exclusively Distance Education	13.6%	14.2%	33.4%	42.1%	17.0%	19.4%

- For undergraduate students enrolled exclusively in distance education courses in fall 2015, 71.5% were located in the same state/jurisdiction. At the graduate level, 46.9% were located in the same state/jurisdiction.
- Using undergraduate enrollments from fall 2015 by sector (page 2.5) and fall 2015 location data by sector (page 7.8), the Commission estimates that 4.0% of undergraduate fall enrollments were for exclusively distance enrollments in another state/jurisdiction.
- Using graduate enrollments from fall 2015 by sector (page 2.5) and fall 2015 location data by sector (page 7.13), the Commission estimates that 22.2% of graduate fall enrollments were for exclusively distance enrollments in another state/jurisdiction.

Fall Enrollment by First-Time Freshmen

See pages 8.2-8.5

- The 10-year trends in the enrollment of first-time freshmen (FTF) vary significantly by sector.
 - The largest increases in the number of first-time freshmen occurred at the University of Nebraska (18.4%) and the Nebraska State College System (15.6%).
 - In comparison, the for-profit/career school sector reported a substantial decrease in the enrollment of first-time freshmen between fall 2005 and fall 2015 (-79.1%).

Percentage Change by Sector		
Sector	14-15 1-Yr	05-15 10-Yr
Univ. of Neb. (■)	1.5%	18.4%
NSCS (●)	-7.8%	15.6%
Neb. CCs (▲)	-5.6%	-3.3%
Independents (◆)	4.4%	2.0%
For-Profit/Career (x)	-25.5%	-79.1%
Total First-Time Freshmen	-1.5%	0.4%

- Nebraska's three public sectors of higher education increased 8.9% overall for FTF (10.1% increase for full-time and 1.1% increase for part-time) while the independent and for-profit/career school sectors *decreased* 22.8% overall (19.9% decrease for full-time and 77.2% decrease for part-time).

Fall Enrollment Compared to 12-Month Enrollment

See pages 9.3-9.16

- Fall enrollment provides a “snapshot” of the total number of students who were enrolled at an institution on October 15 or the institution’s official fall reporting date. In comparison, 12-month enrollment is the total, unduplicated headcount of students who were enrolled at an institution at any time during the academic year.
- Between 2005 and 2014, fall enrollment increased 11.5% at Nebraska’s postsecondary institutions while 12-month enrollment increased less than 0.1%.
- In general, fall enrollment and 12-month enrollment follow similar trends for most sectors/institutions in Nebraska, indicating that either fall enrollment or 12-month enrollment is a valid measure of enrollments for trend analyses. While the levels of enrollment vary by institution and by sector, trends in fall and 12-month enrollment generally have been parallel. As shown below, since 2005, fall enrollment figures have captured 85.4% to 87.2% of the 12-month enrollment reported by the University of Nebraska. On the other hand, fall enrollment captured 47.9% to 56.8% of 12-month enrollment at Nebraska’s community colleges.

Introduction - Enrollment

Fall Enrollment Data for 2005 through 2015 and 12-Month Enrollment Data for 2005-06 through 2015-16

The *2016 Factual Look at Higher Education in Nebraska* summarizes information from the Integrated Postsecondary Education Data System (IPEDS) survey forms. The Higher Education Act of 1965, as amended, requires institutions that participate in federal student aid programs to submit data to IPEDS.¹

The Coordinating Commission for Postsecondary Education is responsible for verification and reporting of IPEDS data as defined in Neb. Rev. Stat. § 85-1424, which states:

“The commission shall:

- (1) Review and verify all information submitted by public postsecondary systems and institutions as part of the Integrated Postsecondary Education Data System and make such corrections in the submitted information as are necessary; and
- (2) Prepare and disseminate an annual report of the information submitted by each public postsecondary system and institution and those private postsecondary educational institutions willing to cooperate as part of the Integrated Postsecondary Education Data System.”

The annual report consists of three sections—Degrees and Other Awards, Enrollment, and Faculty and Salaries—and each section is approved and disseminated as it is completed. This section of the *Factual Look* summarizes enrollments reported through IPEDS surveys of Nebraska’s public and independent colleges and universities and for-profit/career schools.

The 10-year trends presented in this section of the *Factual Look* are based on the 2005-2006 through 2015-2016 IPEDS surveys of Nebraska’s public and independent colleges and universities and for-profit/career schools. In this section, 10-year trends in fall enrollments are analyzed by (1) sector and institution, (2) student level and full-time/part-time classification, (3) gender, (4) race/ethnicity, (5) race/ethnicity and gender, (6) age, (7) distance education status, and (8) first-time freshmen. In addition, fall enrollments are compared to 12-month enrollments in section nine of this report.

Throughout this report, enrollments are analyzed by five sectors of higher education in Nebraska. As defined in the Coordinating Commission’s *Comprehensive Statewide Plan for Postsecondary Education*, there are three public sectors of higher education in Nebraska:

¹ A few for-profit/career schools are not included in this analysis because: 1.) The institution is not required to report school statistics to IPEDS, or 2.) The institution reports school statistics to IPEDS, but it has campuses in multiple states and reports combined data for multiple campuses (known as “parent/child” reporting).

University of Nebraska: “The University of Nebraska provides extensive, comprehensive postsecondary education to Nebraska citizens through its four campuses: the University of Nebraska-Lincoln, the University of Nebraska at Omaha, the University of Nebraska at Kearney, and the University of Nebraska Medical Center. The two-year Nebraska College of Technical Agriculture, under the management of the Institute of Agriculture and Natural Resources at UNL, is also part of the University of Nebraska system.”

Nebraska State College System: “The state colleges at Chadron, Peru, and Wayne are regional institutions that provide educational programs and public services to meet needs indigenous to their service areas.”

Nebraska Community Colleges: “Community colleges provide educational options for students seeking entry-level career training. The education program may culminate in an applied technology associate degree, diploma, or certificate; or an associate of arts or associate of science degree from an academic transfer program.” Nebraska’s six public community colleges are: Central, Metropolitan, Mid-Plains, Northeast, Southeast, and Western Nebraska.

In addition to the public colleges and universities, private not-for-profit, private for-profit, and federally-funded tribal colleges submit data to IPEDS and are categorized into one of two categories:

Nebraska Independent Institutions: All institutions in this sector are not-for-profit colleges, which includes 18 private four-year institutions and two federally-funded tribal colleges.

Nebraska For-Profit/Career Schools: All institutions in this sector are private for-profit colleges, except for the three schools of radiologic technology.² Institutions in this sector offer programs in areas such as cosmetology, business, allied health, real estate, and skilled crafts.

Previous editions of the *Factual Look* and downloadable Excel workbooks with corresponding data are available on the Coordinating Commission’s website: ccpe.nebraska.gov/reports.

Technical Notes:

1. Due to data corrections and additions to the Commission’s database that have been made since the *2015 Factual Look* was published, the *2016 Factual Look* supersedes all previous editions.
2. Adjustments are occasionally made to improve data accuracy. Therefore, it is generally advisable to reference the most recent edition of this report.
3. Due to rounding, percentages may not sum to 100.0% for data summarized in this report.

² In March 2015, the Commission approved a change of ownership application for the Omaha School of Massage and Healthcare of Herzing University to change from for-profit to not-for-profit. However, Herzing’s application with the Department of Education for this change is pending; thus Herzing was classified as a for-profit institution in IPEDS (and in this report) for the reporting period.

Other Degree (●)	-41.2%	-56.0%
Other Non-Degree (■)	-6.0%	1.4%
Sector Total	-16.3%	-24.0%

- Approximately half of the decrease in fall enrollment over the last 10 years in this sector is attributable to the decrease of 416 students at Vatterott College (which closed in fall 2005) and Vatterott College-Spring Valley (which closed in fall 2015).

Note. These graphs detail data for: 1.) The five for-profit/career schools that enrolled the highest number students within the for-profit/career school sector in fall 2015, 2.) The combined data for the remaining degree-granting institutions in the for-profit/career school sector, and 3.) The combined data for the remaining non-degree-granting institutions in the for-profit/career school sector. All of the for-profit/career schools in Nebraska are operated for profit except for the three schools of radiologic technology. (While the Omaha School of Massage and Healthcare of Herzing University changed from for-profit to not-for-profit effective January, 2015, Herzing was classified as a for-profit institution in IPEDS for the reporting period.) Institutions are classified as degree-granting based on their classification for the fall 2015 survey. Sector totals may be different from those published in prior editions of the *Factual Look* due to schools changing from the non-degree- to the degree-granting category. † = degree-granting; ‡ = non-degree-granting.

Section 2

Total Fall Enrollment by Student Level and by Full-Time/Part-Time Classification

CLASSIFICATION OF STUDENT LEVEL AND FULL-TIME/PART-TIME STATUS

The analyses in this section focus on total fall enrollment by student level and full-time/part-time classification as defined below.

IPEDS Category Name	IPEDS Definition
Full-Time Student	Undergraduate: A student enrolled for 12 or more semester credits, or 12 or more quarter credits, or 24 or more contact hours a week each term. Graduate: A student enrolled for 9 or more semester credits, or 9 or more quarter credits, or a student involved in thesis or dissertation preparation that is considered full-time by the institution. Doctor's degree - Professional practice - as defined by the institution.
Graduate Student	A student who holds a bachelor's degree or above and is taking courses at the postbaccalaureate level. These students may or may not be enrolled in graduate programs.
Part-Time Student	Undergraduate: A student enrolled for either less than 12 semester or quarter credits, or less than 24 contact hours a week each term. Graduate: A student enrolled for less than 9 semester or quarter credits.
Undergraduate Student	A student enrolled in a 4- or 5-year bachelor's degree program, an associate's degree program, or a vocational or technical program below the baccalaureate.

Note. Beginning with the collection of 2007 fall enrollment data, IPEDS began the process of eliminating the first-professional degree category. Students are now classified into two categories: undergraduate and graduate. Students in programs previously classified as “first professional” are counted in the graduate student category for all years of data in this report. Institutions were given the option of using the “old” or “new” categories to report enrollments for fall 2007 and fall 2008. Adoption of the revised categories was mandatory beginning with enrollment data for fall 2009. Data source: Glossary, Integrated Postsecondary Education Data System (IPEDS), National Center for Education Statistics, U.S. Department of Education, June 30, 2016.

TOTAL FALL ENROLLMENT by STUDENT LEVEL

- Between fall 2005 and fall 2015, enrollment by student level changed as follows:

Student Level	14–15 1-Yr	05–15 10-Yr
Undergraduate (◆)	-0.5%	5.9%
Graduate (▲)	3.1%	46.0%
Total	0.2%	11.6%

- As a result of the increase in graduate student enrollment, undergraduate students accounted for 81.2% of fall enrollment in 2015, compared to 85.6% in 2005.
- As shown on the next page, graduate enrollments within the independent sector nearly doubled between fall 2005 and fall 2015, accounting for 69.8% of the overall 10-year increase in graduate student enrollment.

- Between fall 2005 and fall 2015, male graduate enrollment by full-time/part-time classification changed as follows:

Full-Time/Part-Time	14–15 1-Yr	05–15 10-Yr
Male Full-Time (■)	2.3%	37.9%
Male Part-Time (▲)	1.4%	47.9%
Male Graduate Total	1.9%	41.9%

- As shown on pages 3.10 and 3.11, 67.9% of the 10-year increase in fall enrollment for males attending full-time at the graduate level was due to the 65.9% increase in enrollments within the independent sector.
- Additionally, 55.8% of the 10-year increase in fall enrollment for males attending part-time at the graduate level was due to the 124.6% increase in enrollments within the independent sector.

GRADUATE FALL ENROLLMENT by GENDER by FULL-TIME/PART-TIME CLASSIFICATION

- Between fall 2005 and fall 2015, female graduate enrollment by full-time/part-time classification changed as follows:

Full-Time/Part-Time	14–15 1-Yr	05–15 10-Yr
Female Full-Time (■)	1.1%	59.2%
Female Part-Time (▲)	7.1%	39.0%
Female Graduate Total	3.8%	48.9%

- As shown on pages 3.10 and 3.11, 75.3% of the 10-year increase in fall enrollment for females attending full-time at the graduate level was due to the 102.7% increase in enrollments within the independent sector.
- Similarly, 72.5% of the 10-year increase in fall enrollment for females attending part-time at the graduate level was due to the 113.3% increase in enrollments within the independent sector.

Note. Beginning in 2013, under the guidance of IPEDS, some students previously classified as part-time students are now classified as full-time students by Bellevue University. (See page S2 of the Executive Summary for more information.)

Note. Nebraska's community colleges do not enroll students at the graduate level. Nebraska's for-profit/career schools did not enroll students at the graduate level until 2006. Beginning in 2013, under the guidance of IPEDS, some students previously classified as part-time students are now classified as full-time students by Bellevue University. Section 4

Total Fall Enrollment by Race/Ethnicity

CLASSIFICATION OF RACE/ETHNICITY

Beginning with the collection of 2008 fall enrollment data, IPEDS started the transition to the full adoption of new categories of race/ethnicity. Institutions were given the option of using the “old” or “new” categories to report fall enrollment by race/ethnicity for fall 2008 and fall 2009. Adoption of the revised categories was mandatory beginning with fall enrollment data reported for fall 2010.

“Race/ethnicity (new definition): Categories developed in 1997 by the Office of Management and Budget (OMB) that are used to describe groups to which individuals belong, identify with, or belong in the eyes of the community. The categories do not denote scientific definitions of anthropological origins. The designations are used to categorize U.S. citizens, resident aliens, and other eligible non-citizens.” (*Data source: IPEDS Glossary*)

Old IPEDS Race/Ethnicity Categories	New IPEDS Race/Ethnicity Categories
1) Non-Resident Alien 2) Race and Ethnicity Unknown 3) Black, Non-Hispanic 4) American Indian/Alaskan Native 5) Asian/Pacific Islander 6) Hispanic 7) White, Non-Hispanic	1) Nonresident Alien 2) Race and Ethnicity Unknown 3) Hispanics of any Race For Non-Hispanics Only: 4) American Indian or Alaska Native 5) Asian 6) Black or African American 7) Native Hawaiian or Other Pacific Islander 8) White 9) Two or More Races

The Commission has adapted its data analysis to the new IPEDS categories for race/ethnicity as defined in the following table.

Race/Ethnicity Category Name Used in this Report	IPEDS Category Name	IPEDS and/or Commission Definition
Asian/Pacific Islander	Asian	A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian Subcontinent, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.
	Native Hawaiian or Other Pacific Islander	A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.
Black Non-Hispanic	Black or African American	A person having origins in any of the black racial groups of Africa.
Hispanic	Hispanic/Latino	A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.
Known Race/Ethnicity	-	Includes persons categorized into any of the following IPEDS race/ethnicity categories: American Indian or Alaska Native, Asian, Black or African American, Hispanic/Latino, Native Hawaiian or Other Pacific Islander, Nonresident Alien, Two or More Races, White.
Minority	-	Includes persons categorized into any of the following IPEDS race/ethnicity categories: American Indian or Alaska Native, Asian, Black or African American, Hispanic/Latino, Native Hawaiian or Other Pacific Islander, Two or More Races.
Native American	American Indian or Alaska Native	A person having origins in any of the original peoples of North and South America (including Central America) who maintains cultural identification through tribal affiliation or community attachment.
Nonresident Alien ^a	Nonresident Alien	A person who is not a citizen or national of the United States and who is in this country on a visa or temporary basis and does not have the right to remain indefinitely. Note: Nonresident aliens are to be reported separately in the places provided, rather than in any of the racial/ethnic categories.
Two or More Races	Two or More Races	Category used by institutions to report persons who selected more than one race.
Unknown Race/Ethnicity	Race and Ethnicity Unknown	Category used to report students whose race and ethnicity are not known.
White Non-Hispanic	White	A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.
-	Resident Alien (and Other Eligible Non-Citizens)	A person who is not a citizen or national of the United States but who has been admitted as a legal immigrant for the purpose of obtaining permanent resident alien status (and who holds either an alien registration card (Form I-551 or I-151), a Temporary Resident Card (Form I-688), or an Arrival-Departure Record (Form I-94) with a notation that conveys legal immigrant status such as Section 207 Refugee, Section 208 Asylee, Conditional Entrant Parolee or Cuban-Haitian). Note: Resident aliens are to be reported in the appropriate racial/ethnic categories along with United States citizens.

Data source: Glossary, Integrated Postsecondary Education Data System (IPEDS), National Center for Education Statistics, U.S. Department of Education, June 30, 2016.

^aIPEDS does not collect data on the originating location of non-resident alien students.

TOTAL FALL ENROLLMENT by KNOWN AND UNKNOWN RACE/ETHNICITY

- Between fall 2005 and fall 2015, enrollment by known and unknown race/ethnicity changed as follows:

Race/Ethnicity	14–15 1-Yr	05–15 10-Yr
Known Race/Ethnicity (●)	-0.3%	10.3%
Unknown Race/Ethnicity (■)	9.6%	49.4%
Total	0.2%	11.6%

Note. The remaining analyses in this section focus on the enrollment of students of known race/ethnicity as defined on page 4.3.

Students of unknown race/ethnicity are *excluded* from the following calculations under the basic, but not necessarily correct, assumption that these students are proportionately distributed among the total number of students enrolled by race/ethnicity, by student level, full-time and part-time classification, by sector, and by gender.

FALL ENROLLMENT by RACE/ETHNICITY

- Between fall 2005 and fall 2015, enrollment by race/ethnicity changed as follows:

Race/Ethnicity	14–15 1-Yr	05–15 10-Yr
White Non-Hispanic (●)	-3.0%	-4.3%
Minority (■)	9.1%	111.4%
Nonresident Alien (▲)	7.9%	65.9%
Known Race/Ethnicity Total	-0.3%	10.3%

- Over the last decade, fall enrollment of minority students has more than doubled. (See the next page for details on each minority group.)

FALL ENROLLMENT by RACE/ETHNICITY

Note. 'Two or more races' was an optional reporting category for enrollments reported for fall 2008 and fall 2009. Adoption of the category was mandatory beginning with data reported for fall 2010.

- Between fall 2005 and fall 2015, enrollment by race/ethnicity changed as follows:

Race/Ethnicity	14–15 1-Yr	05–15 10-Yr
Asian/Pac. Islander (▲)	2.3%	38.4%
Black Non-Hispanic (●)	-5.4%	36.7%
Hispanic (■)	20.1%	193.6%
Native American (◆)	8.6%	9.2%
Two or More Races (■)	16.1%	N/A
Total Minority	9.1%	111.4%

- While fall enrollment increased for all minority groups since baseline, fall enrollment of Hispanic students has nearly tripled.
- Notably, over the last year, fall enrollment of Hispanic students increased 20.1%. However, the majority of this increase was due to a change in the way Bellevue University identified Hispanic students. (See page S5 of the Executive Summary for more information.)

- At Bellevue University, undergraduate fall enrollment of Hispanic students increased 165.4% over the last year (from 471 to 1,250 students). However, the majority of this change was due to a change in the way Bellevue identified Hispanic students. Excluding Bellevue University, fall enrollment of Hispanic students at the undergraduate level increased 8.4% over the last year. (See page S5 of the Executive Summary for more information.)

Beginning in 2013, under the guidance of IPEDS, some students previously classified as part-time students are now classified as full-time students by Bellevue University. (See page S2 of the Executive Summary for more information.)

UNDERGRADUATE FALL ENROLLMENT by RACE/ETHNICITY COMPARED TO NEBRASKA'S POPULATION OF 18-24 YEAR OLDS

- The following table compares undergraduate fall enrollment by race/ethnicity, excluding students of unknown race/ethnicity and nonresident aliens, so that the resulting percentages can be compared to Nebraska's population of 18-24 year olds.
- Based on this comparison, Asians/Pacific Islanders, black non-Hispanics, and students of two or more races were over-represented, and Hispanics, Native Americans, and white non-Hispanics were under-represented among undergraduates attending Nebraska postsecondary institutions in fall 2015.

Undergraduate Fall Enrollment by Race/Ethnicity Compared to Nebraska's Population of 18-24 Year Olds

^aIndividuals who identified as "some other race" were assigned to one of the six race/ethnicity categories by the Census Bureau. For more information, see <http://www.census.gov/popest/data/historical/files/MRSF-01-US1.pdf>. Data source: U.S. Census Bureau, Population Division, Annual Estimates of the Resident Population by Sex, Age, Race, and Hispanic Origin for the United States and States: April 1, 2010 to July 1, 2015 (released June 2016).

^bIncludes undergraduates from out of state. Due to the limitations of IPEDS data, out-of-state students, students that are under 18 years of age, and students that are over 24 years of age cannot be subtracted from the total. Consequently, the number of undergraduates who are residents of Nebraska cannot be compared directly to Nebraska's population of 18-24 year olds.

GRADUATE FALL ENROLLMENT by RACE/ETHNICITY

- Between fall 2005 and fall 2015, graduate enrollment by race/ethnicity changed as follows:

Race/Ethnicity	14–15 1-Yr	05–15 10-Yr
White Non-Hispanic (●)	-0.1%	30.9%
Minority (■)	10.7%	150.0%

GRADUATE FALL ENROLLMENT by RACE/ETHNICITY

Note. 'Two or more races' was an optional reporting category for enrollments reported for fall 2008 and fall 2009. Adoption of the category was mandatory beginning with data reported for fall 2010.

- Between fall 2005 and fall 2015, graduate enrollment by race/ethnicity changed as follows:

Race/Ethnicity	14–15 1-Yr	05–15 10-Yr
Asian/Pac. Islander (▲)	-4.2%	45.9%
Black Non-Hispanic (●)	-6.7%	104.3%

Native American (◆)	2.0%	13.6%
Two or More Races (■)	-0.2%	N/A
Graduate Minority Total	10.7%	150.0%

- At Bellevue University, graduate fall enrollment of Hispanic students increased 225.9% over the last year (from 205 to 668 students). However, the majority of this change was due to a change in the way Bellevue identified Hispanic students. Excluding Bellevue University, fall enrollment of Hispanic students at the graduate level increased 8.3% over the last year. (See page S5 of the Executive Summary for more information.)

Total Fall Enrollment by Distance Education Status

CLASSIFICATION OF DISTANCE EDUCATION STATUS

Beginning with the collection of 2012 fall enrollment data, IPEDS collects data on the number of students who are enrolled in distance education courses. Institutions report the number of students enrolled exclusively in distance education courses as well as the number of students enrolled in some but not all distance education courses. From this data, IPEDS calculates the number of students not enrolled in any distance education courses. For students enrolled exclusively in distance education courses, institutions report additional data on the location of these students.

“Distance education: Education that uses one or more technologies to deliver instruction to students who are separated from the instructor and to support regular and substantive interaction between the students and the instructor synchronously or asynchronously.

Technologies used for instruction may include the following: Internet; one-way and two-way transmissions through open broadcasts, closed circuit, cable, microwave, broadband lines, fiber optics, satellite or wireless communication devices; audio conferencing; and video cassette, DVDs, and CD-ROMs, if the cassette, DVDs, and CD-ROMs are used in a course in conjunction with the technologies listed above.”

“Distance education course: A course in which the instructional content is delivered exclusively via distance education. Requirements for coming to campus for orientation, testing, or academic support services do not exclude a course from being classified as distance education.” (*Data source: IPEDS Glossary*)

ESTIMATED PERCENTAGE OF UNDERGRADUATE FALL ENROLLMENTS THAT WERE EXCLUSIVELY DISTANCE ENROLLMENTS AND LOCATED IN A DIFFERENT STATE/JURISDICTION by SECTOR

- Overall, 14% of fall 2015 undergraduate enrollments were exclusively distance education courses. However, this percentage ranged from 4% at the University of Nebraska to 23% at Nebraska's independent institutions (see pages 7.5-7.6).
- For these undergraduate students enrolled exclusively in distance education courses, 71% were located in the same state/jurisdiction. Examining the data by sector shows this varied by sector, from 39% at the independent institutions to 92% at the community colleges (see page 7.8).
- Examining these two metrics together, (percentage exclusively distance education and percentage of exclusively distance education that are in the same state/jurisdiction), shows a more complete picture of the location of exclusively distance education undergraduates.
 - For example, while 18% of undergraduate enrollments at the community colleges were exclusively distance education in fall 2015, the overwhelming majority of those students (92%) were located in Nebraska.
- Perhaps more interesting is computing the percentage of undergraduate students who took courses exclusively online and were located in a different state/jurisdiction. Using undergraduate enrollments from fall 2015 by sector (see page 2.5) and fall 2015 location data by sector (see page 7.8), the Commission estimates that about 4% (4,453 / 111,147) of undergraduate fall enrollments were for exclusively distance enrollments in another state/jurisdiction. See the table below for the corresponding sector estimations.

ESTIMATED PERCENTAGE OF GRADUATE FALL ENROLLMENTS THAT WERE EXCLUSIVELY DISTANCE ENROLLMENTS AND LOCATED IN A DIFFERENT STATE/JURISDICTION by SECTOR

- Overall, 42% of fall 2015 graduate enrollments were exclusively distance education courses. However, this percentage ranged from 28% at the University of Nebraska to 98% at Nebraska's for-profit/career schools (see page 7.11).
- For these graduate students enrolled exclusively in distance education courses, 47% were located in the same state/jurisdiction. Examining the data by sector shows this varied by sector, from 37% at the independent institutions to 83% at the for-profit/career schools (see page 7.13).
- Examining these two metrics together, (percentage exclusively distance education and percentage of exclusively distance education that are in the same state/jurisdiction), shows a more complete picture of the location of exclusively distance education graduates.
 - For example, while 98% of graduate enrollments at the for-profit/career schools were exclusively distance education in fall 2015, 83% of those students were located in Nebraska.
- Perhaps more interesting is computing the percentage of graduate students who took courses exclusively online and were located in a different state/jurisdiction. Using graduate enrollments from fall 2015 by sector (see page 2.5) and fall 2015 location data by sector (see page 7.13), the Commission estimates that about 22% (5,720 / 25,778) of graduate fall enrollments were for exclusively distance enrollments in another state/jurisdiction. See the table below for the corresponding sector estimations.

^bOver 45% of these enrollments were at Bellevue University. Overall, 47.8% of Bellevue's fall 2015 graduate enrollments were exclusively distance enrollments that were located in a different state/jurisdiction (1,715 / 3,587). Additionally, over 30% of these enrollments were at Creighton University. Overall, 26.1% of Creighton's fall 2015 graduate enrollments were exclusively distance enrollments that were located in a different state/jurisdiction (1,114 / 4,272).

Total Fall Enrollment of First-Time Freshmen

TOTAL FIRST-TIME FRESHMEN FALL ENROLLMENT by ENROLLMENT STATUS

“First-time student (undergraduate): A student who has no prior postsecondary experience (except as noted below) attending any institution for the first time at the undergraduate level. This includes students enrolled in academic or occupational programs. It also includes students enrolled in the fall term who attended college for the first time in the prior summer term, and students who entered with advanced standing (college credits earned before graduation from high school).” (*Data source: IPEDS Glossary*)

Section 9

Total Fall Enrollment Compared to 12-Month Enrollment

METHODS OF MEASURING ENROLLMENT

As outlined below, there are three methods to measure student enrollment in Nebraska postsecondary institutions as defined by IPEDS. This section of the *Factual Look* compares fall enrollment and 12-month enrollment for each sector of higher education in Nebraska. The full-time equivalent (FTE) of students is also included in this section.

NOTE: Fall enrollment and 12-month enrollment “include all students enrolled for credit (enrolled in instructional activity, courses or programs, that can be applied towards the requirements for a postsecondary degree, diploma, certificate, or other formal award), regardless of whether or not they are seeking a degree or certificate. This includes: students enrolled for credit in off-campus centers; high school students taking regular college courses for credit; students taking remedial courses if the student is degree-seeking for the purpose of student financial aid determination; students from overseas enrolled for credit (e.g., online students).” (*Data sources: IPEDS Fall Enrollment and IPEDS 12-Month Enrollment Survey Materials*)

Fall Enrollment: The fall enrollment data collected from each institution provide a “snapshot” of the number of students at the institution at a particular time. These enrollment data are the most frequently reported for a variety of purposes by the news media, state agencies, and the institutions themselves. In general, they are a good indicator of enrollment trends at most institutions.

“Students reported are those enrolled in courses creditable toward a degree or other formal award; students enrolled in courses that are part of a vocational or occupational program, including those enrolled in off-campus or extension centers; and high school students taking regular college courses for credit.” (*Data source: IPEDS Glossary*)

“Institutions operating on a traditional academic year calendar (semester, trimester, quarter, or 4-1-4) report Fall enrollment as of the institution's official fall reporting date or October 15. Institutions operating on a calendar that differs by program or that enrolls students on a continuous basis (referred to as program reporters) report Fall enrollment as students enrolled any time during the period August 1 and October 31.” (*Data source: IPEDS Fall Enrollment Survey Materials*)

12-Month Enrollment: Also referred to as “12-month unduplicated headcount,” 12-month enrollment is the total number of students who were enrolled at an institution at any time during the academic year. Each student is counted only once per academic year. For example, if a student was enrolled in the fall and spring semester at Wayne State College, that student would be counted only once for the entire academic year. Unlike fall enrollment, if a student was enrolled only in the spring semester and not in the fall semester, the student would be counted in 12-month enrollment. In this way, 12-month enrollment is designed to capture the total number of students an institution serves throughout the academic year.

“Data are collected for the entire 12-month academic year, while enrollment data collected in the Fall Enrollment component are fall data. Institutions report an unduplicated head count for the total number of students by gender, race/ethnicity, and level (undergraduate, graduate, first-professional) enrolled throughout the reporting period. Students included are those

enrolled in any courses leading to a degree or other formal award, as well as those enrolled in courses that are part of a terminal vocational or occupational program.” (*Data source: IPEDS Glossary*)

FTE (Full-Time Equivalent): FTE is not a measurement of actual enrollment, but rather a calculation of enrollment, based on the total credit or contact hours reported by the institution. IPEDS collects the data necessary to calculate FTE along with the 12-month enrollment data.

There has been debate over the years about how FTE enrollments should be calculated and how they should be used. For example, with the collection of 12-month enrollment data for 2007-08, IPEDS began the process of eliminating the first-professional degree category. This change affected the way 12-month FTE was calculated for students formerly classified as first-professionals.¹ For some institutions, this change dramatically increased their calculated FTE. Some institutions voiced concerns to IPEDS regarding the change, citing difficulty reporting credit activity for these students. Because of these concerns, IPEDS now collects FTE enrollment for doctor’s-professional practice students (rather than calculating their FTE based on credit hours).²

“Calculation of FTE students (using instructional activity): The number of FTE students is calculated based on the credit and/or contact hours reported by the institution on the IPEDS 12-month enrollment (E12) component and the institution's calendar system, as reported on the IC Header component. The following table indicates the level of instructional activity used to convert the credit and/or contact hours reported to an indicator of full-time equivalents (FTE students):

-Quarter calendar system	-Semester/trimester/4-1-4 plan/other calendar system
-Enrollment level (One FTE over 12-month period)	-Enrollment level (one FTE over 12-month period)
-Undergraduate 45 credit hours, 900 contact hours	-Undergraduate 30 credit hours, 900 contact hours
-Graduate 36 credit hours	-Graduate 24 credit hours

For institutions with continuous enrollment programs, FTE is determined by dividing the number of contact hours attempted by 900.³

The total 12-month FTE is generated by summing the estimated or reported undergraduate FTE and the estimated or reported graduate FTE and reported Doctor's Professional Practice FTE.” (*Data source: IPEDS Glossary*)

¹ Institutions were given the option of using the “old” or “new” categories to report enrollments for 2007-08 and 2008-09. Adoption of the revised categories was mandatory beginning with enrollment data for 2009-10.

² This change began with data collected for 2011-12.

³ “Continuous basis: A calendar system classification that is used by institutions that allow students to enroll/start classes at any time during the year. For example, a cosmetology school or a word processing school might allow students to enroll and begin studies at various times, with no requirement that classes begin on a certain date.” (*Data source: IPEDS Glossary*)

ENROLLMENT AT NEBRASKA COMMUNITY COLLEGES by METHOD

- From fall 2005 to fall 2014, enrollment decreased 0.9% at Nebraska's community colleges.
- Between 2005-06 and 2014-15, 12-month enrollment decreased 14.8% and FTE decreased 0.4%.

**Southeast Community College

**Western Nebraska Community College
Enrollment by Method**

Note. The uneven 12-month enrollment trend at Western Nebraska Community College has been due to the increased, fluctuating demand for industry training classes. The decline in 12-month enrollment between 2013-14 and 2014-15 occurred because the college underwent a major change in counting enrollments for short-term business training. Many of these courses are now classified as non-credit rather than credit.

ENROLLMENT AT NEBRASKA INDEPENDENT INSTITUTIONS by METHOD

- From fall 2005 to fall 2014, enrollment increased 29.8% at Nebraska's independent institutions.
- Between 2005-06 and 2014-15, 12-month enrollment increased 19.7% and FTE increased 34.5%.

ENROLLMENT AT NEBRASKA FOR-PROFIT/CAREER SCHOOLS by METHOD

- From fall 2005 to fall 2014, enrollment decreased 9.3% at Nebraska's for-profit/career schools.
- Between 2005-06 and 2014-15, 12-month enrollment decreased 22.3% while FTE decreased 26.8%.

Note. Many institutions within the for-profit/career school sector enroll students on a continuous basis, meaning students can start/enroll at any time during the school year. This is particularly true for cosmetology, trade, and health sciences schools. Students attending these institutions are often required to attend full time. As outlined on page 9.3, for institutions with continuous enrollment, FTE is calculated using the number of contact hours rather than credit hours. It is because of these differences that FTE is higher than fall enrollment within the for-profit/career school sector.

COMPARING FALL ENROLLMENT AND 12-MONTH ENROLLMENT

In general, the previous charts show that fall enrollment and 12-month enrollment follow similar trends for most sectors/institutions, indicating that either fall enrollment or 12-month enrollment is a valid measure of enrollments for trend analyses. While the levels of enrollment vary by institution and by sector, trends in fall and 12-month enrollment generally have been parallel.

While both methods of measuring enrollment are valid measures, this report focuses on fall enrollments for two main reasons. First, fall enrollment data is more detailed than 12-month enrollment data. Institutions report fall enrollments and 12-month enrollments by student level, race/ethnicity, and gender. Fall enrollments are also reported by full- and part-time classification, by age (every other year), by distance education status, and by first-time freshmen. Second, fall enrollment data is available sooner than 12-month enrollment data since institutions report fall enrollments in the spring and 12-month enrollments in the fall.

It should be noted that when fall enrollment is the reported measure, the amount of 12-month enrollment captured by fall enrollment varies by sector and institution. A technique for measuring the portion of enrollment captured by fall enrollment is discussed below.

Fall Enrollment Divided by 12-Month Enrollment

Dividing an institution's or sector's fall enrollment by its 12-month enrollment provides a direct comparison of the two measures that can be useful in several ways:

- When expressed as a percentage, this ratio gives an idea of the “accuracy” of fall enrollment as an indicant of the total instructional activity of a particular institution. It answers the question, “What percentage of the total activity at the school is captured in the fall enrollment figures?”
- Directly comparing the general trends of several institutions or sectors can be useful in identifying possible errors in the data.
- Changes in the ratio may reflect a general student enrollment trend. If a trend is going down, for example, it may indicate that students in that sector or institution are doing a good bit of “swirling” (dropping in and out and transferring between institutions). If the trend is increasing, it may indicate that more students are staying continuously enrolled at the same institution.

The chart on the following page depicts fall enrollment divided by 12-month enrollment for each sector of higher education in Nebraska.

Note. The relatively low ratios at Nebraska's community colleges could be an indication that more students "swirl" in and out of the community college since these institutions often serve an older, non-traditional student population. In addition, the community colleges also provide a considerable amount of industry training to students who are not captured by fall enrollment figures.
